International Academic Conference on the Future of Game Design and Technology 2010

(FuturePlay 2010)

at GDC Canada 2010

Vancouver, British Columbia, Canada
6 – 7 May 2010

ISBN: 978-1-61782-634-4
# Table of Contents

Association for Computing Machines (ACM) Designation  
ACM FuturePlay 2010 Chairs’ Welcome  
ACM FuturePlay 2010 Program Committee Membership  
Algoma University  
University of Ontario Institute of Technology

## Full Papers

### Design Track

**The Neurobiology of Play**  
Chris Bateman (International Hobo Ltd.), and Lennart Nacke (University of Saskatchewan)  

**Playing the System. Using Frame Analysis to Understand Online Play**  
Jaakko Stenros (University of Tampere)

**A Flexible Multi-Model Approach To Psychosocial Integration In Non Player Characters In Modern Video Games**  
Jiaming You (University of Western Ontario), and Michael Katchabaw (University of Western Ontario)  

**Ludemes and the Linguistic Turn**  
Nis Bojin (Simon Fraser University)

**The Organic Nature of Game Ideation: Game Ideas Arise from Solitude and Mature by Bouncing**  
Annakaisa Kultima (University of Tampere)

**Now It’s Personal: On Abusive Game Design**  
Miguel Sicart (IT University of Copenhagen) and Douglas Wilson (IT University of Copenhagen)

**Critic-Proofing: How Using Critic Reviews and Game Genres can Refine Heuristic Evaluations**  
Ian Livingston (University of Saskatchewan), Regan Mandryk (University of Saskatchewan), and Kevin Stanley (University of Saskatchewan)

**Critical Review on Video Game Evaluation Heuristics: Social Games Perspective**  
Janne Paavilainen (University of Tampere)
Designing Games for Everyone: The Expanded Game Experience Model
Annakaisa Kultima (University of Tampere), and Jaakko Stenros (University of Tampere)

The Craft of Computer Programming: Lifting the Veil
Donald H. House (Clemson University), Brian A. Malloy (Clemson University), and Cory Buckley (Clemson University)

Cheating Attacks and Resistance Techniques in GeoGame Design
Robert Hall (AT&T Labs Research)

Game Design for Ad-Hoc Multi-Touch Gameplay on Large Tabletop Displays
Jonas Schild (University of Duisburg-Essen), and Maic Masuch (University of Duisburg-Essen)

TableTalk Poker: An Online Social Gaming Environment for Seniors
Nicholas Shim (University of Toronto), Ronald Baecker (University of Toronto), and Jeremy Birnholtz (Cornell University)

Skins 1.0: A Curriculum for Designing Games with First Nations Youth
Beth Aileen Lameman (Simon Fraser University), Jason E. Lewis (Concordia University), and Skawennati Fragnito (Aboriginal Territories in Cyberspace)

Epidemic: e-Learning Goes Viral
Nicholas Taylor (York University), Jennifer Jenson (York University), and Suzanne de Castell (Simon Fraser University)

GLUBs: Games for Learning and Understanding Biology
Grigore Pintilie (York University)

Addictive Gameplay: What Casual Game Designers Can Learn from Slot Machine Research
Kevin Harrigan (University of Waterloo), Karen Collins (University of Waterloo), Michael Dixon (University of Waterloo), and Jonathan Fugelsang (University of Waterloo)

Technical Track

User Studies-A Strategy Towards a Successful Industry-Academic Relationship
Beth Aileen Lameman (Simon Fraser University), Magy Seif El-Nasr (Simon Fraser University), Anders Drachen (Dragon Consulting), Wendy Foster (Simon Fraser University), Dinara Moura (Simon Fraser University), and Bardia Aghabeigi (Simon Fraser University)
Teaching Strategies to Millenial Students
Wei Shi (University of Ontario Institute of Technology), and Jean-Pierre Corriveau (School of Computer Science, Carleton University) 143

Activate Your GAIM: A Toolkit for Input in Active Games
Matthew Brehmer (Queen's University), T.C. Nicholas Graham (Queen's University), and Tadeusz Stach (Queen's University) 151

Wiimote vs. Controller: Electroencephalographic Measurement of Affective Gameplay Interaction
Lennart Nacke (University of Saskatchewan) 159

Gameplay Evaluation of the Trackball Controller
Daniel Natapov (York University), and I. Scott MacKenzie (York University) 167

The Trackball Controller: Improving the Analog Stick
Daniel Natapov (York University), and I. Scott MacKenzie (York University) 175

Touchscreens vs. Traditional Controllers in Handheld Gaming
Loutfouz Zaman, Daniel Natapov (York University), and Robert Teather (York University) 183

Raptor: Sketching Games with a Tabletop Computer
J. David Smith (Queen's University), and Nicholas Graham (Queen's University) 191

Digital Distribution of Games: The Player's Perspective
Saara Toivonen (University of Tampere), and Olli Sotamaa (University of Tampere) 199
Short Papers

Aristotle Would Have Admired BioShock While Shakespeare Would Have Played Dragon Age
David Owen (Thompson Rivers University)

Single Webcam 3D Tracking for Video Games
David Scherfgen (Bonn-Rhein-Sieg University of Applied Sciences), Rainer Herpers (Bonn-Rhein-Sieg University of Applied Sciences), and Timur Saitov (Bonn-Rhein-Sieg University of Applied Sciences)

"Oh-No! Banjo"—A Case Study in Alternative Game Controllers
Mike Ey (Rochester Institute of Technology), Joe Pietruch (Rochester Institute of Technology), and David Schwartz (Rochester Institute of Technology)

THEEMPA: Simple AR Games Using Layar
Farjana Eishita (University of Saskatchewan), and Kevin Stanley (University of Saskatchewan)

Breaking Boundaries: Learning by ARG Within an Academic Conference Presentation
Mela Kocher (University of California, San Diego), PJ Rusnak (University of British Columbia), and Ken Eklund (WriterGuy)

Improving Content Download Performance in Online Virtual Worlds
Carl Symborski (EtherNexus)

Virtual World Professionals and Avatar Appearance Codes
Victoria McArthur (York University)

Exergames for Adult Users: A Preliminary Pilot Study
Lorna Boschman (Simon Fraser University)

A Framework for the Online Evaluation of Serious Games
Veliian Pandeliev (University of Toronto), and Ronald Baecker (University of Toronto)

PiNiZoRo: A GPS-based Exercise Game for Families
Kevin Stanley (University of Saskatchewan), Ian Livingston (University of Saskatchewan), Alan Bandurka (University of Saskatchewan), Robert Kapiszka (University of Saskatchewan), and Regan Mandryk (University of Saskatchewan)

Embedded Narrative in Game Design
Huaxin Wei (Simon Fraser University)
Extended Abstracts

Serious Games for Analog Telecommunications Education
Alex Monclou (Universidad Pontificia Bolivariana Seccional Bucaramanga), Sayra Cristancho (The Hospital for Sick Children), Bill Kapralos (University of Ontario Institute of Technology), and Adam Dubrowski (The Hospital for Sick Children)

An exploration of Distributed Mobile Audio and Games
Karen Collins (University of Waterloo), Bill Kapralos (University of Ontario Institute of Technology), Andrew Hogue (University of Ontario Institute of Technology), and Kamen Kanev (Shizuoka University)

GameSoup: A Two-stage Game Development Environment
Kevin Tonon (University of Toronto), and Ronald Baecker (University of Toronto)

An Emotion Aware Agent Platform for Interactive Storytelling and Gaming
Zhiqi Shen (Nanyang Technological University), Chunyian Miao (Nanyang Technological University), Liang Zhang (Nanyang Technological University), Han Yu (Nanyang Technological University), and Mark J. Chavez (Nanyang Technological University)

The Virtual Jet Ski: A Visual-Physical Motion Simulation
Andrew Speers (York University), Lowell Crotin (York University), Douglas Stamp (York University), Timothy Crawford (York University), and Tushar Goel (York University)

Wiimote-Controlled Stereoscopic Visualization With Sonic Augmentation
Jonathan Lam (University of Ontario Institute of Technology), Christopher Collins (University of Ontario Institute of Technology), Bill Kapralos (University of Ontario Institute of Technology), Andrew Hogue (University of Ontario Institute of Technology), and Miguel Garcia (University of Colima)
