Proceedings,
The Fifth AAAI Artificial Intelligence and Interactive Digital Entertainment Conference

14–16 October 2009, Stanford, California

Christian J. Darken, Conference Chair
G. Michael Youngblood, Program Chair

Menlo Park, California
AAAI Press
Contents

AIIDE-09 Organization / ix

Sponsors / xi

Preface / xiii
  Vadim Bulitko, Chris Darken, Kevin Dill, Richard Evans, Brian Schwab, Michael Youngblood, Robert Zubek

Invited Talks / xv
  Michael Booth, David Hernández Cerpa, Richard Evans, Steve Gargolinski, Leland Hepler, Michael Mateas, Paul Tozour

Research Papers

kNN LRTA*: Simple Subgoaling for Real-Time Search / 2
  Vadim Bulitko, Yngvi Bjarnsson

Dynamic Artificial Potential Fields for Autonomous Camera Control / 8
  Paolo Burelli, Arnav Jhala

Bowyer: A Planning Tool for Bridging the Gap between Declarative and Procedural Domains / 14
  Steven P. Cash, R. Michael Young

An Architecture for Game Behavior AI: Behavior Multi-Queues / 20
  Maria Cutumisu, Duane Szafron

A Multi-Agent Potential Field-Based Bot for a Full RTS Game Scenario / 28
  Johan Hugelbäck, Stefan J. Johansson

A Method for Acquiring Body Movement Verbs for a Humanoid Robot through Physical Interaction with Humans / 34
  Dai Hasegawa, Rafal Rzepka, Kenji Araki

Automatically Choosing Appropriate Gestures for Jokes / 40
  Dai Hasegawa, Jonas Sjöbergh, Rafal Rzepka, Kenji Araki

BehaviorShop: An Intuitive Interface for Interactive Character Design / 46
  Frederick W. P. Heckel, G. Michael Youngblood, D. Hunter Hale

Investigating the Interplay between Camera Viewpoints, Game Information, and Challenge / 52
  Arnav Jhala, Martin Schwartz, Hector Pérez Martínez, Georgios Yannakakis

Improving Offensive Performance through Opponent Modeling / 58
  Kennard Laviers, Gita Sukthankar, Matthew Molineaux, David W. Aha

Constructing Game Agents from Video of Human Behavior / 64
  Nan Li, David J. Stracuzzi, Gary Cleveland, Tolga Könik, Dan Shapiro, Matthew Molineaux, David W. Aha, Kamal Ali
Self-Validated Behaviour Trees through Reflective Components / 70
David Janss, Marco Antonio Gómez-Martín, Pedro A. González-Calero

Examining Extended Dynamic Scripting in a Tactical Game Framework / 76
Jeremy Ludwig, Arthur Farley

A Surprise Triggered Adaptive and Reactive (STAR) Framework for Online Adaptation in Non-stationary Environments / 82
Truong-Huy Dinh Nguyen, Tze-Yun Leong

Optimizing Motion-Constrained Pathfinding / 88
Nathan R. Stuartwain

IMPLANT: An Integrated MDP and POMDP Learning Agent for Adaptive Games / 94
Chek Tien Tan, Ho-lun Cheng

Using Semantics to Improve the Design of Game Worlds / 100
Tim Tutenel, Ruben M. Smelik, Rafael Bidarra, Klaas Jan de Kraker

Case-Based Reasoning for Build Order in Real-Time Strategy Games / 106
Ben G. Weber, Michael Mateas

Industry Papers

Bringing Interactive Storytelling to Industry: Designing a Reactive Narrative Encounter System / 113
Daniel Kline

A Unified Spatial Representation for Navigation Systems / 119
Michael Ramsey

Poster Papers

A Synthetic Mind Model for Virtual Actors in Interactive Storytelling Systems / 124
Samir Araujo, Luiz Chaimowicz

A Real-Time PDDL-Based Planning Component for Video Games / 130
Olivier Bartheye, Éric Jacopin

Evaluating the Authorial Leverage of Drama Management / 136
Sherol Chen, Mark J. Nelson, Michael Mateas

Full 3D Spatial Decomposition for the Generation of Navigation Meshes / 142
D. Hunter Hale, G. Michael Youngblood

Adapting Game-Playing Agents to Game Requirements / 148
Joshua Jones, Chris Parnin, Avik Sinharoy, Spencer Rugober, Ashok K. Goel

Supporting Dialogue Generation for Story-Based Games / 154
Christopher Kerr, Duane Stafkof

Generating Story Analogues / 161
Mark Riedl, Carlos Leán
Computational Support for Play Testing Game Sketches / 167
Adam M. Smith, Mark J. Nelson, Michael Mateas

Concepts for Interactive Digital Storytelling: From Table-top to Game-AI / 173
Martin van Velsen, Josh Williams, Gustav Verhulsdonck

Learning Character Behaviors using Agent Modeling in Games / 179
Richard Zhao, Duane Szafron

Demonstrations

CamOn: A Real-Time Autonomous Camera Control System / 187
Paolo Burelli, Arnav Jhala

Demonstrating Automatic Content Generation in the Galactic Arms Race Video Game / 189
Erin J. Hastings, Ratan K. Guha, Kenneth O. Stanley

Optimization of Platform Game Levels for Player Experience / 191
Chris Pedersen, Julian Togelius, Georgios Yannakakis

Prototyping Games with BIPED / 193
Adam M. Smith, Mark J. Nelson, Michael Mateas

Index / 195
