|-----------------------|-------------------|
| **COMPUTATIONAL MECHANICS** |
| ESDA2010-24080 On the Effects of Water Discharge Through Radial Gates at the Caruachi Dam | 1 |
|  
| Douglas Sanchez and Juan E. Salazar |
|  
| Vahid Abdollahi and Amir Nejat |
| ESDA2010-24117 Conjugate Heat Transfer in an Enclosure With Internal Contaminant and Heat Source Using Lattice Boltzmann Method | 17 |
|  
| Salah Hosseini, Vahid Abdollahi, and Amir Nejat |
| ESDA2010-24191 The Application of Bees Algorithm In Finite Element Model Updating | 25 |
|  
| Laleh Fatahi, Shapour Moradi, and Pejman Razi |
| ESDA2010-24201 Turbulent Flow Simulations Through Tarbela Dam Tunnels Considering the Effect of Sediment Particles | 31 |
|  
| Muhammad Abid and Adnan Aslam Noon |
| ESDA2010-24224 Airfoil Flow Separation and Stall Prediction Using a Neural-Network Approach | 37 |
|  
| Amir Nejat, Saeed Alem Varzaneh Esfahani, and Amin Doostmohammadi |
| ESDA2010-24226 Lattice Boltzmann Simulation of Non-Newtonian Flow Past Cylinders | 45 |
|  
| Amir Nejat, Koohyar Vahidkhah, and Vahid Abdollahi |
| ESDA2010-24246 Modes of Wave Propagation and Dispersion Relations in Inclusion Reinforced Composite Plates | 55 |
|  
| Yu Cheng Liu and Jin Huang Huang |
| ESDA2010-24296 Investigating the Effect of Stone-Wales Defect on Young Modulus of Armchair Single Wall Carbon Nanotube Using Molecular Dynamics Simulation | 65 |
|  
| H. Rezaei Nejad, M. Ghasemi, A. Shahabi, and S. M. Mirnouri Langroudi |
| ESDA2010-24298 Numerical Modeling and Simulation of a Condenser Microphone | 71 |
|  
| M. T. Mehrabani, A. Ranjbar, and F. Torkaman |
| ESDA2010-25340 | Classical and Generalized Coupled Thermoelasticity of a Layer  
* S. K. Hosseini Zad and M. R. Eslami | 271 |
* Baris Yilmaz, Sibel Ozdogan, and Iskender Gokalp | 281 |
| ESDA2010-25381 | Static Analysis of Moderately Thick Functionally Graded Plates With Various Boundary Conditions  
* Nastaran Shahmansouri, Mohammad Mohammadi Aghdam, and Kasra Bigdeli | 289 |
| ESDA2010-25433 | Simulation of Indirect Internal Reforming With Self-Sustained Electrochemical Promotion Catalysts in a Planar Solid Oxide Fuel Cell Anode  
* Anchasa Pramuanjaroenkij, Xiang Yang Zhou, Amarin Tongkratoke, and Sadik Kakac | 297 |
| ESDA2010-25439 | Spectral Element Model for the Transverse Vibrations of Thin Plates  
* Usik Lee and Injoon Jang | 303 |
| ESDA2010-25440 | Spectral Element Model for the Vibration of a Bending-Shear-Torsion Coupled Composite Timoshenko Beam  
* Usik Lee and Injoon Jang | 309 |
| DESIGN ENGINEERING |  |
| ESDA2010-24036 | Influence of Environmental Factors on Corrosion of Machinery at Takoradi Thermal Plant Power Station  
* Eric K. Gbadam and Charles Mborah | 317 |
| ESDA2010-24043 | Life Cycle Cost Modeling of Pumps Using an Activity Based Costing Methodology  
* Laxman Yadu Waghmode and Anil Dattatraya Sahasrabudhe | 323 |
| ESDA2010-24099 | An Application of a Generalized Life Cycle Cost Model to BOXN Wagons of Indian Railways  
* Laxman Yadu Waghmode and Anil Dattatraya Sahasrabudhe | 333 |
| ESDA2010-24121 | Collaborative Determination of Task Implementation Priorities in Engineering Design  
* Theodoros G. Tsokos and Argyris J. Dentsoras | 343 |
| ESDA2010-24132 | Robustness of Wheelchairs Under Direct Frontal Impact Loading Conditions  
* Ibrahim K. Yilmazcoban, Osman iyibilgin, and Abdullah Mimaroglu | 353 |
Conception and Evaluation of Sustainable Cross-Company Logistics Models
Wilfried Sihn, Christian Hillbrand, Margarethe Prochazka, Felix Meizer, and René Leitner

Design and Analysis of Rotary Positive Displacement Mechanism for Oil-Less Compression
Holger Roser

A Robust Design Optimization Methodology for External Gear Pumps
Emiliano Mucchi, Gabriele Tosi, Roberto d'Ippolito, and Giorgio Dalpiaz

Slab Method of Analysis for Three Dimensional Forward Extrusion of Squared End Section
Amin Samadi Ghoshchi, Aydin Samadi Ghoshchi, Sajjad Mohamadi Bazargani, and Sajjad Emami

Variational Geometry With Algebraic Level Set Model
Jiwei Zhang, Michael Y. Wang, and Xiaojun Wu

Design and Verification of Bobsleigh Track
Francesco Braghin, Federico Cheli, Stefano Melzi, and Edoardo Sabbioni

On Novel Operation Cycle of Freeze Dryer in P-T Diagram
K. Shahdi, M. R. Ayatollahi, and R. Ghafoori Ahangar

Construction of a Prediction Model for an Acceptable T-Shape Tube Product in Magnesium Alloy Hydro-Forming
S. Y. Lin, C. M. Chang, and R. F. Shyu

Fatigue Life Prediction of a Drag Link by Using Finite Element Method
Baris Koca and Bulent Ekici

Study on Sound Absorption and Transmission Loss of Transversely Isotropic Multi Layers Porous Material
Reza Keshavarz and Abdolreza Ohadi

An Axiomatic Design Approach to Multi-Objective Optimization
Esin Tarcan and A. Karim Kar

Measurement and Simulation of Indoor Air Quality and CO₂ Concentration in a Hotel Room
Ehsan Asadi, Manuel Gameiro da Silva, and José J. Costa
ESDA2010-25174 .................................................. 555
Engine Durability Test Cycle for Heavy-Duty Engines
Serdar Akça, Serdar Demir, Ian Pennington, and Okan Ataman

ESDA2010-25180 .................................................. 565
Analysis of Manufacture Errors for Space Truss With Bolted Spherical Joints Base on Monte Carlo Method
Yongwei Guo, Qiming Wang, and Xuedong Gu

ESDA2010-25196 .................................................. 571
Increasing Penetration Rate of Drill String by Optimum Positioning of Stabilizers
Reza Kazemi, Ali Asghar Jafari, and Mohammad Faraji Mahyari

ESDA2010-25197 .................................................. 579
Design Strategy of a High Pressure Regulator
Amir R. Shahani, Ashkan Aryaei, Mosayeb Najar, Sirvan Mohammadi, and Hamid Esmaili

ESDA2010-25271 .................................................. 585
Investigating Optimum Procedures Needed to Maintain a Model Satellite’s CG Stable About Design Point, Under Subsystem Configuration Changes
H. Dastoom Laatleyli, H. Teimouri, and A. Abedian

ESDA2010-25376 .................................................. 589
Artificial Neural Networks Based Wear Prediction for Pneumatic Drives Seals
Sorin Ciortan, Geanina Podaru, Iulian Gabriel Birsan, and Constantin Spanu

ESDA2010-25377 .................................................. 597
Pneumatic Drives’ Seals Efficiency Monitoring by Thermography Based Methods
Geanina Podaru, Iulian Gabriel Birsan, Sorin Ciortan, and Lorena Deleanu

ESDA2010-25431 .................................................. 603
Usability Test in a Virtual Environment: A Case Study Based on a Mining Machine
Hassan Yousefi, Heikki Handroos, and Amir Soleimani

MANUFACTURING SYSTEMS
ESDA2010-24065 .................................................. 613
Life and Wear Prediction of Twist Drills by a Temperature Dependent Friction Law
Hossein Vaghefpour and Ali Nayeobi

ESDA2010-24109 .................................................. 619
Spindle Speed Variation for Regenerative Chatter Suppression in Turning Process With Tool Wear Effect
Kambiz Haji Hajikolaei, Masoud Rahaeifard, Gholamreza Vossoughi, and Mohammadreza Movahhedy

ESDA2010-24217 .................................................. 627
Optimizing Surface Roughness in Face Milling Using a New Meta-Heuristic Method of Harmony Search
M. R. Razfar, R. Farshbaf Zinati, and M. Haghshenas
