American Society of Sugar Beet Technologists

Proceedings from the 34th Biennial Meeting

OPERATIONS

Salt Lake City, Utah
February 28 – March 3, 2007
### TABLE OF CONTENTS

Mr. Simon A. Harris, Advisor  
British Sugar plc  

*Sugar Situation in the European Union* .................................................. 1

Mr. William H. Hejl, President  
World Association of Beet and Cane Growers  

*Sugar Situation in the World* ............................................................ 21

### Section D – CHEMISTRY & INSTRUMENTATION

**Advances in fluorescence detection of sugar in water systems.**  
Dang, Xiaojun* and Dolores J. Soto, Nalco Company ........................................ 53

**Recent advances in Nalco's juice purification system.**  
Dang, Xiaojun, Dennis Saye, David Larson, Kevin Finkenbiner and Anthony Sommese*, Nalco Company ................................................................. 63

**Controlling quality of MDS extract for long term storage.**  
Groom, David R.*, Terry D. McGillivray and James H. Heggeness, American Crystal Sugar Company ................................................................. 67

**Methods for automated particle size analysis.**  
Kawlewski, Ron*, Steve Aakre and Jim Schueller, Southern Minnesota Beet Sugar Cooperative ................................................................. 70

**Determination of Betaine by NIR for Betaine recovery optimization.**  
McGillivray, Terry* and Beverly Jacobson, American Crystal Sugar Company ................................................................. 80

**Amino acid elimination in chromatographic molasses separation systems.**  
Rearick, D. E.* and Cheri McKay, Amalgamated Research Inc. .............................. 82

**The relative stability of stored extract with and without inoculation with high levels of different microbial types.**  
Samaraweera, Indrani*, Diane Rheault, Lynn Buschette, Terry McGillivray and David Groom, American Crystal Sugar Company ................................................................. 88
Microwave technology: An ubiquitous in line measurement instrument for density, total solids, concentration, especially brix in a today sugar factory.
Theisen, Karl H. and Irma Geyer*, pro-M-tec Theisen GmbH

Section D – POSTER SESSION

Comparative study of copper reduction, chromatographic, and enzymatic ICUMSA methods for reducing sugars in molasses.
Kavas, M. Fusun1, G. Eggleston2, G. Parkin3, B. White4, G. Sezer1 and K. Pardoe3, 1 Turkish Sugar Institute, 2USDA-ARS-SRRC, 3British Sugar PLC and 4Audubon Sugar Institute

Microplate assay for rapid determination of sucrose, glucose, fructose and raffinose.
Klotz, Karen L.1* and Daniel N. Martins2, 1USDA-ARS, Northern Crop Science Laboratory and 2Universidade Federal de Viçosa

Laboratory studies on polyaluminum coagulants in sugarbeet juice and molasses.
McKee, Marianne1*, Sara Moore1, Ron Triche1, Charley Richard1, Mary An Godshall1 and Robert Hatch2, 1Sugar Processing Research Institute, Inc. and 2American Charcoal Company LLC

Microwave technology: An ubiquitous in line measurement instrument for density, total solids, concentration, especially brix in a today sugar factory.
Theisen, Karl H. and Irma Geyer*, pro-M-tec Theisen GmbH

Section F – FACTORY OPERATIONS

Rapid odor control for sugar plant process water and ponds.
Baures, Marc A., Hydrite Chemical Co.

Experiences with briquetting and burning boiler fly ash in a coal-fired beet pulp dryer.
Carlson, Jeffrey L.* and Parker Thilmony, Minn-Dak Farmers Cooperative
Experiences with processing sugarbeets frozen for long term storage.
Carlson, Jeffrey L.*, Brent Muehlberg and Upasiri Samaraweera, Minn-Dak Farmers Cooperative ................................................................. 135

Reduction of washhouse sugar losses through water management at Minn-Dak Farmers Cooperative.
Carlson, Jeffrey L.*, Brent Muehlberg and Upasiri Samaraweera, Minn-Dak Farmers Cooperative ................................................................. 137

Eliminating hydrogen sulfide emissions from beet sugar wastewater.
Govind, Rakesh, University of Cincinnati and Prd Tech, Inc. ............................................. 139

The use of ion exchange resins for beet sugar juice processing.
Gula, Francis¹* and Xavier Lancrenon², ¹Novasep Inc. and ²Applexion SAS................................................................. 140

Steamdrying of beet pulp – larger units, more energy recovery, no VOC and large CO₂ reduction.
Jensen, Arne S.¹* and Kent Quinney², ¹EnerDry Aps and ²The Amalgamated Sugar Company LLC ................................................................. 148

Managing operational challenges of steam pulp driers.
Kawlewski, Ron, Paul Rustad, Gary Cornelius and Glenn Augustine*, Southern Minnesota Beet Sugar Cooperative ................................................................. 153

Co-treatment of digester effluent and pond stored wastewaters during 2005-2006 campaign.
Kawlewski, Ron¹*, Dennis J. Saye² and Ron Sanford¹, ¹Southern Minnesota Beet Sugar Cooperative and ²Nalco Company ................................................................. 164

Ion exchange decolorization - possibility of resin rejuvenation.
Kochergin, Vadim¹*, William Jacob², Michael Kearney³ and William Bornak³, ¹Audubon Sugar Institute, ²Amalgamated Research Inc. (ARI) and ³Recirculation Technologies Inc. (RTI) ................................................................. 169

Progressive steam dryer design enables highest capacities.
Krell, Lothar, Braunschweigische Maschinenbauanstalt AG ................................................................. 178

Low green separation at Wissington Sugar Factory, the United Kingdom.
Lancrenon, Xavier¹*, Tony Leigh², Nick Garret² and Hannu Paananen³, ¹Applexion SAS, ²British Sugar Plc and ³Danisco ................................................................. 179
Laboratory studies on the effect of enzymes on color, turbidity and total polysaccharides in sugarbeet and sugarcane juice.
McKee, Marianne*, Sara Moore, Ron Triche, Charley Richard and Mary An Godshall, Sugar Processing Research Institute, Inc. ........................................... 188

A systematic approach to optimization of the BMA K-2300 continuous centrifugal.
Rhoten, Christopher D.1* and Jeffrey L. Carlson2, 1Western Sugar Cooperative and 2Minn-Dak Farmers Cooperative ......................................................... 197

Impact of new SPCC regulations on sugar manufacturing.
Sullivan, Shawn, The Western Sugar Cooperative ........................................... 209

The new Bogazlyian beet factory: The latest reference in modern technology.
Taylor, Mark1 and Pascal Dedole2*, 1Fletcher Smith Ltd. and 2Fives Cail Group/Maguin SAS ........................................................................................................... 215

Billings BMA Tower 2000 installation and comparison to other Western Sugar BMA tower installations.
Zimmerman, Robert M.1*, Ken Bennett2 and E. Jeremy Coster3, The Western Sugar Cooperative (1Greeley, CO, 2Billings, MT and 3Denver, CO) ................................................................. 229

Fort Morgan evaporator failure.
Zimmerman, Robert M.* and Scott A. Winn, The Western Sugar Cooperative ........................................... 234

Section F – POSTER SESSION

Reduction of processing aids – apparatus to reduce lime, antifoam and alkalizing medium.
Rössner, Gerhard1, Walter Hein1, Günter Pollach1, Paul Dodd2 and Jason Grech2*, 1Zuckerforschung Tulln GmbH and 2BetaTec Hop Products GmbH ........................................................................................................... 241
