Contents

Preface 3

Session 3. Combustion plant – Biomass & waste boilers

Benchmarking for plant maintenance 6
  Kari Komonen, Toni Ahonen and Susanna Kunttu

Managing corrosion in biomass boilers: benefits and limitations of coatings 22
  Satu Tuurma, Tommi Varis, Kimmo Ruusuvuori, Stefan Holmström,
  Jorma Salonen, Perti Auerkari, Tuomo Kinnunen, Patrik Yrjas, Risto Finne,
  Matti Nupponen, Ulla McNiven, Hannu Ahonen and Ari Kapulainen

Selecting the right material for recovery boiler superheaters 37
  Esa K. Vakkilainen and Pekka Pohjanne

Oxyfuel combustion: Oxidation performance of steels in simulated oxyfuel conditions 52
  Satu Tuurma, Pekka Pohjanne, Sanri Yli-Olli, Tuomo Kinnunen and Petra Jauhiainen

Session 5. Combustion plant – Fossil & co-fired boilers

Safety issues arising from the corrosion-fatigue of waterwall tubes 63
  John M. Brear, Paul Jarvis and Stephen Scully

Life assessment for vintage boilers 78
  Perti Auerkari, Jorma Salonen, Stefan Holmström, Leila Laaksonen, Ulla McNiven, Olli Lehtinen, Sari Mäkinen, Ville Väänänen and Reino Nikkarila

Session 7. Combustion plant – High temperature components

Italian standardization in the field of defect evaluation, fracture mechanics and fitness for service of pressure equipment 90
  Corrado Delle Site, Carlo Fossati, Giuseppe Giannelli, Claudio Sampietri and Andrea Tonti

Defect integrity in components subjected to cyclic loading at high temperatures 104
  Stuart Holdsworth

Life assessment and extension for gas turbine blades 117
  Perti Auerkari, Jorma Salonen, Juhani Rantala, Sari Mäkinen, Ilkka Karvonen, Heikki Tanittari, Pekka Kangas and Jukka Taattola

Fire incidents in underground coal storage 128
  Juha Sipilä and Perti Auerkari
Development and Implementation of i-LAS (indentation based turbine remaining life assessment system)
Woosung Choi, Geewook Song and Jaeraeyang Koo

Creep damage and long term life of steam line components: case X20
Stefan Holmström, Pertti Auerkari, Jorma Salonen, Anssi Laukkanen, Juhani Rantala, Reino Nikkarila and Jarmo Junttanen

Remaining lifetime assessment of power plant steam boilers
Vaclav Liska and Vaclav Mentl

Creep strain, damage and life prediction for welded 0.5CMV steel
Juhani Rantala, Pertti Auerkari, Stefan Holmström, Jorma Salonen and Anssi Laukkanen

Different types of cracking of P91 steel weld joints after long-term creep tests
Dagmar Jandová, Josef Kasl and Eva Chvostová

Session 10. Cross-cutting issues – New methods & tools

New mechanical testing equipment for testing in real and simulated service environments (HIPS)
Pekka Moilanen and Stefan Holmström

Characterization of true stress-strain behavior using optical monitoring
Tom Andersson, Lauri Elers, Anssi Laukkanen and Pekka Nevasma

Non-contact measurement of oxide thickness with a laser ultrasonic technique
Jonne Haapalainen, Joona Eskelinen, Tarja Jäppinen, Stefan Sandlin and Edward Håggström

On-line flaw growth monitoring in high temperature plant
Ian Atkinson, Stephen Kelly, Philip Lay and Colin Brett

Experience on the periodic wet bar diagnosis of water-cooled generator stator windings
Hee-Soo Kim and Yong-Chae Bae

A breakthrough in ultrasonic detection and sizing of partially closed cracks?
Stefan Sandlin

Development of nondestructive techniques for fuel cladding evaluation in hot cell
Tarja Jäppinen and Stefan Sandlin
