PART B

ASME/BATH FLUID POWER SYMPOSIUM: MODELING AND ANALYSIS
DSCC2009-2561 ........................................................................................................ 913
Numerical Simulation of the Performance of the SC-89 Jet Impact System
  Jianwang Chen, Kun Yin, Jianming Peng, Linyi Gu, and Bo Zhou

xvii
Second Order Polynomial Model for Fluid Dynamics in High Pressure
Juho-Pekka Karjalainen, Reijo Karjalainen, Kalevi Huhtala, and Matti Vilenius

Internal Leakage Diagnosis in Hydraulic Actuators Using Wavelet Transforms
Amin Yazdanpanah Goharrizi, Nariman Sepehri, and Yan Wu

Fundamentals of Mass Conservative System Simulation in Fluid Power
Christian Riedel, Christian Stammen, and H. Murrenhoff

Identification of the Input-Output Behavior of Hydraulic Two-Port Networks
Bernhard Manhartsgruber

A Novel Thermal Model for the Piston/Cylinder Interface of Piston Machines
Matteo Pelosi and Monika Ivantysynova

HUMAN-IN-THE-LOOP SYSTEMS

Stochastic Estimation of Multi-Variable Human Ankle Mechanical Impedance
Mohammad A. Rastgaar, Patrick Ho, Hyunglae Lee, Hermano Igo Krebs, and Neville Hogan

Lower Extremity Exoskeleton Reduces Back Forces in Lifting
Michael Wehner, David Rempel, and Homayoon Kazerooni

Modeling of Biodynamic Feedthrough in Backhoe Operation
Heather C. Humphreys, Wayne J. Book, and James D. Huggins

A General Framework for Control Systems Approach to Collaborative Human-Machine Systems
Yingzi Lin and Hua Cai

Development of an Internet-Distributed Hardware-In-The-Loop Simulation Platform for an Automotive Application
Tulga Ersal, Mark Brudnak, Ashwin Salvi, Jeffrey L. Stein, Zoran Filipi, and Hosam K. Fathy

Incorporating Operator States in Driver Assistance Systems Control
Jeffrey Breugelmans, Yingzi Lin, and Hua Cai
A Hybrid Optimal Control Strategy for a Smart Prosthetic Hand
Cheng-Hung Chen, D. Subbaram Naidu, Alba Perez-Gracia, and Marco P. Schoen

On the Geometric Characteristics of Cell Membrane Using Rotationally Oscillating Drill (Ros-Drill®)
Jhon Diaz, Mehdi Karzar Jeddii, Nejat Olgac, Tai-Hsi Fan, and Ali Fuat Ergenc

Modeling and Control of the Oxygen Saturation in Neonatal Infants
Timothy Keim, Ramak Amjad, and Roger Fales

Modeling and Diagnostics of Heart Assist Devices
Taoufik Wassar, Matthew A. Franchek, Hassene Jammoussi, Ralph Metcalfe, Rafik Borji, Cedric Benkowski, O. Howard Frazier, Robert Benkowski, William E. Cohn, Egemen Tuzun, and Steven M. Parnis

Wet Shape Memory Alloy Actuated Robotic Heart
Joel Ertel and Stephen Mascaro

Analysis of Hybrid Electric/Thermofluidic Control for Wet Shape Memory Alloy Actuators
Leslie Flemming and Stephen Mascaro

Model-Free Adaptive On-Off Step Controller for Piezoelectric Micro-Robots
Bongsu Hahn and Kenn Oldham

Adaptive Calibration and Control of Cascade Processes With Unknown Measurement Model and Actuator Dynamics and Its Application to Paper Manufacturing
Zeyu Liu and Perry Li

Active Vibration Cancellation for Tire Road Friction Estimation
Gurkan Erdogan, Lee Alexander, and Rajesh Rajamani

Adaptive Robust Control for a Class of Nonlinear Uncertain System With Unknown Input Backlash
Jian Guo, Bin Yao, Jun Jiang, and Qingwei Chen

An Output Feedback Based Adaptive Robust Fault Tolerant Control Scheme for a Class of Nonlinear Systems
Shreekant Gayaka and Bin Yao
Indirect Adaptive Robust Control of Uncertain Systems With Unknown Asymmetric Input Deadband Using a Smooth Inverse
   Amit Mohanty and Bin Yao

MECHATRONICS APPLICATIONS

Dynamic Systems With SES Process for Vehicle Integration
   Kevin Chang, Sung Kwon, and Kasra Naghshineh

Target Tracking Using the Smooth Variable Structure Filter
   Andrew Gadsden and Saeid Habibi

Sensing and Estimation on a Modular Testbed for Swarm Robotics
   Gregory K. Fricke, Devendra P. Garg, and Dejan Milutinovic

Crane Operation Using Hand-Motion and Machine Vision
   Kelvin Chen Chih Peng, William Singhose, and Jonathan Fonseca

Design of a Small-Scale Prototype for a Stabilized Permanent Magnet Levitated Vehicle
   Geoffrey A. Long, O. James Fiske, and Brad E. Paden

Quantitative Indicators of Simulator Motion Cue Quality
   Nicolas Ochoa Lleras and Carlos F. Rodriguez

CONTROL, OPTIMIZATION AND IDENTIFICATION OF ADVANCED AUTOMOTIVE SYSTEMS

Discrete Partitioning and Coverage Control With Gossip Communication
   Joseph W. Durham, Ruggero Carli, Paolo Frasca, and Francesco Bullo

Electro-Thermal Battery Modeling and Identification for Automotive Applications
   Yiran Hu, Benjamin J. Yurkovich, Stephen Yurkovich, and Yann Guezennec

Lithium Ion Dynamic Battery Pack Model and Simulation for Automotive Applications
   Benjamin J. Yurkovich and Yann Guezennec

Model Predictive Control as an Energy Management Strategy for Hybrid Electric Vehicles
   Balaji Sampathnarayanan, Lorenzo Serrao, Simona Onori, Giorgio Rizzoni, and Steve Yurkovich
Automotive Battery Prognostics Using Dual Extended Kalman Filter
Matteo Rubagotti, Simona Onori, and Giorgio Rizzoni

Optimality Assessment of Equivalent Consumption Minimization Strategy for PHEV Applications
Pinak Tulpule, Stephanie Stockar, Vincenzo Marano, and Giorgio Rizzoni

POWERTRAIN CONTROL
Combined Component Swapping Modularity for a VCT Engine Controller
Melih Çakmakci and A. Galip Ulsoy

Optimal Control of Complex Air-Path Systems for Advanced Diesel Engines
Fengjun Yan, Benjamin Haber, and Junmin Wang

Pseudo-Causal Tracking Control of a Nonminimum Phase System
Pengfei Wang, M. Necip Sahinkaya, and Sam Akehurst

Hybrid-Dynamic Modeling and Characterization of Mechanical Transmissions With Unidirectional Coupling
Hanz Richter and Rachel E. Maynard

Variation-Based Transparency Analysis of an Internet-Distributed Hardware-in-the-Loop Simulation Platform for Vehicle Powertrain Systems
Tulga Ersal, Mark Brudnak, Jeffrey L. Stein, and Hosam K. Fathy

Hybrid Adaptive Friction Compensation of Indirect Drive Trains
Wenjie Chen, Kyoungchul Kong, and Masayoshi Tomizuka

Effects of Remote Control on Usability of Hydraulic Excavator
Jarno Uusisalo, Kalevi Huhtala, and Matti Vilenius

Modeling and Control of Interconnected Dimensionless Dynamic Systems
Scott Manwaring and Andrew G. Alleyne

Pressure Control for a Continuous Micro-Flow Seawater Hydraulic System
Jiwei Hou, Shilun Li, Ying Chen, and Jianwang Chen
DSCC2009-2608 ................................................................. 1257
Modal Control of an Electrohydrostatic Flight Simulator Motion System
Andrew R. Plummer and Paulo Serena Guinzio

DSCC2009-2634 ................................................................. 1265
Experimental Evaluation of Two Bilateral Control Schemes Applied to a Tele-Operated
Hydraulic Actuator
Kurosh Zarei-nia, Amin Yazdanpanah Goharrizi, Nariman Sepehri, and Wai-keung Fung

DSCC2009-2769 ................................................................. 1273
Modeling and Control of a High Pressure Combined Air/Fuel Injection System
Chao Yong and Eric J. Barth

ASME/BATH FLUID POWER SYMPOSIUM: SYSTEM DESIGN
DSCC2009-2505 ................................................................. 1281
An Actively Controlled Hydraulic Carbody Centering System for the Lateral Suspensions of
High Speed Trains
Giovanni Jacazio, Alberto Magnani, Laura Gastaldi, and Gualtiero Balossini

DSCC2009-2583 ................................................................. 1289
Digital Clay Force Observer Design and Shape Editing Concept
Cheng Shu Ngoo and Wayne J. Book

DSCC2009-2645 ................................................................. 1293
Noise Reduction by Means of Non-Uniform Placement of Pistons in an Fluid Power Machine
Liselott Ericson, Andreas Johansson, and Jan-Ove Palmberg

DSCC2009-2654 ................................................................. 1301
Virtual Development Environment for Fluid Power Mechatronic Systems
Torsten Verkoyen, René von Dombrowski, and Hubertus Murrenhoff

DSCC2009-2730 ................................................................. 1309
Reducing Piston Mass in a Free Piston Engine Compressor by Exploiting the Inertance of a
Liquid Piston
Joel A. Willhite and Eric J. Barth

DSCC2009-2749 ................................................................. 1315
Optimal Efficiency-Power Relationship for an Air Motor-Compressor in an Energy Storage
and Regeneration System
Caleb J. Sancken and Perry Y. Li

AUTONOMOUS SYSTEMS
DSCC2009-2529 ................................................................. 1323
Control and Validation of Automated Lane Centering and Lane Changing Maneuver
Jin-Woo Lee and Bakhtiar Litkouhi

DSCC2009-2594 ................................................................. 1331
A Multiattribute Utility Approach to Target Assignment
Xi Chen, Ali E. Abbas, and Dusan M. Stipanovic

NONLINEAR DYNAMICS AND CONTROL
DSCC2009-2511 ................................................................. 1415
Observer-Based Control of Nonlinear Time-Delay Systems in Lower-Triangular Form
Salim Ibrir

DSCC2009-2532 ................................................................. 1421
Gain Scheduling-Inspired Control for Nonlinear Partial Differential Equations
Antranik A. Siranosian, Miroslav Krstic, Andrey Smyshlyaev, and Matt Bement

DSCC2009-2620 ................................................................. 1429
Observer-Based Output Feedback Control of Nonlinear Systems Non-Affine in the
Unmeasured States
Yannick Morel and Alexander Leonessa

DSCC2009-2647 ................................................................. 1437
On Internal Resonance of Nonlinear Nonuniform Beams
Dumitru I. Caruntu

DSCC2009-2685 ................................................................. 1445
Subharmonic Resonances of Piezoelectrically Actuated Microcantilevers
S. Nima Mahmoodi, Nader Jalili, and Mehdi Ahmadian

DSCC2009-2783 ................................................................. 1453
Connectability-Based Controllability of Large Scale Nonlinear Dynamic Thermal Systems
Rahmat Shoureshi and Virdi Permana

MECHATRONICS AND CONTROL FOR NANO PRECISION MOTION
DSCC2009-2664 ................................................................. 1461
Direct Adaptive Disturbance Observer Design for Rejecting the Narrow-Band Disturbance
With Unknown Frequency in Hard Disk Drives
Qixing Zheng and Masayoshi Tomizuka

DSCC2009-2726 ................................................................. 1469
Identification in Iterative Learning Control: A Model Based, Iteration Varying Learning
Filter for Precision Control
Benjamin T. Fine, Hoday Stearns, and Masayoshi Tomizuka

DSCC2009-2756 ................................................................. 1477
Design and Implementation of Dual-Stage Track-Following Control for Hard Disk Drives
Jianbin Nie and Roberto Horowitz

DSCC2009-2765 ................................................................. 1485
Analysis and Control of Halbach Linear Motor for Nanopositioning
Yigang Wang, Kevin C. Chu, and Tsu-Chin Tsao

DSCC2009-2776 ................................................................. 1493
Adaptive Control for Deterministic Trajectory Tracking and Random Disturbance Rejection
With Application to Nano-Precision Positioning of a Halbach Linear Motor
Yigang Wang, Kevin C. Chu, and Tsu-Chin Tsao
A Simulation Study of a Reduced-Gravity Simulator for Simulating Human Jumping and Walking in a Reduced-Gravity Environment

Qi Lu, Jesse McAvoy, and Ou Ma

Dynamics Analysis and Control Method of a Novel Spherical Robot

Hanxu Sun, Yili Zheng, and Qingxuan Jia

Adaptive Disturbance Cancellation for Indirect Drive Robots Using Joint Sensing Information

Cheng-Huei Han and Masayoshi Tomizuka

LPV-Based-Method Aiming at a Win-Win Situation for Analytical Control Theories and Intelligent Optimization Methodologies

Kazuhiko Hiramoto

Control-Oriented Modeling of a Solid-Oxide Fuel Cell Stack Using an LPV Model Structure

Borhan M. Sanandaji, Tyrone L. Vincent, Andrew Colclasure, and Robert J. Kee

Decentralized LPV Gain-Scheduled PD Control of a Robotic Manipulator

H. Abbas, S. M. Hashemi, and H. Werner

Parameter Varying Control of an Electrostatic MEMS Actuator

Farzad A. Shirazi, Javad Mohammadpour, and Karolos M. Grigoriadis

Anti-Windup LPV Control of Magneto-Rheological Dampers

Mona Meisami-Azad, Javad Mohammadpour, and Karolos M. Grigoriadis

An LPV Approach to Obstacle-Sensitive Trajectory Regulation

Mazen Farhood and Eric Feron

An Autonomous Pneumotronic System for Enhancing the Braking Capability of Long Freight Trains

Giovanni Jacazio and Laura Gastaldi
Experimental Investigation Into Improved Wrapper Control of Hot Strip Steel Rolling
  D. Li Davies, J. Watton, Y. Xue, and G. A. Williams

Energy Efficient Fluid Power in Autonomous Legged Robotics
  Emanuele Guglielmino, Claudio Semini, Yousheng Yang, Darwin Caldwell,
  Helmut Kogler, and Rudolf Scheidl

Hybrid Control of a Pneumatic Gantry Robot for Contour Tracking:
  Proportional Pressure versus Proportional Flow Control
  Mohammed Abu-Mallouh, Brian Surgenor, and Sasan Taghizadeh

Passive Bilateral Tele-Operation and Human Power Amplification With Pneumatic Actuators
  Venkat Durbha and Perry Y. Li

Effect of Installed Hydraulic Corner Power on the Energy Consumption and Performance of
  Multi-Actuator Displacement Controlled Mobile Machines
  Joshua Zimmerman and Monika Ivantysynova
