Greetings from the General Chairs .................................................................xix
Greetings from the Technical Programming Committee Chairs .................................................................xxi
Organizing Committee ...........................................................................xxiii
Reviewers .............................................................................................xxix

Track I: Multimedia Computing and Intelligence

Optical Image and SAR Image Matching Based on Scattered Edge Feature .........................................................1
Hui Cheng

TBM: A High-Effective Monitoring Algorithm to the Quality of IPTV Transmission ...................................................5
Zhigang Sun, Ziwen Zhang, Dong Wang, and Hua Zhang

The Color Components' Exchanging on Different Color Spaces for Image Segmentation of Hematocyte .........................10
Hang Dai and Xi Li

Application Research of Voice Control in Reading Assistive Device for Visually Impaired Persons .........................14
Zeng Fanfeng

Trajectory Based Sign Language Video Retrieval Using Revised String Edit Distance ...................................................17
Shilin Zhang and Bo Zhang

A New Rate Adaptive Control Algorithm for JPEG2000 ..................................................................................23
Qi-hu Li, Yan-yan Zhang, Guo-qiang Ren, Qin-zhang Wu, and Wen-jun Han

Coordinated Multi-sensors Coverage Based on Parallelism Selection Genetic Algorithm ..............................................28
Bin Wu and HaiLin Feng

Iterative Algorithm of Fixed Points for Nonexpansive Mappings by Metric Projections ...........................................32
Yuanheng Wang and Zongsheng Sheng
Fast Texture Segmentation Based on Semi-local Region Descriptor and Active Contour Driven by the Bhattacharyya Distance .......................................................... 35

Shanqing Zhang, Weibin Xin, and Guixu Zhang

A Multiple Description Coding Approach for Overlay Multipath Video Streaming Based on QoE Evaluations .......................................................... 39

Majd Ghareeb and Cesar Viho

2PASCD: An Efficient 2-Pass Abrupt Scene Change Detection Algorithm .......................................................... 44

Aditya Vashistha, Rajarathnam Nallusamy, and Sanjoy Paul

A Style Transfer Algorithm of Caricature .......................................................... 49

Wenjuan Chen, Guoyu Sun, Haiyan Li, Qingjie Sun, and Minyong Shi

HiKC: A Dictionary Training Algorithm for Sparse Representation .......................................................... 54

Jian Xu and Zhiguo Chang

Blind Source Separation of Audios Based on Bayesian Method .......................................................... 58

Jiayu An, Hui Wang, Bing Zhu, Juanjuan Cai, and Qin Zhang

A New Efficient Method of Computing MDCT in MP3 Audio Coding .......................................................... 63

Guixing Wu and En-hui Yang

Application of Improved Snake Model in Segmentation of Korean Pine Cone Image .......................................................... 68

Su Jian-min and Wang Xiao-li

RD-Based Adaptive UEP for H.264 Video Transmission in Wireless Networks .......................................................... 72

Zenghua Zhao and Shubing Long

A Scalable Clustering Algorithm Based on Affinity Propagation and Normalized Cut .......................................................... 77

Lei Huang, Jiabin Wang, and Xing He

An Edge-Adaptive Interpolation Algorithm for Super-Resolution Reconstruction .......................................................... 81

Xiao-feng Wang and He-fei Ling

Event Element Identify of Internet Context .......................................................... 85

Fu Chen

Hierarchical Access Control for Scalable Video Coding .......................................................... 89

Gui Zhang and Chun Yuan

Track II: Information Networking and Communication

Simulation and Analysis of Optimized OLSR .......................................................... 97

Li Zhilyuan and Hu Jinhong

Modeling the Critical Transmitting Range for Connectivity in Wireless Sensor Networks .......................................................... 101

Yanhuai Qu, Jianan Fang, and Shuai Zhang

A Dynamic Multi-relay Cooperation Node Selection Algorithm .......................................................... 106

Qin Qin, Zeng Zhimin, Zhang Tiankui, and Zhang Congqing
Error-Bounded Data Compression Using Data, Temporal and Spatial Correlations in Wireless Sensor Networks ................................................................. 111
   Meng-Han Li, Chih-Chung Lin, Chi-Cheng Chuang, and Ray-I Chang
The Forwarding Indices of Enhanced Hypercube Networks .................................................. 116
   Changqing Liu and Hongmei Liu
Performance Evaluation of SigComp in MANETs ................................................................. 119
   Yanling Wu, Yuncheng Liu, and Ming Li
Fragment Maintenance in Distributed Storage Systems ....................................................... 123
   Xiaoyuan Yang and Shuaishuai Zhu
Research and Realization of IPv4 Virtual Service Based on the ForCES Framework ............... 127
   Hua Wang, Bin Zhuge, and Weiming Wang
USMI: An Ultra-Node Selection Mechanism with Incentive in P2P Network ......................... 131
   Huo Ying and Chen Zhigang
Equilibrium Network with Core-Periphery Architecture of Local Information Flow ................ 141
   Xinjie Zhao, Hongwei Gao, Wenwen Li, Nana Sun, Lina Sun, and Dandan Dong
Research and Implementation on QoS Routing Algorithm to Meet Multimedia Applications ...... 145
   Huqing Wang and Zhixin Sun
Packet Forwarding Based on Cooperative Game and Auction Theory in Wireless Ad Hoc Network ................................................................. 149
   Bo-qing Yang and Hao Sun
Modeling and Simulation of Link-16 System in Network Simulator 2 ................................... 154
   Zhao-xiong He and Xing Liu
Improving Data Transmission Reliability with Network Coding in Wireless Sensor Network ...... 159
   Jing Hao, Hailin Feng, and Guangxue Wu
Internet Traffic Identification Using Community Detecting Algorithm ................................ 164
   Jun Cai and Shun-Zheng Yu
HTTP Proxy Server Based on Real-Time Link ................................................................. 169
   Guang-fei Du, Zhi-hong Zhang, and Xiao-ying Wu
A Novel Fixed Contention Window Backoff Algorithm for IEEE 802.11 WLAN ..................... 174
   Chun Shi, Xiaohua Dai, Qi Zhou, and Jianyao Nie
Vector-Based Low-Delay Forwarding Protocol for Underwater Wireless Sensor Networks ...... 178
   Chang Su, Xiaoming Liu, and Fengju Shang
A Future Network Architecture for Resource Sharing and Service Diversity ....................... 182
   Rui Li, Jianya Chen, Yunjie Liu, and Tao Huang
Analyzing and Improving the Simulation Algorithm of IEEE 802.11DCF Error Frame Model in QualNet Simulator ........................................187
Lei Lei, Qing Zhu, Jinhua Zhou, and Weiling Cai

Management Innovation of Promoting the Development of Private Enterprise in Hebei Province is Technology Roadmap ........................................192
HongMei Zhang

How Can Peers Assist Each Other in Large-Scale P2P-VoD Systems ........................................198
Yubao Zhang, Hui Wang, Pei Li, Zhihong Jiang, and Chao Gao

Mobile Awareness Based Hybrid MAC Protocol for Tactical Data Link Networks ........................................203
Jiqiang Tang and Youguang Zhang

The Placement Scheme for Static Nodes in a Circular WSN Area Based on the Analysis of Density and Energy ........................................208
Jiechao Wang

The Empirical Analysis on the Information Technology Risk Control Evaluation System in the Commercial Bank Based on URSIT Frame ........................................213
Mingxing Li and Tongjian Zhang

**Track III: Service Science and Intelligence**

Analysis of Externality Based on Internet ........................................217
Lin Zhongyan

Design and Implement of the Electric and Electronic Virtual Experiment System ........................................221
Shoucheng Ding, Wenhui Li, Jianhai Li, and Wanqiang Lu

A Novel Model Supporting Customization Sharing in SaaS Applications ........................................225
Lanju Kong, Qingzhong Li, and Xuxu Zheng

Web-Service-Based Design for Rural Industry by the Local e-Government ........................................230
Hongyan Wang, Quanyin Zhu, Jianchun Shen, and Suqun Cao

Web Services Security Policy ........................................236
Yongsheng Zhang, Cuicui Sun, Yang Jing, and Wang Ying

A Modeling Approach on Self-Adaptive Composite Services ........................................240
Liang Ge and Bin Zhang

IMS Management & Monitoring with eTOM Framework and Composite Web Service ........................................245
B. Raouyane, M. Errais, M. Bellafikh, and Mohamed Ramdani

The Adaptive Method for Closely Communicating Community Detection Based on Ant Colony Clustering ........................................250
Yan Liu, Lian Liu, and Junyong Luo

Automatic Term Extraction in Cryptology Based on Extension of Central String ........................................255
Chen Shichao and Yu Bin

Optimizing Queries with Expensive Video Predicates Based on Estimation of Attribute Cardinality ........................................259
Lisheng Yu, Jianmei Zhang, and Shan Wang
Customer Adoption of Internet Banking: An Integration of TAM with Trust, Perceived Risk, and Quality .......................... Hong-Lei Song

The Worm Propagation Model with Pulse Quarantine Strategy ....................................................... Yu Yao, Hao Guo, Fu-xiang Gao, and Ge Yu

An Improved DTC Algorithm for Reducing Torque Ripples of PMSM Based on Cloud Model and SVM ...................... Li Ningzhou, Wei Xiaojuan, and Feng Xiaoyun

Research on Operational Strategies of B-to-C Websites Based on Experiential Marketing .................................. Tong Li and Liping Chen

Geospatial Information Security Web Service Based on Agent ............................................................... Jing Sun, Jin Liu, Zhengquan Xu, and Zhe Wu

Improved Authentication Scheme Using Facial Recognition Scheme Based on RFID Tag ........................................ Dae-Hee Seo, Jang-Mi Baek, Mi-Yeon Yoon, Jung-Wook Choi, Dong-Sub Cho, and Yunjeong Jo

A Dynamic Data Storage Architecture for SaaS ............................................................. Wu Shengqi, Zhang Shidong, and Kong Lanjiu

Empirical Research of Mobile Reading Consumers’ Behavior Intention ............................................... Ma Ling and Ding Lin

Improved SOM Algorithm-HDSOM Applied in Text Clustering ...................................................... Ai-xiang Sun

Research on Software Cascading Failures .................................................................................... Wenhui Lan, Kuanjiu Zhou, Jinjin Feng, and Zongzheng Chi

Factors Affecting Privacy Disclosure on Social Network Sites: An Integrated Model .............................. Xuefeng Li and Xi Chen

Web Service Based Enterprise Mobile Information System ................................................................ Jingjing Tao and Xi Chen

An Initial Review of Cloud Computing Services Research Development ........................................ Wei Zhao

Research on Vehicle Routing Problem of Cold Chain Logistics ......................................................... Wang Ying and Chen Xi

Track IV: Multimedia Information Security

Obligation Constraints in Access Control .................................................................................. Zongda Wu, Jianfeng Lu, and Chengiang Lu

Detecting Composite JPEG Images in Transform Domain .......................................................... Ergong Zheng, Xijian Ping, and Tao Zhang
Fully Secure Anonymous Identity-Based Encryption under Simple Assumptions
Yanli Ren, Shuozhong Wang, Xinpeng Zhang, and Zhenxing Qian

Research on Context and Trust-Based Grid Service Authorization Model
Houren Xiong and Bin Zhang

An Approach to Analyze Covert Channel Based on Finite State Machine
Xiong Liu, Jian-guo Hao, and Yi-qi Dai

Formal Analysis and Improvement of Two-Factor Authenticated Key Exchange Protocol
Ying Liu, Fushan Wei, and Chuangui Ma

Research and Analysis about Attack and Guard for QQ
Hongru Wei, Pei Xiaogiang, Li Yaoyao, and Huang Jinghe

Research on Detector Generating Algorithm Based on Artificial Immune
Zhen Liu, Su Xu, and Jun Li

Public Key Cryptosystems from the Multiplicative Learning with Errors
Gu Chunsheng

Vertex-Fault-Tolerant Cycles Embedding on Enhanced Hypercube
Liu Yingying, Liu Hongmei, and Zhang Yanjuan

A New Hierarchical Key AuthData Management Scheme for Trusted Platform
Weiping Peng, Yajian Zhou, Cong Wang, Yixian Yang, and Yuan Ping

Research on XML-Based Key Management Service for Identity-Based Cryptography
Tieming Chen, Jie Jiang, Bo Chen, and Wei Li

Data Exchange between Multilevel Security Management System Based Ice
Luo Yang and Zheng Chang-xing

A Secure Proxy Blind Signature Scheme Based on DLP
Binayak Kar, Pritam Prava Sahoo, and Ashok Kumar Das

Proactive Vulnerability Finding via Information Flow Tracking
Zhi Liu, Xiaosong Zhang, and Xiongda Li

Variable Length Character N-Gram Approach for Online Writeprint Identification
Jianwen Sun, Zongkai Yang, Pei Wang, and Sanya Liu

Research on Decision of Cyber Security Investment Based on Evolutionary Game Model
Rong Pan and Changxin Xu

Detecting Wormhole Attacks Using Probabilistic Routing and Redundancy Transmission
Guiyi Wei, Xueli Wang, and Yuxin Mao

Extensive Design for Attack's Recognition and Resistance of Survivable Network
Xu Hui, Zhu Yanqiong, and Zhou Jianmei

RBAC Permission Consistency Static Analysis Framework
Tao Wang, Wei-hua Li, and Zun Liu

</tbody>
</table>
Fourth-Order Finite Difference Approach for Numerical Solution of Burgers
Equation ............................................................................................................603
Mamatimin Umar, Nurammat Heii, and Kaysar Rahman

Special Session 1: Applications and Security in Cultural Heritage Environments
Segmentation and Tagging of Oracle Inscriptions Based on Lucene and Dictionary .................................................................................................608
Jin-yu Kai, Na Li, and Yong-ge Liu
Constructing Classification Model with MapReduce ........................................611
Xiangxiang Chen, Kaigui Wu, and Changze Wu
A Secure Data Management Model for Cultural Organizations ....................616
Vasiliki Liagkou and Paul Spirakis
ICT for Human Development in South Pacific .................................................621
Eduard Babulak

Special Session 2: Security, Privacy and Copyright in Multimedia Social Network
Combination Algorithm of Active and Passive Security Protection for Image Based on Arnold Transform .................................................................625
Li Jiang and Zhengquan Xu
Analysis on Wavelet Coefficient for Image Watermarking ..............................630
Lei Hu and Fang Wan
Text's Source Trustworthiness Detection Based on Cognitive Hash ..................635
Donghui Hu, Juan Zhang, Xuegang Hu, Lian Wang, Wenjie Miao, and Zhengfeng Hou
The Design of Combined Random Number Generator .....................................640
Xiaohui Guan and Yaguan Qian
Authentication Protocols to Support Fast Handoff for 802.11s Mesh Networks .........................................................................................644
Yang Wei-dong, Liu Ji-zhao, Wang Ke, and Sun Li-Ming

Special Session 3: Watermarking and Steganography in Multimedia
Image Self-Embedding with Large-Area Restoration Capability ........................649
Zhenxing Qian and Tong Qiao
Histogram-Based Perceptual Image Hashing in the DWT Domain ....................653
Shijun Xiang
Bhattacharyya Distance for Blind Image Steganalysis .......................................658
Ke Ke, Tao Zhao, and Ou Li
A New Encryption Method Using Turbo Code .................................................662
Qian Mao, Chuan Qin, and Decun Dong
A Novel Semi-fragile Authentication Watermarking Scheme of Color JPEG Image in Compressed Domain .........................................................666
Qunting Yang, Tiegang Gao, and Fan Li
Robust Software Watermarking Scheme Based on Obfuscated Interpretation ........................................671
  Ying Zeng, Fenlin Liu, Xiangyang Luo, and Chunfang Yang
Reversible Data Hiding of Subsampled Model for Edge-Information Prediction ........................................676
  Guorui Feng and Lingyan Fan
Steganalysis of Analysis-by-Synthesis Compressed Speech .................................................................681
  Qi Ding and Xijian Ping
A Further Study on a PVD-Based Steganography ..................................................................................686
  Liping Ji, Xiaolong Li, Bin Yang, and Zhihong Liu
Cryptographic Secrecy Analysis of Matrix Embedding .......................................................................691
  Jiufen Liu, Jiayong Chen, Weiming Zhang, and Tao Han

Special Session 4: Large-Scale Multimedia Search and Mining
Association Rule Mining with Establishment of Frequent Item Set Vectors ..........................................696
  Hai-yan Zhou and Qi Hui
A Relevance Feedback System for CBIR with Long-Term Learning .................................................700
  Lu Hui, Huang Xiang-Lin, Yang Li-Fang, and Liu Min
A Fast Biological Data Mining Algorithm Based on Embedded Frequent Subtree ..................................705
  Zhong-xue Yang
The CMVAI-File: An Efficient Approximation-Based High-Dimensional Index Structure ......................710
  Lihong Ye and Yuan Hua

Special Session 5: Mobile Internet and Service Innovation
Research on E-commerce Capability Evaluation Model Based on DEA .............................................714
  Yingjin Lu, Xianglan Jiang, and Jiao Lu
Analyzes IPTV Security Threats under the Triple Play .................................................................720
  Liu Tibin
Virtual Resource Organization and Virtual Network Embedding across Multiple Domains ................725
  Bo Lv, Zhenkai Wang, Tao Huang, Jianya Chen, and Yunjie Liu
Municipal Solid Waste Recycle Management Information Platform Based on Internet of Things Technology 729
  Chen Tao and Li Xiang
A General Review of Mobile E-Government in China ....................................................................733
  Chen Su and Ma Jing
Application Model of Mobile E-Government in Wuhan Urban Circle .............................................738
  Chen Su and Zhou Pei
The Impact of KIBS on Divisions of Manufacturing Corporations: The Cases of Japan .....................742
  She Shuo and Akio Nagahira
Comparative Study on E-Government from the Perspective of Local Government between China and the U.S. .................................................................746

Zeng Yuhang

**Special Session 6: Trusted Software in Information Networking**

A Comprehensive Monitor Model for Self-Healing Systems ..................................................751

_Dong Xikun, Wang Huiqiang, and Lv Hongwu_

An Approach of Inconsistency Verification of Use Case in XML and the Model of Verification Tool .................................................................757

_Ning Jin and Jing Yang_

Research of Agile Software Development Based on Formal Methods ........................................762

_Anfan Zuo, Jing Yang, and Xiaowen Chen_

Administrative Domain: Security Enhancement for Virtual TPM ...........................................767

_Xin Jin, Li-na Wang, Rong-wei Yu, Peng Kou, and Cheng-lin Shen_

The Impacts of Some Distrustable Factors on Software Quality .............................................772

_Jizhou Zhan, Xianzhong Zhou, and Jiabao Zhao_

**Special Session 7: Wireless Network Security**

On the Security of Some Self-Healing Key Distribution Schemes ...........................................777

_Huaqun Wang_

The Application of Trust Model in WLAN ..................................................................................781

_Guo-Zi Sun, Jie Wei, Dan-Wei Chen, and Wei-Ming Geng_

A Secure Clustering Scheme Protocol for MANET .....................................................................785

_Li Wang and Fei Gao_

Continuum-State Communication Network Reliability Model ..................................................790

_Yu Jiang, Aiqun Hu, and Yubo Song_

Mobile Office Security Technology for WLAN .........................................................................795

_Yu Jiang, Guoqin Li, and Aiqun Hu_

Study on Application of TNC Technology in Mobile Office ......................................................799

_Guoqin Li, Yu Jiang, and Aiqun Hu_

Implicit Security Authentication Scheme in Wireless Sensor Networks ...................................804

_Haiguang Chen, XinHua Chen, and Junyu Niu_

A Promising Pairwise Key Establishment Scheme for Wireless Sensor Networks ..................809

_Wenqi Yu_

A GSM/UMTS Selective Jamming System ................................................................................813

_Song Yubo, Zhou Kan, Yao Bingxin, and Chen Xi_

A Partial Zero-Forcing Precoding Method for Downlink Multi-user MIMO ..............................816

_Bingxin Yao and Yubo Song_
Workshop 1: Second International Workshop on Network Steganography - IWNS 2010

Encryption Scheme Based on Invertible Watermarking .................................................................820
    Jinwei Wang, Yufeng Shi, and Shiguo Lian
Steganography in MAC Layers of 802.15.4 Protocol for Securing Wireless Sensor Networks .................................................................824
    David Martins and Hervé Guyennet
Stream Control Transmission Protocol Steganography .................................................................829
    Wojciech Frączek, Wojciech Mazurczyk, and Krzysztof Szczypiorski
Hiding Data in OFDM Symbols of IEEE 802.11 Networks .............................................................835
    Krzysztof Szczypiorski and Wojciech Mazurczyk
A Steganography Method for AAC Audio Based on Escape Sequences ........................................841
    Yujie Wang, Li Guo, Yifang Wei, and Cuiping Wang
Retransmission Steganography Applied .................................................................846
    Wojciech Mazurczyk, Miłosz Smolarczyk, and Krzysztof Szczypiorski

Workshop 2: Service-Oriented Architecture and Services Computing - SOASC 2010

Identity-Based Authentication in Cloud Storage Sharing .............................................................851
    Lishan Kang and Xuejie Zhang
Amalgamation of Ontologies via a Statistical Approach .............................................................856
    Peng Liu, Gonghua Xu, Chuang Xu, Xiaoxuan Wang, and Xiaoying Wang
Similarity Matching Algorithm of Multiple Granularities Time-Series Data ..................................861
    Wenning Hao, Enlai Zhao, Hongjun Zhang, Gang Chen, and Shuining Zhao
Application of Bloom Filter in Grid Information Service ..........................................................866
    Xueming Li, Lijuan Peng, and Chunlin Zhang

Workshop 3: Secure Multimedia Communication and Services - SECMCS 2010

Multimedia Content Tracing Scheme Based on Tardos' Fingerprint Codes ..................................871
    Hongyuan Li, Guangjie Liu, Junwen Wang, Yuewei Dai, and Zhiquan Wang
Some Results on the Degenerate Criterion of Cryptographic Functions over Finite Fields ..............875
    Jihong Teng, Xiaoying Huang, and Weiming Zhang
Efficient Matrix Embedding Based on Random Linear Codes ....................................................879
    Jiayong Chen, Yuefei Zhu, Yong Shen, and Weiming Zhang
Image Encryption Algorithm Based on DNA Sequences for the Big Image ................................884
    Shihua Zhou, Qiang Zhang, and Xiaopeng Wei
Image Copy-Move Forgery Detection Based on SURF ...............................................................889
    Xu Bo, Wang Junwen, Liu Guangjie, and Dai Yuewei
A Covert Channel Detection Algorithm Based on TCP Markov Model .......................................893
    Jiangtao Zhai, Guangjie Liu, and Yuewei Dai
