Enhanced Error Assessment of Response Time Histories (EEARTH) Metric and Calibration Process

Zhenfei Zhan, Yan Fu and Ren-Jye Yang
Ford Motor Company

Quality Variation Control Method and Process

Megumu Oshima and Kanya Nara
Nissan Motor Co., LTD.

Prevention of Defects and Customer Dissatisfaction using Quick Design Review

Megumu Oshima and Kanya Nara
Nissan Motor Co., LTD.
Tatsuhiko Yoshimura
Kyushu University

DFMEA and FTA Applied to Complex Hybrid and Fuel Cell Systems

Michael Henry Down
General Motors Company

Numerical Simulation on the Ventilation Cooling Performance of the Engine Nacelle under Hover and Forward Flight Conditions

Yongqi Xie
Beihang University
Hongxia Gao, Jianzu Yu and Jing Xiao
Beihang University

Statistical Experimentation of Fuel System O-Ring Interface

Edward John Vinarcik

A Simulation and Optimization Methodology for Reliability of Vehicle Fleets

Zissimos Mourelatos, Jing Li
and Vijitashwa Pandey
Oakland Univ.
Amandeep Singh, Matthew Castanier
and David A. Lamb
US Army TARDEC

Reliability Prediction for the HMMWV Suspension System

Dan Ghiocel
GP Technologies Inc.
Dan Negrut
Univ. of Wisconsin
David A. Lamb
US Army TARDEC
David Gorsich
US Army RDECOM
Multi-Criteria Decision Analysis of Heuristically Designed Light-Duty Vehicles Today and in 2035.

Erik Wilhelm Alexander Wokaun
Paul Scherrer Institut

Amandeep Singh and Zissimos Mourelatos
Oakland Univ.
Efstratios Nikolaidis
Univ. of Toledo

Fuzzy Boundary Element Method with Uncertain Shear Modulus in Linear Plane Strain Elasticity.

Bart Zalewski
ZIN Technologies

Interval Optimization of Uncertain Suspension Kinematics Characteristics.

Kai Ma
College of Mechanical, Jilin University
Shuyi Pang
State Key ADSL Lab, Jilin University

An Improved Finite Element-Based Model for Reliability Assessment of a Profile-Type Automotive Body Experiencing Uncertain Loading Conditions and Material Properties.

M. Shariyat
Professor, K.N. Toosi University of Tech
Mahboobeh Rajabi Ghahnavieh
Corresponding author, M. SC., K.N. Toosi

Generalized Probability Distributions for Accelerated Life Modeling.

D. Gary Harlow
Lehigh University

Statistically Precise and Energy Efficient Accelerated Life Testing.

Haitao Liao and Dan Zhang
Univ. of Tennessee-Knoxville

Reliability Evaluation Based on Sequencing of Applied Stresses.

Michael Koskulics and E. A. Elsayed
Rutgers Univ.

A GLM Approach to Optimal ALT Test Plans for Weibull Distribution with Type-I Censoring.

Rong Pan and Tao Yang
Arizona State University
2011-01-0800 Why Current Types of Accelerated Stress Testing Cannot Help to Accurately Predict Reliability and Durability? .................................................................285
Lev M. Klyatis
SoHaR, Inc.

2011-01-1077 Shape Optimization of a Single Cylinder Engine Crankshaft .................................................................293
M. Cagri Cevik
VKA, RWTH Aachen University
Emre Kanpolat and Martin Rebbert
FEV Motorentechnik GmbH

2011-01-1078 Optimizing Battery Sizing and Vehicle Lightweighting for an Extended Range Electric Vehicle .................................................................303
Arun M. Joshi, Hesham Ezzat, Norman Bucknor
and Mark Verbrugge
General Motors Company

2011-01-1079 New Proposal of Piston Skirt Form using Multi Objective Optimization Method .................................................................311
Toshiaki Kobayashi
Honda R&D Co., Ltd.

2011-01-1080 Multi-Objective Decision Making under Uncertainty and Incomplete Knowledge of Designer Preferences .................................................................319
Vijitashwa Pandey
