PASTE 2011

Proceedings of the 14th International Seminar on Paste and Thickened Tailings
5–7 April 2011, Perth, Australia

EDITORS

Richard Jewell
Australian Centre for Geomechanics, Australia

Andy Fourie
The University of Western Australia, Australia
# TABLE OF CONTENTS

Australian Centre for Geomechanics ........................................................................................................ iii
Committees ....................................................................................................................................................... v
Reviewers ......................................................................................................................................................... vi
Preface .......................................................................................................................................................... vii
Sponsors .......................................................................................................................................................... ix

## P&T — A DECADE ON

A personal perspective on paste and thickened tailings — a decade on .................................................................................................................. 3  
D.V. Boger, Monash University; and The University of Melbourne, Australia

## THICKENING

### Keynote address
Dewatering to higher densities — an industry review .................................................................................. 19  
F. Schoenbrunn, FLSmidth Inc., USA

### Design and operational experience of the Cerro Lindo filtered tailings deposit
Design and operational experience of the Cerro Lindo filtered tailings deposit ........................................... 25  
J.L. Lara, Golder Associates Peru S.A., Peru; E. León, Compañía Minera Milpo S.A.A., Peru

### Innovative coal refuse dewatering system
Innovative coal refuse dewatering system ................................................................................................. 39  
M.J. Niederhauser, K. Wilson, FLSmidth Inc., USA

### Paste dewatering with the Boozer disc filter
Paste dewatering with the Boozer disc filter ......................................................................................... 45  
J. Hahn, R. Bott, T. Langeloh, BOKELA GmbH, Germany

### Optimising unit operations in paste dewatering
Optimising unit operations in paste dewatering ..................................................................................... 57  
J. Palmer, V. Viswanathan, Outotec Pty Ltd, Australia

### Tailings treatment and water option study
Tailings treatment and water option study ............................................................................................. 67  
R. Harrison, AMEC Minproc, Australia

### Pilot and full-scale validation of thickener and feedwell modelling
Pilot and full-scale validation of thickener and feedwell modelling ......................................................... 81  
P.D. Fawell, K. Simic, K. Mohanarangam, J.B. Farrow, Parker Centre (CSIRO Process Science and Engineering), Australia; D.W. Stephens, Parker Centre (CSIRO Mathematical and Information Sciences), Australia; M. Rudman, D. Peterson, CSIRO Mathematical and Information Sciences, Australia; W. Yang, CSIRO Process Science and Engineering, Australia

### Challenges in the design of pilot tests
Challenges in the design of pilot tests ..................................................................................................... 93  
S. Barrera, P. Chacón, H. Quelopana, ARCADIS, Chile; M. Becerra, ASM IN Industrial Ltda.

### Collahuasi paste thickener — pilot and full scale results
Collahuasi paste thickener — pilot and full scale results ..................................................................... 101  
C. Loan, Outotec Pty Ltd, Australia; M.L. Villanueva, N. Saldia, Compañía Minera Doña Inés de Collahuasi, Chile

### Caserones Project — analysis and interpretation of pilot tests results
Caserones Project — analysis and interpretation of pilot tests results ....................................................... 111  
H. Quelopana, P. Chacón, S. Barrera, ARCADIS, Chile; R. Oreillana, Caserones Project, Chile

## RHEOLOGY

### Rheology for thickened tailings and paste — history, state-of-the-art and future directions
Rheology for thickened tailings and paste — history, state-of-the-art and future directions .......................... 121  
P. Sofrà, Rheological Consulting Services Pty Ltd, Australia; D.V. Boger, Monash University; and The University of Melbourne, Australia

### Step change improvements in underflow rheology
Step change improvements in underflow rheology ............................................................................. 135  
A. Berger, S. Adkins, BASF Construction Polymers, Germany; S. Hess, BASF SE, Germany; I. Flanagan, P. Stocks, BASF Performance Products, UK

### Ore types impact on flocculation and the treatment strategies for different types of oil sand tailings
Ore types impact on flocculation and the treatment strategies for different types of oil sand tailings .......... 143  
X.S. Yuan, Syncrude Canada Ltd., Canada

### Mature fine tailings drying — technology update
Mature fine tailings drying — technology update .................................................................................. 155  
P.S. Wells, A. Revlington, O. Omotoso, Suncor Energy Inc., Canada
A technique for measuring the reduction of yield stress of thickened tailings

E.U. Pomillos, Golder Associates Peru S.A.; Golder Paste Technology Ltd., Peru

The rheology and flow behaviour of fly ash and brine paste slurries

Y. Maree, Sasol Technology R&D, South Africa; P.L. Moodman, F.P. van Sittert, A.J.C. Paterson, Paterson & Cooke, South Africa

TAILINGS DISPOSAL

Keynote address

Paste and thickened tailings — friend against acid and metalliferous drainage?

G.M. Mudd, Monash University, Australia

Case study — bauxite residue management at Rio Tinto Alcan Gove, Northern Territory, Australia

H. Li, S. Pedrosa, A. Canfell, Rio Tinto Alcan, Australia

Oil sands tailings dewatering — can it be done?

S. Longo, R. Francoeur, M. Labelle, Golder Paste Technology Ltd., Canada; I. Wislesky, Golder Associates Ltd., Canada

Thickened tailings disposal at Musselwhite Mine

S. Kem, Golder Associates Ltd., Canada; J. Girard, N. Hmidi, Goldcorp Canada, Canada; Y. Mao, Golder Associates Ltd., Canada; S. Longo, Golder Paste Technology Ltd., Canada

The Sarcheshmeh thickened tailings disposal project

L. MacNamara, FLSmidth Ltd, UK; N. Khoshniaz, National Iranian Copper Industries Company, Iran; S. Hashemi, CanyMes Engineering and Technical Services, Iran

Sailitre Project — dewatered phosphate rocks tailings as alternatives to conventional tailings disposal, Vale Fertilizantes Minas Gerais State, Brazil

M. e Silva Marques, J.L. Lara, Golder Associates Peru S.A., Peru; P. Primeau, Golder Paste Technology Ltd., Canada; F. Palkovits, Mine Paste Engineering, Canada; N. Kuyucak, Golder Paste Technology Ltd., Canada; L.L.A.C. Costa, Vale Fertilizantes, Brazil

Case study — operation of three paste disposal facilities

R.A. Cooper, M.E. Smith, Stefanutti Stocks Mining Services, South Africa

Field trials of thin-lift deposition of amended mature fine tailings at the Muskeg River Mine in Northern Alberta

J.G. Matthews, N. Dhaddi, P. House, Shell Canada, Canada; P. Simms, Carleton University, Canada

Realistic beach slope prediction and design

K.D. Seddon, T.G. Fitton, ATC Williams Pty Ltd, Australia

Analysis of tailings beach slopes based on slurry pipeline experience

A. Thomas, Slurry Systems Pty Limited, Australia; T.G. Fitton, ATC Williams Pty Ltd, Australia

Prediction of tailings beach slopes and tailings flow profiles

A.L. Li, Golder Associates Ltd., Canada

Beaching angles and evolution of stack geometry for thickened tailings — a review

P. Simms, Carleton University, Canada; M.P.A. Williams, T.G. Fitton, ATC Williams Pty Ltd, Australia; G. McPhail, Metago Environmental Engineers (Australia) Pty Ltd, Australia

Design, construction and operation of a partially lined dense phase ash storage facility constructed from mine waste

T. Mortimer, J. McNicol, CS Energy Ltd, Australia; P. Keefer, W. Ludlow, Golder Associates Pty Ltd, Australia

TRANSPORT

Keynote address

The pipeline transport of high density slurries — a historical review of past mistakes, lessons learned and current technologies

A.J.C. Paterson, Paterson & Cooke, South Africa
