TABLE OF CONTENTS

COLLABORATION SYSTEMS AND TECHNOLOGIES

ADVANCES IN TEACHING AND LEARNING TECHNOLOGIES

A Cross-Cultural Collaborative Learning Project: Learning about Cultures, Research Methods .............................................. 1
Margaret Kersten, Trudy O’Brien

A Study of Structured Lecture Podcasting to Facilitate Active Learning ................................................................. 10
David J. Nkles, Daniel D. Sathers

Ammunition Multimedia Encyclopedia (AME): A Case Study ....................................................................................... 20
J. Lucco, R. Sharda, J. Buffier, U. Shimp, D. Biras, A. Clower

Collaborative Learning through Wireless Grids ...................................................................................................... 30
Angela U. Ancuttine-Rixie, Lee W. McPherson, Kath V. Small

Victor Kapelson

Investigating the Trend of Non-Task Social Interactions in Online Collaborative Learning Environments ................. 50
Balak Antal

Mapping Learning Aids, Introducing Learning Styles as a Moderator ........................................................................... 58
Margot Kasner, Brigitte Sang

Matching the Affordances of Wikis to Collaborative Learning: A Case Study of IT Project Students ................... 68
Andrew U. Kuswara, Debbie Richards

Using Interactive Graphical Tools to Overcome the "Collage Effect" in Collaborative Learning Environments .......... 78
Christopher K. Stude, Daniel D. Sathers

Virtual Team Role Play Using Second Life for Teaching Business Process Concepts .................................................. 88
Amit Budru, Bjørn Iaister, Ashley Aiken, Vanessa Chang, Berit Helgheim

COGNITIVE PERSPECTIVES ON COLLABORATION

A Field Investigation of the Nostalgia Effect ................................................................................................................. 96
Brady Sindhav, Bruce A. Reinig, Robert O. Briggs

A Team Mental Model Perspective of Pre-Quantitative Risk .................................................................................... 104
Lynne P. Cooper

Cognitive Load in Collaboration - Brainstorming .................................................................................................. 114
Gwendolyn L. Kolfschoten

Developing Collaboration Awareness Support from a Cognitive Perspective .......................................................... 123
Pedro Antunes, António Ferreira

The Role of Group Cognition in Enterprise Architecting .......................................................................................... 133
J. Alberts Egip flashes, Frank Armour, Wei Peng Bob

COLLABORATION AND COMPETITION IN GLOBAL SOFTWARE DEVELOPMENT

Antecedents of ISD Offshoring Outcomes: Exploring Differences between India, China ......................................... 143
Kai Spohrer, Armin Heinzel, Yan Li

On Bilateral Effort Contribution to IT Outsourcing ................................................................................................ 153
Gang Pang, Rammohan Konerati

Onshore-Offshore Competition: A Stage Model ...................................................................................................... 161
Suling Zhang

COLLABORATION IN VIRTUAL WORLDS AND METAVERSES

Examining Work Performance in Immersive Virtual Environments versus Face-to-Face Physical Environments through Laboratory Experimentation .................................................. 169
Richard Borgin, Bryan Hudgens, Mark Nissen

If You Build It Will They Come? An Empirical Investigation of Facilitators, Inhibitors of Hedonic Virtual World Acceptance ........................................................................................................ 179
Samuel Geh, Tom You

Leader-Member Relationships in Virtual World Teams ......................................................................................... 188
Samuel Geh, Molly Wasko
