Preface  13

About the Authors  19

1  INTRODUCTION TO JAVA:
OBJECT-ORIENTED PROGRAMMING
FOR MODELING A WORLD  23

1  Objects for Modeling a World  25
   1.1  Making Representations of a World  27
   1.2  Why Java?  33
        Getting Java Set Up  33

2  Introduction to Java  37
   2.1  What's Java About?  37
   2.2  Basic (Syntax) Rules of Java  39
        Declarations and Types  39
        Strings  41
        Object Variables and Primitive Variables  42
        Assignment  44
        Semicolons  44
        Conditionals  44
        Arrays  46
        Iteration  47
        Strings versus Arrays and Substrings  48
   2.3  Using Java to Model the World  48
        Discourse Rules for Java  53
        Defining toString  53
        Defining Student as Subclass of Person  54
        Creating a main() Method  57
        Exploring Inheritance  58
   2.4  Manipulating Pictures in Java  61
   2.5  Exploring Sound in Java  67
   2.6  Exploring Music in Java  68
3 Methods in Java: Manipulating Pictures 73
3.1 Reviewing Java Basics 73
   Assignment 73
   Arrays 75
   Conditionals 75
   Iteration: For each, While, and For 76
3.2 Changing the Picture Class 77
   Pictures Are About Arrays and Pixels 79
   A Method for Decreasing Red 79
   Method with an Input 82
3.3 Methods That Return Something: Compositing Images 84
   Composing by Chromakey 90
3.4 Creating Classes That Do Something 93

4 Objects as Agents: Manipulating Turtles 97
4.1 Turtles: An Early Computational Object 97
4.2 Drawing with Turtles 98
   When Cascades Don't Work 100
   Making Lots of Turtles 101
   Composing Pictures with Turtles 103
4.3 Creating Animations with Turtles and Frames 105
   The Data Structure within FrameSequencer 108
4.4 Making a Slow Moving Turtle with sleep and Exceptions 110

5 Arrays: A Static Data Structure for Sounds 115
5.1 Manipulating Sampled Sounds 115
5.2 Inserting and Deleting in an Array 120
5.3 How Slow Does It Get? 124

2 INTRODUCING LINKED LISTS 127

6 Structuring Music Using Linked Lists 129
6.1 JMusic and Imports 129
6.2 Making a Simple Song Object 134
6.3 Making a Song Something to Explore as a Linked List 135
   Walking through SongNode 143
   Improving insertAfter 147
13.2 Building and Rendering User Interfaces 340
   Building a Simple User Interface 340
   Java Swing Layout Managers: GUI Tree Renderers 344
13.3 Creating an Interactive User Interface 347
   Making Our GUI tree Interactive 349
   Creating a Picture Tool 351
13.4 Running from the Command Line 356

4 SIMULATIONS: PROBLEM SOLVING
WITH DATA STRUCTURES 361

14 Using an Existing Simulation Package 363
   14.1 Introducing Simulations 363
   14.2 Overview of Greenfoot 365
   14.3 Greenfoot Basics 370
   14.4 Creating New Classes 372
   14.5 Breakout 377

15 Introducing UML and Continuous Simulations 387
   15.1 Our First Model and Simulation: Wolves and Deer 387
      Modeling the Wolves and Deer 389
   15.2 Modeling in Objects 390
   15.3 Implementing the Simulation Class 394
   15.4 Implementing a Wolf 397
   15.5 Implementing Deer 402
   15.6 Implementing AgentNode 403
   15.7 Extending the Simulation 404
      Making Hungry Wolves 404
      Writing Results to a File 407
      Getting Results from a Simulation 411

16 Abstracting Simulations: Creating a Simulation Package 413
   16.1 Creating a Generalized Simulation Package 413
      Real Programmers Rarely Build Data Structures 414
Real Programmers Make Models and Choices 415
The Structure of the Simulation Package 416
Using a Linked List from the Java Collection Classes 419
16.2 Re-Making the Wolves and Deer with Our Simulation Package 420
16.3 Making a Disease Propagation Simulation 428
   Exploring Scenarios in Disease Propagation 432
16.4 Walking through the Simulation Package 434
16.5 Finally! Making Wildebeests and Villagers 439
   Going Beyond the Wildebeests 447

17 Discrete Event Simulation 456
17.1 Describing a Marketplace 456
17.2 Differences between Continuous and Discrete Event Simulations 457
   Introducing Resources 458
17.3 Different Kinds of Random 458
   Random Distributions in the World 459
   Generating Different Random Distributions 460
   Generating Useful Random Distributions 466
17.4 Ordering Events by Time 469
   Sorting Objects 473
   Inserting into a Sorted List 474
   Using a Min-Heap 475
17.5 Implementing a Discrete Event Simulation 477
   Building a Discrete Event Simulation 480
17.6 The Final Word: The Thin Line between Structure and Behavior 493

Bibliography 497
