Nanomaterials and Plastic Deformation

Selected, peer reviewed papers from the Annual Meeting of Chinese Materials Research Society, Session L, 2009 12-17 September 2009, Suzhou, China

Edited by:
Jing Tao Wang
Table of Contents

Preface v

I. Processing
Rapid Prototyped Nanocrystalline Copper Parts by Jet Electrodeposition
Developing Metallic Glass Matrix Composites with In Situ Crystalline Spheres through the Mechanism of Liquid-Liquid Phase Decomposition in Miscibility Gap of the Multicomponent Immiscible Alloys
J. He, S. Chen and J.Z. Zhao .................................................................................. 9
Studies of Annealing Process in Severely Cold Drawn Pearlitic Steel Wires
S.F. Liu, G. Liu, B.J. Wang, C.H. Ren and X.L. Shi ................................................... 19
Bulk Nanocrystalline Cu Produced by High-Energy Ball Milling
Shearing Patterns of AZ31 Mg Alloy Processed by Equal-Channel Angular Pressing via Various Route
X.M. Feng and T.T. Ai ......................................................................................... 33
A Comparison of Temperature-Dependent Compressive Deformation Features of Ultrafine-Grained Ti and Cu Produced by ECAP
Q.W. Jiang, L. Xiao and X.W. Li ......................................................................... 41

II. Microstructure Characterization
Microstructure and Mechanical Properties of Mg-96Zn-Ni Alloy Processed by Equal Channel Angular Pressing
B. Chen, C. Lu, D.L. Lin and X.Q. Zeng ................................................................. 49
Effects of Si/Al Molar Ratio on Morphology of Mullite Nanocomposite Synthesized from Kaolin
N.C. Chen, W. Wang, A.P. Deng, H.M. Ao and Q.H. Li ........................................ 55
Microstructures and Properties of Ultrafine Grained Iron by Rolling
Y. Ding, J.H. Jiang and A.D. Shan ........................................................................ 61
Texture Analysis of Commercial Pure (Grade 3) Ti after Two-Step Severe Plastic Deformation
Microtexture Study of Warm-Rolled High Strength Interstitial-Free (IF) Steel Sheets
C.N. Jing, M.G. Wang, X.J. Liu, Q.Z. Tan, Z.C. Wang and F.T. Han ...................... 71
Solidification Structure Characteristics and Mechanical Properties of (Ag-Cu28)-25Sn Alloy Ribbons Prepared by Melt Spinning Method
L.F. Li, T. Qiu, J. Yang and Y.B. Feng ................................................................. 75
The Microstructural Studies of Ag/Ni20 Fibre Composites Processed by Severe Plastic Deformation
K.H. Zhang, C.J. Wang, M. Wen and W.M. Guan ............................................... 81
Deformation Processing and Mechanical Properties of Cu-10Cr-0.4Zr
*In Situ* Composite Microwires

Microstructure and Mechanical Properties of Austempered Ultrahigh
Carbon Steel 1.4%C
Z.L. Zhang, K.K. Zhang, Y. Yue, N. Ma and Z.W. Xu ...................................................... 97

Microstructure and Mechanical Properties of CP-Ti Processed by 2 ECAP Passes
Using a 90° Die at Room Temperature
X.R. Yang, X.C. Zhao and X.Y. Liu ..................................................................................... 103

Mechanical Properties of Plain Carbon Steels with Ultrafine (α+θ) Microstructures

Microstructure and Performance of Surface Nanostructure 316L Stainless Steel
Induced by Wire-Brushing Deformation
L. Zhu and X.M. Fan ........................................................................................................ 115

### III. Mechanical and other Properties

Mechanical Property of Duplex Stainless Steel with Nanostructured Layer by
Surface Mechanical Attrition Treatment
L. Chen and X.L. Xu ....................................................................................................... 123

Microstructure and Mechanical Properties of a 1.6C (pct) Ultra-Fine Grained
Ultra-High Carbon Steel

Constitutive Model for Large Plastic Deformation of Nanocrystalline Materials
H. Jiang, J.Q. Zhou and R.T. Zhu .................................................................................. 139

Effect of Load Direction on Tensile Yield Properties in Mg-3Al-Zn Alloy
R. Liu, D.L. Yin and J.T. Wang ..................................................................................... 145

Effect of Grain Size Distribution on the Local Mechanical Behavior
of Nanocrystalline Materials
Y.G. Liu and J.Q. Zhou ................................................................................................. 153

Numerical and Experimental Investigation of Strain Inhomogeneity during
Cyclic Channel Die Compression
F.J. Shi, L.G. Wang, S. Lu and Z.F. Huang ................................................................. 159

Superelasticity and Shape Memory Behaviors of Ti-25 at. % Nb Alloy
Processed by ECAP and Aging

Tensile Properties and Dislocation Strengthening of Commercial Pure Titanium
Processed by Equal-Channel Angular Pressing at Liquid Nitrogen Temperature
X.N. Cheng, H.X. Xu, X.J. Xu and Z.L. Zhang ............................................................. 171

Compression Superplasticity of Ultrahigh Carbon Steel in Electric Field

Effects of ECAE and Aging on Phase Transformations and Superelasticity
of a Ni-Rich TiNi SMA
X.N. Zhang, J. Song, H. Jiang, X.G. Sun and C.Y. Xie ............................................. 185

Microstructures and Mechanical Properties of Fcc Pure Metals with Different
Stacking Fault Energies by Equal Channel Angular Pressing
Y. Zhang, J.Q. Liu, J.T. Wang, Z.B. Wu and F. Liu ....................................................... 193
Microstructure and Properties of Ultrafine-Grained Steel Produced by Warm Compression of Martensite
X. Zhao, X.L. Yang and T.F. Jing ................................................................. 205

Improvement of Strength of Mg-12Gd-3Y-0.5Zr Alloys Processed by Combination of ECAP and Extrusion
R. Zhu, J.Q. Liu, J.T. Wang, P. Huang, Y.J. Wu and X. Zhao ........................................ 211

Erosion Wear Property of Surface Diffusion Alloyed Coatings on Magnesium Alloy
Y.P. Ma, X.L. Li, L. Yang and X.P. He ................................................................. 217

Damping Behavior and Mechanism of Graphite and Al2O3 Particles Reinforced Al Matrix Composites
Z.M. Zhang and B. Hu ...................................................................................... 225

Fatigue Property and Fatigue Cracks of Ultra-Fine Grained Copper Processed by Equal-Channel Angular Pressing

Electroactive Organic-Inorganic Layered Perovskite Hybrids: Steric Interaction between Aminopyridine and Trivalent Ferricyanide and Use for Electrochemical Sensing Device
