CSUG/SPE 136566 How to Achieve and Control Branch Fracturing for Unconventional Reservoirs:
Two Novel Multistage-Stimulation Processes .................................................. 309
M. Stanojlic, K. Rispler

CSUG/SPE 136611 Heavy Oil and Bitumen Recovery Using Radiofrequency Electromagnetic
Irradiation and Electrical Heating: Theoretical Analysis and Field Scale Observations .......... 325
Alfred Daviet-Buea, Liana Kovaleva, Tayfun Babadagli, Rais Minnigalimov

CSUG/SPE 136665 Viscosity of Foamy Oils .......................................................... 339
A. B. Alishakky, B. B. Maini

CSUG/SPE 136696 Understanding Gas Production Mechanism and Effectiveness of Well Stimulation
in the Haynesville Shale Through Reservoir Simulation ........................................ 352
L. Fan, J. W. Thompson, J. R. Robinson

CSUG/SPE 136700 Integration of Montney Microseismic Information Into a Reservoir Simulator to
Analyze a Horizontal Wellbore With Multiple Fracture Stages ................................ 367
D. J. Quirk, A. Cai

CSUG/SPE 136714 Production Behaviour of Gas Hydrate Under Hot Sea Water Injection:
Laboratory Case Study ......................................................................................... 391
A. Nengkeda, B. Budjihanto, S. Supranto, I. Prasetyo, S. Purwono, S. Sulfa

CSUG/SPE 136737 Experimental Characterization of Production Behavior Accompanying the
Hydrate Reformation in Methane Hydrate Bearing Sediments .................................. 399
T. Ahn, C. Park, J. Lee, J. M. Kang, H. T. Nguyen

CSUG/SPE 136757 Restimulation of Unconventional Reservoirs: When are Refracs Beneficial? .... 407
M. C. Vincent

CSUG/SPE 136758 Experimental Study of Solvent-Based Emulsion Injection to Enhance Heavy Oil
Recovery in Alaska North Slope Area ................................................................. 444
Fangda Qiu, Daolat Mamora

CSUG/SPE 136851 Reducing Steam Oil Ratio in Steam-Assisted Gravity Drainage .................. 460
B. W. Orr, P. Srivastava, V. Sadetsky, B. J. Stefan

CSUG/SPE 136856 A Numerical Study of the Effects of Packer-Induced Stresses and Stress
Shadowing on Fracture Initiation and Stimulation of Horizontal Wells ...................... 473
I. Singh, J. L. Miskimins

CSUG/SPE 136863 When Unconventional Becomes Conventional ................................ 491
R. Steflk, K. Paulson

CSUG/SPE 136866 Natural Gas: The Green Fuel of the Future .................................... 496
R. S. Taylor, P. Tertzakian, T. Wall, J. Wilkinson, M. Graham, P. J. Young, S. W. Harbinson

CSUG/SPE 136870 Experimental Optimization of Catalytic Process In-Situ for Heavy Oil and
Bitumen Upgrading ............................................................................................... 514

CSUG/SPE 136871 The Potential for Slot Closure, Screen Damage, and Collapse of Liners in Thermal
Horizontal Wells .................................................................................................. 528
J. C. O'Rourke

CSUG/SPE 136875 An Overview of Horizontal Well Completions in the Haynesville Shale ......... 551
J. W. Thompson, L. Fan, D. Grant, R. B. Martin, K. T. Kanneganti, G. J. Lindsey

CSUG/SPE 136887 Carbon Sequestration From Waste via Conversion to Charcoal: Equipment for a
Small Scale Operation .......................................................................................... 565
S. C. Gupta, A. Strauk, D. Gilbert

CSUG/SPE 136900 Electromagnetic Methods to Monitor Gas Hydrate Distribution and Production in
Layered Sediments ............................................................................................... 576

CSUG/SPE 136904 Performance Analysis and Field Application Result of Polymer Flooding in Low-
Permeability Reservoirs in Daqing Oilfield .......................................................... 590
W. Fenglan, L Xia, L Siyuan, H. Peihui, G. Wenting, Y. Yonghui

CSUG/SPE 137001 Impact of Oil Viscosity Gradient Presence on SAGD ................................ 594
J. X. Chen, Y. Jio

CSUG/SPE 137006 A Systematic Workflow Process for Heavy Oil Characterization: Experimental
Techniques and Challenges .................................................................................... 613
A. I. Memon, J. Gao, S. D. Taylor, T. L. Davies, N. Jia

CSUG/SPE 137007 Well Integrity and Workover Candidates for Existing Wells in the Wabamun
Area CO2 Sequestration Project (WASP) ............................................................ 631
Runar Nygaard, Rob Lavoie

CSUG/SPE 137010 Bacterial Survival in Fractured Shale Gas Wells of the Horn River Basin ......... 644
S. L. Moore, C. M. Cripps
CSUG/SPE 137020 Local Dissociation Experiments of Methane-Hydrate-Bearing Soil ........................................ 658
S. Faisal, A. C. Palmer, T. S. Tan, K. Ja
CSUG/SPE 137035 Reserves Management: A Concerted Effort ................................................................. 664
Nathan McMahan, Efron Munoz
CSUG/SPE 137039 Montney Fracturing-Fluid Considerations: Case History ........................................ 683
R. Romanson, N. Riviere, R. Taylor, G. McIntosh, M. Wilson, C. Loran, J. R. Cockhill
CSUG/SPE 137047 Behavior of Depressurization in Type III Hydrate Reservoirs ........................................ 693
A. Shahbazi, M. Pooladi-Darvish
CSUG/SPE 137078 Maximizing the Marcellus Gold Rush While Minimizing Negative Impacts .................. 715
B. Huls
CSUG/SPE 137079 Well Integrity in Heavy Oil Wells: Challenges and Solutions ......................................... 723
S. Taoutaou, T. M. Osman, M. Mjibah, N. Succar
CSUG/SPE 137092 Co-Injection of Noncondensible Gas Improves ES-SAGD Performance in Shallow Oil Sands Reservoirs With a Small Top Water Zone ................................................. 736
A. A. Alturki, I. D. Gates, B. B. Maini
CSUG/SPE 137133 Method to Improve Thermal EOR Performance Using Intelligent Well Technology: Orion SAGD Field Trial ................................................................. 753
CSUG/SPE 137135 Case Study: Development and Optimization of Horseshoe Canyon CBM Properties ......................... 765
D. G. Rempel, M. Somerwil
