2010 Sixth International Conference on Intelligent Information Hiding and Multimedia Signal Processing

(IIH-MSP 2010)

Darmstadt, Germany
15 – 17 October 2010

Editors:

Isao Echizen
Jeng-Shyang Pan
Dieter Fellner

Alexander Nouak
Arjan Kuijper
Lakhmi C. Jain

IEEE Catalog Number: CFP10IIH-PRT
Preface ........................................................................................................... xviii
Organizing Committee ................................................................................... xix
Reviewers ....................................................................................................... xxv

Intelligent Watermarking Techniques, Image Authentication and Visual Cryptography

Possible Disease-Link Genetic Pathways Constructed by Hierarchical Clustering and Conditional Probabilities of Ovarian Carcinoma Microarray
Data .............................................................................................................. 1

Hsiao-Han Ko, Kuo-Jin Tseng, Li-Min Wei, and Meng-Hsiun Tsai
An Efficient Source Authentication for Multicast Based on Merkle Hash Tree ................................................................. 5

Iuon-Chang Lin and Chia-Chang Sung
An Improved Digital Signature Scheme with Fault Tolerance in RSA ................................................................. 9

Iuon-Chang Lin and Hsing-Lei Wang
Chaos-Based Image Integrity Authentication Code ................................................................. 13

Tzung-Her Chen, Wei-Lun Huang, and Chih-Yang Lin
The Information Hiding Technology Based on the Similar Sample Blocks of Grayscale Image ........................................ 17

Tzu-Chuen Lu, Siang-Ru Liao, and Chun-Ming Chang
A Robust Public Watermarking Scheme Based on DWT ......................................................................................... 21

Chin-Chen Chang, Kuo-Nan Chen, and Ming-Huang Hsieh
Enhancement of Two-Factor User Authentication in Wireless Sensor Networks ........................................ 27

Hui-Feng Huang, Ya-Fen Chang, and Chun-Hung Liu
A Data Hiding Scheme on Word Documents Using Multiple-Base Notation
System ........................................................................................................... 31

Iuon-Chang Lin and Ping-Kun Hsu
A Reversible Data Hiding Scheme for Digital Images Using LAU-Side Match Prediction .......................................................... 34

Chin-Fang Lee and Huei-Ju Tsai

Steganography and Watermarking
Reversible Watermarking by Coefficient Adjustment Method ........................................ 39
Ching-Yu Yang, Chih-Hung Lin, and Wu-Chih Hu

A (2, 3) Threshold Secret Sharing Scheme Using Sudoku ........................................ 43
Yung-Chen Chou, Chih-Hung Lin, Pao-Ching Li, and Yu-Chiang Li

Reversible Authentication and Cross-Recovery of Images Using (t, n) Threshold and Modified-RCM Watermarking ............ 47
Yeh-Shun Chen and Ran-Zan Wang

Steganalysis Scheme Using the Difference Image of Calibrated Sub-sampling ................ 51
Jeong-Chun Joo, Tae-Woo Oh, Jung-Ho Choi, and Heung-Kyu Lee

Improved Watermark Estimation Scheme Based on Neighborhood Filter ................... 55
Tae-Woo Oh, Seung-Jin Ryu, Ji-Won Lee, Won-Young Yoo, and Heung-Kyu Lee

Multi-layer Secret Image Sharing ................................................................. 59
Wen-Pinn Fang

Graylevel Images Encrypting Based on the n-Graylevel Encoding Method and the Lowest Common Multiple Technique ............ 62
Kuang Tsan Lin

Data Hiding Based on Side Match Vector Quantization and Modulus Function ................ 66
Lee Shu-Teng Chen, Wen-Tern Chang, Suiang-Shyan Lee, and Ja-Chen Lin

High-Payload Image Hiding Scheme Using k-Way Block Matching ................................ 70
Shang-Kuan Chen and Ran-Zan Wang

High Embedding Reversible Data Hiding Scheme for JPEG ...................................... 74
Wen-Chung Kuo, Shao-Hung Kuo, and Lih-Chyau Wuu

Secure Hybrid Spread Spectrum System for Steganography in Auditive Media ............. 78
Marcus Nutzinger, Christian Fabian, and Marion Marschalek

Robust Watermarking of H.264-Encoded Video: Extension to SVC ............................. 82
Peter Meerwald and Andreas Uhl

A Robust Digital Image Watermarking Algorithm Based on CHIRPLET Transform ............ 86
Minghui Deng and Xiuli Zhou

An Information-Theoretic Model for Dispersed Ordered Dithered Halftone Image Watermarking by Hilbert Curve Decomposition 90
Brian K. Lien

Mobile Services and Implementation of Digital Watermarks in Audio Files .................. 94
Manabu Hirakawa and Junichi Ijima

A Watermarking Based Tamper Detection Solution for RFID Tags ............................. 98
Ali Nur Mohammad Noman, Kevin Curran, and Tom Lunney

A Novel Image Watermarking Technique Using Fuzzy-BP Network ............................ 102
Charu Agarwal and Anurag Mishra
Cross-Discipline Techniques in Signal Processing and Networking

Design of 3-D FIR Cone-Shaped Filters by a Nest of McClellan Transformations ................................................................. 147
    Jong-Jy Shyu, Soo-Chang Pei, and Yun-Da Huang
Reversible Data Hiding with Improved Histogram Alteration Method .......................................................... 151
    Hsiang-Cheh Huang, Yueh-Hong Chen, and I-Hung Wang
A RFID-Based Hybrid Building Fire Evacuation System on Mobile Phone ........................................ 155
    Liou Chu
A New Integrated Mobile Architecture for Heterogeneous Wireless Networks ........................................ 159
    Shih-Jung Wu
Preliminary Survey of Multiview Synthesis Technology ................................................................. 163
    Ellen Sharma Shijagurumayum and Feng-Cheng Chang
Efficient Multi-Layer Background Model on Complex Environment for Foreground Object Detection ................................................................. 292
Wen-kai Tsai, Ming-hwa Sheu, and Chung-chi Lin
A Pipelined Program Decompression Engine Generator Based on Partial Field-Partitioned (PFP) Compression Technique for Embedded Systems ................................................................. 296
Yuan-Long Jeang and Ko-Yen Hu
A Simple and Efficient Anti-collision Algorithm for RFID System ................................................................. 300
Chuen-Ching Wang, Te-Yuan Wang, Tien-Hao Lien, and Rong-Ming Su

New Biometric Modalities and Capture Devices
Unobtrusive User-Authentication on Mobile Phones Using Biometric Gait Recognition ................................................................. 306
Mohammad Omar Derawi, Claudia Nickel, Patrick Bours, and Christoph Busch
Improved Cycle Detection for Accelerometer Based Gait Authentication ................................................................. 312
Mohammad O. Derawi, Patrick Bours, and Kjetil Holien
Capturing Hand or Wrist Vein Images for Biometric Authentication Using Low-Cost Devices ................................................................. 318
J. Enrique Suarez Pascual, Jaime Uriarte-Antonio, Raul Sanchez-Reillo, and Michael G. Lorenz
Teeth Segmentation and Feature Extraction for Odontological Biometrics ................................................................. 323
Danish Mairaj, Stephen D. Wolthusen, and Christoph Busch
3D Face Recognition with Local Binary Patterns ................................................................. 329
Xuebing Zhou, Silvia Araujo Sanchez, and Arjan Kuijper
Usability Evaluation of Fingerprint Based Access Control Systems ................................................................. 333
B. Fernandez-Saavedra, R. Alonso-Moreno, A. Mendaza-Ormaza, and R. Sanchez-Reillo

Privacy and Security in Biometrics
Blackbox Security of Biometrics (Invited Paper) ................................................................. 337
Julien Bringer, Hervé Chabanne, and Koen Simoens
Spectral Minutiae Representations for Fingerprint Recognition ................................................................. 341
Haiyun Xu and Raymond N.J. Veldhuis
A Survey of the Security and Privacy Measures for Anonymus Biometric Authentication Systems ................................................................. 346
Illeana Buhan, Emile Kelkboom, and Koen Simoens
Privacy Preserving Identification: Order Statistics List Decoding Perspective ................................................................. 352
Farzad Farhadzadeh, Sviatoslav Voloshynovskiy, and Oleksiy Koval
Fusion in Fingerprint Authentication: Two Finger Scenarios ................................................................. 356
Davrondzhon Gafurov, Christoph Busch, Patrick Bours, and Bian Yang
Acceleration Axis Selection in Biometric Technique Based on Gesture Recognition ................................................................. 360
J. Guerra Casanova, C. Sánchez Ávila, A. de Santos Sierra, G. Bailador del Pozo, and V. Jara Vera
Two Stress Detection Schemes Based on Physiological Signals for Real-Time Applications

Alberto de Santos Sierra, Carmen Sánchez Ávila, Javier Guerra Casanova, Gonzalo Ballador del Pozo, and Vicente Jara Vera

Teaching of Emotional Expression Using Finger Braille

Yasuhiro Matsuda and Tsuneshi Isomura

Detecting Sustained Attention during Cognitive Work Using Heart Rate Variability

Cho-Yan Chen, Chi-Jen Wang, E-Liang Chen, Chi-Keng Wu, Yen Kuang Yang, Jeen-Shing Wang, and Pau-Choo Chung

Gabor-Based Kernel Independent Component Analysis for Face Recognition

Yanchuan Huang, Mingchu Li, Chuang Lin, and Linlin Tian

Bayesian Decision Based Method for Assets Recognition of Risk Assessment

Shenyu Liu, Xi He, and Daofu Gong

Bio-inspired Hybrid Face Recognition System for Small Sample Size and Large Dataset

Muhammad Imran Razzak, Muhammad Khurram Khan, and Khaled Alghathbar

Driving Conditions Recognition Using Heart Rate Variability Indexes

Jeen-Shin Wang, Pau-Choo Chung, Wei-Hsin Wang, and Che-Wei Lin

Facial Features Approximation for Expression Detection in Human-Robot Interface

Mohammad Ibrahim Khan and Md. Al-Amin Bhuiyan

Multimedia Contents Analysis and Applications

Research on Multimedia Intelligence Course and Intelligence Classroom Based on Multiple Intelligence Theory

Qingsheng Li, Aimin Wang, Jinyu Kai, and Jipeng Wang

Design and Implementation of Personalized and Visual Web Page Editor

Qingsheng Li, Jipeng Wang, and Xiaona Jiang

Genetic Algorithm Based Bayesian Network for Customers' Behavior Analysis

Xiao Yi Yu and Aiming Wang

Revisit LSB Matching

Xiao Yi Yu and Aiming Wang

Internet Multimedia Technology and Applications

An Object-Based Web System for Building a Virtual Community

A Snapshot-Based Evaluation Method for Garbage Collection

Chin-Yang Lin, Ting-Wei Hou, and Fuh-Gwo Chen

Enhancing UPnP Quality of Service by Intelligent Access Point

Chia-Feng Kang, Kai-Hua Kuo, Ya-Chun Li, Tin-Yu Wu, Wei-Tsong Lee, and Jim-Min Lin
Image/Video Watermarking and Forensics

An Image Structure Information Based Robust Hash for Tamper Detection and Localization ................................................................. 430
Zhaoqing Liu, Qiong Li, Hui Zhang, and Xiyuan Peng
Tamper Detection for Shifted Double JPEG Compression ................................................................. 434
Xian-zhe Meng, Shao-zhang Niu, and Jian-chen Zou
A Novel Robust Watermarking Method for Certificates Based on DFT and Hough Transforms ................................................................. 438
Jiancheng Zou, Xin Yang, and Shaozhang Niu
Spread Spectrum-Based Image Watermarking Resistant to Rotation and Scaling Using Radon Transform ................................................................. 442
Huawei Tian, Yao Zhao, Rongrong Ni, and Jeng-Shyang Pan
A High Payload Histogram-Based Reversible Watermarking Using Linear Prediction ................................................................. 446
Bo Ou, Yao Zhao, Rongrong Ni, and Gang Cao
An Error Driven 3D Face Modeling Scheme Based on Partial Differential Equations ................................................................. 450
Chuanjun Wang, Zhenfeng Shi, and Xiamu Niu
Image Retrieval Based on RST Invariant Features Extracted from Scale Invariant Keypoints ................................................................. 454
Zhe-Ming Lu, Wei-Min Zheng, and Jing Wang

Digital Forensics and Security

ASM-SPV: A Model Checker for Security Protocols ................................................................. 458
Jianhua Peng, Feng Liu, Zhenju Zhao, Danqing Huang, and Rui Xue
Camera Model Identification for JPEG Images via Tensor Analysis ................................................................. 462
Ming Liu, Nenghai Yu, and Weihai Li
Secure and Efficient Generalized Signcryption Scheme Based on a Short ECDSA ................................................................. 466
Chuanrong Zhang, Long Chi, and Yuqing Zhang
Regular Quasi-cyclic LDPC Codes with Girth 6 from Prime Fields ................................................................. 470
Qingji Zheng, Xiangxue Li, Dong Zheng, and Baoan Guo
A Study of Mutual Authentication for P2P Trust Management ................................................................. 474
Chunling Wang and Jingyu Feng
Enhanced Adaptive FEC Based Multiple Description Coding for Internet Video Streaming over Wireless Network ................................................................. 478
Li Li, Qi Han, and Xiamu Niu
A Novel and Secure Image Interpolation Methods for Image Disguise ................................................................. 482
Shen Wang, Qiong Li, Bian Yang, and Xiamu Niu
Formal Verification of HMQV Using ASM-SPV

Danqing Huang, Rui Xue, Feng Liu, Jianhua Peng, Zhenju Zhao, and Dongyao Ji

Certificates Distributed Storage Scheme in the Trust Management System

Ying Cai and Qinglong Wang

Techniques and Algorithms for Multimedia Security

Reduction of Interference for CDMA-Based Fingerprinting Scheme Based on Random Permutation

Minoru Kuribayashi

On Some Properties of a Digital Watermarking Based on Complete Complementary Codes

Tetsuya Kojima, Yoshiya Hori, Naoki Ohtani, and Thierno Sene

Detecting Revelation of Private Information on Online Social Networks

Natsuki Watanabe and Hiroshi Yoshiura

Unified Metric for Measuring Anonymity and Privacy with Application to Online Social Network

Komei Kamiyama, Tran Hong Ngoc, Isao Echizen, and Hiroshi Yoshiura

Privacy by Data Provenance with Digital Watermarking - A Proof-of-Concept Implementation for Medical Services with Electronic Health Records

Jérémie Tharaud, Sven Wohlgemuth, Isao Echizen, Noboru Sonehara, Günther Müller, and Pascal Lafourcade

Advanced Data Hiding and Coding Techniques for Audio Signals

Aerial Acoustic Modem with Decoding Capabilities Using a CELP-Based Speech Encoder

Akira Nishimura

Improvement of Packet Loss Concealment for MP3 Audio Based on Switching of Concealment Method and Estimation of MDCT Signs

Akinori Ito, Kiyoshi Konno, Masashi Ito, and Shozo Makino

Audio Information Hiding Based on Spatial Masking

Ryouichi Nishimura

Design of IIR All-Pass Filter Based on Cochlear Delay to Reduce Embedding Limitations

Masashi Unoki, Yoshizo Kosugi, Atsushi Haniu, and Ryota Miyauchi

An Audio Steganography by a Low-Bit Coding Method with Wave Files

Masahiro Wakiyama, Yasunobu Hidaka, and Koichi Nozaki

A Semi-lossless Steganography Technique for G.711 Telephony Speech

Naofumi Aoki

A New Approach of Reversible Acoustic Steganography for Tampering Detection

Xuping Huang, Isao Echizen, and Akira Nishimura
Computational Intelligence and Security

Vision-Based Hand Gesture Recognition Using Combinational Features ...........................................543
Chenglong Yu, Xuan Wang, Hejiao Huang, Jianping Shen, and Kun Wu

Example-Based Facial Portraiture Style Learning ..............................................................................547
Zhongmei Zhou, Xuan Wang, Zili Zhang, and Chenglong Yu

Multi-class Relationship Extraction from Biomedical Literature Using Maximum Entropy ..................551
Lin Yao, Chengjie Sun, Xiaolong Wang, and Xuan Wang

Mirror-Like Gabor Features for Face Recognition under Varying Illumination Conditions ..................555
Yingnan Zhao, Yan Ma, and Zhong Jin

An Image Level Set Method for Denoising .......................................................................................559
Dazhi Zhang, Songsong Li, Boying Wu, and Jiebao Sun

A Perceptual Metric Based on Salient Information Entropy for 3D Mesh Distortion ..............................563
Zhenfeng Shi, Qiong Li, and Xiamu Niu

Detecting Resized JPEG Images by Analyzing High Frequency Elements in DCT Coefficients ...............567
Toshihiko Yamasaki, Tomoaki Matsunami, and Kiyoharu Aizawa

Kernel Canonical Correlation with Similarity Refinement for Automatic Image Tagging .........................571
Yanhui Xiao, Yao Zhao, and Zhenfeng Zhu

Multiple Description Wavelet Based Image Coding with Classification ..............................................575
Chunyu Lin and Yao Zhao

Digital Image Forgery Detection by Local Statistical Models ..................................................................579
Jiri Grim, Petr Somol, and Pavel Pudil

Novel (n, n) Secret Image Sharing Scheme Based on Addition ............................................................583
Lin Dong and Min Ku

Industrial Workflows Recognition by Computer Vision and AI Technologies .......................................587
Emmanuel Sardis and Theodora Varvarigou

High Efficiency Image/Video Coding and Transmission

Robust Video Transmission Scheme Based on Network Coding ..........................................................591
Song Xiao, Ji Lu, Yangli Wang, and Chengke Wu

An Error Concealment Approach for Pixel Based Wyner-Ziv Video Coding ......................................595
Yangli Wang, Chengke Wu, and Song Xiao

Optimized State-Distortion Extraction for Scalable Extension of H.264/AVC ..........................................599
Ji Lu, Song Xiao, and Chengke Wu

A Pixel-Level Rate Control Algorithm for the Optimal Prediction Residual ........................................603
Hongwei Li, Song Xiao, Chengke Wu, and Yuli Feng

Distributed Compressive Hyperspectral Image Sensing .....................................................................607
Haiying Liu, Yunsong Li, Song Xiao, and Chengke Wu
Estimation of Human Movements from Body Acceleration Monitoring Using One Nearest Neighbor Method - Ubiquitous Health Care ................................................................. 672
Takaaki Kozaki, Shigeyoshi Nakajima, Tetsuo Tsujioka, Shinsuke Hara,
Tadayuki Inoue, Hajime Nakamura, and Kazuhide Takeuchi

A Stochastic Model for Popularity Measures in Web Dynamics ................................. 676
Hiromitsu Hama, Pyke Tin, Thi Thi Zin, and Takashi Toriu

A Markov Random Walk Model for Loitering People Detection ................................. 680
Thi Thi Zin, Pyke Tin, Takashi Toriu, and Hiromitsu Hama

Real-Time Updatable Volumetric Display System Based on Inclined-Image Scanning ................................................................. 684
Daisuke Miyazaki, Keisuke Ohno, and Takaaki Mukai

High Performance Networking, Digital Content and Ubiquitous Computing

A Decision Support System in Geriatric Care ............................................................... 688
Nai-Wen Kuo

Attack Analysis for Automatic Monitoring System Used in the Wireless Networks ................................................................. 692
Chung-Hsin Liu and I. Shao

The Study of Video Conference Transmission Security as an Example
on Polycom ......................................................................................................................... 696
Chung-Hsin Liu and Wu-Fan Hsu

Mobile Ad Hoc Network Applications in the Library ....................................................... 700
Kuo-Kai Hsu and Dwen-Ren Tsai

Early Warning System for DDoS Attacking Based on Multilayer Deployment
of Time Delay Neural Network ......................................................................................... 704
Chang-Lung Tsai, Allen Y. Chang, and Ming-Szu Huang

Factors Affecting Consumers' Motivation in Online Group Buyers ............................. 708
Wuu-Yee Chen and Pin-Hsiu Wu

Visual Development Platform for White-Box Algorithmic Trading .............................. 712
Chia-Han Chou and Allen Y. Chang

Building Enterprise Data Centers Using Virtual and Cloud ........................................... 716
Dwen-Ren Tsai and Sheng-Wei Lin

Multimedia and Security Services in Mobile Cloud Computing

Jing Zhao, Lei Wang, Suran Li, Xiaokang Liu, Zhuxiu Yuan, and Zhengjiu Gao

2.5D SIFT Descriptor for Facial Feature Extraction ....................................................... 723
He Guo, Kai Zhang, and Qi Jia

A Low-Level Security Solving Method in Grid .............................................................. 727
Weifeng Sun, Boxiang Dong, Zhenquan Qin, Juanyun Wang, and Mingchu Li

An Efficient Trust Mechanism in P2P Network ............................................................. 731
Zhenquan Qin, Lei Wang, Mingchu Li, and Weifeng Sun
