The 3CX IP PBX Tutorial

Develop a fully functional, low cost, professional PBX phone system using 3CX

Matthew M. Landis
Robert A. Lloyd
# Table of Contents

**Preface**  
1

**Chapter 1: Getting Started with the 3CX Phone System**  
7

About the company—3CX  
7

What the 3CX Phone System is  
8

Hardware versus software phone systems  
10

Linux Asterisk versus Windows 3CX  
11

3CX Free versus 3CX Commercial edition  
12

**Major components of the 3CX Phone System**  
12

3CX Phone System  
13

The navigation pane  
14

Drop-down menus  
16

Quick launch toolbar  
17

3CX Phone  
17

3CX Assistant  
19

3CX VoIP Client  
24

3CX Call Reporter  
26

3CX Gateway for Skype  
27

3CX Hotel module  
27

**Some characteristics and features of 3CX**  
28

Easy to use  
28

Open and vendor independent  
29

Windows-based  
29

**What the 3CX Phone System is not**  
30

3CX is not expensive  
30

3CX is not a Cisco level of maturity product  
30

3CX is not a turnkey hardware phone system  
31

3CX is not done  
31

3CX does not have "key system" replacement features  
31
3CX integration with Microsoft Office Communications Server is not supported
3CX currently does not have the ability to do multi-tenant
3CX does not do multiple languages simultaneously

Summary

Chapter 2: Downloading and Installing 3CX

What you will need
Your 3CX server hardware requirements
Choosing a Windows operating system
  Starting with a clean operating system install
  Getting the Microsoft stack in place
Downloading 3CX and getting a key
  Free key versus a two-user test key
Starting the install
  The requirements screen
  The recommendations screen
  The EUL Agreement
  The install folder screen
  Selecting IIS or Cassini web server
  The 3CX User Settings Wizard
  Creating user extensions
  Operator extension
  Registration
  Logging in to 3CX for the first time
Checking the status of 3CX
Summary

Chapter 3: Working with Extensions

Devices that can connect to 3CX as extensions
  Softphones
    X-Lite by CounterPath
    Zoiper Communicator
  SIP phones
  Analog phones
  Other SIP hardware and software devices
Verifying basic network connectivity to our 3CX server from another computer
Basic extension setup in the administrator console
  First and last name
  ID, password, and pin
  E-mail address
  Voicemail configuration
Table of Contents

Forwarding rules 60
Installing and connecting the 3CX VoIP Phone 61
Testing the extension we just connected 63
   Checking that system console indicates the extension as registered 63
   Testing that we can call another extension 64
Connecting a Snom 360 phone 64
Connecting other phones 69
Checking out the MyPhone UserPortal page 70
   Voicemail 71
Extension groups 72
Editing multiple extensions at a time 73
Summary 74

Chapter 4: Call Control: Ring Groups, Auto-attendants, and Call Queues 75
Ring groups 75
   Adding ring group members 78
   Destination if no answer 78
Digital Receptionist setup 79
   Recording a menu prompt 79
   Creating the Digital Receptionist 82
Call by name setup 84
Call queues 85
Summary 88

Chapter 5: Trunks—Connecting to the Outside World 89
PSTN trunks 89
SIP trunks 90
   The PBX 92
   The enterprise border element 92
   The ITSP 92
Choosing a VoIP carrier—more than just price 92
   Disaster recovery 94
   Mixing VoIP and PSTN 95
Connecting 3CX to your trunk 95
Creating a SIP trunk 108
Summary 116

Chapter 6: Configuration 117
Music on Hold 117
   Obtaining the file 118
   For the iTunes user 118
Prompt sets 123
