Geo-Frontiers 2011

Advances in Geotechnical Engineering

Geotechnical Special Publication No. 211

Dallas, Texas, USA
13-16 March 2011

Volume 6 of 6

Editors:

Jie Han            Daniel A. Alzamora

ISBN: 978-1-61782-594-1
VOLUME 6

Bioremediation of Piping Erosion in Sand ........................................... 4060
Benjamin T. Adams, Ming Xiao

Development of Microbial Geotechnology in Singapore .................. 4070
J. Chu, V. Ivanov, J. He, M. Naami, B. Li, K. Shebekov

Application of Response Surface Methodology for Carbonate Precipitation Production Induced by a Mutant Strain of Sporosarcina pasteurii .................. 4079
Meng Li, Hongxian Guo, Xiaohui Cheng

Experiment Research from Macro to Micro on Microbial-Induced Clogging by Adding Potato Soup in Beijing Sand Column ........................................... 4089
Hechao Zhang, Hongxian Guo, Meng Li, Xiaohui Cheng

Bio-Mediated Ground Improvement: From Laboratory Experiment to Pilot Applications ........................................... 4099
L. A. Van Paassen

CHARACTERIZING AND PREDICTING EXPANSIVE SOIL BEHAVIOR

Correlations between Durability and Geotechnical Properties of Compacted Shales ........................................... 4109
L. S. Bryson, J. C. Gomez-Gutierrez, T. C. Hopkins

Correlations between Geotechnical Properties and the Swell Behavior of Compacted Shales ........................................... 4119
J. C. Gomez-Gutierrez, L. S. Bryson, T. C. Hopkins

The Role of Micro-Scale Properties in the Study of Expansive Soils ........................................... 4129
B. Lin, A. B. Ceralo

Study of the Fundamentals of Expansive Clays through Discrete Element Modeling ........................................... 4137
A. Anandarajah, C. Locatell

Prediction of Shear Strength and Volume Change Behaviour Using Hyperbolic Model ........................................... 4146
V. K. Stalin, R. B. Arun Murugan

Transient Behavior of a Clay Barrier Subjected to High Temperature Changes ........................................... 4156
Marcelo Sanchez, Ajay Shastri, Antonia Gens

MICRO-MECHANICS OF GRANULAR SOILS: EXPERIMENTATION, MODELING, AND COMPUTATIONAL ANALYSES

DEM Simulations of Wave Propagation in Dry Granular Soils ........................................... 4166
N. Zamani, U. El Shamy

Microscopic Research on Air Sparging I-Network Model Development ........................................... 4176
Zengyan Gao, Jay N. Mengola, Liqing Hu

Characteristics Analysis of Cavity Expansion with Anisotropic Initial Stress in a Two-Dimensional Numerical Model ........................................... 4186
Wenjun Han, Songli Liu, Dingwen Zhang, Huzin Zhou

Simulation of Fluid Flow through Porous Media Using Smoothed Particle Hydrodynamics Method ........................................... 4195
Wei Chen, Yong Guo

Probabilistic Calibration of a Discrete Particle Model for Geomaterials ........................................... 4204
Y. B. Zhang, Z. Medina-Cedina, H. D. V. Khoa
MICRO-MECHANICS OF GRANULAR SOILS: EXPERIMENTATION, MODELING, AND COMPUTATIONAL ANALYSES II

Interaction of Saturated Granular Soils with Pile Foundation: A Micro-Mechanical Study .................................................. 4214
Tewodros Dessalegn, Mourad Zeghal, Utama El Shamy, Claudia Medina

Vortex Structures inside Shear Bands in Sands .................................................. 4223
S. Abdil, A. L. Rechmecher

Microscale Characterization of Energy Dissipation Mechanisms in Granular Soils ................................................................ 4232
U. El Shamy, C. Demathien

Numerical Simulation of Reinforced Granular Soils Using DEM .................................................. 4242
J. S. Vinod, Swarat Nagaraj, T. G. Silharam, S. V. Donah

Discrete Simulations of Particulate-Structure Interactions .................................................................................. 4252
T. Matthew Event, Jeremy Kress

MULTI-SCALE CHARACTERIZATION AND MODELING OF SOILS I

Molecular Interactions Influence Barrier and Mechanical Properties in Swelling Clays: A Multiscale Modeling and Experimental Investigation ........................................................................... 4263
D. R. Katti, K. S. Katti

Modeling Macro-Scale Clay Secondary Compression at Micro-Scale Clay Particle Interfaces .................................................. 4273
Laura Karaghi, George Fils

Coupling Discrete Elements and Micropolar Continuum through an Overlapping Region .................................................. 4283
R. A. Regueiro, B. Tan

Modeling Granular Particle Shape Using Discrete Element Method .................................................................................. 4293
Novelita Das, Stephen Thomas, John Kajmam, Colin Donivan, Casey Hurt, Ali Dasounji, Aksam Ashmawy, Beena Subraman

Constitutive Behavior of Compacted Clayey Sand Using a Refined Suction-Controlled Cubical Test Cell .................................................................................. 4303
L. R. Hoyos, D. D. Pérez-Ruiz, A. J. Puppulo

MULTI-SCALE CHARACTERIZATION AND MODELING OF SOILS II

Small-Strain Stiffness of Unsaturated Soils Using a Suction-Controlled Resonant Column Device with Bender Elements .................................................................................. 4313
L. R. Hoyos, E. A. Swanson, A. J. Puppulo

Predicting Shear Strength Properties for Low-Sensitivity Granular-Cohesive Soils from SPT Results .................................................................................. 4323
Simon C. Murley, Hiroshan Hettiarachchi

Experiment Based Multiscale Computations in Granular Materials .................................................................................. 4333
J. E. Andrade, C. F. Avila

Effect of Smear on Radial Consolidation with Vertical Drains .................................................................................. 4349
Daping Xiao, Hong Yang, Ningzhong Xi

A Multi-Scale Multi-Physics Model of Soil Drying .................................................................................. 4359
L. B. Hu, H. Peron, L. Laloue, T. Hueckel

SOIL-STRUCTURE/GEOSYNTHETICS INTERACTION

New Hybrid Subgrade Model for Soil-Structure Interaction Analysis: Foundation and Geosynthetic Applications .................................................................................. 4369
Robby S. Santos, Steven Kue, Victor Cronerio

Shake Table Testing of Seismic Soil-Foundation-Structure-Interaction .................................................................................. 4378
Weiwen Zang, Wei T. Schuwa

Pullout Response of Geosynthetic in Soil—Theoretical Analysis .................................................................................. 4388
Zehong Yuan

Soil-Pipe Interaction Analysis: A Forensic Evaluation .................................................................................. 4398
John T. Bryant, M. Adil Have

Shaking Table Tests on Dry and Saturated Sand with Large Embedded Objects .................................................................................. 4408
L. E. Vallejo, Myra Mei Cheng Au

TRANSPORTATION MATERIALS AND PAVEMENTS

Behavior and Design of Stabilized Pavement Layers and Foundations I

Utilization of Industrial Wastes in Pavements Laid over Expansive Clay Sub-Grades .................................................................................. 4418
A. Sreerama Rao, G. Sridevi

Life-Cycle Cost Analysis of Base Course Using Cold In-Place Recycling: Case Study .................................................................................. 4428
Weiwang Zhang, Jin Yang, Xiaoxiang Fan, Ruochang Yang, Jin Yu

Characterization of Lime- and Fly Ash-Stabilized Soil by Indirect Tensile Testing .................................................................................. 4438
Praneeth Solanki, Madhavur Zamani
The Use of Fibre Reinforced Crushed Rocks for the Improvement of Tensile Strength
Konmin Siripun, Peerapong Jitsangiam, Hamid Nikraz

The Effects of Moisture Characteristics of Crushed Rock Base (CRB)
Konmin Siripun, Peerapong Jitsangiam, Hamid Nikraz

BEHAVIOR AND DESIGN OF STABILIZED PAVEMENT LAYERS AND FOUNDATIONS II

Accelerated Design Process of Lime-Stabilized Clays
Manuel Celaya, Maiyam Yeisi, Soheil Nazarian, Anand Puppala

Leachate Studies on Lime and Portland Cement Treated Expansive Clays
S. Chitloori, A. Pedarla, A. J. Puppala, L. R. Hoyos, S. Nazarian, S. Saride

Stiffness Improvement of Expansive Soil-Rubber Mixtures with Off-Specification Fly Ash
Ethan P. Wiechert, Jesse Dunham-Friel, J. Antonio H. Carraro

Performance of Geogrid Reinforced Rubber Waste As Subgrade Material
Peng Li, Lin Li, Juanyi Liu, Stephen Saboundjian

CHARACTERIZATION OF CONSTRUCTION MATERIALS

Laboratory Assessment of Skid Resistance for High RAP Content Warm Mixed Asphalt
Jesse D. Doyle, Isaac L. Howard

Comparison of Properties of RAP Aggregates Extracted by Ignition and Centrifuge Methods
Subhash C. Thakur, Jin Han, Wei Kiong Chong, Robert L. Parsons

Correlation between PG Plus, Superpave PG Specifications, and Molecular Weight from GPC for Different Polymer Modified Binders
Eileen Batten, Yvsef Mehta, Aaron Nolan, Sarah Zorn, Kevin Dahm

EPS Geofoam Design Parameters for Pavement Structures
Zixiaodi Huang, Davi Neguessey

EVALUATION OF HIGHWAY PAVEMENTS AND RAILROADS

Evaluation of the Cantabro Durability Test for Dense Graded Asphalt
Jesse D. Doyle, Isaac L. Howard

Development and Evaluation of Functional Open Graded Friction Courses (FOGFC) Mixtures for In Situ Highway Runoff Treatment
Liang Wang, Hashim R. Rizvi, Mohammad J. Khastieh, Daniel D. Gang

Predicting Pavement Service Life Using M-EPDG with LTPP Climatic Database
Can Chan, Jie Zhang

Comparisons of IRI-Based Pavement Deterioration Prediction Models Using New Mexico Pavement Data
R. S. Lomber, C. L. Ito, J. P. Hyslip

Effects of a Wax-Based Warm Mix Additive on Lower Compaction Temperatures
Nasiruddin M. Wasimuddin, Rajan Soha, William King Jr.

GEOSYNTHETIC REINFORCEMENT MECHANISMS IN PAVEMENT STABILIZATION

New Developments for Geogrid Reinforced Base Courses
Kent V. Maslanyuk, J. Klaeymaker

In-Aggregate Testing of Unitized and Woven Geogrids for Base Reinforcement Applications
E. Hintari, Z. Wang, T. Mohamed, R. Gablala, M. M. Zaman

The Function of Basal Geogrids in Minimizing Rutting of Geocell Reinforced Subgrades
Sireesh Saride, T. G. Sitharum, Anand J. Puppala

A Validated Discrete Element Modeling Approach for Studying Geogrid-Aggregate Reinforcement Mechanisms
Yi Qian, Erol Tutumluer, Hai Huang

In-Ground Dynamic Stress Measurements for Geosynthetic Reinforced Subgrade/Subbase

Back-Calculated Pavement Layer Modulus Values of Geogrid Reinforced Test Sections
K. S. Henry, Joshua Clapp, William G. Davids, Lynette Barnes
GEOSYNTHETIC REINFORCEMENT OF PAVEMENT AND RAILROAD SYSTEMS

Nonlinear Response of Infinite Beams on Reinforced Earth Beds under Moving Loads ............................................. 4683
Priti Maheshwari, K. Karuppasamy

Enhancing Ballast Performance Using Geocell Confinement ....................................................................................... 4693
Ben A. Leshchinsky

Full-Scale Field Study of Geosynthetics Used As Subgrade Stabilization ................................................................. 4703
E. V. Cuelho, S. W. Perkins, K. Von Maubeuge

Use of Falling Weight Deflectometer Data to Quantify the Relative Performance of Reinforced Pavement Sections .... 4713
R. V. Joshi, J. G. Zornberg

Creep Deformation of Unreinforced and Geocell-Reinforced Recycled Asphalt Pavements ................................ 4723
Jitendra K. Thakur, Jing Han, Dov Leshchinsky, Isolare Halahmi, Robert L. Parsons

Use of Geosynthetics in Railways Including Geocomposites and Vertical Drains ......................................................... 4733
Buddhima Indraraina, Cholachai Rujikiatkamjorn, Sanjay Nimbalkar

MECHANISTIC-BASED EVALUATION OF PAVEMENT LAYER AND FOUNDATION PROPERTIES I

Determination of Resilient Modulus of Subgrade Using Cyclic Plate Loading Tests ....................................................... 4743
Yu Qian, Jie Han, Sunan K. Pokharel, Robert L. Parsons

Evaluation of the Shakedown Behavior of Unbound Granular Base Materials .............................................................. 4752
Munir D. Nazzal, Louay N. Mohammad, Aaron Austin

Prediction of the Subgrade Resilient Modulus for the Implementation of the MEPDG in Idaho ..................................... 4762
S. M. El-Badawy, F. M. Bayomy, S. M. Miller

Effect of Long Term Oven Aging on Dynamic Modulus of Hot Mix Asphalt ............................................................ 4773
Dharamveer Singh, Musharraf Zaman, Sana/ K. Pokharel, Robert L. Parsons

Effect of Plasticity of Fines on the Deformation Behavior of Unbound Granular Base Material ............................... 4782
M. Ohiabuzo, S. C. R. Lee, G. Craig

Stress Distribution of Unbound Granular Base Course .................................................................................................... 4792
Konnun Siripun, Pavanaopas Jitloangdorn, Hamid Niaz

MECHANISTIC-BASED EVALUATION OF PAVEMENT LAYER AND FOUNDATION PROPERTIES II

Effect of Spatial Variations in Subgrade Stiffness on Pavement Performance .............................................................. 4802
A. W. Ali, A. R. Abul, E. Seti

Mechanistic Characteristics of Asphalt Binder and Asphalt Matrix Modified with Nano-Fibers ............................. 4812
Mohammad J. Khosht, Ahmad Khosht, Hashim R. Ritis

Characterization of Subgrade Resilient Modulus for Pavement Design ................................................................. 4823
Z. Hassain, M. Zaman, C. Doiron, P. Selank

Determining Effective Material Properties and Particle Size for Asphaltic Composites Using Microstructure Approach .................................................................................................................. 4833
Samer Dessouky, A. T. Papagiannakis

Resilient Modulus Behavior Estimated from Aggregate Source Properties ............................................................... 4843
Wentong Xiao, G. D. Dahotre, John Smolen

Mechanistic-Based Characterization of Non-Linear Pavement Mechanical Properties with Evolving Intelligent Information Processing Systems ......................................................................................... 4853
Karthirangan Gopalskrishnan, Halll Ceyalan, Sungibae Kim
