

Light Metals 2011

Proceedings of the technical sessions presented
by the TMS Aluminum Committee
at the TMS 2011 Annual Meeting & Exhibition,
San Diego, California, USA
February 27-March 3, 2011

Edited by
Stephen J. Lindsay

WILEY

A John Wiley & Sons, Inc., Publication

TABLE OF CONTENTS

Light Metals 2011

Preface	xix
About the Editor	xxi
Program Organizers	xxiii
Aluminum Committee	xxix

Alumina and Bauxite

Bauxite Resources and Utilisation

New Development Model for Bauxite Deposits	5
<i>P. ter Weer</i>	
Study on the Characterization of Marginal Bauxite from Pará/Brazil	13
<i>F. Silva, J. Sampaio, M. Medeiros, and F. Garrido</i>	
Resource Utilization of High-sulfur Bauxite of Low-median Grade in Chongqing China.....	19
<i>J. Yin, W. Xia, and M. Han</i>	
Development of Bauxite and Alumina Resources in the Kingdom of Saudi Arabia	23
<i>A. Al-Dubaisi</i>	
Digestion Studies on Central Indian Bauxite.....	29
<i>P. Raghavan, N. Kshatriya, and Dasgupta</i>	
Effects of Roasting Pretreatment in Intense Magnetic Field on Digestion Performance of Diasporic Bauxite.....	33
<i>Z. Ting-an, D. Zhihe, L. Guozhi, L. Yan, D. Juan, W. Xiaoxiao, and L. Yan</i>	

Bayer Process I

Application of Operation Integrity Management in the Alumina Industry	41
<i>C. Suarez, D. Welshons, J. Mc Nerney, and J. Webb</i>	
Influence of Solid Concentration, Particle Size Distribution, Ph And Temperature on Yield Stress of Bauxite Pulp	47
<i>C. Barbato, M. Nele, and S. França</i>	
A New Method for Removal Organics in the Bayer Process.....	51
<i>B. Yingwen, L. Jungi, S. Mingliang, and Z. Fei</i>	
Alunorte Expansion 3 – The New Lines Added to Reach 6.3 Million Tons per Year.....	57
<i>D. Khoshnevis, L. Corrêa, J. Ribeiro Alves Filho, H. Berntsen, and R. Carvalho</i>	
One Green Field Megaton Grade Large Alumina Refinery with Successful Engineering & Operation Experience...	63
<i>L. Xianqing, and Y. Xiaoping</i>	
Advanced Process Control in the Evaporation Unit	69
<i>C. Kumar, U. Giri, R. Pradhan, T. Banerjee, R. Saha, and P. Pattnaik</i>	

Improvements in Smelter Grade Alumina Quality at Clarendon Alumina Works	75
<i>R. Shaw, A. Duncan, and M. Crosdale</i>	

Red Mud

Application of Nanofiltration Technology to Improve Sea Water Neutralization of Bayer Process Residue	81
<i>K. Taylor, M. Mullett, L. Fergusson, H. Adamson, and J. Wehrli</i>	
Caustic and Alumina Recovery from Bayer Residue	89
<i>S. Gu</i>	
Investigation on Alumina Discharge into the Red Mud Pond at Nalco's Alumina Refinery, Damanjodi, Orissa, India	93
<i>B. Mohapatra, B. Mishra, and C. Mishra</i>	
Production of Ordinary Portland Cement(OPC) from NALCO Red Mud.....	97
<i>C. Mishra, D. Yadav, M. Alli, and P. Sharma</i>	
Recovery of Metal Values from Red Mud.....	103
<i>P. Raghavan, N. Kshatriya, and K. Wawrynink</i>	
Red Mud Flocculants used in the Bayer Process	107
<i>S. Moffatt, F. Ballentine, and M. Lewellyn</i>	
Reductive Smelting of Greek Bauxite Residues for Iron Production	113
<i>A. Xenidis, C. Zografidis, I. Kotsis, and D. Boufounos</i>	

Precipitation, Calcination and Properties

Effect of Technological Parameters on PSD of Aluminum Tri-Hydroxide from Seed Precipitation in Seeded Sodium Aluminate Solutions	121
<i>Y. Wu, L. Mingchun, and Q. Yanping</i>	
Methods to Reduce Operating Costs in Circulating Fluidized Bed Calcination.....	125
<i>C. Klett, M. Missalla, B. Reeb, and H. Schmidt</i>	
Pressure Calcination Revisited	131
<i>F. Williams, and C. Misra</i>	
Dynamic Simulation of Gas Suspension Calciner (GSC) for Alumina	137
<i>B. Raahauge, S. Wind, M. Wu, and T. Jensen</i>	
Physical Simulation and Numerical Simulation of Mixing Performance in the Seed Precipitation Tank with a Improved Intermig Impeller	145
<i>Z. Ting-an, L. Yan, W. Shuchan, Z. Hongliang, Z. Chao, Z. Qiuyue, D. Zhihe, and L. Guozhi</i>	
Two Perspectives on the Evolution and Future of Alumina	151
<i>L. Perander, J. Metson, and C. Klett</i>	
Significant Improvement of Energy Efficiency at Alunorte's Calcination Facility	157
<i>M. Missalla, H. Schmidt, J. Ribeiro, and R. Wischnewski</i>	
Attrition of Alumina in Smelter Handling and Scrubbing Systems.....	163
<i>S. Lindsay</i>	

Energy and Environment

Perspective on Bayer Process Energy.....	171
<i>D. Donaldson</i>	
Optimization of Heat Recovery from the Precipitation Circuit	175
<i>R. Singh, S. Hial, and M. Simpson</i>	
Alunorte Global Energy Efficiency	179
<i>A. Monteiro, R. Wischnewski, C. Azevedo, and E. Moraes</i>	
Opportunities for Improved Environmental Control in the Alumina Industry	185
<i>R. Mimna, J. Kildea, E. Phillips, W. Carlson, B. Keiser, and J. Meier</i>	
Alumina Refinery Wastewater Management: When Zero Discharge Just Isn't Feasible... ..	191
<i>L. Martin, and S. Howard</i>	
High Purity Alumina Powders Extracted from Aluminum Dross by the Calcining—Leaching Process	197
<i>L. Qingsheng, Z. Chunming, F. Hui, and X. Jilai</i>	
Effect of Calcium/Aluminium Ratio on MgO Containing Calcium Aluminate Slags.....	201
<i>W. Bo, S. Hui-Lan, G. Dong, and B. Shi-Wen</i>	
Study on Extracting Aluminum Hydroxide from Reduction Slag of Magnesium Smelting by Vacuum Aluminothermic Reduction	205
<i>W. Yaowu, F. Naixiang, Y. Jing, H. Wenxin, P. Jianping, D. Yuezhong, and W. Zhihui</i>	
Application of Thermo-gravimetric Analysis for Estimation of Tri-hydrate Alumina in Central Indian Bauxites—An Alternative for Classical Techniques.....	211
<i>Y. Ramana, and R. Patnaik</i>	
Determination of Oxalate Ion in Bayer Liquor Using Electrochemical Method	215
<i>S. Turhan, B. Usta, Y. Sahin, and O. Uysal</i>	

Alternative Alumina Sources - Poster Session

The Effect of Ultrasonic Treatment on Alumina Leaching from Calcium Aluminate Slag	221
<i>S. Hui-lan, W. Bo, G. Dong, Z. Xue-zheng, and B. Shi-wen</i>	
Theory and Experiment on Cooling Strategy during Seeded Precipitation	227
<i>Z. Liu, W. Chen, and W. Li</i>	
Extraction of Alumina from Red Mud by Divalent Alkaline Earth Metal Soda Ash Sinter Process.....	231
<i>S. Meher, A. Rout, and B. Padhi</i>	
Dissolution Kinetics of Silicon from Sintering Red Mud in Pure Water.....	237
<i>X. Li, K. Huang, and H. Zhu</i>	
The Effect of Cooling Rate on the Leachability of Calcium Aluminate Slags	241
<i>W. Bo, S. Hui-lan, Z. Xue-zheng, and B. Shi-wen</i>	
Preparing Polymerized Aluminum-ferrum Chloride with Red Mud	245
<i>L. Guilin, Y. Haiyan, and B. Shiwen</i>	
Adsorption of Polyethylene Glycol at the Interface of Dicalcium Silicate – Sodium Aluminate Solution	251
<i>Y. Haiyan, X. Pan, Z. Lu, and T. Ding</i>	

Production of Hematite Ore from Red Mud	255
<i>P. Raghavan, N. Kshatriya, and K. Wawrynink</i>	

Aluminum Reduction Technology

Enviroment- Emissions/ Anode Effect I

HF Measurements Inside an Aluminium Electrolysis Cell.....	263
<i>K. Osen, T. Aarhaug, A. Solheim, E. Skybakmoen, and C. Sommerseth</i>	
LasIRTM-R – The New Generation RoHS-Compliant Gas Analyzers Based on Tunable Diode Lasers	269
<i>J. Gagne, J. Pisano, A. Chanda, G. Mackay, K. Mackay, and P. Bouchard</i>	
Use of Spent Potlining (SPL) in Ferro Silico Manganese Smelting	275
<i>P. von Krüger</i>	
Reduction of PFC Emissions at Pot Line 70 kA of Companhia Brasileira de Alumínio.....	281
<i>H. Santos, D. Melo, J. Calixto, J. Santos, and J. Miranda</i>	
Towards Redefining the Alumina Specifications Sheet – The Case of HF Emissions	285
<i>L. Perander, M. Stam, M. Hyland, and J. Metson</i>	
Design of Experiment to Minimize Fluoride and Particulate Emissions at Alumar	291
<i>E. Batista, P. Miotto, E. Montoro, and L. Souza</i>	
Innovative Distributed Multi-Pollutant Pot Gas Treatment System	295
<i>G. Wedde, O. Bjarno, and A. Sorhuus</i>	
Fluoride Emissions Management Guide (FEMG) for Aluminium Smelters	301
<i>N. Tjahyono, Y. Gao, D. Wong, W. Zhang, and M. Taylor</i>	

Enviroment- Emissions/ Anode Effect II

On Continuous PFC Emission Unrelated to Anode Effects	309
<i>X. Chen, W. Li, J. Marks, Q. Zhao, J. Yang, S. Qiu, and C. Bayliss</i>	
Monitoring Air Fluoride Concentration around ALUAR Smelter in Puerto Madryn (Chubut Province, Argentina).....	315
<i>J. Zavatti, C. Moreno, J. Lifschitz, and G. Quiroga</i>	
Reduction of Anode Effect Duration in 400kA Prebake Cells	319
<i>W. Zhang, D. Wong, M. Gilbert, Y. Gao, M. Dorreen, M. Taylor, A. Tabereaux, M. Soffer, X. Sun, C. Hu, X. Liang, H. Qin, J. Mao, and X. Lin</i>	
Sustainable Anode Effect Based Perfluorocarbon Emission Reduction.....	325
<i>N. Dando, L. Sylvain, J. Fleckenstein, C. Kato, V. Van Son, and L. Coleman</i>	
The Initiation, Propagation and Termination of Anode Effects in Hall-Héroult Cells	329
<i>G. Tarcy, and A. Tabereaux</i>	
Towards Eliminating Anode Effects.....	333
<i>A. Al Zarouni, B. Welch, M. Mohamed Al-Jallaf, and A. Kumar</i>	
Correlation between Moisture and HF Formation in the Aluminium Process.....	339
<i>C. Sommerseth, K. Osen, T. Aarhaug, E. Skybakmoen, A. Solheim, C. Rosenkilde, and A. Ratvik</i>	

Particulate Emissions from Electrolysis Cells	345
<i>H. Gaertner, A. Ratvik, and T. Aarhaug</i>	
Investigation of Solutions to Reduce Fluoride Emissions from Anode Butts and Crust Cover Material	351
<i>G. Girault, M. Faure, J. Bertolo, S. Massambi, and G. Bertran</i>	
PFC Survey in Some Smelters of China.....	357
<i>W. Li, X. Chen, Q. Zhao, S. Qiu, and S. Zhang</i>	
Considerations Regarding High Draft Ventilation as an Air Emission Reduction Tool.....	361
<i>S. Broek, N. Dando, S. Lindsay, and A. Moras</i>	

Cells Thermal Balance

Increasing the Power Modulation Window of Aluminium Smelter Pots with Shell Heat Exchanger Technology ...	369
<i>P. Lavoie, S. Namboothiri, M. Dorreen, J. Chen, D. Zeigler, and M. Taylor</i>	
New Approaches to Power Modulation at TRIMET Hamburg	375
<i>T. Reek</i>	
Some Aspects of Heat Transfer Between Bath and Sideledge in Aluminium Reduction Cells.....	381
<i>A. Solheim</i>	
Towards a Design Tool for Self-heated Cells Producing Liquid Metal by Electrolysis	387
<i>S. Poizeau, and D. Sadoway</i>	
Heat Recovery from Aluminium Reduction Cells.....	393
<i>Y. Ladam, A. Solheim, M. Segatz, and O. Lorentsen</i>	
Effects of Composition and Granulometry on Thermal Conductivity of Anode Cover Materials	399
<i>H. Wijayaratne, M. Hyland, M. Taylor, A. Grama, and T. Grouitso</i>	
Restart of 300kA Potlines after 5 Hours Power Failure.....	405
<i>X. Zhao, B. Gao, H. Han, J. Liu, J. Xiao, J. Qian, J. Yan, and D. Wang</i>	
Multiblock Monitoring of Aluminum Reduction Cells Performance	407
<i>J. Tessier, C. Duchesne, and G. Tarcy</i>	

Cells Technology, Development and Sustainability

High Amperage Operation of AP18 pots at Karmøy.....	415
<i>M. Bugge, H. Haakonsen, O. Kobbeltvedt, and K. Paulsen</i>	
Aluminium Smelter Manufacturing Simulation – Can These Bring Real Cost Savings?.....	421
<i>M. Meijer</i>	
Simultaneous Preheating and Fast Restart of 50 Aluminium Reduction Cells in an Idled Potline - A New Soft Restart Technique for a Pot Line	425
<i>A. Mulder, A. Folkers, M. Stam, and M. Taylor</i>	
SWOT Perspectives of Midage Prebaked Aluminium Smelter	431
<i>P. Choudhury, and A. Sharma</i>	
Integrated Approach for Safe and Efficient Plant Layout Development	437
<i>R. Pires, R. Baxter, L. Tikasz, and R. McCulloch</i>	

New Progress on Application of NEUI400kA Family High Energy Efficiency Aluminum Reduction Pot ("HEEP") Technology	443
<i>D. Lu, J. Qin, Z. Ai, and Y. Ban</i>	
Improving Current Efficiency of Aged Reduction Lines at Aluminium Bahrain (Alba).....	449
<i>A. Ahmed, K. Raghavendra, H. Hassan, and K. Ghuloom</i>	
Development of NEUI500kA Family High Energy Efficiency Aluminum Reduction Pot ("HEEP") Technology ..	455
<i>D. Lu, Y. Ban, X. Qi, J. Mao, Q. Yang, and H. Dong</i>	

Cells Process Control

Current Efficiency for Aluminium Deposition from Molten Cryolite-alumina Electrolytes in a Laboratory Cell....	461
<i>G. Haarberg, J. Armoo, H. Gudbrandsen, E. Skybakmoen, A. Solheim, and T. Jentoftsen</i>	

Improvement in Cell Equipment and Design

Retrofit of a Combined Breaker Feeder with a Chisel Bath Contact Detection System to Reduce Anode Effect Frequency in a Potroom.....	467
<i>J. Verreault, R. Gariépy, B. Desgroseilliers, C. Simard, X. Delcorde, C. Turpain, S. Simard, and S. Déry</i>	
Anode Dusting from a Potroom Perspective at Nordural and Correlation with Anode Properties.....	471
<i>H. Gudmundsson</i>	
The Application of Continuous Improvement to Aluminium Potline Design and Equipment	477
<i>W. Paul</i>	
Alcoa STARprobe™	483
<i>X. Wang, B. Hosler, and G. Tarcy</i>	
Active Pot Control using Alcoa STARprobe™	491
<i>X. Wang, G. Tarcy, E. Batista, and G. Wood</i>	
Technology & Equipment for Starting Up & Shutting Down Aluminium Pots under Full Amperage	497
<i>Y. Tao, L. Meng, C. Bin, and Y. Xiaobing</i>	
Study on Solution of Al ₂ O ₃ in Low Temperature Aluminum Electrolyte	503
<i>H. Kan, N. Zhang, and X. Wang</i>	
Applications of New Structure Reduction Cell Technology in Chalco's Smelters	509
<i>F. Liu, S. Gu, J. Wang, and H. Yang</i>	
Transport Numbers in the Molten System NaF-KF-AlF ₃ -Al ₂ O ₃	513
<i>P. Fellner, J. Hiveš, and J. Thonstad</i>	

Cells Process Modeling

Development and Application of an ANSYS Based Thermo-electro-mechanical Collector Bar Slot Design Tool	519
<i>M. Dupuis</i>	
Impact of Amperage Creep on Potroom Busbars and Electrical Insulation: Thermal-Electrical Aspects.....	525
<i>A. Schneider, D. Richard, and O. Charette</i>	

Modern Design of Potroom Ventilation	531
<i>A. Vershenya, U. Shah, S. Broek, T. Plikas, J. Woloshyn, and A. Schneider</i>	
A Preliminary Finite Element Electrochemical Model for Modelling Ionic Species Transport in the Cathode Block of a Hall-Héroult Cell	537
<i>F. Gagnon, D. Ziegler, and M. Fafard</i>	
CFD Modelling of Alumina Mixing in Aluminium Reduction Cells	543
<i>Y. Feng, M. Cooksey, and P. Schwarz</i>	
Bubble Transport by Electro-Magnetophoretic Foces at Anode Botttom of Aluminium Cells.....	549
<i>V. Bojarevics, and A. Roy</i>	
Anodic Voltage Oscillations in Hall-Héroult Cells	555
<i>K. Einarsrud, and E. Sandnes</i>	

Energy Savings by Cell Design Improvements

Electrical Conductivity of the KF-NaF- AlF ₃ Molten System at Low Cryolite Ratio with CaF ₂ Additions	563
<i>A. Redkin, A. Dedyukhin, A. Apisarov, P. Tin'ghaev, and Y. Zaikov</i>	
Study of ACD Model and Energy Consumption in Aluminum Reduction Cells	567
<i>T. Yingfu, and W. Hang</i>	
Modeling of Energy Savings by Using Cathode Design and Inserts	569
<i>R. von Kaenel, and J. Antille</i>	
Experimental Investigation of Single Bubble Characteristics in a Cold Model of a Hall-Héroult Electrolytic Cell.....	575
<i>S. Das, Y. Morsi, G. Brooks, W. Yang, and J. Chen</i>	
Large Gas Bubbles under the Anodes of Aluminum Electrolysis Cells	581
<i>A. Caboussat, L. Kiss, J. Rappaz, K. Vékony, A. Perron, S. Renaudier, and O. Martin</i>	
Initiatives to Reduction of Aluminum Potline Energy Consumption Alcoa Poços de Caldas/Brazil.....	587
<i>A. Abreu, M. Salles, and C. Kato</i>	
Overview of High-Efficiency Energy Saving for Aluminium Reduction Cell.....	591
<i>X. Canming, and Y. Xiaobing</i>	
Cell Voltage Noise Reduction Based on Wavelet in Aluminum Reduction Cell	599
<i>B. Li, J. Chen, X. Zhai, S. Sun, and G. Tu</i>	

Poster Session

Human Factors in Operational and Control Decision Making in Aluminium Smelters	605
<i>Y. Gao, M. Taylor, J. Chen, and M. Hautus</i>	

Aluminum Rolling

Session I

An Investigation of Deformation Behavior of Bimetal Clad Sheets by Asymmetrical Rolling at Room Temperature	615
<i>L. Xiaobing, Z. Guoyin, and D. Qiang</i>	
Coil Build Up Compensation during Cold Rolling to Improve Off-line Flatness	621
<i>L. Almeida Neto, and T. Ayhan</i>	
Through Process Effects on Final Al-sheet Flatness	625
<i>S. Neumann, and K. Karhausen</i>	

Cast Shop for Aluminum Production

Casthouse Productivity and Safety

New Casthouse Smelter Layout for the Production of Small Non-Alloyed Ingots: Three Furnaces/Two Lines.....	635
<i>J. Berlioux, A. Bourgier, and J. Baudrenghien</i>	
Use of Process Simulation to Design a Billet Casthouse.....	641
<i>G. Jaouen</i>	
Optimizing Scrap Reuse as a Key Element in Efficient Aluminium Cast Houses	647
<i>T. Schmidt, J. Migchielsen, D. Ing, and H. Gräb</i>	
Implementation of an Effective Energy Management Program Supported by a Case Study	653
<i>R. Courchée</i>	
Molten Metal Safety Approach through a Network.....	657
<i>C. Pluchon, B. Hannart, L. Jouet-Pastré, J. Mathieu, R. Wood, J. Riquet, F. Fehrenbach, G. Ranaud, M. Bertherat, and J. Hennings</i>	
Improved Monolithic Materials for Lining Aluminum Holding & Melting Furnaces.....	663
<i>A. Wynn, J. Coppack, T. Steele, and K. Moody</i>	

Direct Chill Casting

Cold Cracking during Direct-chill Casting.....	669
<i>D. Eskin, M. Lalpoor, and L. Katgerman</i>	
Surface Defects Structures on Direct Chill Cast 6xxx Aluminium Billets	675
<i>M. Erdegren, and T. Carlberg</i>	
Effect of Cooling Water Quality on Dendrite Arm Spacing of DC Cast Billets.....	681
<i>S. Mohapatra, S. Nanda, and A. Palchowdhury</i>	
Mould Wall Heat Flow Mechanism in a DC Casting Mould	687
<i>A. Prasad, and I. Bainbridge</i>	
Productivity Improvements at Direct Chill Casting Unit in Aluminium Bahrain (ALBA).....	693
<i>A. Noor, S. Chateeriji, and A. Ahmed</i>	

The Coupling of Macrosegregation with Grain Nucleation, Growth and Motion in DC Cast Aluminum Alloy Ingots	699
<i>M. Založnik, A. Kumar, H. Combeau, M. Bedel, P. Jarry, and E. Waz</i>	
Investment Casting of Surfaces with Microholes and Their Possible Applications	705
<i>T. Ivanov, A. Buehrig-Polaczek, U. Vroomen, C. Hartmann, A. Gillner, K. Bobzin, J. Holtkamp, N. Bagcivan, and S. Theiss</i>	
Using SEM and EDX for a Simple Differentiation of α - and β -AlFeSi-Phases in Wrought Aluminum Billets	711
<i>M. Rosefort, C. Matthies, H. Buck, and H. Koch</i>	

Dross Formation, Control and Handling

Oxidation of AlMg in Dry and Humid Atmospheres	719
<i>A. Kvithyld, D. Stevens, S. Wilson, and T. Engh</i>	
Study of Early Stage Interaction of Oxygen with Al; Methods, Challenges and Difficulties.....	725
<i>B. Fateh, G. Brooks, M. Rhamdhani, J. Taylor, J. Davis, and M. Lowe</i>	
Quality Assessment of Recycled Aluminium	731
<i>D. Dispinar, A. Kvithyld, and A. Nordmark</i>	

Melt Quality Control

In-Line Salt-ACD™: A Chlorine-Free Technology for Metal Treatment	739
<i>P. Robichaud, C. Dupuis, A. Mathis, P. Coté, and B. Maltais</i>	
The Effect of TiB ₂ Granules on Metal Quality	745
<i>M. Mohamed Al-Jallaf, M. Hyland, B. Welch, A. Al Zarouni, and F. Abdullah</i>	
Thermodynamic Analysis of Ti, Zr, V and Cr Impurities in Aluminium Melt.....	751
<i>A. Khaliq, M. Rhamdhani, G. Brooks, and J. Grandfield</i>	
Current Technologies for the Removal of Iron from Aluminum Alloys	757
<i>L. Zhang, J. Gao, and L. Damdah</i>	
Electromagnetically Enhanced Filtration of Aluminum Melts	763
<i>M. Kennedy, S. Akhtar, R. Aune, and J. Bakken</i>	
A Review of the Development of New Filter Technologies Based on the Principle of Multi Stage Filtration With Grain Refiner Added in the Intermediate Stage.....	769
<i>J. Courtenay, S. Instone, and F. Reusch</i>	
Wettability of Aluminium with SiC and Graphite in Aluminium Filtration.....	775
<i>S. Bao, A. Kvithyld, T. Engh, and M. Tangstad</i>	
Study of Microporosity Formation under Different Pouring Conditions in A356 Aluminum Alloy Castings.....	783
<i>L. Yao, S. Cockcroft, D. Maijer, J. Zhu, and C. Reilly</i>	

Grain Refinement, Alloying, Solidification and Casting

Hycast Gas Cushion (GC) Billet Casting System.....	793
<i>I. Steen, and A. Hakonsen</i>	

Studies of Fluid Flow and Meniscus Behavior during Horizontal Single Belt Casting (HSBC) of Thin Metallic Strips.....	797
<i>D. Li, J. Gill, M. Isac, and R. Guthrie</i>	
Development of Alba High Speed Alloy	803
<i>A. Ahmed, J. Hassan, G. Martin, and K. Ghosh</i>	
Dissolution Studies of Si Metal in Liquid Al under Different Forced Convection Conditions	809
<i>M. Seyed Ahmadi, S. Argyropoulos, M. Bussmann, and D. Doutré</i>	
Modification and Grain Refinement of Eutectics to Improve Performance of Al-Si Castings.....	815
<i>M. Felberbaum, and A. Dahle</i>	
Production of Al-Ti-C Grain Refiners with the Addition of Elemental Carbon and K_2TiF_6	821
<i>F. Toptan, I. Kerti, S. Daglilar, A. Sagin, O. Karadeniz, and A. Ambarkutuk</i>	
Effect of Mechanical Vibrations on Microstructure Refinement of Al-7mass% Si Alloys	827
<i>T. Tamura, T. Matsuki, and K. Miwa</i>	
Predicting the Response of Aluminum Casting Alloys to Heat Treatment.....	831
<i>C. Wu, and M. Makhlof</i>	

Electrode Technology for Aluminium Production

Anode Baking

Determination of Coke Calcination Level and Anode Baking Level – Application and Reproducibility of L-sub-c Based Methods	841
<i>S. Rørvik, L. Lossius, and A. Ratvik</i>	
Operation of an Open Type Anode Baking Furnace with a Temporary Crossover	847
<i>E. Cobo, L. Beltramino, J. Artola, J. Rey Boero, P. Roy, and J. Bigot</i>	
Recent Developments in Anode Baking Furnace Design	853
<i>D. Severo, V. Gusberti, P. Sulger, F. Keller, and M. Meier</i>	
Sohar Aluminium's Anode Baking Furnace Operation.....	859
<i>S. Al Hosni, J. Chandler, O. Forato, F. Morales, C. Jonville, and J. Bigot</i>	
Meeting the Challenge of Increasing Anode Baking Furnace Productivity.....	865
<i>F. Ordronneau, M. Gendre, L. Pomerleau, N. Backhouse, A. Berkovich, and X. Huang</i>	
Wireless Communication for Secured Firing and Control Systems in Anode Baking Furnaces	871
<i>N. Fiot, and C. Coulaud</i>	
Full Control of Pitch Burn during Baking: It's Impact on Anode Quality, Operational Safety, Maintenance and Operational Costs	875
<i>D. Maiwald, D. Di Lisa, and P. Mnikoleiski</i>	
High Performance Sealing for Anode Baking Furnaces.....	881
<i>P. Mahieu, S. Neple, N. Fiot, I. Ofico, and M. Eufrazio</i>	

Anode Raw Materials and Green Carbon

Property Profile of Lab-scale Anodes Produced with 180°C Mettler Coal Tar Pitch.....	889
<i>W. Boenigk, C. Boltersdorf, F. Lindner, and J. Stiegert</i>	
Quality and Process Performance of Rotary Kilns and Shaft Calciners	895
<i>L. Edwards</i>	
Sub-surface Carbon Dioxide Reaction in Anodes	901
<i>D. Ziegler</i>	
Paste Quality Improvements at Alcoa Poços de Caldas Plant	907
<i>B. Vry, C. Kato, J. Araujo, F. Ribeiro, and A. Abreu</i>	
Prebaked Anode from Coal Extract (2) - Effects of the Properties of Hypercoal-coke on the Performance of Prebaked Anodes	913
<i>M. Hamaguchi, N. Okuyama, N. Komatsu, J. Koide, K. Kano, T. Shishido, K. Sakai, and T. Inoue</i>	
The New Generation of Vertical Shaft Calciner Technology	917
<i>J. Zhao, Q. Zhao, and Q. Zhao</i>	

Petroleum Coke VBD

Historical and Future Challenges with the Vibrated Bulk Density Test Methods for Determining Porosity of Calcined Petroleum Coke	925
<i>J. Panchal, M. Wyborney, and J. Rolle</i>	
Prediction of Calcined Coke Bulk Density	931
<i>M. Dion, H. Darmstadt, N. Backhouse, F. Cannova, and M. Canada</i>	
Calcined Coke Particle Size and Crushing Steps Affect Its VBD Result	937
<i>F. Cannova, M. Canada, and B. Vitchus</i>	
Bulk Density - Overview of ASTM and ISO Methods with Examples of Between Laboratory Comparisons	941
<i>L. Lossius, B. Spencer, and H. Øye</i>	
Improving the Repeatability of Coke Bulk Density Testing.....	947
<i>L. Edwards, M. Lubin, and J. Marino</i>	
ASTM D7454 Vibrated Bulk Density Method – Principles and Limitations	953
<i>F. Laplante, and L. Duchesneau</i>	
Vibrated Bulk Density (VBD) of Calcined Petroleum Coke and Implications of Changes in the ASTM Method D4292	959
<i>B. Spencer, L. Johnsen, D. Kirkpatrick, D. Clark, and M. Baudino</i>	

Anode Quality and Rodding Processes

Multivariate Monitoring of the Prebaked Anode Manufacturing Process and Anode Quality	967
<i>J. Lauzon-Gauthier, C. Duchesne, J. Tessier, K. Cantin, and I. Petit</i>	
Characterization of a Full Scale Prebaked Carbon Anode using X-Ray Computerized Tomography.....	973
<i>D. Picard, H. Alamdari, D. Ziegler, P. St-Arnaud, and M. Fafard</i>	

FEM Analysis of the Anode Connection in Aluminium Reduction Cells	979
<i>S. Beier, J. Chen, M. Fafard, and H. Fortin</i>	
Development of Industrial Benchmark Finite Element Analysis Model to Study Energy Efficient Electrical Connections for Primary Aluminium Smelters.....	985
<i>D. Molenaar, K. Ding, and A. Kapoor</i>	
Real Time Temperature Distribution During Sealing Process and Room Temperature Air Gap Measurements of a Hall-Hérout Cell Anode	991
<i>O. Trempe, D. Larouche, D. Ziegler, M. Guillot, and M. Fafard</i>	
Effects of High Temperatures and Pressures on Cathode and Anode Interfaces in a Hall-Heroult Electrolytic Cell.....	997
<i>L. St-Georges, L. Kiss, J. Bouchard, M. Rouleau, and D. Marceau</i>	
New Apparatus for Characterizing Electrical Contact Resistance and Thermal Contact Conductance.....	1003
<i>N. Kande, H. Fortin, S. Chénard, G. Gauvin, M. Martin, and M. Fafard</i>	
Carbon Anode Modeling for Electric Energy Savings in the Aluminium Reduction Cell	1009
<i>D. Andersen, and Z. Zhang</i>	

Cathode Design and Operation

Preheating Collector Bars and Cathode Blocks Prior to Rodding with Cast Iron by Passing an AC Current Through the Collector Bars	1017
<i>E. Jensen, H. Bjørnstad, and J. Hansen</i>	
Development and Application of an Energy Saving Technology for Aluminum Reduction Cells	1023
<i>P. Jianping, F. Naixiang, F. Shaofeng, L. Jun, and Q. Xiquan</i>	
Study of Electromagnetic Field in 300kA Aluminium Reduction Cells with Innovation Cathode Structure.....	1029
<i>B. Li, X. Zhang, S. Zhang, F. Wang, and N. Feng</i>	
Evaluation of the Thermophysical Properties of Silicon Carbide, Graphitic and Graphitized Carbon Sidewall Lining Materials Used in Aluminium Reduction Cell in Function of Temperature.....	1035
<i>A. Khatun, and M. Desilets</i>	
Advanced Numerical Simulation of the Thermo-Electro-Mechanical Behaviour of Hall-Hérout Cells under Electrical Preheating.....	1041
<i>D. Marceau, S. Pilote, M. Désilets, L. Hacini, J. Bilodeau, and Y. Caratini</i>	
Influence of Technological and Constructive Parameters on the Integrity of the Bottom of Aluminum Reduction Cells during Flame Preheating.....	1047
<i>A. Arkhipov, G. Arkhipov, and V. Pingin</i>	
Creep Behaviors of Industrial Graphitic and Graphitized Cathodes during Modified Rapoport Tests	1053
<i>W. Wang, J. Xue, J. Feng, Q. Liu, L. Zhan, H. He, and J. Zhu</i>	

Cathode Materials and Wear

Measurement of Cathode Surface Wear Profiles by Laser Scanning	1061
<i>E. Skybakmoen, S. Rørvik, A. Solheim, K. Holm, P. Tiefenbach, and O. Ostrem</i>	
Coke Selection Criteria for Abrasion Resistant Graphitized Cathodes	1067
<i>R. Perruchoud, W. Fischer, M. Meier, and U. Mannweiler</i>	

Determination of the Effect of Pitch-Impregnation on Cathode Erosion Rate	1073
<i>P. Patel, Y. Sato, and P. Lavoie</i>	
Simplifying Protection System to Prolong Cell Life	1079
<i>M. Mohamed Al-Jallaf, M. Hyland, B. Welch, and A. Al Zarouni</i>	
Aluminate Spinel as Sidewall Linings for Aluminum Smelters.....	1085
<i>X. Yan, R. Mukhlis, M. Rhamdhani, and G. Brooks</i>	
A New Ramming Paste with Improved Potlining Working Conditions	1091
<i>B. Allard, R. Paulus, and G. Billat</i>	
Towards a Better Understanding of Carburation Phenomenon	1097
<i>M. Lebeuf, M. Coulombe, B. Allard, and G. Soucy</i>	
Characterization of Sodium and Fluorides Penetration into Carbon Cathodes by Image Analysis and SEM-EDS Techniques.....	1103
<i>Y. Gao, J. Xue, J. Zhu, K. Jiao, and G. Jiang</i>	

Inert Anodes and Wettable Cathodes

Pressureless Sintering of TiB ₂ -based Composites using Ti and Fe Additives for Development of Wettable Cathodes.....	1111
<i>H. Heidari, H. Alamdari, D. Dubé, and R. Schulz</i>	
Furan Resin and Pitch Blends as Binders for TiB ₂ -C Cathodes	1117
<i>H. Zhang, J. Hou, X. Lü, Y. Lai, and J. Li</i>	
Influence of Cobalt Additions on Electrochemical Behaviour of Ni-Fe-Based Anodes for Aluminium Electrowinning	1123
<i>V. Singleton, B. Welch, and M. Skyllas-Kazacos</i>	
Effects of the Additive ZrO ₂ on Properties of Nickel Ferrite Cermet Inert Anode.....	1129
<i>X. Zhang, G. Yao, Y. Liu, J. Ma, and Z. Zhang</i>	
Effect of Sintering Atmosphere on Phase Composition and Mechanical Property of 5Cu/(10NiO-NiFe ₂ O ₄) Cermet Anodes for Aluminum Electrolysis	1135
<i>Z. Zou, C. Wei, Z. Tian, K. Liu, H. Zhang, Y. Lai, and J. Li</i>	

Poster Session - Electrode

Influence of Ultrafine Powder on the Properties of Carbon Anode Used in Aluminum Electrolysis.....	1143
<i>X. Jin, D. Songyun, L. Jie, L. Yanqing, and L. Yexiang</i>	
Preparation NiFe ₂ O ₄ Matrix Inert Anode Used in Aluminum Electrolysis by Adding Nanopowder	1149
<i>Z. Zhang, G. Yao, Y. Liu, and X. Zhang</i>	
Cold Water Model Simulation of Aluminum Liquid Fluctuations Induced by Anodic Gas in New Tape of Cathode Structure Aluminum Electrolytic Cell.....	1155
<i>Y. Liu, T. Zhang, Z. Dou, H. Wang, G. Lv, Q. Zhao, N. Feng, and J. He</i>	
Effects of Physical Properties of Anode Raw Materials on the Paste Compaction Behavior.....	1161
<i>K. Azari, H. Ammar, H. Alamdari, D. Picard, M. Fafard, and D. Ziegler</i>	

Furnace Efficiency – Energy and Throughput

Session I

Furnaces Designed for Fuel Efficiency	1169
<i>D. White</i>	
Latest Trends in Post Consumer and Light Gauge Scrap Processing to include Problematic Materials such as UBC, Edge Trimming and Loose Swarf.....	1173
<i>F. Niedermair, and G. Wimroither</i>	
Investigation of Heat Transfer Conditions in a Reverberatory Melting Furnace by Numerical Modeling.....	1179
<i>A. Buchholz, and J. Rødseth</i>	
Oxyfuel Optimization using CFD Modeling	1185
<i>T. Niehoff, and S. Viyyuri</i>	
Operational Efficiency Improvements Resulting from Monitoring and Trim of Industrial Combustion Systems	1189
<i>J. Oakes, and D. Bratcher</i>	
New Technology for Electromagnetic Stirring of Aluminum Reverberatory Furnaces	1193
<i>J. Herbert, and A. Peel</i>	
Evaluation of Effects of Stirring in a Melting Furnace for Aluminum.....	1199
<i>K. Matsuzaki, T. Shimizu, Y. Murakoshi, and K. Takahashi</i>	
Business Analysis of Total Refractory Costs.....	1205
<i>C. Belt</i>	
Improved Furnace Efficiency through the Use of Refractory Materials.....	1211
<i>J. Hemrick, A. Rodrigues-Schroer, D. Colavito, and J. Smith</i>	
Study on the Energy-saving Technology of Chinese Shaft Calciners	1217
<i>G. Lang, C. Bao, S. Gao, R. Logan, Y. Li, and J. Wu</i>	
Author Index.....	1221
Subject Index	1227
