## Full Research Papers

The complementary role of two evaluation methods in the usability and accessibility evaluation of a non-standard system  
*Funmi Adebesin, Paula Kotze and Helene Gelderblom* ........................................ 1

Probing some theoretical aspects of practitioner-based inquiry research in information systems  
*Udo Richard Averweg and Jan Hendrik Kroeze* ............................................. 12

Identifying annotations for adventure game generation from fiction text  
*Ross Berkland and Shaun Bangoy* .................................................................. 19

Mobile user experience in a mlearning environment  
*Adile Botha, Marlien Herselman and Darelle Van Greunen* .............................. 29

Panopticon: scalable monitoring system  
*Duncan Cloiigh, Stefano Rivera, Michelle Kuttel, Vincent Geddes and Patrick Marais* ........................................................................................................ 39

A four-way framework for validating a specification  
*Cyrille Dongmo and John A. van Der Poil* ....................................................... 48

A mobile commerce application for rural economy development: a case study for dwesa  
*Edim A. Emmanuel and Muyingi Hippolyte N* .................................................. 58

Mobile phone adoption: Do existing models adequately capture the actual usage of older adults?  
*Helene Gelderblom, Tobie van Dyk and Judy van Biljon* ................................. 67

Documenting open source migration processes for re-use  
*Aurona Gerber, Onkgopotse Molefe and Alta van der Merwe* ......................... 75

Investigating the feasibility factors of synthetic sign language visualization methods on mobile phones  
*Mehrdad Ghaziasgar and James Carman* ......................................................... 86

Application usage of unsupervised Digital Doorway computer kiosks in remote locations in South Africa  
*Kim Gush and Ruth de Villiers* ....................................................................... 93

PH2: An Hadoop-based framework for mining structural properties from the PDB Database  
*Scott Hazelhurst* ............................................................................................ 104

APOInter: an adaptive mobile tourist guide  
*Ryan Hill and Janet Wesson* ........................................................................... 113

M-health adoption and sustainability prognosis from a care givers' and patients' perspective  
*Boroto Hwabamungu and Quentin Williams* .................................................... 123

The evaluation of an adaptive user interface model  
*Bronwin Jason, André Calitz and Jean Greyling* ............................................. 132

Motivation and learning preferences of information technology learners in south african secondary schools  
*Melisa Koorsse, Charmain Cilliers and André Calitz* ..................................... 144
Ontology goes postmodern in ICT
Jan H. Kroese .......................................................... 153

Deriving a digraph isomorphism for digraph compliance measurement
Linda Marshall and Derrick Kourie ........................................ 160

User experience evaluation metrics for usable accounting tools
Job Mashapa and Darelle van Greumen ........................................ 170

Towards energy efficient mobile communications
Moshe Timothy Masonta, Mjumo Mayece and Ntsibane Ntlatlapa .......... 182

The impact of accents on automatic recognition of south african english speech: A preliminary investigation
Audrey Mbogho and Michelle Katz ........................................ 187

Sweeting the medicine: Educating users about information security by means of game play
Thomas Monk, Johan van Niekerk and Rossouw von Solms ...... 193

Integrated security framework for low cost RFID tags
Mark Muwanguzi and Elmarie Biernann ........................................ 201

A data lineage model for distributed subimage processing
Johnson Mwebaze, John John McFarland, Danny Booxhorn and Edwin Valentijn .............................. 209

A framework for benchmarking FA-based string recognizers
Ernest Ketcha Ngassam, Derrick Kourie and Bruce Watson .................. 220

Parallel packet classification using GPU co-processors
Alastair Nottingham and Barry Irwin ........................................ 231

Performance of C++ bit-vector implementations
Vreda Pieterse, Derrick G Kourie, Loek Cleophas and Bruce Watson ................ 242

An empirical study into the structure of heuristic combinations in an evolutionary algorithm hyper-heuristic for the examination timetabling problem
Nelishia Pillay .......................................................... 251

A study into the use of hyper-heuristics to solve the school timetabling problem
Nelishia Pillay .......................................................... 258

A South African Perspective of the international discourse about women in information technology
Hendrik Willem Pretorius and Carina de Villiers .................................. 265

Using Eye tracking to compare how adults and children learn to use an unfamiliar computer game
Marco Pretorius, Helene Gelderblom and Bester Chimbo ...................... 275

Qualitative techniques for evaluating enterprise resource planning (ERP) software interfaces
Brenda Scholtz, Charmain Cilliers and André Calitz .................................. 284

A virtual VLSI architecture for computer hardware evolution
Farouk Smith .......................................................... 294

Critical success factors for information systems outsourcing management: a software development lifecycle view
Hanlie Smits, Alta van der Merwe, Paula Kotze and Marianne Loock ............... 304

Design and evaluation of a multimodal interface for in-car communication systems
Patrick Thchankue, Dieter Yogts and Janet Wesson .............................. 314

Is Tilt interaction better than keypad interaction for mobile map-based applications?
Bradley van Tonder and Janet Wesson ........................................ 322
Determining requirements within an indigenous knowledge system of African rural communities

Heike Winschiers-Theophilus, Nicola J Bidwell, Shilumbe Chivuno-Kuria and Gereon Koch Kapuire

SHORT RESEARCH PAPERS

Blind assessment of image blur using the Haar wavelet

Asheer Kasar Bachoo

Towards database inference by GUI analysis: A case study

Meredith Barnes, Mathys C Du Plessis And Brenda Scholtz

A "busy-ness" model for assigning tutors to pupils in a mobile, online tutoring system: A look at C3TO

Laurie Buigereit and Reinhardt A Botha

Data classification for neural classifier training to aid in network incident identification

Bradley Cowie and Barry Irwin

Factors Influencing the Shortage of Skilled Storage Professionals in South Africa and Coping Strategies Employed

David Denton and Irwin Brown

Determining the User Profile for an Adaptable Training Platform

Marde Greeff, Quentin Williams, Ronell Alberts and Riette Pretorius

An overview of HLTs for South African Bantu languages

Aditi Sharma Grover, Karen Calteaux, Gerhard van Huyssteen and Marthinus Pretorius

On the Suitability of Quality Metrics for Mashups

Agnes Koschmider, Volker Hoyer and Andrea Fuchsloch

The Management of Service Desk Role Players: A South African Perspective

Awie Leonard and Ian Strydom

Numberplate Detection Using Double Segmentation

Pei Li and James Connan

A Framework for Predicting Droughts in Developing Countries Using Sensor Networks and Mobile Phones

Muthoni Masinde and Antoine Bagula

Acoustic modelling of Sepedi affricates for ASR

Thipe Modipa, Febe De Wet and Marelie Davel

Toward a service creation framework: a case of intelligent semantic services

Jabu Mtsweni, Elmarie Biermann and Laurette Pretorius

Wireless Network Deployment Configurations: Dwenza Rural Marginalized Area as a Case Study

Nkanyiso Ndlovu, Nobert Jere and Handsome Mpofu

An Informed Genetic Algorithm for the High School Timetabling Problem

Rushil Raghavjee and Nelshia Pillay

A Framework for Efficient File Transfer for Mobile Devices

Evan Saunders, Jean Greyling and Lester Cowley

Comparing and analyzing the computational complexity of FCA algorithms

Fedor Strok and Alexey Neznanov

Hybrid Online-Offline Digital Collections

Hussein Suleman, Marc Bowes, Matthew Hirst and Suraj Subrun
IT MODERATION GOING GREEN!
Corné Johandia van Staden ................................. 426

awareNet: The system design of a social networking software for disadvantaged South African schools
Ronald Roman, Robert Wertlen and Richard Strickland ................................. 429

INDUSTRY PAPER

CSFs for decision-making support systems: An IS practitioner-researcher perspective
Udo Richard Averweg ................................. 434
