# Table of Contents

**Preface** 1

**Chapter 1: Combining Moodle and JavaScript** 7
- Introduction 7
- Creating a new Moodle PHP page 8
- Loading a JavaScript file 11
- Loading a JavaScript file in `<head>` 13
- Generating a JavaScript function call from PHP 14
- Passing variables from PHP to JavaScript 15
- Ensuring compliance with XHTML Strict 17
- Retrieving language strings from Moodle 18

**Chapter 2: Moodle and Yahoo! User Interface Library (YUI)** 21
- Introduction 21
- Initializing the YUI 3 library 22
- Loading additional YUI modules 24
- Loading YUI 2 modules from YUI 3 25
- Attaching basic event handlers 27
- Attaching advanced DOM event handlers 29
- Implementing event delegation 33
- Debugging with the YUI console 36

**Chapter 3: Moodle Forms Validation** 39
- Introduction 39
- Adding a required field 40
- Adding a field with a maximum length 43
- Adding a field with a minimum length 44
- Adding a field length within in a specified range 45
- Adding a valid e-mail address field 46
- Adding custom validation with a Regular Expression 47
- Adding a field that accepts only alphabetic characters 48
# Table of Contents

- Adding a field that accepts only alphanumeric characters 49
- Adding a field that accepts only numeric characters 50
- Rejecting punctuation characters 51
- Rejecting input without a leading zero 52
- Comparing with another field 53
- Adding a custom JavaScript validation function callback 54

## Chapter 4: Manipulating Data with YUI 3

- Introduction 57
- Using IO to request a URI 58
- Using IO's alternative transport method for requesting external URIs 60
- Using PHP as a proxy to load data from an external domain 63
- Parsing XML with DataSource 64
- Parsing JSON with DataSource 67
- Parsing CSV data with DataSource 69
- Retrieving data from a Moodle 2.0 web service 72

## Chapter 5: Working with Data Tables

- Introduction 79
- Initializing a YUI DataSource 80
- Displaying data 83
- Basic column sorting 85
- Adding paging 87
- Enabling scrolling 88
- Enabling editing 89

## Chapter 6: Enhancing Page Elements

- Introduction 93
- Adding a text box with auto-complete 94
- Adding a combo box with auto-complete 96
- Displaying auto-updating data 98
- Enabling resizable elements 100
- Adding custom tooltips 101
- Adding custom button controls 103

## Chapter 7: Advanced Layout Techniques

- Introduction 105
- Adding a fly-out navigation menu 106
- Adding a drop-down navigation menu 109
- Displaying a tree-view navigation menu 112
- Adding a tabbed content control 114
- Displaying content in a modal window 118
# Table of Contents

## Chapter 8: Animating Components
- Introduction
- Fading in an element
- Fading out an element
- Scrolling an element
- Resizing an element
- Animating with easing
- Moving an element along a straight path
- Moving an element along a curved path
- Changing an element’s color
- Sequencing multiple animations

## Chapter 9: Integrating External Libraries
- Introduction
- Adding the jQuery framework
- Adding the MooTools framework
- Adding the Dojo framework
- Adding the Prototype framework
- Adding the script.aculo.us add-on to Prototype
- Adding image enlargement with Lightbox 2
