PART B

FLOW-SOUND AND FLUID-STRUCTURE-ACOUSTICAL INTERACTIONS

FEDSM/ICNMM2010-30104 ................................................................. 681
Vortex Shedding and Acoustic Resonance of Single and Tandem Finned Cylinders
Mohammed Eid and Samir Ziada

FEDSM/ICNMM2010-30128 ................................................................. 693
Study on Evaluation of Sound Speed in Duct With Tube Banks
Kunihiko Ishihara

FEDSM/ICNMM2010-30215 ................................................................. 703
Self-Sustained Oscillations of High Speed Impinging Planar Jets
David Arthurs and Samir Ziada
FSI INVOLVING AXIAL FLOWS (PIPES, CYLINDERS, ETC.)

FEDSM/ICNMM2010-30028 ................................................................. 829
Fluid-Structure Interaction in Annular Flows With Several Modes of Vibration
   Abolghasem Mekanik and Naser Sayma

FEDSM/ICNMM2010-30034 ................................................................. 839
Influence of Geometry on the Non-Linear Vibrations of Cylindrical Shells With Internal
   Flowing Fluid
   Zenon J. del Prado, Paulo B. Gonçalves, and Michael P. Paidoussis

FEDSM/ICNMM2010-30074 ................................................................. 849
Flow Conditions at the Inlet of Aspirating Pipes: Part 1 — Theory
   François Axisa

FEDSM/ICNMM2010-30075 ................................................................. 861
Flow Conditions at the Inlet of Aspirating Pipes: Part 2 — Experiments
   Vincent Debut, Jose Antunes, and François Axisa

FEDSM/ICNMM2010-30079 ................................................................. 875
The Dynamics of Cantilevered Flexible Plates in Axial Flow
   Wensheng Zhao, Michael P. Paidoussis, Liaoasha Tang, Meiqing Liu, and Jin Jiang

FEDSM/ICNMM2010-30082 ................................................................. 883
On the Feasibility of Using Linear Fluid Dynamics in an Overall Nonlinear Model for the
   Dynamics of Cantilevered Cylinders in Axial Flow
   M. Kheiri, M. P. Paidoussis, and M. Amabili

FEDSM/ICNMM2010-30084 ................................................................. 893
Dynamics of a Fluid-Conveying Cantilevered Pipe With Intermediate Spring Support
   Mergen H. Ghayesh and Michael P. Paidoussis

FEDSM/ICNMM2010-30085 ................................................................. 903
Phase-Shift Determination in Coriolis Flowmeters With Added Masses
   Mergen H. Ghayesh, Marco Amabili, and Michael P. Paidoussis

FEDSM/ICNMM2010-30280 ................................................................. 913
Vibration Experiments and Numerical Simulations of Pulsation Behavior in
   Actual Size Mock-Up Piping
   Akira Maekawa, Tsuneo Takahashi, Takashi Tsuji, Michiyasu Noda, Minoru Kato, and
   Katsuhisa Fujita

FEDSM/ICNMM2010-30331 ................................................................. 921
Coupled Fluid-Structure Model for Duckbill Valve Flow
   J. Wang, D. S. Weaver, and S. Tullis

FEDSM/ICNMM2010-30352 ................................................................. 931
Development of Flexible Liquid Damper
   Shinichi Kawabata, Weerachai Bunkhlong, and Tomomichi Nakamura
Aerothermoelastic Stability of Functionally Graded Circular Cylindrical Shells
Farhad Sabri and Aouni A. Lakis

Effect of Fluid Flow Nonlinearities on the Dynamic Behaviour of Cylindrical Shells Subjected to a Supersonic Flow
R. Ramzi and A. A. Lakis

Numerical Analysis of Single Mode Panel Flutter in a Viscous Gas Flow
Vasily V. Vedeneev

Experimental Study of Single Mode Panel Flutter
Vasily V. Vedeneev, Sergey V. Guvernyuk, Alexander F. Zubkov, and Mikhail E. Kolotnikov

Two-Dimensional Shell Vibration of Microtubule in Living Cell
Esmaeel Ghavanoo, Farhang Daneshmand, and M. Amabili

Flow-Induced Wave Generated on a Thin Film Under Shear Loading
Gaku Kudou, Masahiro Watanabe, and Kensuke Hara

Effect of Bifurcation on Pulse Wave Propagation in Human Arteries
Yusuke Kawai and Shigehiko Kaneko

Buckling of Human Aorta Related to Dissection due to Flow-Pressure Conditions
Kostas Karagiozis, Marco Amabili, Rosaire Mongrain, Raymond Cartier, and Michael P. Paidoussis

The Dynamics of a Cantilevered Pipe Aspirating Fluid Studied by Experimental, Numerical and Analytical Methods
Dana Giacobbi, Stephanie Rinaldi, Christian Semler, and Michael P. Paidoussis

Flutter Instability of a Fluid-Conveying, Fluid-Immersed Pipe Affixed to a Rigid Body
Aren M. Hellum, Andrew J. Hull, and Ranjan Mukherjee

Dynamics of Pipes Conveying Fluid With Non-Uniform Turbulent and Laminar Velocity Profiles
Aren M. Hellum, Andrew J. Hull, and Ranjan Mukherjee

Analysis of Micropolar Vibrating Plate in Contact With a Fluid
A. Najafi, F. Daneshmand, and S. R. Mohebpour
FEDSM/ICMM2010-31053 ................................................................. 1039
An Analytical Study of the Dynamics of Pipes Conveying Fluid of Axially Varying Density
Dana Giacobbi, Christian Semler, and Michael Païdoussis

FEDSM/ICMM2010-31120 ................................................................. 1047
Sloshing in a Vertical Circular Cylindrical Container With an Vertical Baffle
E. Askari, F. Daneshmand, and M. Amabili

FEDSM/ICMM2010-31170 ................................................................. 1055
Fluid Structure Interaction With Mean Flow: Over-Scattering and Unstable
Resonance Growth
Sevag Arzoumanian and Nigel Peake

FSI INVOLVING MEMS AND NANOSYSTEMS
FEDSM/ICMM2010-30040 ................................................................. 1063
Fluid-Structure Coupling in Gas Damping Response of Nanowire Resonators
Rustom B. Bhiladvala

FEDSM/ICMM2010-30380 ................................................................. 1069
Parameter Study of Dynamical Behavior of Carbon Nanotubes Conveying Water
Considering Carbon-Water Bond
Kamyar Hashemnia, Mehrdad Farid, and Homayun Emdad

FEDSM/ICMM2010-30515 ................................................................. 1079
Active Control of Vortex Induced Vibration by Plasma Actuation
S. Gholamreza and N. W. Mureithi

FEDSM/ICMM2010-30751 ................................................................. 1089
Rotating Microsensors With Non-Linear Feedback
Andrew R. Sloboda and Bogdan I. Epureanu

FEDSM/ICMM2010-31216 ................................................................. 1099
Piezo-Actuated Valveless Micropumps for Micro-Total Analysis Systems
Arvind Chandrasekaran and Muthukumaran Packirisamy

HYDROELASTIC PROBLEMS IN NAVAL VEHICLES AND
OFFSHORE STRUCTURES
FEDSM/ICMM2010-30148 ................................................................. 1103
Effect of Chordwise Flexibility and Depth of Submergence on an Oscillating Plate
Underwater Propulsion System
Oleksandr Barannyk, Brad Buckham, and Peter Oshkai

FEDSM/ICMM2010-30414 ................................................................. 1113
Reliability-Based Global Design of Self-Adaptive Marine Rotors
Michael R. Motley and Yin L. Young

FEDSM/ICMM2010-30541 ................................................................. 1123
Vibration Response Behaviour of a High Solidity, Low Rotational Velocity, Vertical Axis
Wind Turbine
Kevin W. McLaren, Stephen W. Tullis, and Samir Ziada
