CONTENTS

COMBUSTION, FIRE AND REACTING FLOW

HT2009-88017 ................................................................. 1
Study the Characteristics in the Growth Phase of Wood Crib Fires
Qiang Xu, G. J. Griffin, XuHong Miao, ZhenYu Xu, and Y. Jiang

HT2009-88018 ................................................................. 7
A Mathematical Model for Cooling Effect of Sprinkler on Smoke Layer
S. C. Li, Y. Chen, D. Wei, D. Yang, X. Q. Sun, R. Huo, and L. H. Hu

HT2009-88058 ................................................................. 15
Fuel Flexible Biomass Reburn Technology
Guang Xu, Wei Zhou, and Larry Swanson

HT2009-88083 ................................................................. 21
Justification of Fire Field Models by Atrium Hot Smoke Tests
W. K. Chow, S. S. Li, and C. L. Chow

HT2009-88084 ................................................................. 27
Flame Stretching in a Room Model With Natural Vent
W. K. Chow, S. S. Han, Y. Gao, H. Dong, Y. Huo, Y. M. Zhang, and S. S. Li

HT2009-88156 ................................................................. 31
Quantifying Energy Transfer From a Reacting Thermite to a Target Using
Infrared Diagnostics
Charles Crane, Michelle Pantoya, and Jerry Dunn

HT2009-88193 ................................................................. 41
The Application of Snapshot POD Method in Characterization and Analysis of Numerically
Simulated Fire-Induced Flows
Dong Yang, Ran Huo, Longhua Hu, Xiaoyuan Xu, Fei Tang, Shi Zhu, and Yaqiang Jiang

HT2009-88195 ................................................................. 63
Investigation of Flame Structure for Laminar Methane/Air Flame Impinging on a Flat Surface
Subhash Chander and Anjan Ray

HT2009-88219 ................................................................. 73
Quantification of Heat Flux From a Reacting Thermite Spray
Eric Nixon, Michelle Pantoya, and Daniel Prentice

HT2009-88253 ................................................................. 81
Numerical Study on Thermal Characteristics in Fluidized Beds Using DEM-CFD
Fengguo Tian, Mingchuan Zhang, Bin Wu, and Dong Fu

HT2009-88259 ................................................................. 89
Numerical Study of the Effects of Pressure and Gravitational Acceleration on
Soot Formation in Laminar Axisymmetric Coflow Methane/Air Diffusion Flame
Fengshan Liu, Gregory J. Smallwood, and Wenjun Kong
Burning Rates and Surface Characteristics of Hydrogen-Enriched Turbulent Lean Premixed Methane-Air Flames  
Hongsheng Guo, Bedri Tayebi, Cedric Galizzi, and Dany Escudie

Modelling Radiative Heat Transfer in Oxycoal Combustion  
Rachael Porter, Mohamed Pourkashanian, Alan Williams, and David Smith

One-Dimensional Numerical Investigation of a Cylindrical Micro Combustor  
A. Irani R., M. Saediamiri, M. S. Saidi, M. H. Saidi, and M. B. Shafii

Heat and Mass Transfer and Kinetic Processes Modeling in a Methane Steam Conversion Facility  
Gustavo A. Restrepo, Andrey N. Krylov, and Eduard D. Sergievskiy

Simulation of H2-Air Turbulent Diffusion Flame by the Combustion Model Using Chemical Equilibrium Combined With the Eddy Dissipation Concept  
Kazui Fukumoto and Yoshifumi Ogami

Study of Smoke Stratification in Atrium Halls Using Scale Model  
N. K. Fong and C. H. Ko

Effect of Initial Velocity Field on Smoke Diffusion Characteristic in Subway Tunnel  
Hui Yang, Li Jia, and Lixin Yang

CFD Analysis of Coal Combustion With Oxygen/CO2/H2O Mixture  
Chaouki Ghenai

Impact and Fire Modeling Considerations Employing SPH Coupling to a Dilute Spray Fire Code  
Alexander L. Brown

Thermal Measurements of a Rail-Cask-Size Pipe-Calorimeter in Jet Fuel Fires  
Miles Greiner, Marcelo del Valle, Carlos Lopez, Victor Figueroa, and Esam Abu-Irshaid

CFD Study for Air Distribution in Hydrogen Reformer Furnace  
Ping Zhou, Bin Wu, Yuzhu Hu, Dezhi Zheng, Jeff Fleitz, Robert Trajkovski, and Chenn Q. Zhou

Critical Conditions for Fire-Induced Smoke Confinement by Air Curtain in Long Channels  
Jie Ji, Wei Zhong, Ran Huo, and Jinhua Sun
Consequences of Surface Deposition of Molten Aluminum in High-Temperature Oxidizing Environments

John C. Hewson, Vernon F. Nicolette, and William W. Erikson

HEAT TRANSFER IN MULTIPHASE SYSTEMS

Performance Analysis for Mechanical Draft Cooling Tower
Si Y. Lee, James S. Bollinger, Alfred J. Garrett, and Larry D. Koffman

Fractal Loop Heat Pipe Heat Flux and Operational Performance Testing
Eric A. Silk and David Myre

Subcooled Flow Boiling Heat Transfer of Nanofluids in a Microchannel
Saeid Vafaei and Dongsheng Wen

Visualization and Thermal Resistance Measurement for the Sintered Mesh-Wick Evaporator in Operating Flat-Plate Heat Pipes
Jhan-Hong Liou, Chia-Wei Chang, Chi Chao, and Shwin-Chung Wong

Numerical Simulation of Two-Phase Slug Flows in Microchannels
A. Mehdizadeh, S. A. Sherif, and W. E. Lear

Experimental Investigation on Heat Transfer of CO₂ Solid-Gas Two Phase Flow With Dry Ice Sublimation
Xin-Rong Zhang and Hiroshi Yamaguchi

Experimental Study on Two-Phase Heat Transfer of FC-72 in Microchannels Heat Sink
Xiao Hu, Guiping Lin, and Hongxing Zhang

Simulation of Single Bubble Dynamics in Nucleate Pool Boiling Using a Conservative Level Set Method
Muhammad Sajid and Rachid Bennacer

Microscale Heat Transfer Measurements During Subcooled Pool Boiling of Pentane
Payam Delgoshaei and Jungho Kim

An Experimental Investigation of Three-Dimensional Flat-Plate Oscillating Heat Pipe
Scott M. Thompson, Hongbin Ma, Robert A. Winholtz, and Corey Wilson
HT2009-88217 ................................................................. 301
System Instability of Evaporative Micro-Channels
   Hee Joon Lee and Shi-Chune Yao

HT2009-88227 ................................................................. 311
Rheological Characteristics of Nanoparticle Compound Microencapsulated Phase Change
   Material Suspension
   Liang Wang, Guiping Lin, and Yulong Ding

HT2009-88240 ................................................................. 317
Heat Transfer at an Evaporating Front in Porous Media
   V. K. Chaitanya Pakala and O. A. Plumb

HT2009-88257 ................................................................. 327
Improving Bi-Porous Wick Heat Transfer by Addition of Monoporous Interface Layer
   Sean W. Reilly and Ivan Catton

HT2009-88314 ................................................................. 335
Efficient Multiphase Cooling System for Large Area Using Multiple Jet/Spray
   Mita Sarkar, R. Panneer Selvam, Mark Kuss, and Juan C. Balda

HT2009-88315 ................................................................. 345
Experimental Investigation on the Condensation Heat Transfer and Pressure Drop
   Characteristics of R134A at High Mass Flux Conditions During Annular Flow Regime
   Inside a Vertical Smooth Tube
   Ahmet Selim Dalkilic, Suriyan Laohalertdecha, and Somchai Wongwises

HT2009-88340 ................................................................. 359
Performance Improvement in Pulsating Heat Pipes Using a Self-Rewetting Fluid
   K. Fumoto and M. Kawaji

HT2009-88353 ................................................................. 367
Numerical Modeling of Liquid Drop Spreading Behavior on Inclined Surfaces
   Young-Gil Park and Anthony M. Jacobi

HT2009-88410 ................................................................. 375
An Experimental Investigation on the Effects of Heat and Mass Flux on Vapor Bubble
   Growth Characteristics in a Microchannel
   Zachary Edel and Abhijit Mukherjee

HT2009-88418 ................................................................. 383
Generation of Water Channel During Melting Process of an Ice Packed Bed
   Kengo Murakami, Tatsunori Asaoka, Masashi Okada, and Yoshikazu Teraoka

HT2009-88428 ................................................................. 389
Laminar Slug Flow: Heat Transfer Characteristics With Constant Heat Flux Boundary
   P. A. Walsh, E. J. Walsh, and Y. S. Muzychka

HT2009-88446 ................................................................. 399
Two-Phase Flow With Surfactants in a Microchannels
   Dong Liu and Aritra Sur

Moving Heat Sources in a Half Space: Effect of Source Geometry
Mohsen Akbari, David Sinton, and Majid Bahrami

Experimental Evidence of Density and Mechanical Properties Enhancement of Binary Alloys by Soldification Subject to Vibrations

Multiscale Simulation of Nanoparticle Transport and Deposition in Fiber Matrix During a Nanofluid Filtration Process
Di Su, Ronghui Ma, and Liang Zhu

Thermal Modeling of the Human Eye as a Porous Structure
Maryam Shafahi and Kambiz Vafai

Simulation of Focused Radiation Propagation and Transient Heat Transfer in Turbid Tissues
Jian Jiao and Zhixiong Guo

Simulation of Traffic Jam Formation in Fast Axonal Transport
A. V. Kuznetsov, A. A. Avramenko, and D. G. Blinov

Skin Imaging With Infrared Thermography and Confocal Microscopy
Müge Pirtini Çetingül, Cila Herman, and Rhoda M. Alani

Computer Assisted Simulation Model in Cryosurgery for Prostate Tumor
Chih-Wei Chen, Hong-Sen Kou, Hsueh-Erh Liu, Cheng-Keng Chuang, and Li-Jen Wang

One-Dimensional Simulation of a Stirling Three-Stage Pulse-Tube Refrigerator
M. A. Etaati, R. M. M. Mattheij, A. S. Tijsseling, and A. T. A. M. de Waele

Optimal Design of a JT Cryocooler With Stochastic Constraints: Part I — Formulation
George M. Lloyd

Experimental Demonstrations and Optimal Design Conditions of Snow-Melting System Using Geothermal and Solar Energy
Niro Nagai, Shigenobu Miyamoto, Toru Tsuda, and Shinya Yamahata
ENVIRONMENTAL HEAT TRANSFER

HT2009-88024 ............................................. 773
Correlation of Global Warming Potential and Atmospheric Life Times of Halocarbons
Suman Kumar Sharma

HT2009-88105 ............................................. 779
Thermodynamics-Based Object-Oriented Environmental Design of an Industrial Air-Conditioner
Amip J. Shah, Wilfredo Lugo, and Chandrakant Patel

HT2009-88158 ............................................. 789
Scavenging of Gaseous Pollutants by Falling Liquid Droplets in Inhomogeneous Atmosphere With Non-Uniform Temperature and Concentration Distributions
Boris Krasovitov, Tov Elperin, and Andrew Fominykh

HT2009-88170 ............................................. 801
Design of Compact BIPV Façades for the Buildings at the University of Technology Sydney (UTS)
Jafar Madadnia and Myung Hun Park

HT2009-88232 ............................................. 809
CRAC Heat Exchanger Response to Step Change in Chilled Water Flowrate
Shawn P. Shields, Yogendra K. Joshi, Michael Patterson, and Michael Meakins

HT2009-88289 ............................................. 817
A Method to Achieve Robust Aerodynamics and Enhancement of Updraft in Natural Draft Dry Cooling Towers
Christopher C. M. Chu and Md. Mizanur Rahman

HT2009-88344 ............................................. 825
Simulated Thermal Performance of Triple Vacuum Glazing
Yueping Fang, Trevor J. Hyde, and Neil Hewitt

HT2009-88350 ............................................. 833
A Three-Dimensional, Time-Dependent Circulation Model of Utah Lake
Robert E. Spall, Brandon Wilson, and Eric Callister

HT2009-88596 ............................................. 843
Effect of Size and Slip Coefficient of a Porous Manifold on Thermal Stratification in Storage Tanks
N. M. Brown and F. C. Lai

HEAT TRANSFER EDUCATION

HT2009-88212 ............................................. 851
Real-Time Reliable Simulation of Heat Transfer Phenomena
G. Rozza, D. B. P. Huynh, N. C. Nguyen, and A. T. Patera

HT2009-88544 ............................................. 861
Undergraduate Class Project: Design and Build a Helical Coil Heat Exchanger Experiment
Amanie N. Abdelmessih, Stanely G. Cummings, Mary Jorgenson, and Joel Parker
VISUALIZATION OF HEAT TRANSFER

HT2009-88234 ................................................................. 871
A Way to Visualise Heat Transfer in 3D Unsteady Flows
   M. F. M. Speetjens

HT2009-88417 ................................................................. 881
Preliminary Experiments With an Underexpanded Gas Jet Into Water
   Mitsunori Uchida, Satoshi Someya, Koji Okamoto, and Hiroyuki Ohshima

HT2009-88435 ................................................................. 889
Measurement of Unsteady Flow in Pump-Turbine for Hydropower Using PIV Method
   Nobuhiko Fukuda, Satoshi Someya, and Koji Okamoto

HT2009-88438 ................................................................. 897
A 2D-PIV Study on Natural Convective Heat Transfer in a Square Enclosure With Partially
   Active Side Walls
   Massimo Paroncini, Francesco Corvaro, and Alessia Montucchiari

Author Index........................................................................ 907
