11th INTERNATIONAL CONFERENCE
ON ASPHALT PAVEMENTS

August 1 to 6, 2010
Nagoya, Aichi, Japan

Volume II
Proceedings

International Society for Asphalt Pavements
Japan Road Association
# Table of Contents

**Volume II**

3. Pavement Materials

## 3.1 Porous Asphalt

Evaluation Method for Moisture-Induced Damage of Binder Course Mixtures under Porous Asphalt Pavements, Including Digital Image Analysis
Yoshinori Fujita, Hideo Fujii, Takumi Kojima ................................................................. 61

3.2 Warm mix asphalt

Laboratory Investigation of Rheological and Moisture Susceptibility of WMA Mixture
Feipeng Xiao, Serji N. Amirkhanian, Junan Shen ............................................................... 71

Laboratory Performance Assessment of Sulfur-Modified Warm Mixes
Nam H. Tran, Adam J. Taylor, Richard W. May ................................................................. 79

Stiffness and Low-Temperature Behaviour of Selected Warm Asphalt Mixes
Jan Valentin, Petr Mondschein, Michal Varaus, Petr Hyzl ............................................... 89

Performance Measure of Warm Mix Asphalt with Three Organic Additives
Hosin Lee, Yongjoo Kim, Sampath Anand, Sung-Do Hwang, Soc-Ahn Kwon,
Kyu-Dong Jeong ................................................................................................................. 99

Study on the Storage Stability of WMA Modified Asphalt
Jianzhong Pei, Shicui Xu, Mingfeng Chang, Hong Zhang .................................................. 105

3.3 Recycle

Mechanical behavior of fiber reinforced compacted concrete with incorporation of reclaimed asphalt pavement
Kevin Bilodeau, Cedric Sauzeat, Herve Di benedetto, Francois Olard,
Dominique Bonneau ............................................................................................................. 117

Increasing the Use of Reclaimed Asphalt Pavement (RAP) in United States Highway Pavements: A National Effort
Audrey Copeland, John D'Angelo .......................................................................................... 127

On-site Application of Pedestrian-friendly Pavements using Pressurized Fluidized Bed Combustion Ash and Bamboo Chips
Takuro Fujikawa, Kenichi Sato, Shigeo Matsuki .................................................................. 137

Assessment of Fatigue Characteristics of Cold Recycling Mixes by Different Test Methods
Jan Valentin, Petr Mondschein, Milos Macko, Dušan Stehlik ............................................ 147

Using Hot In-place Recycling for Rehabilitation of Asphalt Pavements Made with Coral Aggregates
Shahram Sheikh Sandiani, Marjan Rohani, Mostafa Joharifard ........................................ 157

Monitoring the Performance of Cold In-depth Recycled Pavements
Vasilis Papavasiliou, Andreas Loizos, Christina Plati ......................................................... 167

A Laboratory-Based Investigation to Attain Longer-lasting Modified Binder with Crumb Rubber and Acid
Marjan Rohani, Shahram Sheikh Sandiani, Iman Mohammadi, Mahmoud Khadem .......... 177

An Investigation Using Idealised Rubber-Bitumen Composite Mixtures to Assess the Influence of Short-Term Rubber-Bitumen Interaction on Dry Process CRM Asphalt Mixtures
Mujib M. Rahman, Gordon D. Airey .................................................................................... 187
3.4 Mix design

Development of a Lab Production Method with Recycled Asphalt Pavement in a Double Barrel Drum Mixer
Martin F.C. van de Ven, Andre A.A. Molenaar, Girum Mengiste .................................................. 201

Evaluation of Rutting Potential of Asphalt Mixtures Using Linear Genetic Programming
Mohammadreza R. Mirzahosseini, Amirhossein H. Alavi, Fereidoon Moghadas Nejad,
Amirhossein H. Gandomi, Mahmoud Ameri .................................................................................. 211

Upgraded Mix Design Procedure of Hybrid Mix for less Compaction Energy
Ryo Kato, Akira Oi, Keizo Kamiya, Toshihiro Tanaka .................................................................... 221

HMA-Related Research Activities for Airfield Pavements at the Federal Aviation Administration
Navneet Garg, Injun Song, Harkanwal Brar .................................................................................. 231

On the Optimization of the Aggregate Packing for the Design of Self-Blocking
High-Performance Asphalts
Francois Olard, P. Huon, Daniel Perraton, C. Billet ................................................................. 241

Investigation of Superpave Mixtures in Malaysia
Juraiadah Ahmad, Mohd Yusof Abdul Rahman, Mohd Rosli Hainin .......................................... 251

Adhesion Agents influencing the Fatigue Life of Stone Mastic Asphalts
Christiane Weise, Markus Oeser .................................................................................................... 261

Research to the applicability of the ITS-R test as a ravelling indicator for SMA mixtures
Dieter Seghers, Jan Stoep, Wim Van den bergh, Stefan Vansteenkiste,
Joelle De Visscher, Ferhat Hammoum, Rene Reynaert .............................................................. 271

Validation of New Dutch Volumetric Mix Design Method for SMA with Mechanical Tests and
Field Trials
Martin F.C. van de Ven, Jan L.M. Voskuilen .................................................................................. 281

Research on the Asphalt Aging Properties under Ultraviolet Radiation and its Modification
Liping Liu, Wenlong Dong, Lijun Sun, Lu Jia, Tao Jiang ............................................................. 291

Characterization of Asphalt Concrete Microstructure using a Volumetrics-Based Thresholding
Algorithm
Habtamu M. Zelelew, Tom Papagiannakis ..................................................................................... 301

Internal Structure Parameters of Asphalt Mixture Made by Different Compaction Methods
Lei Zhang, Xu-dong Wang, Xingye Zhou ......................................................................................... 311

Numerical Simulation of HMA Compaction Using Discrete Element Method
Jingsong Chen, Baoshan Huang, Xiang Shu .................................................................................... 321

Volumetric Properties of Hot Mix Asphalt Containing Subnano-Sized Hydrated Lime (SNHL)
Junan Shen, Walker Brazell, Jason Pankiw, Dekalb Taylor, Tang Boming,
Fu Guanhua .................................................................................................................................... 331
3.5 Modifiers

Variation in Chemical Properties of Two Kinds of Polymer Modified Asphalts during Thermal Degradation
Motoyuki Sugano, Jun Kajita, Mitsue Ochiai, Noriyuki Takagi, Shigeo Iwai, Katsumi Hirano ................................................................. 361

Low-temperature Flexibility of Mastic Asphalt and Asphalt Concrete with Polymer-Modified Bitumen
Carsten Karcher, Anne Wittenberg .......................................................... 371

Combined Traffic and Climate Effects on Durability of Pavement Mixture with Polymer Modified Binder
Mehdi Ould-Henia, André-Gilles Dumont, Michel Pittet, Jean-Pascal Planche, Sylvia Dreessen ................................................................. 381

SBS Modified Bitumens: Does Their Morphology and Storage Stability Influence Asphalt Mix Performance?
Xiaohu Lu, Per Redelius, Hilde Soenen ...................................................... 391

Life Cycle Cost Analysis of Flexible Pavements with Modified Asphalt Mixes - Indian Experience
Anjan Kumar Siddagangaiah, Hazeera Tahseen, Rajib B. Mallick, Veeraragavan Amruthalingam ................................................................. 401

Aging Gradient in a 19 Year-Old Wearing Course in Switzerland
Thibaud Gallet, Sylvia Dreessen, André-Gilles Dumont, Michel Pittet ................................................................. 411

Evaluation of Mineral Fiber Impact on Hot-Mix Asphalt Performance
Long Wang, Xiaoguang Xie, Chenglin Shi .................................................. 421

Effect of Polyphosphoric Acid on the Chemical Composition and Properties of Different Bitumens
Henglong Zhang, Jianying Yu, Zhengang Feng, Lian Li .................................. 431

Empirical Evaluation of the Use of Oily Sludge as a Modifier of Buton Rock Asphalt in Hot Mix Asphalt Pavement
Madi Hermadi, Kemas A. Zamhari ............................................................. 441

Crude Oil Sources and Cut Point as Keys for the Prediction of the Mechanical Performance of Bitumen
Markus Hoffmann, Klaus Stangl, Ronald Blab ............................................. 449
3.6 Fracture & Rutting

The Modified Partial Healing Model used as a Prediction Tool for the Complex Stiffness Modulus Evolutions in Four Point Bending Fatigue Tests based on the Evolutions in Uni-Axial Push-Pull Tests
Ad C. Pronk, Andre A.A. Molenaar ................................................................. 461

Rheological Properties and Fatigue Resistance of Crumb Rubber Modified Bitumen
Farag Khodary, Michael Vormwald ................................................................. 471

Determination of a New Fatigue Rupture Criterion for Bituminous Mixes
Margarita Rodriguez ......................................................................................... 481

Effect of Temperature on Fatigue Performances of Asphalt Mixes
Didier Bodin, Jean-Philippe Terrier, Clement Perroteau, P. Hornych, Paul Marsac ...... 491

Comparison between Fatigue Performance of Foam Stabilized, Dense and Open Graded Asphalt Mixes
Mofreh F. Saleh ................................................................................................. 501

Multiscale Approach for Characterization of Asphaltic Materials Designed in Brazil and Spain
Renato P. Coutinho, Veronica T.F. Castelo Branco, Thais F. Pamplona, Jorge B. Soares, Angel Mateos ............................................................................................. 511

Effect of Different Polymer-modified Bitumen of the same Sort on the Fatigue Behavior of Asphalt
Carsten Karcher ................................................................................................. 521

A Research on Measurement of Stiffness of Asphalt Mixture in High Temperature
Yoshio Hisari, Naohiro Kanjo, Akinori Sato, Osamu Kamada, Junichi Haga, Nobuyuki Yoshida ............................................................................................ 531

Research on Different Additives to Improve the Moisture Susceptibility of Granite Asphalt Mixtures
Xu Huang, Shaopeng Wu, Wei Zhang .................................................................... 541

High Stable Asphalt for Heavy loaded Bus Test Lane Sections
Pahirangan Sivapatham, Hartmut Johannes Beckedahl, Stefan Janssen ...................... 549

A Comparison of Flow Number for Plant-Produced Mix to Field Rut Depths under Full-Scale Loading
James R. Willis, Adam J. Taylor, Nam H. Tran, Audrey Copeland .......................... 559

Effects of Asphalt Binder Grade on the Performance of Rhode Island Hot-Mix Asphalt
Kang-Won W. Lee, Satish K. Gundapuneni, Ajay Singh ........................................ 569

Assessment of Rut-Resistance of Unbound Granular Bases
Geoffrey W. Jameson, Binh T. Vuong, Michael A. Moffatt .................................... 579

Assessment of Permanent Deformation Behavior of Asphalt Concrete by Improved Triaxial Cyclic Compression Testing
Bernhard Hofko, Ronald Blab ............................................................................. 589
Effect of Modification on Rut Susceptibility of Asphalt Binders and Mixtures
Nader Tabatabaee, Pouya Teymourpour ................................................................. 599

Cyclic triaxial apparatus for the study of permanent deformations of bituminous mixes
Juliette Sohm, Pierre Hornych, Thomas Gabet, Herve Di Benedetto .......................... 609

Semi-flexible Pavement on Beijing Bus Rapid Transit Line
Zhong Lin .................................................................................................................. 619

Resistance of Asphalt Binder and Surface Courses to High and Low Temperatures
Aleksander Ljubic, Roman Bašelj ............................................................................. 629

Study on Ultra Thin Overlay Method Applicable in Medium to Low Temperature Range
Keigo Hatakeyama, Tadashi Makabe, Toshifumi Emukai .......................................... 639

Laboratory Characterisation of the Evolution of the Thermal Cracking Resistance with
Freeze-thaw Cycles
Alan Carter, Michel Paradis ...................................................................................... 649

Research of Modified Asphalt for the Intense Cold Region
Hiroki Imai, Koji Goto, Tomohiro Ando ................................................................. 659

Development of a Double-Torsion Fracture Test for Bituminous Materials
Hyunwook Kim, Manfred N. Partl ............................................................................. 669

Estimation of Relative Performance of Overlaid Asphalt Mixtures Against Reflection Cracking
due to Mixed Fracture Mode
Young S. Doh, Jiyong Park, Jung S. Choi, Kang W. Kim .............................................. 679

An Introduction of the Arcan Testing Configuration for Mixed-Mode Cracking in Asphalt
Concrete
Andrew Braham, Fujian Ni, Shu Yang ...................................................................... 687

About the Use of Induction Heating to Close Cracks in Asphalt Pavements
Alvaro Garcia Hernandez, Erik Schlangen, Martin van de Ven, Dave van Vliet ............. 697

3.7 Laboratory testing

Using Dynamic Modulus Test as a Tool to Determine Resistance of Asphalt Concrete to
Moisture Damage
Mansour Soleimanian, Chieh-Tang Chang ............................................................... 709

Performance Characteristics of Liquid and Lime-Treated Asphalt Mixtures
Peter E. Sebaaly, Elie Y. Hajj .................................................................................. 719

Indirect Tensile Test for the Determination of the Stiffness and the Resilient Modulus of Asphalt
Concrete: Experimental Analysis of the EN 12697-26 and the ASTM D 4123 Standards
Nicola Baldo, Matteo Dal Ben, Marco Pasetto, Martin van de Ven,
Andre A.A. Molenaar ............................................................................................... 729

A Practical Method for Converting Resilient Modulus to Dynamic Modulus of Asphalt Mixtures
Xiang Shu, Baoshan Huang, Guoping Qian ............................................................. 739
