CONTENTS

COMPONENT RELIABILITY AND MATERIALS ISSUES  
ICONE18-29013 .................................................................................................................. 1  
Ageing Assessment, Condition Inspection and Lifetime Evaluation for Safety Related  
Fuse in Nuclear Power Plant  
Jie Shi, Xinming Jin, Zhiming Liu, Haining Shi, Jianlin Yao, and Fengsheng Tu  

ICONE18-29037 .................................................................................................................. 7  
Fluid-Elastic Instability of Normal Square Tube Bundles in Two-Phase Cross Flow  
Woo Gun Sim and Mi Yeon Park  

ICONE18-29067 .................................................................................................................. 15  
Iconic Representation Extension of Event Sequence Diagram Framework for  
Nuclear Power Plant  
Haiyan Xie, Qi Cai, and Yangwei Zhang  

ICONE18-29076 .................................................................................................................. 23  
Study of the Corrosion Behavior of Zr-xFe-yCr Alloys in 500°C/10.3MPa Steam  
Jun Wang, Shihao Ying, Miao Zhi, and Hongyuan Fan  

ICONE18-29107 .................................................................................................................. 27  
Corrosion Resistance of Mo-Fe-Ti Alloy for Overpack in Simulating Underground  
Environment  
Toshiyasu Nishimura  

ICONE18-29120 .................................................................................................................. 33  
Preliminary Discussion on Comparison and Analysis on Nuclear Power Plant Materials  
Standards of ASME and RCC-M  
Dong Ning, Yongdong Wang, Hui Li, and Zhanggen Bao  

ICONE18-29128 .................................................................................................................. 43  
Evaluation of Thermal Aging Embrittlement in Main Coolant Pipe Steel by Small Punch Test  
Xue Fei, Weiwei Yu, Xiao Chen, Yan Liu, Zhenhao Shi, Guogang Shu, and Xitao Wang  

ICONE18-29132 .................................................................................................................. 47  
Experimental Investigation of Copper/Stainless Steel Joints Formed by Vacuum Brazing  
Changqing Ye  

ICONE18-29149 .................................................................................................................. 57  
Material Surveillance Program Regulatory Guidance for Steam Generator Tubes Extracted  
From Canadian CANDU®Reactors  
Sue Liu, Blair Carroll, Jovica Riznic, Nicholas Christodoulou, and Raoul Awad  

ICONE18-29169 .................................................................................................................. 65  
Equilibrium Partition Coefficients of Cesium and Iodine Between Sodium Pool and the  
Inert Cover Gas  
Shinya Miyahara, Masahiro Nishimura, and Toshio Nakagiri
Prediction of Radioactive Corrosion Product Transfer in Primary Systems of Japanese Prototype Fast Breeder Reactor MONJU
Youichirou Matuo, Masanori Hasagawa, Yoshiharu Maegawa, and Shinya Miyahara

Threshold Stress Intensity Factor for Delayed Hydride Cracking of a Recrystallized N18 Alloy Plate Along the Rolling Direction
Chao Sun, Shi H. Ying, Jun Tan, Qian Peng, and Xun Dai

Applicability Study of Computed Radiography to NDE for Piping and Component in Nuclear Power Plant
Takashi Hasebe, Nobuki Tamai, Syohei Tatsuno, Yuma Itahashi, and Kiyoaki Tokunou

Irradiation-Embrittlement of Reactor Pressure Vessel Steel
Guoyun Li, Yukun Wu, Guofu Jiang, Juan Huang, and Haisheng Zhang

Study of Weld Residual Stress Field in the Girth Seam H6A of Core Shroud of Boiling Water Reactor
Yongkui Li, Yoshiyuki Kaji, and Takahiro Igarashi

The Improvement Research of Accident Generation Mechanism of Dynamic Event Tree
Yongfa Zhang, Jiejuan Tong, and Yu Zhou

Corrosion Test of 304 Stainless Steel in Hydrazine and Methanol Solutions at 320°C Under Gamma-Irradiation and Gamma Radiolysis of Hydrazine and Methanol
Masafumi Domae, Hirotaka Kawamura, Daisuke Akutagawa, Kenji Hisamune, Yosuke Katsumura, and Yusa Muroya

Synergistic Effect of Neutron and Gamma Irradiation on CMOS Integrated Circuits
Yan Liu, Xiaoming Jin, Wei Chen, Dongsheng Lin, and Shanchao Yang

Multiphysics Modeling and Simulation for Stress Corrosion Cracking Considering Oxygen Atom Diffusion Along Grain Boundary
Takahiro Igarashi, Yoshiteru Aoyagi, and Yoshiyuki Kaji

The Effect of Fabrication Process on Microstructure Evolution of N18 Alloy Sheets
Xun Dai, Hong Liu, Hongman Jiang, and Ying Wang

Thermal Aging Effect of CDSS on the Integrity of the PWR Primary Pipe With Damage Tolerance Method
Zhao-Xi Wang, Fei Xue, Hui-Ji Shi, Weiwei Yu, and Guo-gang Shu
Stress Corrosion Cracking Incidents and Repair Technologies on PWR Dissimilar Weld Metal Joints in Japan

Naoki Chigusa, Shinro Hirano, Takehiko Sera, Hitoshi Kaguchi, Masayuki Mukai, and Yusuke Yoshida

The Reliability Analysis of Bearing in Large Blower System

Jun Zhao, Qinzhao Zhang, Jiejuan Tong, and Hong Wang

Parameters Influencing the Secondary Hydrogenation of Zr-Sn and Zr-Nb Alloys During Steam Oxidation Under LOCA and Severe Accident Conditions

Mirco K. Grosse, Martin Steinbrück, and Juri Stuckert

Quality Control of Interface Between Tungsten Coating and Cu Alloy Heat Sink of PFC for EAST Tokamak by Infrared Thermography

Pan Qi, Guangnan Luo, Qiang Li, Xiaojun Kuang, and Haishan Zhou

Study on the Hydrogen Effect on the Temper Embrittlement of 2.25Cr-1Mo Steel

Xiliang Zhang and Changyu Zhou

The Mechanical Properties and Friction and Wear Behavior of C/C-SIC

Gao Wen, Chongsheng Long, Tang Rui, and Jiping Wang

Chemico-Physical Causes of Radiation-Induced “Long Cell” Action Corrosion in Water Cooled Reactors

Genn Saji

Aspects of Minimizing Steel Corrosion in Liquid Lead-Alloys by Addition of Oxygen

Carsten Schroer, Olaf Wedemeyer, and Juergen Konys

Assessment of ODS Ferritic Alloy for Advanced Nuclear Energy System

Zhangjian Zhou, Ming Li, Lu Liao, Pei He, and Yingli Xu

Development of Electrical Resistivity Measurement Systems for Inspecting Void Swelling in Irradiated Microscopy Discs

Mitsuyuki Sagisaka, Yoshihiro Isobe, Frank Garner, Satoshi Fujita, and Taira Okita

Corrosion Properties of Welded Ferritic-Martensitic Steels in Liquid Lead-Bismuth at 600C

Asril Pramutadi Andi Mustari and Minoru Takahashi
ICONE18-29973 ................................................................. 237
Rupture Frequency of CANDU® Large-Diameter Primary Heat Transport Piping
Estimated Using Probabilistic Fracture Mechanics Codes
Rob McLean, Xinjian Duan, and Michael J. Kozluk

ICONE18-30045 ................................................................. 247
Dynamic Analysis of Core Magnetic Circuit of Direct Action Solenoid Valve
Qianfeng Liu, Hanliang Bo, and Benke Qin

ICONE18-30049 ................................................................. 255
Irradiation Damage and Embrittlement in RPV Steels Under the Aspect of
Long Term Operation: Overview of the FP7 Project LONGLIFE
Eberhard Altstadt, Frank Bergner, and Hieronymus Hein

ICONE18-30068 ................................................................. 265
Effect of Temperature in the Preparation of Zirconium Hydride
Lijun Wang, Li Zhang, Yuanhui Luo, Weidong Chen, and Jianwei Wang

ICONE18-30088 ................................................................. 269
The Welding Deformations of Stainless Steel Pipes With Thick Wall by Narrow Gap
Gas Tungsten Arc Welding
Jianxun Zhang, Chuan Liu, and Jing Niu

ICONE18-30094 ................................................................. 275
Proactive Aging Management: PAM 2.0
Robert K. Perdue, Matthew H. Kelley, Raymond E. O'Rourke, Joel Woodcock,
Mengyi Zhang, and Hui Zheng

ICONE18-30120 ................................................................. 283
Effect of Hazardous Impurities on Steam Generator Tube Degradation
Yucheng Lu

ICONE18-30121 ................................................................. 293
Irradiation-Induced Embrittlement of INCONEL 600 Flux Detectors in CANDU® Reactors
M. Griffiths, G. A. Bickel, and S. R. Douglas

ICONE18-30130 ................................................................. 299
An Accurate Probabilistic Model for Estimating the Life Cycle Cost of Degrading
Components in Nuclear Power Plants
T. Cheng, M. D. Pandey, and W. C. Xie

ICONE18-30169 ................................................................. 309
The Prediction of Long-Term and Emergency Sealability of Silicone and EPDM Gaskets
Mitsuyuki Nakano, Haruko Sasaki, and Kanji Hanashima

ICONE18-30197 ................................................................. 317
Application of Extra High Purity Austenitic Stainless Steel to Weld Overlay
Ikuo Ioka, Jun Suzuki, Kiyoshi Kiuchi, and Jumpei Nakayama

ICONE18-30207 ................................................................. 323
High Temperature Aging and Corrosion Study on Alloy 617 and Alloy 230
Kun Mo, Gianfranco Lovicu, Hsiao-Ming Tung, Xiang Chen, and James F. Stubbins
Pressurized Water Reactor Core Crud Mapping
W. A. Byers

State of the Art NDT Mechanized Equipment Used in PWR Reactor Vessel Inspection
Ming Li, Huaidong Chen, Xuezhu Xiao, Tianming Lv, and Zhe Yu

Bruce Power Aging Obsolescence Program
Ian Cruchley, Rick Dam, Ralf Gold, and Brian Ferguson

Introduction of Hot Isostatically Pressed, Reactor Coolant System Components in PWR Plant
John L. Sulley, Ian Hookham, Barry Burdett, and Keith Bridger

Surveillance Specimen Program for Lifetime Extension of RPV
Milan Brumovsky and Milos Kytka

Steam Generator Ageing Management Database
Junqi Chen, Fei Xue, Peng Liu, Lin Zhou, Lei Lin, and Wenxin Ti

Progress of the Study on Corrosion Behavior of Graphite in HTGRs
Peng Wang, Xinli Yu, and Suyuan Yu

Development of a Large Diameter Electromagnetic Pump for 4S
Rie Aizawa, Seiji Fujiwara, Yasuko Oyamatsu, Kenji Katsuki, Minoru Funato, and Hiroyuki Ota

Dynamic Motion of RC Beams and One-Way Slabs Impacted by a Missile at Medium Velocity: Models for Spreadsheet Application
Jean-Mathieu Rambach

Random Seismic Response Analysis of Coupling Structure Interconnected by Hysteretic Dampers
Qian Huang, Fenggang Zang, and Yixiong Zhang

Using Microplane Material Model for Concrete in Soft Missile Impact Analysis
Jukka Kähkönen and Pentti Varpasuo
Floor Response Spectra of Loviisa Nuclear Power Plant Reactor Buildings
Jukka Kähkönen and Pentti Varpasuo

Seismic Fragility Study for High-Pressure Emergency Cooling Water Tanks of Loviisa Nuclear Power Plant
Jukka Kähkönen and Pentti Varpasuo

Fortum Participation in IAEA Benchmark for KKNPP7 RHR Piping Response NCO 2007 Event
Pentti Varpasuo and Jukka Kähkönen

The Application of Combination of Individual Modal Responses According to the Revised RG1.92
Shenghua Liu and Zufeng Xia

Development and Validation of an LS-DYNA Model for Simulating Vertical Drop Test of a Nuclear Fuel Shipping Package
W. Zhao, B. Hempy, J. Liu, W. Stilwell, and R. Rochow

On-Line Sequestration of Fission Product Gases in Operating Nuclear Reactors
Gary M. Sandquist and Jay F. Kunze

Numerical Evaluation of Fluctuating Pressure at Stub Pipes in Actual BWR Main Steam Lines
Ryo Morita, Shiro Takahashi, Fumio Inada, and Yukio Ogawa

Fluctuating Pressure Generating in BWR Main Steam Lines Acoustic Excited by Safety Relief Valve Stub Pipes and Dead Legs
Shiro Takahashi, Keita Okuyama, Akinori Tamura, Masaya Ohtsuka, Masaaki Tsubaki, Mabachi Yasuhiro, Teppei Kubota, Yukio Ogawa, Fumio Inada, and Ryo Morita

Analysis of Thermal Stratification and Fatigue Stress for Pressurizer Surge Line
Xiaofei Yu and Yixiong Zhang

Prediction of Irradiation Embrittlement for Chinese Domestic A508-3 Steel
Feng Lu, Rongshan Wang, Ping Huang, and Haiyang Qian

Three-Dimensional Seismic Analysis on Reactor Structure
Nai-bin Jiang, Feng-gang Zang, Li-min Zhang, and Chuan-yong Zhang
