TURBULENT FLOWS: ISSUES AND PERSPECTIVES
BIO-INSPIRED FLUID MECHANICS
CFD VERIFICATION AND VALIDATION
DEVELOPMENT AND APPLICATIONS OF IMMERSED BOUNDARY METHODS
DNS, LES AND HYBRID RANS/LES METHODS
ISSUES AND PERSPECTIVES IN GROUND VEHICLE FLOWS
NONINVASIVE MEASUREMENTS IN SINGLE AND MULTIPHASE FLOWS
UNCERTAINTY QUANTIFICATION IN COMPUTATIONAL MECHANICS

presented at
ASME 2010 3rd JOINT US-EUROPEAN FLUIDS ENGINEERING DIVISION SUMMER MEETING
AUGUST 1–5, 2010
MONTREAL, CANADA

sponsored by
THE FLUIDS ENGINEERING DIVISION, ASME
PART C

INTERNATIONAL SYMPOSIUM ON TURBULENT FLOWS: ISSUES AND PERSPECTIVES

FEDSM/ICNMM2010-30015 ................................................................. 1995
PIV Measurements of Turbulent Flow in a Channel With Solid or Perforated Ribs
   Lei Wang, Mirko Salewski, and Bengt Sundén

FEDSM/ICNMM2010-30184 ................................................................. 2005
Water Jet Performance Variation for Intrusion of a Cylinder Central-Body
   Can Kang, Shengnan Xiao, Dong Liu, and Feng Zhang

FEDSM/ICNMM2010-30278 ................................................................. 2011
PIV Measurements of the Turbulent Secondary Flow in a Three-Dimensional Wall Jet
   Lhendup Namgyal and Joseph W. Hall

FEDSM/ICNMM2010-30351 ................................................................. 2019
Extended Self-Similarity in Drag-Reduced Turbulent Flow of Viscoelastic Fluid
   Feng-Chen Li, Hong-Na Zhang, Wei-Hua Cai, and Juan-Cheng Yang

FEDSM/ICNMM2010-30459 ................................................................. 2025
The Influence of Polymers on Coherent Structures in Decaying Homogeneous Isotropic Turbulence
   Wei-Hua Cai, Hong-Na Zhang, and Feng-Chen Li

FEDSM/ICNMM2010-30518 ................................................................. 2033
Transport of Resolved Turbulent Stresses in a Spanwise Rotating Channel Flow
   Qian-Qiu Xun, Bing-Chen Wang, and Gang Yan
An Experimental Investigation of the Skin Friction in a Plane Turbulent Wall Jet Over Smooth and Rough Surfaces
Noorallah Rostamy, Donald J. Bergstrom, David Sumner, and James D. Bugg

Experimental and Numerical Study of the Three Dimensional Instabilities in the Wake of a Blunt Trailing Edge Profiled Body
Arash Naghib Lahouti, Lakshmana Sampat Doddipatla, Horia Hangan, and Kamran Siddiqui

Coherent Structures in the Near Wake of a Blunt Trailing Edge Profiled Body
Lakshmana Sampat Doddipatla, Arash Naghib Lahouti, Horia Hangan, and Kamran Siddiqui

POD-Based Estimations of the Flowfield From PIV Wall Gradient Measurements in the Backward-Facing Step Flow
Thien Duy Nguyen, John Craig Wells, Paritosh Mokhasi, and Dietmar Rempfer

Experimental Investigation of Turbulent Boundary Layers Under Favorable Pressure Gradient
Pranav Joshi and Joseph Katz

Scale-Dependent Energy Fluxes in a Rough-Wall Turbulent Channel Flow
Jiarong Hong, Joseph Katz, and Michael Schultz

Experimental Investigation of the Mean Concentration Fields in a Counterflowing Jet
Luis A. Torres, Brian A. Fleck, David J. Wilson, David Nobes, and Mohammad Mahmoudi

Interaction Between Two Opposing Turbulent Round Jets
Hind Alkandry, Koen Stegeman, and Hiroshi Higuchi

DNS of Turbulent Spot Developing Into Turbulent Stripe in Plane Poiseuille Flow
Hiroshi Aida, Takahiro Tsukahara, and Yasuo Kawaguchi

Experimental Analysis of Non-Uniform Surface Roughness Affecting to Flow Resistance

DNS Study of Transitional Channel Flow Accompanied by Turbulent-Stripe Structures
Shizuma Kaneko, Takahiro Tsukahara, and Yasuo Kawaguchi
SYMPOSIUM ON BIO-INSPIRED FLUID MECHANICS

FEDSM/ICNMM2010-30367: Hydrodynamic Considerations in Bioreactor Selection and Design
Enes Kadic and Theodore J. Heindel

FEDSM/ICNMM2010-30417: Analytical and Experimental Characterization of Flow in Slowly-Varying Cross-Section Microchannels
M. Akbari, M. Bahrami, and D. Sinton

FEDSM/ICNMM2010-30525: Aerodynamic Particle Resuspension due to Human and Model Foot Motions
Yoshihiro Kubota and Hiroshi Higuchi

FEDSM/ICNMM2010-30546: Numerical Simulations of the Intra-Aneurysmal Vortex Shedding in Induced Mouse Abdominal Aortic Aneurysms
Matthew D. Ford, Richard Y. Cao, Ugo Piomelli, Colin D. Funk, and Andrew Pollard

FEDSM/ICNMM2010-30593: Numerical Assessment of the Quasi-Steady Approximation in Glottal Air Flow
Hani Bakhshaei, Luc Mongeau, and Rosaire Mongrain

FEDSM/ICNMM2010-30601: Fiber Transport and Deposition in Human Upper Tracheobronchial Airways
L. Tian, G. Ahmadi, P. K. Hopke, and Y.-S. Cheng

FEDSM/ICNMM2010-30995: The Fluid Mechanics of the Eye and the Role of the Mucus Layer
Douglas Platt and Ashwin Vaidya

Masaaki Tamagawa

SYMPOSIUM ON CFD VERIFICATION AND VALIDATION

FEDSM/ICNMM2010-30267: Large Eddy Simulations of Taylor-Görtler Instabilities in Transitional and Turbulent Boundary Layers
Sergej Gordeev, Robert Stieglitz, and Volker Heinzel

FEDSM/ICNMM2010-30274: Experimental and Numerical Investigations of Inlet Boundary Conditions for a Propeller Turbine Draft Tube
Jean-Mathieu Gagnon, Felix Flemming, Ruixia Qian, Claire Deschênes, and Stuart Coulson

FEDSM/ICNMM2010-30298: A Validation Database for Flow in a Parallel Triangular Heat Exchanger Tube Array
John Mahon and Craig Meskell
CFD Base Hydro-Turbine Optimization: Simulation of Flow Over a Rotating Blade Using Immersed-Boundary Method

Ning Zhang, Saikiran Yadagiri, Brent Ballard, Reggy Saxon, and Willi Schippers

Immersed Boundary Method for Generalised Finite Volume and Finite Difference Navier-Stokes Solvers

A. Pinelli, I. Z. Naqavi, and U. Piomelli

A Study on Flow Through a Periodic Array of Porous Medium Cylinders by Immersed-Boundary Methods

Xiaofan Yang, Zhongquan Charlie Zheng, and Ying Xu

A Combined Soft-Sphere Collision/Immersed Boundary Method for Resolved Simulations of Particulate Flows

Wim-Paul Breugem

An Immersed Boundary Method for Conjugate Heat Transfer Problems

M. D. de Tullio, S. S. Latorre, P. De Palma, M. Napolitano, and G. Pascazio

Immersed Boundary Method for Large Eddy Simulation and Lagrangian Stochastic Modeling of Passive Scalar Dispersion Downstream of an Obstacle

C. Le Ribault and S. Simoëns

A Vortex Immersed Boundary Method for Bluff Body Flows

Georges-Henri Cottet, Federico Gallizio, Adrien Magni, and Iraj Mortazavi

Direct Numerical Simulation of Turbulent Flows in Rough Pipes Using an Immersed Boundary Method With a Spectral Representation of the Roughness Topography

A. T. van Nimwegen and L. M. Portela

A Comparative Study of Interface Schemes in the Immersed Boundary Method for a Moving Solid Boundary Problem Using the Lattice Boltzmann Method

Shin K. Kang and Yassin A. Hassan

Olivier Botella and Yoann Cheny

Application of an Immersed Boundary Method to Flow in Cerebral Aneurysms and Porous Media

Julia Mikhal, David J. Lopez Penha, Steffen Stolz, and Bernard J. Geurts
FEDSM/ICNMM2010-31097 ................................................................. 2461
An Immersed Boundary Method for General Flow Applications
Jack R. Edwards, Jung-IL Choi, Santanu Ghosh, Daniel A. Gieseking, and
Jeffrey D. Eischen

FEDSM/ICNMM2010-31148 ................................................................. 2471
Fluid Mechanics of Deformable Aortic Prostheses
Marco D. de Tullio, Roberto Verzicco, Luciano Afferrante, and Giuseppe Pascazio

SYMPOSIUM ON DNS, LES AND HYBRID RANS/LES METHODS
FEDSM/ICNMM2010-30311 ................................................................. 2481
Shear-Improved Smagorinsky Modeling of Turbulent Channel Flow Using Generalized
Lattice Boltzmann Equation
Saeed Jafari and Mohammad Rahnama

FEDSM/ICNMM2010-30354 ................................................................. 2489
Near-Wall RANS Modelling in LES of Heat Transfer in Backward-Facing Step Flows Under
Conditions of Constant and Variable Fluid Properties
S. Jakirlić and B. Kniesner

FEDSM/ICNMM2010-30404 ................................................................. 2503
Application of a Zonal K–ε Model on Simulation of Turbulent Mixed Convection
Mehdi Shahraeeni and Mehrdad Raisee

FEDSM/ICNMM2010-30654 ................................................................. 2509
Rapid and Slow Decomposition in Large Eddy Simulation of Scalar Turbulence
L. Fang, L. Shao, J. P. Bertoglio, L. P. Lu, and Z. S. Zhang

FEDSM/ICNMM2010-30718 ................................................................. 2527
A Novel Meshing Approach for Large Eddy Simulation
Bin Zhang, Tong Wang, Chuan-gang Gu, and Zheng-yuan Dai

FEDSM/ICNMM2010-30736 ................................................................. 2537
Self-Adaptive Upwinding for Large Eddy Simulation of Cross-Flow Jets
Vimal Kumar and Marius Paraschivoiu

FEDSM/ICNMM2010-30739 ................................................................. 2549
Numerical Investigation of the Flow Field Around a Low Rise Building Using LES Technique
S. S. Motallebi Hasankola and O. Abouali

FEDSM/ICNMM2010-30742 ................................................................. 2557
Large Eddy Simulation of Turbulent Air Flow Over a Surface Mounted Hemisphere
M. M. Tavakol, O. Abouali, and M. Yaghoubi

FEDSM/ICNMM2010-31094 ................................................................. 2565
Evaluation of Turbulence Models Using Large-Eddy Simulation Data
Hassan Raiesi, Ugo Piomelli, and Andrew Pollard
**SYMPOSIUM ON ISSUES AND PERSPECTIVES IN GROUNDVEHICLE FLOWS**

**FEDSM/ICNMM2010-30122** ................................................................. 2575

Transient Numerical Computation of the Temperature of Electronic Devices in Passenger Cars  
*Florence Michel and Bernard Desmet*

**FEDSM/ICNMM2010-30193** ................................................................. 2587

Flow Visualization and PIV Measurements of Flow Around a Sport Utility Vehicle Model  
*Alban Lamy, Amandine Hamel, Christina Vanderwel, Stavros Tavoularis, and Azeddine Kourta*

**FEDSM/ICNMM2010-30321** ................................................................. 2595

Aerodynamic Forces on a Simplified Car Body: Towards Innovative Designs for Car Drag Reduction  
*Mahmoud Khaled, Fabien Harambat, Anthony Yammine, and Hassan Peerhossaini*

**FEDSM/ICNMM2010-30454** ................................................................. 2605

Detached-Eddy Simulations of the Effects of Different Wind Gust Models on the Unsteady Aerodynamics of Road Vehicles  
*Tristan Favre and Gunilla Efraimsson*

**FEDSM/ICNMM2010-30491** ................................................................. 2615

Active Flow Control of the 3D Separation on a Ahmed Body Using Steady Microjet Arrays  
*S. Aubrun, F. Alvi, A. Leroy, and A. Kourta*

**FEDSM/ICNMM2010-30570** ................................................................. 2623

Large-Eddy Simulation on the Effect of Ambient Perturbation on Vehicle Aerodynamics  
*Makoto Tsubokura, Yuki Ikawa, Masashi Kitayama, and Takuji Nakashima*

**FEDSM/ICNMM2010-30625** ................................................................. 2633

Development of Rapid Simulation Method for Automotive Aerodynamics  
*Kei Akasaka and Kenji Ono*

**FEDSM/ICNMM2010-30629** ................................................................. 2641

The Effect of Oscillatory Boat-Tail Flaps on the Near Wake of a Prototypical Heavy Vehicle  
*Martin Johansson, John Sheridan, and Sverker Fredriksson*

**FEDSM/ICNMM2010-30633** ................................................................. 2649

Experimental Characterization of the Unsteady Flow Over the Rear Slant of an Ahmed Body  
*Adrien Thacker, Sandrine Aubrun, Annie Leroy, and Philippe Devinant*

**FEDSM/ICNMM2010-30646** ................................................................. 2659

Coupled Analysis of Unsteady Aerodynamics and Vehicle Motion of a Heavy Duty Truck in Wind Gusts  
*Takuji Nakashima, Makoto Tsubokura, Takeshi Ikenaga, Kozo Kitoh, and Yasuaki Doi*

**FEDSM/ICNMM2010-30680** ................................................................. 2669

Numerical Simulation of Flow Around a Generic Pickup With ISIS-CFD  
*Emmanuel Guilmineau*
LES of the Flow Around a Generic Wheel in a Wheelhouse
Sinisa Krajnovic, Sasan Sarmast, and Branislav Basara

Numerical Investigation of the Influence of Side Winds on a Simplified Car at Various Yaw Angles
Sinisa Krajnovic and Sasan Sarmast

Validation of Lattice-Boltzmann Aerodynamics Simulation for Vehicle Lift Prediction
Bradley D. Duncan, Axel Fischer, and Satheesh Kandasamy

Analysis of Door Mirror Aeroacoustic Source Using Extended Proper Orthogonal Decomposition
Abbas Hekmati, Denis Ricot, and Philippe Druault

Statistical Analysis of Correlation Between Simulation and Measurement of Interior Wind Noise
Robert E. Powell, Sivapalan Senthooran, and David M. Freed

Nozzle Effects in Thermal Wind Tunnels
Zhu Wang, Jaehoon Han, and Ales Alajbegovic

Bed Height Effects on Fluidized Bed Hydrodynamics
David R. Escudero and Theodore J. Heindel

Experimental Characterization of Hydraulic Solid Particle Transportation in Horizontal Pipelines Using PIV
Liang Wang, Afshin Goharzadeh, and Peter Rodgers

Experimental Characterization of Air-Entrainment in a Plunging Water Jet System Using Particle Image Velocimetry (PIV)
Xiaoliang Qu, Afshin Goharzadeh, Lyes Khezzar, and Arman Molki

Experimental and Theoretical Studies of Pulsed Micro Flows Pertinent to Continuous Subcutaneous Insulin Infusion (CSII) Therapy
Bin Wang, Hui Hu, Ayodeji Demuren, and Eric Gyurcsko
Convergence of a Greedy Algorithm on Nonlinear Convex Problems and Application to Uncertainty Quantification on Obstacle Problems
Virginie Ehrlacher

Uncertainty Quantification of Turbulence Model Coefficients via Latin Hypercube Sampling Method
Matthew C. Dunn, Babak Shotorban, and Abdelkader Frendi

A Numerical Method for Uncertain Compressible Flows
Gael Poette, Didier Lucor, and Bruno Després

Adaptive Anisotropic Stochastic Discretization Schemes for Uncertain Conservation Laws
Julie Tryoen, Olivier Le Maftre, and Alexandre Ern

Mixing Layer Growth Response to Inflow Forcing With Random Phase Shift
Jordan Ko, Didier Lucor, and Josselin Garnier
