Proceedings,
The Fourth Artificial Intelligence and Interactive Digital Entertainment Conference

22–24 October 2008, Stanford, California

Michael Mateas, Conference Chair
Chris Darken, Program Chair

Menlo Park, California
AAAI Press
Contents

AllIDE-08 Organization / ix
Sponsors / xi
Preface / xiii
   Ruth Aylett, Chris Darken, Kevin Dill, Richard Evans,
   Michael Mateas, Ana Paiva, Michael Youngblood, and Robert Zubek
Invited Talks / xv

Full Papers

Hierarchical Petri Nets for Story Plots Featuring Virtual Humans / 2
   Daniel Balas, Cyril Brom, Adam Abonyi, Jakub Gemrot
Modeling Culturally and Emotionally Affected Behavior / 10
   Vadim Bulitko, Steven Solomon, Jonathan Gratch, Michael van Lent
Simulation-Based Story Generation with a Theory of Mind / 16
   Hsueh-Min Chang, Von-Win Soo
Agent Learning Using Action-Dependent Learning Rates in Computer Role-Playing Games / 22
   Maria Cutumisu, Duane Szafron, Michael Bowling, Richard S. Sutton
Effects of Communication on the Evolution of Squad Behaviours / 30
   Darren Doherty, Colin O'Riordan
Dynamic Expansion of Behaviour Trees / 36
   Gonzalo Flores-Puga, Marco Gomez-Martín, Belén Diaz-Agudo, Pedro A. Gonzalez-Calero
The Rise of Potential Fields in Real Time Strategy Bots / 42
   Johan Hagelbäck, Stefan J. Johansson
Lightweight Procedural Animation with Believable Physical Interactions / 48
   Ian Horswill
A Cover-Based Approach to Multi-Agent Moving Target Pursuit / 54
   Alejandro Isaza, Jieshan Lu, Vadim Bulitko, Russel Greiner
Offline Planning with Hierarchical Task Networks in Video Games / 60
   John-Paul Kelly, Adi Botea, Sven Koenig
Learning and Playing in Wubble World / 66
   Wesley Kerr, Paul Cohen, Yu-Han Chang
Logical Agents for Language and Action / 72
   Martin Magnusson, Patrick Doherty
Learning to be a Bot: Reinforcement Learning in Shooter Games / 78
Michelle McPartland, Marcus Gallagher

Recombinable Game Mechanics for Automated Design Support / 84
Mark J. Nelson, Michael Mateas

Modeling the Dynamics of Non-Player Characters’ Social Relations in Video Games / 90
Magalié Ochs, Nicolas Sabouret, Vincent Corruble

Automatic Generation of Game Level Solutions as Storyboards / 96
David Pizzi, Marc Cavazza, Alex Whittaker, Jean-Luc Lugrin

Intelligent Trading Agents for Massively Multi-player Game Economies / 102
John Reeder, Gita Sukthankar, M. Georgiopoulos, G. Anagnostopoulos

Constructing Complex NPC Behavior via Multi-Objective Neuroevolution / 108
Jacob Schrum, Risto Mikkalainen

Talking with NPCs: Towards Dynamic Generation of Discourse Structures / 114
Christina R. Strong, Michael Mateas

TAP: An Effective Personality Representation for Inter-Agent Adaptation in Games / 120
Chek Tien Tan, Ho-lun Cheng

Stochastic Plan Optimization in Real-Time Strategy Games / 126
Andrew Trusty, Santi Ontañón, Ashwin Ram

Combining Model-Based Meta-Reasoning and Reinforcement Learning for Adapting Game-Playing Agents / 132
Patrick Ulam, Joshua Jones, Ashok Goel

Explicit Knowledge Programming for Computer Games / 138
Andreas Witzel, Jonathan Zvesper, Ethan Kennerly

Industry Papers

Brian Schwab

Otello: A Next-Generation Reputation System for Humans and NPCs / 149
Michael Sellers

Navigating Detailed Worlds with a Complex, Physically Driven Locomotion: NPC Skateboarder AI in EA’s skate / 155
Mark Wesley

Posters

Adaptive Spatial Reasoning for Turn-based Strategy Games / 161
Maurice Bergsma, Pieter Spronck

Automatically Generating Summary Visualizations from Game Logs / 167
Yun-Gyung Cheong, Arnav Jhala, Byung-Chull Bae, R. Michael Young
Automatically-Generated Convex Region Decomposition for Real-time Spatial Agent Navigation in Virtual Worlds / 173
  D. Hunter Hale, G. Michael Youngblood, Priyesh N. Dixit

Cerberus: Applying Supervised and Reinforcement Learning Techniques to Capture the Flag Games / 179
  Ahmed S. Hefny, Ayat A. Hatem, Mahmoud M. Shalaby, Amir F. Atiya

Direction Maps for Cooperative Pathfinding / 185
  M. Renee Jansen, Nathan R. Sturtevant

Agent Architecture in Social Games — The Implementation of Subsumption Architecture in Diplomacy / 191
  Aleksander Krzywinski, Weiqin Chen, Arne Helgesen

A Framework for the Semi-Automatic Testing of Video Games / 197
  Alfredo Nantes, Ross Brown, Frederic Maire

Integrating Story-Centric and Character-Centric Processes for Authoring Interactive Drama / 203
  Mei Si, Stacy C. Marsella, Mark O. Riedl

An Intelligent IDE for Behavior Authoring in Real-Time Strategy Games / 209
  Suhas Virmani, Yatin Kanetkar, Manish Mehta, Santiago Ontañón, Ashwin Ram

Demonstration Papers

Monte-Carlo Tree Search: A New Framework for Game AI / 216
  Guillaume Chaslot, Sander Bakkes, Istvan Szita, Pieter Spronck

A Demonstration of Agent Learning with Action-Dependent Learning Rates in Computer Role-Playing Games / 218
  Maria Cutumisu, Duane Szafron

OpenNERO: A Game Platform for AI Research and Education / 220
  Igor V. Karpov, John Sheblak, Risto Mikkelainen

Integrating Drama Management into an Adventure Game / 222
  Anne Sullivan, Sherol Chen, Michael Mateas

IDtension — Highly Interactive Drama / 224
  Nicolas Szilas

PaSSAGE: A Demonstration of Player Modeling in Interactive Storytelling / 226
  David Thue, Vadim Bulitko, Marcia Speech

Difficulty Scaling through Incongruity / 228
  Giel van Lankveld, Pieter Spronck, Matthias Rauterberg

Index / 231
