CONTENTS

HEAT TRANSFER IN ENERGYSYSTEMS

HT2009-88014 ................................................................. 1
Finite-Volume Solution of the P3 Equations of Radiative Transfer and Coupling to Reacting Flow Calculations
Mahesh Ravishankar, Sandip Mazemder, and Ankan Kumar

HT2009-88019 ................................................................. 13
Radiation Characteristics of Promising Algae for CO2 Fixation and Biofuel Production
Halil Berberoglu, Pedro S. Gomez, and Laurent Pilon

HT2009-88023 ................................................................. 23
Mohamed Ammar Abbassi, Kamel Guedri, Mohamed Naceur Borjini, Kamel Halouani, and Belkacem Zeghami

HT2009-88031 ................................................................. 33
Tomography-Based Heat and Mass Transfer Characterization of Reticulate Porous Ceramics for High-Temperature Processing
Sophia Haussener, Patrick Coray, Wojciech Lipinski, Peter Wyss, and Aldo Steinfeld

HT2009-88033 ................................................................. 45
Green's Function Approach to Nonlinear Conduction and Surface Radiation Problems
Matthew R. Jones and Vladimir P. Solovjov

HT2009-88035 ................................................................. 53
Adjoint Equations and Error Measure in Radiative Heat Transfer With Diffuse Reflection
Pierre E. Vueghs and Pierre Rochus

HT2009-88060 ................................................................. 59
A Brief History of the T4 Radiation Law
John Crepeau

HT2009-88065 ................................................................. 67
Conservative Interpretation of Nonconservative Discrete Ordinates Radiative Intensity Distribution
Kihwan Kim, Seok Hun Kang, and Tae-Ho Song

HT2009-88078 ................................................................. 77
Radiation Characteristics and Turbulence-Radiation Interactions in Sooting Turbulent Jet Flames
Ranjan S. Mehta, Michael F. Modest, and Daniel C. Haworth

HT2009-88120 ................................................................. 93
Narrow Band k-Distribution Database for Atomic Radiation in Hypersonic Nonequilibrium Flows
Ankit Bansal, Michael F. Modest, and Deborah Levin
