ITiCSE’10
Proceedings of the 2010 ACM SIGCSE Annual Conference on
Innovation and Technology
in Computer Science Education

Sponsored by:
ACM SIGCSE

Supported by:
Bilkent University, Intel, Meteksan Savunma, Microsoft,
Bilkent Hotel & Conference Center, Lufthansa, Havelsan, Tübitak
Table of Contents

ITiCSE 2010 Conference Organization ................................................................. xiii
ITiCSE 2010 Reviewers ........................................................................................... xv
ITiCSE 2010 Sponsor & Supporters ..................................................................... xviii
ITiCSE 2010 Working Groups ............................................................................ xix

Keynote Talks

- Science, Technology and Innovation: A Key Driver for Economic Growth ........................................ 1
  Nüket Yetiş (Tübitak)

- Who’s Missing From the Room? ...................................................................... 2
  Jane Prey (Microsoft Research)

Session 1: Course Design

Session Chair: Don Goelman (Villanova University)

- Challenges with Teaching HCI Early to Computer Students .............................................. 3
  Johan Aberg (Linköpings Universitet)

- Service Learning in Introductory Computer Science ...................................................... 8
  Mary Anne L. Egan, Mathew Johnson (Siena College)

- From Phenomenography Study to Planning Teaching ................................................... 13
  Errol Thompson (University of Birmingham)

Session 2: Software Tools

Session Chair: Guido Rößling (Technische Universität Darmstadt)

- The SOM Family: Virtual Machines for Teaching and Research ..................................... 18
  Michael Haupt, Robert Hirschfeld, Tobias Pape (University of Potsdam), Gregor Gabrysiak (Vrije Universiteit Brussel), Stefan Marr, Arne Bergmann, Arvid Heise, Matthias Kleine, Robert Krahn (University of Potsdam)

- JavaSpaces NetBeans — A Linda Workbench for Distributed Programming Course ........ 23
  Magdalena Dukielska (Google Switzerland GmbH), Jacek Sroka (University of Warsaw)

- Enbug: When Debuggers Go Bad ............................................................................. 28
  David Williams-King, John Aycock, Daniel Medeiros Nunes de Castro (University of Calgary)

Session 3: Diversity

Session Chair: Yaakov Varol (University of Nevada Reno)

- A Sub-Saharan Comparative Study of University Students’ Attitudes Towards Computer Programming .................................................. 33
  Cecille J. Marsh (Walter Sisulu University)

- Creating Digital Divas: Scaffolding Perception Change Through Secondary School and University Alliances ........................................... 38
  Catherine Lang (Swinburne University of Technology), Annemieke Craig (Deakin University), Julie Fisher, Helen Forgasz (Monash University)

- Inspiring Women Undergraduates ........................................................................ 43
  Hannah M. Dee (NPG), Roger D. Boyle (University of Leeds)
Session 4: Curriculum Issues
Session Chair: Michael Kolling (University of Kent)

• Analysis of Computer Science Related Curriculum on LDA and Isomap .............................................. 48
  Takayuki Sekiya (The University of Tokyo), Yoshitatsu Matsuda (Aoyama Gakuin University),
  Kazunori Yamaguchi (The University of Tokyo)

• Individual and Group Seminars and Workshops in the Computer Science Curriculum .......................... 53
  Tamar Benaya, Maya Herman, Daphna Shahak, Ela Zur (The Open University of Israel)

• Developing Verification-Driven Learning Cases ...................................................................................... 58
  Shengru Tu, Schun J. Oh, Rushikesh Kale, Aditya Kallem, Shireesha Tankashala (University of New Orleans)

Session 5: Laboratory Tools
Session Chair: Barbara Owens (Southwestern University)

• ComTest: A Tool to Impart TDD and Unit Testing to Introductory Level Programming .......................... 63
  Vesa Lappalainen, Jonne Itkonen, Ville Isomöttönen, Sami Kollanus (University of Jyväskylä)

• SAMtool, a Tool for Deducing and Implementing Loop Patterns ....................................................... 68
  José Luis Fernández Aleman, Youssef Oufaska (University of Murcia)

• PhidgetLab: Crossing the Border from Virtual to Real-World Objects ................................................. 73
  Michael Haupt, Michael Perscheid, Robert Hirschfeld, Lysann Kessler, Thomas Klingbeil,
  Stephanie Platz, Frank Schlegel, Philipp Tessenow (University of Potsdam)

Session 6: Online Learning
Session Chair: Monica McGill (Bradley University)

• LOMOLEHEA: Learning Object Model for Online Learning Based on the European Higher Education Area .................................................. 78
  Felipe Cocon (Universidad Rey Juan Carlos), Eugenio Fernández (Universidad de Alcalá)

• Online Education Experiences: Information Technologies Certificate Program at METU ........................ 83
  Erman Yükseltürk, Adnan Yazıcı (Middle East Technical University), Ahmet Saçan (Drexel University),
  Özgür Kaya (Middle East Technical University)

• Evaluation of Automatic Classroom Capture for Computer Science Education .................................. 88
  Paul E. Dickson (Hampshire College), David T. Arbou, W. Richards Adrion (University of Massachusetts),
  Amanda Gentzel (Westminster College)

Session 7: Theoretical Overtures
Session Chair: Lillian Cassel (Villanova University)

• Computer Lab Work on Theory ............................................................................................................. 93
  Emma Enström, Viggo Kann (School of Computer Science and Communication, KTH)

• Tail Recursive Programming by Applying Generalization ................................................................ 98
  Manuel Rubio-Sánchez (Universidad Rey Juan Carlos)

• Mental Models of Recursion: Investigating Students’ Understanding of Recursion ............................. 103
  Tamarisk L. Scholtz, Ian Sanders (University of the Witwatersrand)

Session 8: Reflections
Session Chair: Ulrich Kiesmueller (University of Erlangen-Nuremberg)

• Comparison of OOP First and OOP Later — First Results Regarding the Role of Comfort Level ........ 108
  Albrecht Ehler (OSZ Informations- und Medizintechnik), Carsten Schulte (Freie Universität Berlin)
• A Study on Student Performance in First Year CS Courses
  Anabela Jesus Gomes (University of Coimbra & Engineering Institute of Coimbra),
  Antônio José Mendes (University of Coimbra)

• Self-Predicted and Actual Performance in an Introductory Programming Course
  Paul Denny, Andrew Luxton-Reilly, John Hamer (The University of Auckland),
  Dana B. Dahlstrom (University of California, San Diego), Helen C. Purchase (University of Glasgow)

Session 9: Computational Thinking
Session Chair: Annemieke Craig (Deakin University)

• A Framework for Computational Thinking Across the Curriculum
  Ljubomir Perković, Amber Settle, Sungsoon Hwang, Joshua Jones (DePaul University)

• Helping Students Build a Mental Model of Computation
  Steven Kollmansberger (South Puget Sound Community College)

• File References, Trees, and Computational Thinking
  Craig S. Miller, Ljubomir Perkovic, Amber Settle (DePaul University)

Session 10: Social Networking
Session Chair: James Paterson (Glasgow Caledonian University)

• Effect of Media Richness on User Acceptance of Blogs and Podcasts
  Nauman Saeed, Yun Yang, Suku Sinnappan (Swinburne University of Technology)

• SNAG: Using Social Networking Games to Increase Student Retention in Computer Science
  Samantha L. Finkelstein, Eve Powell, Andrew Hicks, Katelyn Doran, Sandhya Rani Charugulla, Tiffany Barnes
  (University of North Carolina, Charlotte)

• Developing Tools to Encourage Reflection in First Year Students Blogs
  Roger McDermott, Garry Brindley, Gordon Eccleston (The Robert Gordon University)

Session 11: Educational Quality
Session Chair: Roger Boyle (University of Leeds)

• Measuring of and Reacting to Learners’ Progress in Logic Programming Courses
  Stefan Friese (University of Duisburg-Essen)

• Student Self-Assessment in a Programming Course
  Using Bloom’s Revised Taxonomy
  Sanu Alaoutinen, Kari Smolander (Lappeenranta University of Technology)

• Learning (Through) Recursion:
  A Multidimensional Analysis of the Competences Achieved by CS1 Students
  Claudio Mirolo (University of Udine)

Session 12: Introductory Courses
Session Chair: Michal Armoni (Weizmann Institute of Science)

• Using Alice in CS1 – A Quantitative Experiment
  Ryan Garlick, Ebru Celikel Cankaya (University of North Texas)

• An Unusual CS 1 with High Standards and Confirming Results
  Guido Rößling, Max Möhlhäuser (Technische Universität Darmstadt)

• Teaching Abstraction in Introductory Courses
  Herman Koppelman (Open Universiteit in the Netherlands), Betsy van Dijk (University of Twente)

Session 13: Cyber Learning
Session Chair: Mohamad Neifforoshan (Stockton College)

• Reflecting on Online Learning Designs Using Observed Behavior
  Larry Howard, Julie Johnson, Carin Neitzel (Vanderbilt University)
• Cyberspace Meets Brick and Mortar: An Investigation into How Students Engage in Peer to Peer Feedback Using Both Cyberlearning and Physical Infrastructures .......... 184
  Ashok R. Basawapatna, Alexander Repenning (University of Colorado Boulder)

• e-Lectures to Support Blended Instruction in Multimedia Programming Course .......... 189
  Anastasios Karakostas, Stavros Demetriadis, Vasiliki Ragazou, Maria Amarliariotou
  (Aristotle University of Thessaloniki)

Session 14: Robots
Session Chair: Errol Thompson (University of Birmingham)

• Robotics and Intelligent Systems for Social and Behavioral Science Undergraduates ..... 194
  Tom Armstrong (Wheaton College)

• Creativity and Intrinsic Motivation in Computer Science Education: Experimenting with Robots ............................................................... 199
  Mikko Apiola, Matti Lattu (University of Helsinki),
  Tomi A. Pasanen (Tunma University, Iringa University College)

• Using Personal Robots in CS1: Experiences, Outcomes, and Attitudinal Influences .... 204
  Stefan A. Markham, K. N. King (Georgia State University)

Session 15: Avant Garde
Session Chair: Catherine Lang (Swinburne University of Technology)

• What Did Qubits Ever Do for Me? An Answer for CS2 Students ........................................... 209
  Michael Main, Robert Frohardt, Yingdan Huang (University of Colorado at Boulder)

• Experience Report: CS1 for Majors with Media Computation ............................................ 214
  Beth Simon, Päivi Kinnunen, Leo Porter (University of California, San Diego), Dov Zazkis (San Diego State University & University of California, San Diego)

• When CS 1 Is Biology 1: Crossdisciplinary Collaboration as CS Context ...................... 219
  Zachary Dodds, Ran Libeskind-Hadas, Eliot Bush (Harvey Mudd College)

Session 16: K-12
Session Chair: Julie Johnson (Vanderbilt University)

• Using Scalable Game Design to Teach Computer Science From Middle School to Graduate School ........................................... 224
  Ashok R. Basawapatna, Kyu Han Koh, Alexander Repenning (University of Colorado Boulder)

• Broadening Accessibility to Computer Science for K-12 Education ....................... 229
  Mark K. Gardner, Wu-chun Feng (Virginia Polytechnic Institute and State University)

• Enhancing K-12 Education with Alice Programming Adventures .................. 234
  Susan H. Rodger, Maggie Bashford, Lana Dyck, Jenna Hayes, Liz Liang, Deborah Nelson, Henry Qin
  (Duke University)

Session 17: Software Engineering
Session Chair: Shengru Tu (University of New Orleans)

• Evaluating the Effectiveness of a Pattern Application Support Tool for Novices .......... 239
  Masita Jalil (Universiti Malaysia Terengganu),
  Shahruhl Azman Noah, Sufian Idris (Universiti Kebangsaan Malaysia)

• Experiences in Software Engineering Courses Using Psychometrics with RAMSET .... 244
  Luis G. Martinez, Licea Guillermo, Antonio Rodriguez-Diaz, Juan R. Castro
  (Universidad Autónoma de Baja California)

• Modeling with Plato: The Unified Modeling Language in a Cultural Context ....... 249
  Luis de-Marcos (University of Alcalá), Fernando Flores (Lund University),
  José Javier Martinez (University of Alcalá)
Session 18: Collaboration
Session Chair: Mary Anne Egan (Siena College)

- Encouraging Reading and Collaboration Using Classroom Salon .................................................. 254
  Ananda Gunawardena, Aaron Tan, David Kaufer (Carnegie Mellon University)

- Collaborative Design of Cross-Disciplinary Game Minors Based on the IGDA Curriculum Framework ................................................................. 259
  Monica McGill (Bradley University)

- Skills and Knowledge for Hire: Leeds Source-It ........................................................................... 264
  Royce Neagle, Alison Marshall, Roger Boyle (University of Leeds)

Session 19: Human Factors
Session Chair: Tony Clear (Auckland University of Technology)

- Usability, Engagement & Development of a Digital Usability Laboratory in a Higher Education Environment ................................................... 269
  David Cox (Southampton Solent University)

- Online Identification of Learner Problem Solving Strategies Using Pattern Recognition Methods ............................................................................... 274
  Ulrich Kiesmuller, Sebastian Sossalla, Torsten Brinda, Korbinian Riedhammer (Friedrich-Alexander-University of Erlangen-Nuremberg)

Session 20: Upper Level Courses
Session Chair: Laurence Merkle (Wright State University)

- Undergraduate Database Instruction with MeTube ........................................................................ 279
  James Z. Wang, Timothy A. Davis, James M. Westall, Pradip K. Srimani (Clemson University)

- Hands-On Approach to Teaching Wireless Sensor Networks at the Undergraduate Level .................................................. 284
  Anna Förster, Mehdi Jazayeri (University of Lugano)

Session 21: Visualization
Session Chair: Henry Walker (Grinnell College)

- Integrating Categories of Algorithm Learning Objective into Algorithm Visualization Design: A Proposal ............................................................. 289
  Ming-Han Lee, Guido Röfling (Technische Universität Darmstadt)

- A Platform for Visualizing Digital Circuit Synthesis with VHDL ........................................ 294
  Abdihadi Shoufan, Zheng Lu, Guido Röfling (Technische Universität Darmstadt)

Tips, Techniques and Courseware
Session Chair: Serhat Azgur (Bilkent University)

- Using AVs to Explain NP-Completeness ......................................................................................... 299
  Pilu Crescenzi (Università di Firenze)

- Motivating Online Collaborative Learning .................................................................................. 300
  Paul Denny (The University of Auckland)

- Sharing and Discussing UML Modeling Exercises in a PLE .................................................... 301
  Jürgen Börstler (Uned University), Dimitris Dranidis, Ervin Ramollari (University of Sheffield), Sonja Trapp, Matthias Heintz, Sebastian Weber (Fraunhofer IESE)

- Open Source Widget for Parson's Puzzles .................................................................................... 302
  Petri Ihantola, Ville Karavirta (Aalto University)

- Serverless Automatic Assessment of JavaScript Exercises ..................................................... 303
  Ville Karavirta, Petri Ihantola (Aalto University)

- VCache: Visualization Applet for Processor Caches ................................................................. 304
  Berkin Ilbeyi, John A. Nestor (Lafayette College)
- Greenroom — A Teacher Community for Collaborative Resource Development ..........305  
  Neil Brown, Phil Stevens, Michael Költing (University of Kent)

- Promoting Active Learning Through Assignments ...........................................306  
  Gerry Cross (Mount Royal University)

### Posters

- Innovative CS Capstone Projects on Green Energy Applications with WSN in a Box .....307  
  Chia-Tien Dan Lo, Kai Qian (Southern Polytechnic State University),  
  Li Yang (University of Tennessee at Chattanooga)

- Advantage of Using Web 2.0 Applications in Class ........................................308  
  Ayşe Begüm Aydinol, Özgür Gültekin (Bilkent University)

- Assessment Methods and How Teachers and Students View Them  
  in a Computer Science Course at Uppsala University .....................................309  
  Mithat Canberk Ezal (Bilkent University)

- Linking Different Programming Paradigms – Thoughts about Instructional Design ........310  
  Noa Ragonis (Beit Berl College and Technion – Israel Institute of Technology),  
  Bruria Haberman (Holon Institute of Technology and Davidson Institute of Science Education)

- The Case for Error Detection Support During Online Testing  
  ........................................311  
  Amruth N. Kumar (Ramapo College of New Jersey)

- Inquiry-Based Active Learning in Introductory Programming Courses ................312  
  Kai Qian, Chia-Tien Dan Lo (Southern Polytechnic State University),  
  Li Yang (University of Tennessee at Chattanooga), Jigang Liu (Metropolitan State University)

- Lecturing about the Phenomenology of Databases ..........................................313  
  Luis de-Marcos (University of Alcalá), Fernando Flores (Lund University),  
  José-Javier Martinez (University of Alcalá)

- Improving CS Education at Wits Using an Online Assessment  
  and Evaluation System - A Case Study ....................................................314  
  Angelo Kyrilov (University of the Witwatersrand), Jarryd Chengalroyen (ECN Telecommunications),  
  Mayya Tokman (University of California, Merced)

- Support Tools for Graphs in Computer Science ............................................315  
  Victor N. Kasyanov (IIS & NSU)

- Changing the Learning Process of the Input/Output Topic  
  Using a Game in a Portable Console .........................................................316  
  Edurne Larraza-Mendiluze, Nestor Garay-Vitoria (University of the Basque Country)

- International Sustainable Exchange: Student Projects to Teach Social Responsibility ....317  
  Christopher Routh, Cary Laxer (Rose-Hulman Institute of Technology),  
  Logan Muller, Nicholas J. Dimmitt (Asian Institute of Technology)

- Portable Labs in a Box for Embedded System Education ..................................318  
  Kai Qian, Chih-Tien Dan Lo (Southern Polytechnic State University), Xiaolin Hu (Georgia State University)

- A Mobile Learning Tool to Deliver Online Questionnaires  
  ........................................319  
  Luis de-Marcos, José-Ramón Hilera, Eva García, Antonio García, José-Javier Martínez, José-Maria Gutiérrez,  
  Roberto Barchino, Salvador Otón, José Antonio Gutiérrez (University of Alcalá),  
  Elena Vilar (Sistema Sanitario de Madrid), Miriam Martínez (University of Alcalá),  
  Salvador Espinosa (Colegio Santa Ana)

- A Lecture about Teaching Informatics in Secondary Education  
  — Lecture Design and First Experiences .....................................................320  
  Torsten Brinda (University of Erlangen-Nuremberg), Peter Hubwieser (Technical University of Munich)

- Lego NXT as a Learning Tool .................................................................321  
  Mohamed Hamada, Sayoto Sato (The University of Aizu)
• embed4Auto — A PLE for Software Modelling ................................................................. 322
  Jürgen Börstler (Umeå University), Ömer Faruk Bay, Meltem Baturay (Gazi University)
  Sonja Trapp, Matthias Heintz, Sebastian Weber (Fraunhofer IESE)

• The Effect of Video Tutorials on Learning Spreadsheets .................................................. 323
  Ayşe Beglim Aydinol, Özgür Gültekin (Bilkent University)

• JavaMarker: An Eclipse Plug-in to Mark Students’ Java Exercises ...................................... 324
  Marzieh Ahmadzadeh, Mansoore Soltani (Shiraz University of Technology)

• What Do Promising High School Students Think About Studying Computing? .................. 325
  Deniz A. Gürsel, Banuççek Gürcuoğlu (Istanbul Bilgi University)

• Student-centered Design of a Parser Visualization Tool ...................................................... 326
  Francisco J. Almeida-Martínez, Jaime Urrizsa-Fuentes, Manuel Rubio-Sánchez, J. Ángel Velázquez-Iturbi
  (Universidad Rey Juan Carlos)

• Starting Out at University with Team Projects ...................................................................... 327
  Xavier Ferré, Antonio Giraldo, Gloria Sánchez-Torrubia, M. Asunción Sastre
  (Universidad Politécnica de Madrid)

Panels

• Computer Science Education in Turkey .............................................................................. 328
  Petek Aşkar (Hacettepe University)

• Professional Associations in K-12 Computer Science .......................................................... 329
  Chris Stephenson (Computer Science Teachers Association), Judith Gal-Ezer (The Open University of Israel),
  Margot Philipps (ACE Training Limited), Jan Vahrenhold (Technische Universität Dortmund)

Author Index ............................................................................................................................ 331
