Proceedings of the

ASME Conference on Smart Materials, Adaptive Structures and Intelligent Systems – 2010 –

VOLUME 1

ACTIVE MATERIALS, MECHANICS AND BEHAVIOR
MODELING, SIMULATION AND CONTROL
BIO-INSPIRED SMART MATERIALS AND STRUCTURES

presented at
ASME 2010 CONFERENCE ON SMART MATERIALS, ADAPTIVE STRUCTURES AND INTELLIGENT SYSTEMS
SEPTEMBER 28–OCTOBER 1, 2010
PHILADELPHIA, PENNSYLVANIA USA

sponsored by
NANOTECHNOLOGY INSTITUTE, ASME
CONTENTS

ACTIVE MATERIALS, MECHANICS AND BEHAVIOR
SMASIS2010-3609......................................................................................................................... 1
Stress-Induced Martensitic Phase Transformation in Nitinol Under Hard Cyclic Loading
  Kyubum Kim, K. Anne Juggernauth, and Samantha Daly

SMASIS2010-3628......................................................................................................................... 9
An Analysis of Composite Piezoelectric Actuators Incorporating Nonlinear Material Behavior
  Virginia G. DeGiorgi and M. A. Siddiq Qidwai

SMASIS2010-3634......................................................................................................................... 21
Applications and Mechanics of Pressure Adaptive Honeycomb
  Roelof Vos and Ron Barrett

SMASIS2010-3650......................................................................................................................... 33
Performance Evaluation of the Pre-Stressed Piezoelectric Unimorph Using Nonlinear Piezoelectric Properties
  Lae-Hyong Kang and Jae-Hung Han

SMASIS2010-3652......................................................................................................................... 41
A Ferromagnetic Shape Memory Foil Actuator
  Manfred Kohl, Berthold Krevet, Srinivasa R. Yeduru, Yossi Ezer, and Alexei Sozinov

SMASIS2010-3654......................................................................................................................... 49
The Challenges of Modeling Magnetic Shape Memory Alloys Under Complex Load Paths
  Alex B. Waldauer, Heidi P. Feigenbaum, and Constantin Ciocanel

SMASIS2010-3667......................................................................................................................... 57
Singularities in Landau-Devonshire Potentials for Ferroelectric Phase-Transitions
  Fabrizio Davé

SMASIS2010-3669......................................................................................................................... 63
The Low Frequency Characteristics of Dielectric Elastomer Acoustic Actuators
  Allan J. Moustgaard, Richard W. Jones, Benny Lassen, and Rahimullah Sarban

SMASIS2010-3674......................................................................................................................... 69
The Strain Rate- and Temperature-Dependent Mechanical Behavior of Veriflex-E in Tension
  A. J. W. McClung, G. P. Tandon, and J. W. Baur

SMASIS2010-3679......................................................................................................................... 79
Non-Contact Technique for Characterizing Full-Field Surface Deformation of Shape Memory Polymers
  Amber J. W. McClung, G. P. Tandon, K. E. Goecke, and J. W. Baur

SMASIS2010-3690......................................................................................................................... 89
Force Characterization of Hygroscopic Liquid Crystal Elastomers
  Michael R. Hays, Hongbo Wang, and William S. Oates
Experimental and Numerical Analysis of Recovery Stress in Ni_{47}Ti_{44}Nb_{9} Shape Memory Alloys: Application to Tightening
Boris Piotrowski, Tarak Ben-Zineb, André Eberhardt, and Etienne Patoor

Modeling the Behavior of Crystallizable Shape Memory Polymers Subject to Inhomogeneous Deformations
Mahesh Khanolkar, Jaskirat Sodhi, and I. Joga Rao

Modeling and Simulation of Light Activated Shape Memory Polymers
Jaskirat S. Sodhi and I. Joga Rao

Degradation of Sensor Systems in Multifunctional Composites
Mohammad Mehdirzadeh, Sabu John, Chun Wang, Michael Bannister, and Viktor Verijenko

Cyclic Behavior of Concrete Confined by Active and Passive Jackets
Eunsoo Choi, Yeon-Wook Kim, Young-Soo Chung, Hong-Taek Kim, and Baik-Soon Cho

Generic Models of Piezo-Actuators and Experimental Validation for Smart Applications
Abdou-Fadel Boukari, George Moraru, Jean-Claude Carmona, Francois Malburet, Ali Chaaba, and Mohammed Douimi

An Experimental Performance Evaluation of DC Power Generation and Power Loss in Full-Bridge Rectifier of Cantilever Type of Piezoelectric Vibration Energy Harvester
Kazuhiko Adachi and Tohru Tanaka

Multiphysics Modelling and Design of Shape Memory Alloy Wave Springs as Linear Actuators
Andrea Spaggiari and Eugenio Dragoni

Effect of Microstructure on Lifetime Performance of Barium Titanate Ceramics Under DC and AC Electric Fields
Jay Shieh

Electromechanical Stability of Dielectric Elastomer Using Electric Energy Density Function With Variable Dielectric Constant
Liwu Liu, Tiefeng Li, Yanju Liu, and Jinsong Leng

Mechanical Properties of Metallic Cellular Materials With Polymer
Satoshi Kishimoto, Kimiyoshi Naito, Toru Shimizu, and Yin Fuxing
SMASIS2010-3792 267
Modeling of Inhomogeneous Deformation in a Dielectric Elastomer Generator for Energy Harvesting
Tiefeng Li, Christoph Keplinger, Liwu Liu, Richard Baumgartner, and Shaoxing Qu

SMASIS2010-3799 269
Characterizing of Ionic Polymer-Metal Composites (IPMC) for Sensitive Curvature Measurement
Yousef Bahramzadeh and Mohsen Shahinpoor

SMASIS2010-3813 275
Enhanced Piezoelectric Multilayered Beam: Modelling, Experimental Validation and Application to Actuation
A. Fernandes and J. Pouget

SMASIS2010-3819 285
Domain Evolution of Herringbone Structures in Ferroelectric Single Crystals
N. T. Tsou and J. E. Huber

SMASIS2010-3833 295
Analysis of Shape Memory Alloy Components Using Beam, Shell, and Continuum Finite Elements
Darren Hartl, Tyler Zimmerman, Matthew Dilligan, James Mabe, and Frederick Calkins

SMASIS2010-3847 307
Towards Self-Sensing of Deap Actuators: Capacitive Sensing Experimental Analysis
Alexander York and Stefan Seelecke

SMASIS2010-3849 315
Electro-Mechanical Analysis of a DEAP Actuator Coupled to a Negative-Rate Bias Spring Mechanism
Micah Hodgins, Alexander York, and Stefan Seelecke

SMASIS2010-3851 323
Thermomechanical Models for NiTi Shape Memory Alloys and Their Applications
Petr Sedláčk, Miroslav Frost, Tarak Ben-Zineb, and Petr Šittner

SMASIS2010-3855 331
A Design Method for Shape Memory Alloy Actuators Accounting for Cyclic Shakedown With Constrained Allowable Strain
WonHee Kim, Brian M. Barnes, Jonathan E. Luntz, and Diann E. Brei

SMASIS2010-3891 343
Anisotropic Bistable Electroactive Polymers: Large Strain Actuation of Shape Memory Polymers
Seyul Son and N. C. Goulbourne

SMASIS2010-3892 351
Actuation and Charging Characteristics of Ionic Liquid-Ionic Polymer Transducers
Jacob D. Davidson and N. C. Goulbourne
Aqueous Magnetorheological Suspensions of Composite Carbonyl Iron Particles
H. B. Cheng, L. Zuo, Q. J. Zhang, and N. M. Wereley

Modeling of the Nucleation and Growth of Domain Needles
Wenyuan Li and Chad M. Landis

Effects of Transverse Strains on the Measurement of the Thermal Expansion of the Composite Using FBG Sensors
Hong-II Kim, Jae-San Yoon, and Jae-Hung Han

Modelling of Wire-on-Drum Shape Memory Actuators for Linear and Rotary Motion
Giovanni Scirè Mammano and Eugenio Dragoni

Nonlinear Vibration Analysis of Shear Deformable Functionally Graded Ceramic-Metal Plates Using an Improved Higher Order Theory
Mohammad Talha and B. N. Singh

Augmented Adaptive Control of Flexible Structures Using Residual Mode Filters
Mark Balas and Susan A. Frost

Active Control of Geometrically Nonlinear Transient Response of Smart Laminated Composite Plate Integrated With AFC Actuator and PVDF Sensor
Shravankumar B. Kerur and Anup Ghosh

On the Development of the En Masse Elimination Algorithm for Actuator Grouping Optimization in Adaptive Structures
Jeffrey R. Hill and K. W. Wang

A Phase Field Model of Photo-Induced Trans-Cis-Trans Bending of Liquid Crystal Elastomer Films
Hongbo Wang and William S. Oates

Design of Switching Damping Control for Smart Structure Self-Powered Adaptive Damping Control
Chao-Ting Wu, Chih-Hsiang Yang, Wen-Jong Wu, and Chih-Kung Lee

The Modelling of Hysteresis in Magnetorheological Dampers Using a Generalised Prandtl-Ishlinskii Approach
Kun Wang, Ying Zhang, and Richard Jones
SMASIS2010-3673 .......................................................... 443
Configuration of Control System for an Adaptive Tensegrity Structure
Sinan Korkmaz, Nizar Bel Hadj Ali, and Ian F. C. Smith

SMASIS2010-3677 .......................................................... 453
Thermal Robustness Assessment of a Rigidized Space Inflatable Boom via Experimental
Modal Analysis and Finite Element Modeling
Matthew Daly, Armaghan Salehian, and Alireza Doosthoseini

SMASIS2010-3683 .......................................................... 461
Fluidic Composite Tunable Vibration Isolators
Lloyd H. Scarborough, III, Christopher D. Rahn, and Edward C. Smith

SMASIS2010-3684 .......................................................... 471
Torsional Behavior of Shape Memory Alloy Tubes for Biomedical Applications
Cory Chapman, Zohreh Karbaschi, Mohammad Elahinia, and Majid Tabesh

SMASIS2010-3702 .......................................................... 479
Effective Reduction of Peak Frequency in Hydraulic Engine Mounts
Reza Tikani, Nader Vahdati, and Saeed Ziaei-Rad

SMASIS2010-3710 .......................................................... 487
Electromechanical Modelling and Experiments of a Bistable Plate for Nonlinear
Energy Harvesting
Andres F. Arrieta, Alper Erturk, Peter Hagedorn, and Daniel J. Inman

SMASIS2010-3715 .......................................................... 495
Numerical Tools for Semi-Active Optimization of 2D Wave’s Dispersion Into
Mechanical System
Manuel Collet, Mohamed N. Ichchou, Massimo Ruzzene, and Morvan Ouisse

SMASIS2010-3718 .......................................................... 505
Optimal Parameters of an Electromagnetic Actuator for Actively Controlling the Vibration
of a Flexible Rotor-Shaft System
Anindya S. Das, Tarapada Roy, and Jayanta K. Dutt

SMASIS2010-3719 .......................................................... 513
Novel Sensor Placement for Damage Identification in a Cracked Complex Structure With
Structural Variability
Sung-Kwon Hong, Bogdan I. Epureanu, and Matthew P. Castanier

SMASIS2010-3736 .......................................................... 523
Flow Driven Vibration Energy Harvester
Enrico Bischur, Sebastian Pobering, Markus Menacher, and Norbert Schwesinger

SMASIS2010-3740 .......................................................... 529
Tunable Energy Harvesting From Ambient Vibrations
Mohamed Rhimi and Nizar Lajnef

SMASIS2010-3741 .......................................................... 535
Concepts for Standardized Shape Memory Actuators for Positioning Applications
Horst Meier, Alexander Czechowicz, and Sven Langbein
SMASIS2010-3746
Modeling of Hysteresis and Backlash Within a Smart Fin With a Piezoelectric Actuator
Mohamed B. Trabia, Woosoon Yim, and Mohammad Saadeh

SMASIS2010-3755
Position and Force Control of an SMA Spring Based Differential Actuator
Alireza Hadi, Mohammad Elahinia, Aghil Yousefi-Koma, Majid M. Moghadam, and Cory Chapman

SMASIS2010-3757
Experimental Analysis of a Cantilever Beam With a Shunted Piezoelectric Periodic Array
Benjamin S. Beck, Kenneth A. Cunefare, Massimo Ruzzene, and Manuel Collet

SMASIS2010-3772
Investigation of Wake Effects in Aeroelastic Flutter Vibration Energy Harvesting
Matthew J. Bryant, Michael E. Isenberg, and Ephrahim Garcia

SMASIS2010-3782
Analysis of Wrinkled Membranes Bounded With Macro-Fiber Composite (MFC) Actuators
Alireza Doosthoseini, Armaghan Salehian, and Matthew Daly

SMASIS2010-3796
Investigation of Soft and Hard Ceramics and Single Crystals for Resonant and Off-Resonant Piezoelectric Energy Harvesting
Alper Erturk, Ho-Yong Lee, and Daniel J. Inman

SMASIS2010-3814
Microstructures of Constrained Shape Memory Alloy Nanowires Under Thermal Effects
Rakesh P. Dhote, Roderick V. N. Melnik, Jean W. Zu, and Linxiang Wang

SMASIS2010-3815
FEA of Fuel Sensors: Effect of Dynamics and Temperature on Solder Joints
J.-P. Gilles Delaire and Kirk M. Ivens

SMASIS2010-3821
Broadband and Low Frequency Vibration-Based Energy Harvesting Improvement Through Magnetically Induced Frequency Up-Conversion
Adam M. Wickenheiser

SMASIS2010-3822
Low Frequency Piezoelectric Synthetic Jets
Charles E. Seeley, Mehmet Arik, Yogen Uttukar, and Tunc Icoz

SMASIS2010-3834
The Effect of Numerical Solution Procedure on the Simulation of Shape Memory Alloy Actuators
Eric Williams, Yonas Tadesse, Shashank Priya, and Dennis Hong

SMASIS2010-3879
Onset of Self-Excited Oscillations of Traveling Wave Thermo-Acoustic-Piezoelectric Energy Harvester
O. Aldraihem and A. Baz
Control of a Shape Memory Alloy Actuator for Mirror Positioning
Eric Williams, Gordon Shaw, and Mohammad Elahinia

Hysteresis Identification of Shape Memory Alloy Actuators Using a Novel Artificial Neural Network Based Presiach Model
Mohammad Reza Zakerzadeh, Mohsen Firouzi, Hassan Sayyaadi, and Saeed Bagheri Shouraki

Analysis of a Flexible Beam Actuated by Two Active SMA Wires
Mohammad R. Zakerzadeh and Hassan Sayyaadi

Actuators for Smart Applications
Alexandre Paternoster, Andre de Boer, Richard Loendersloot, and Remko Akkerman

A Bending Mode Galfenol Electric Power Harvester
Jin-Hyeong Yoo and Alison B. Flatau

Fabrication, Oxidation and Characterization of Shark Skin Inspired Riblet Structures as Aerodynamically Optimized High Temperature Coatings for Blades of Aeroengines
Claudia C. Buttner and Uwe Schulz

Chemomechanical Transduction in Hybrid Bio-Derived Conducting Polymer Actuator
Vishnu Baba Sundaresan and Hao Zhang

Design of a Passively Morphing Ornithopter Wing Using a Novel Compliant Spine
Yashwanth Tummala, Aimy Wissa, Mary Frecker, and James E. Hubbard, Jr.

A Computational Model for Structural Evolution of Protein Fibrils
Liang Cheng, William S. Oates, Ongi Englander, and Anant Paravastu

Fractal Inspired Multi-Frequency Structures for Piezoelectric Harvesting of Ambient Kinetic Energy
Davide Castagnetti

Fabrication and Testing of a Simple "Bionic Arm" Demonstrator
Larry D. Peel and Charles Ball
Development of Biomimetic Intelligent Material Applying Bio-SMA Honeycomb Structures
Hidetake Yamamoto and Kiyoshi Onishi

Thrust Modeling and Measurement for Clapping Wing Nano Air Vehicles Actuated by Piezoelectric T-Beams
Kiron Mateti, Zheqian Zhang, Srinivas A. Tadigadapa, and Christopher D. Rahn

Nonlinear Aeroelastic Study of Bending Divergence
Ghalib Y. Thwapiah and L. Flavio Campanile

A Dexterous Surgical Manipulation Tool Using Self-Sensing Magnetolectric Actuators
Yezuo Wang and Jayasimha Atulasimha

Polycation Coated Polymeric Particles as Vehicles of RNA Delivery Into Immune Cells
Ying Zheng and Wilson S. Meng

Design and Optimization of Hybrid Compliant Narrow-Gauge Surgical Forceps
Milton E. Aguirre and Mary Frecker

Encapsulated Interface Bilayers for Durable Biomolecular Materials
Stephen A. Sarles and Donald J. Leo

Computational Study of Inclusion Burst via the Proton Sponge Hypothesis
Eric Freeman, Lisa Mauck Weiland, and Wilson S. Meng

Modeling Bilayer Systems as Electrical Networks
M. Austin Creasy and Donald J. Leo

Precision Extrusion Deposition With Integrated Assisting Cooling to Fabricate 3D Scaffolds
Qudus Hamid, Wei Sun, and Selçuk Güçeri

Smart Self Sealing Pressure Vessels and Structural Panels
Dryver Huston and David Hurley

Performance Assessment and Actuator Design of a Flexible Tail Propulsor in an Artificial Alligator
Michael Philen and Wayne Neu
