# Table of Contents

## Indoor Positioning and Navigation

*Invited Talk*
Localization and Interaction in Active Indoor Environments
*Lars Kulik*

Enhanced Positioning Systems: Accuracy through Mapping, Calibration, and Classification
*Scott Bell, Wook Jung and Vishwa Krishnakumar*

A Spatial Orientation and Information System for Indoor Spatial Awareness
*Rongxing Li, Boris Skopljak, Alper Yilmaz, Shaojun He, Pingbo Tang and Jinwei Jiang*

Supporting 3D Route Planning in Indoor Space Based on the LEGO representation
*Wenjie Yuan and Markus Schneider*

## Modeling of Indoor Spaces

*Keynote Talk*
Multiple Ontologies for Spatial Exploration and Mapping
*Benjamin Kuipers*

An Enhanced Indoor Pedestrian Model Supporting Spatial DBMSs
*Suyeong Kwak, Hyunwoo Nam and Chulmin Jun*

A Fine-Grained Context-Dependent Model for Indoor Spaces
*Imad Afyouni, Cyril Ray and Christophe Claramunt*

A Multi-Modal Data Access Framework for Spatial Assistance Systems
*Carl Schultz and Mehul Bhatt*

## Outlook

The Informatics of Indoor and Outdoor Space: A Research Agenda
*Nicholas Giudice, Lisa Walton and Michael Worboys*
