TABLE OF CONTENTS

2011-01-1026  Improved Robustness and Interoperability Testing Approach for FlexRay Controllers .............................................. 1
               David Bollati and Federico Canas
               C&S Group GmbH

2011-01-1027  FlexRay Active Star Network Integration Strategies and Host Interface Implementation .......................................... 7
               Lawrence Peruski and Sandeep Menon
               General Motors Company

2011-01-1029  Automatic Gateway Prototype Generation for Optimization of E/E-Architectures Based on High-Level Models ................. 21
               Oliver Sander, Jannik Merz and Juergen Becker
               Karlsruhe Institute of Technology (KIT)
               Clemens Reichmann
               aquintos GmbH

2011-01-1034  J2716 SENT - Single Edge Nibble Transmission, Updates and Status ........................................................................ 29
               Mark Costin and Robert Horner
               General Motors Company
               Johannes Jaegers
               Hella KGaA Hueck & Co
               Dirk Daecke, Alex Grossmann and Bernhard Opitz
               Robert Bosch GmbH
               Machiel ten Brinke, Tim Tiek and Eric Visser
               Sensata Technologies

2011-01-1038  Guaranteeing Hard Real-Time Requirements of In-Vehicle Multihop Communication Over COTS Ethernet Hardware ............. 41
               Jonas Lext, Lars Bröhnne and Björn Andersson
               Time-Critical Networks

2011-01-1041  ESCAN - An Open Source, High Bandwidth, Event Scheduled Controller Area Network .................................................. 53
               Anthony Williams, Christopher Quigley and James Finney
               Warwick Control Technologies Ltd.

               Wolfgang Stolz, Kyle Williams, Tobias Lorenz and Martin Piastowski
               Robert Bosch GmbH
A New High-Speed Bus Topology LAN Protocol Compatible with CAN
Ryo Kurachi and Hiroaki Takada
Nagoya Univ.
Masanobu Nishimura and Satoshi Horihata
Autonetworks Technologies

ADACS: Advanced Diagnosis for Time-Triggered Automotive Communication Systems
Eric Armengaud and Allan Tengg
Virtual Vehicle
Roland Lieger and Erwin Kristen
Austrian Institute of Technology

Reliability and Safety/Integrity Analysis for Vehicle-to-Vehicle Wireless Communication
Arkadeb Ghosal, Fan Bai, Rami Debouk and Haibo Zeng
General Motors Company

Applying Software Dependence Analysis for Automotive Embedded Software
Srihari Sukumaran
GM Technical Center India Ltd. - General Motors Company
Trenton Haines
General Motors Company
Ramesh S
GM Technical Center India Ltd. - General Motors Company

Using Model Transformation/Code Generation Technology to Migrate Legacy Software Assets to AUTOSAR
Rick Flores, David Rosa and Mohan Murugesan
General Motors Company

Virtualization for ECU Platform Software Testing in Automotive Embedded
Rajesh Kumar Katyal and Srinath S
GM Technical Center India Ltd. – General Motors Company

High Voltage Connect Feature
Trista Schieffer, Suneet Katoch and Richard Marsh
General Motors Company
