# TABLE OF CONTENTS

## 2011 GENERAL PROCEEDINGS

(In order of Presentation)

1. **Mitigating Loaded Blast Patterns Buried Beneath a High Wall Failure**  
   J. Kennedy, A. Carey

2. **Drilling and Blasting on the Ty Nant Project**  
   R. Farnfield, B. Williams

3. **Seismic Blasting Between the North Poles**  
   L. Litwin

4. **Measuring Blast Fragmentation by Analyzing Shovel Bucket Contents**  
   E. Chow, H. Zeng, S. Tafazoli

5. **Oversize Reduction Project at the Iron Ore Company of Canada**  
   R. Proulx, R. Pinksen

6. **Holistic Scientific Approach to Address Wall Damage and Berm Loss from Blasting In Large Open Cut Metal Mines**  
   T. Goswami, S. Jeric, G. Brent

7. **Advantages of EFI Based Detonator Technology in Commercial Blasting Applications**  
   R. Givens, T. Baginski

8. **Rapid Advances in Electronic Initiating Systems**  
   A. Koekemoer, G. Landman

9. **Blasting Topologies for Electronic Initiation Systems**  
   G. Teowee, D. Lansburg

10. **Use of Explosives to Protect a Native Cutthroat Trout Population**  
    C. Hyle, C. Sestrich, J. Hiedeman

11. **Close Proximity Blasting at the University of Georgia**  
    G. Poole, M. Fritz

12. **Defining and Controlling the Environmental Impacts of Blasting At a Major Opencast Coal Mine**  
    W. Birch, S. Hosein, D. Mason

13. **How Complexity Analysis Contributes to Blasting Practice**  
    M. Cardu, M. Dompieri, J. Seccatore

14. **Resolution to a Conflict Regarding Blasting Near a High Pressure Pipeline**  
    R. Wheeler

15. **Full-Scale Trials Involving the Open Detonation of Large Bombs Close to Structures**  
    C. Adcock, R. Farnfield, A. Buchanan
Measuring Blast Induced Damage by Applying the MASW Geophysical Method
C. Zdazinsky .................................................................175

Measured Results of the Influence of a Large-Scale Fault on Blasting Vibrations in Sublevel Open Stoping
K. Fleetwood, E. Villaescusa ..............................................187

A Comparison of Theoretical Calculations to Hydro Code-Simulated Variables to Assist in the Design of Mousetrap-type Planar Detonation Wave Generators
C. Thompson .................................................................201

Penetration Analysis of a Shaped Charge Jet into a Concrete Target
J. Indeck, A. Thompson, S. Lim ...........................................215

Low Cost Method for Monitoring Shock-Tube Detonator and Explosive Product Performance in Blast Holes,
W. Birch, S. Hosein, L. Bermingham, G.D., Rangel-Sharp ...........................................225

Shape Charge Effectiveness
B. Potter, D. Castelo ........................................................239

The Effects of Various Wet-Hole Loading Methods on Powder Factor
N. Lee ..........................................................251

Fueling Station and Tank Farm Expansion on Taboguilla Island
A. Lindo ..............................................................265

Analysis of Environmental Effects Induced by Cautious Blasting During the Excavation of Istanbul Subway Construction
A. Kahriman, A. Karadogan, A. Celtikci, E. Kaya, G. Tuncer, T. Ozat, A. Varol ...........................................273

Social Cost Benefit Analysis of Aluminized ANFO
J. Loeb, G. Lovegrove, D. Tannant ....................................287

Development of Splitting Technology by Using Electric Discharge Impulse Crushing System
K. Sasaki, H. Kitajima, H. Maehata, R. Sakamoto, S. Kubota ...........................................301

Prototype Gauges for Measuring Detonation Temperature and Pressure of Commercial Explosives
A. Torrance, G. Cavanough, I. Onederra ................................313

Optimization of Fragmentation in Benches for Dragline Deployed in Large Opencast Coal Mines - A Case Study of Indian Mine
R. Sonkar, S. Kumar ........................................................323

A Research Method for the Estimation of Heavy Metal Deposit Range of Open Surface Mass Detonations
M. Hagfors, M. Hokkanen .................................................335

Study of Linear Waves on Linear Shaped Charges
M. Wild, G. Walsh ..........................................................355

Marine Blasting on the New Canal, Pacific Entrance
M. Lopez Cano, P. Couceiro, C. Rodriguez Calvo ...........................................365

</tr>
</thead>
<tbody>
<tr>
<td>Safe and Reliable Remote Blasting with Electronic Initiation Systems</td>
<td>R. Van Wyk, G. Landman</td>
<td>577</td>
</tr>
<tr>
<td>Trim Blasting Designs in the Morenci Mine</td>
<td>K. Christopherson, V. de Viterbo</td>
<td>587</td>
</tr>
<tr>
<td>Improved Remediation Performance of a Contaminated Basalt Aquifer by Blast Fracturing</td>
<td>A. Moore, B. Goodwin, D. Fales, D. Lam</td>
<td>603</td>
</tr>
<tr>
<td>Influence of Environment on Explosively Driven Shock Waves in Air</td>
<td>W. Wedding, B. Lusk, J. Hoffman</td>
<td>617</td>
</tr>
<tr>
<td>Shaft Holing Project at Bulyanhulu Gold Mine, Tanzania</td>
<td>C. Mkumbo, W. De Graaf, E. Sellers</td>
<td>631</td>
</tr>
<tr>
<td>Constructing Laboratory Caverns in Hard Rock under High Stress</td>
<td>C. Laughton</td>
<td>643</td>
</tr>
<tr>
<td>Drill Monitoring Systems and the Integration with Drill &amp; Blast Software</td>
<td>J. Vynne, J. Hutchings</td>
<td>651</td>
</tr>
<tr>
<td>Geotechnical Slope Remediation Via RC-drilling And Controlled Slope Failure Blasting</td>
<td>T. Acorn</td>
<td>663</td>
</tr>
<tr>
<td>Underground Mega Mass Blasting with Electronic Initiation Near Urban Area</td>
<td>A. Pomerleau, J. Lagueux</td>
<td>677</td>
</tr>
<tr>
<td>Explosion Hazards and Quantity-Distance Regulations - A Review of Their Physical Basis</td>
<td>B. Mohanty</td>
<td>693</td>
</tr>
<tr>
<td>Instruments and Available Internet-Based Data for Documenting Weather Conditions</td>
<td>D. Kliche, C. Kliche</td>
<td>705</td>
</tr>
<tr>
<td>A Work Area Monitor (WAM) to Protect Blast Crews from Rock Falls</td>
<td>D. Scutt, D. Noon</td>
<td>723</td>
</tr>
<tr>
<td>Flyrock: A Continuing Blast Safety Threat</td>
<td>H. Verakis</td>
<td>731</td>
</tr>
<tr>
<td>Wight Pit High Grade Wall Slash</td>
<td>G. Newman, A. Frye, L. Pratt, G. Zhao</td>
<td>741</td>
</tr>
<tr>
<td>Analysis of Annual-Delayed Successive (4D) Geophysical Charges in a Borehole</td>
<td>A. Tawadrous, D. Preece</td>
<td>751</td>
</tr>
<tr>
<td>Examination of Dynamic Parameters of Rocks Using Hopkinson Bar Experiments</td>
<td>P. Katsabanis, A. Pascoel, O. Rielo</td>
<td>765</td>
</tr>
<tr>
<td>Would That Low-Density Explosive Work For This Rock?</td>
<td>M. Wieland</td>
<td>777</td>
</tr>
