CONTENTS

PREFACE .......................................................................................................................... 9

KRETTEK, O. (Germany)
Entwicklungsstand und Perspektiven in der Laufwerkstechnik ........................................ 11

MITSUHIRA, G.-TAJIMA, S.-MATSUZAKI, K.-EDO, Y.-ASANO, K.-
TAGUCHI, H.-NAGURA, H. (Japan)
Bogie Technology towards Raising Speeds of the Prototypes „FASTECH“ and
the Commercial Series “E5” in JR EAST .................................................................. 35

ORLOVA, A.-RUDAKOVA, E. (Russia)
Comparison of Different Types of Friction Wedge Suspensions in Freight Wagons .......... 41

SHUKLA, S.-GUPTA, R.-VYAS, N.S. (India)
Design Improvement in an Indian Railway Three Piece Freight Bogie Frame
Considering Fatigue Strength .................................................................................. 51

IWAMOTO, A.-SHIMOMURA, Y.-OGINO, T.-NAKAI, T.-SATO, Y.-
SHIMOKAWA, Y. (Japan)
The Newest Designed Bogie Truck with Bolster at Tokyo Metro ................................. 61

HARDER, R.F.-NOLAN, E. (USA)
Development of an Overhead Contact System Mobile Testing Trolley ....................... 69

RICHTER, W.D. (Germany)
Bogie Design Criteria and Wear Behaviour Results, Conclusions from Experiences
and Long-Term Investigations ............................................................................... 79

HARDER, R.F.-KENNEDY, T.C. (USA)
Thermal Modeling of Railcar Wheel Braking .................................................................. 89

SÁBITZ, L.-ZOBORY, I. (Hungary)
Finite Element Modelling of the Thermoelastic Processes in Tread-Braked Wheels ...... 103

ZOBORY, I.-SZABÓ, A.-BÉKEFI, E. (Hungary)
Operation Properties of a Four-Axle Freight Car Equipped with a Non-Traditional
Block Brake System .............................................................................................. 115

SCHWICKERT, M.-SCHINDLER, CH. (Germany)
Dynamic Behaviour of Long Freight Trains at Very Low Speed .................................. 131

TOMONAGA, A.-YANO, H. (Japan)
The Test Truck of SHINKANSENG ................................................................. 139

BEITELSCHEIMT, M.-KLOTZ, CH.-QUARZ, V. (Germany)
Acoustical Optimization of Railway Running Gear by Simulation and Experiment ....... 145

MYAMLIN, S.-ZHIZHKO, V.-PRIKHODKO, V.-DUZIK, V. (Ukraine)
Determination of Optimal Parameters of Coach Bogies Springing ............................. 151

THEILER, A. (Germany)
Optimization of Wheel Profiles of LRV Systems for Tram and Tram-Train Operations .... 163

WARD, C.P.-GOODALL, R.M.-DIXON, R (UK)
Wheel/Rail Profile Real-Time Estimation Techniques and Challenges ....................... 175

YAMAMATO, D. (Japan)
Estimation of Creep Coefficient between Actual Wheel and Rail .................................. 185

STEENBERGEN, M.J.M. (The Netherlands)
On Dynamic Train-Track Interaction in the Presence of Short System Inho-
mogenities - Deterioration and Treatment .................................................................. 195
FERENCZ, P. (Hungary)
Investigation into the Wheel Profile Wear Process Influenced by Parameter Anomalies in Suspension Characteristics of Electro-Locomotive Bogies

KLEINER, O.-SCHINDLER, CH. (Germany)
Numerical and Experimental Research into Loads on Wheel and Rail

POPOV, V.L.-STARCEVIC, J.-TEIDELT, E. (Germany)
Suppression of Cornering Squeal by Ultrasonic Oscillations

GERULL, M.-KOLBE, T. (Germany)
The Twisted Test Track: Conditions and Factors Influencing the Verification of Safety against Derailment

SHIMIZU, M.-TOMEOKA, M.-MATSUMOTO, K.-MATSUMOTO, A.-SATOH, Y.-OHNO, H.-TANIMOTO, M.-SATO, Y. (Japan)
A New Monitoring System for Derailment Coefficients without a Special Wheel-Set

OSHIKOSHI, K.-ASANO, K.-KATOU, H.-KAJITANI, Y.-MITSUHIRA, G. (Japan)
A Study of Riding Comfort at High Speeds by Wheel with Worn Tread Profile

ALFI, S.-BRUNI, S.-MAZZOLA, L. (Italy)
Numerical Methodology for the Evaluation of High Speed Vehicle Stability in Curved Track

KRETTEK, O.-MILUCZKY, A. (Germany + Hungary)
Was ist mit dem Ruck?

MICHITSUJI, Y.-MATSUMOTO, A.-SUDA, Y.-SATO, Y.-OHNO, H.-ADACHI, M.-TANIMOTO, M.-KISHIMOTO, Y.-SATO, Y.-NAKAI, T. (Japan)
Curving Performance and Hunting Stability Analysis on Active-Bogie-Steering Truck

ORVNAS, A.-STICHEL, S.-PERSSON, R. (Sweden)
Ride Comfort Improvements of REGINA Train with Active Lateral Secondary Suspension

KAZATO, A.-SUGAHARA, Y.-KOGANEI, R.-SANADA, K. (Japan)
Vertical Vibration Suppression of SHINKANSEN Vehicle by Damping Control of an Air Spring with Flow Control Valve

SUGAHARA, Y.-KOJIMA, T.-KAZATO, A. (Japan)
Vertical Vibration Suppression of Railway Vehicle by Damping Control of Secondary Vertical Damper

KURZECK, B.-VALENTE, L. (Germany)
The Mechatronic Track Guiding Concept for the DLR “Next Generation Train”

KALIVODA, J. (Czech Republic)
Mathematical Modelling and Experimental Implementation of a 2-Axle Bogie with Active Wheel-Set Guidance

BORONKAI, L. (Austria)
The Equivalent Bending Stress in the Wheel-Set Axle of a High-Speed Train as a Function of the Velocity
KONDO, O.-MAKINO, T.-YAMAMOTO, M.-SHIMOKAWA, Y.-NAKATA, M. (Japan)
Evaluation of Fatigue Properties on Welded Joints with Incomplete Penetration and Application to Fatigue Design Approach of Railway Bogie Frames ........................................337

STARKE, P.-EIFLER, D. (Germany)
Fatigue Life Calculation of Highly Stressed Railway Components on the Basis of “PHYBAL” ..................................................................................................................345

KOLONITS, F. (Hungary)
Analytic vs. FEM Calculation of a Rounded Hub/Shaft Contact with Respect to Fretting Risk ..............................................................................................................355

KAPS, H.-GERICKE, CH.-ESCHWEILER, P. (Germany)
Condition Based Maintenance for Freight Wagon Bogies ..................................363

RAMIN, D.-ALFI, S.-BRUNI, S. (Italy)
Fault Diagnosis of Bogie Components for High Speed Trains ................................373

TANIMOTO, M.-MIYAUCHI, E.-TOMEOKA, M.-MATSUMOTO, K.-SHIMIZU, M.-SAITOU, T.-SATO, Y. (Japan)
Monitoring System of Derailment Coefficient with Sensor-Equipped Rail in Service Line..................................................................................................................383

CHUDZIKIEWICZ, A.-SOWINSKI, B. (Poland)
Problems of Choosing Statistical Parameters in the Process of Monitoring the System of Railway Vehicle........................................................................................................391

KRÉMER, M. (Hungary)
Wheel-Set and Wheel-Set/Axle Inspection in Hungary and Changes after the Viareggio Accident ..............................................................................................................401

FEDI, E.-TAITI, M.-MONCINI, D.-TORTORANO, V. (Italy)
Re-Design of a Welded Bogie Frame with EN15085 Standard ..........................411

PETÁK, T.-ANKA, L.-CSERVENÁK, J.-PALASZKÓ, R. (Hungary)
Modernisation of Bogie 4ANc of Third Generation Intercity Coaches Built for MÁV ZRt. ..................................................................................................................421

PSHINKO, A.-MYAMLIN, S.-ZHIZHKO, V.-PRIKHODKO, V.-DUZIK, V. (Ukraine)
Dynamic Simulation of Railway Vehicles .................................................................429

KEPKA, M.-CHVOJAN, J. (Czech Republic)
Testing of Railway Structures at Laboratories .........................................................439

RÓZSAVÓLYGYI, ZS.-MAJOROS, A. (Hungary)
The Role of Material Testing in Investigating Operational Loads and Root Causes of Failures ..................................................................................................................445

ADVERTISEMENTS ..................................................................................................451
