Advanced Building Materials

PART 1

Selected, peer reviewed papers from the 2011 International Conference on Civil Engineering, Architecture and Building Materials (CEABM 2011), 18-20 June, 2011, Haikou, China

Edited by

Guangfan Li, Yong Huang and Chaohe Chen
# Table of Contents

Preface v  
Sponsors and Conference Organization vi  

Part 1

**Chapter 1: Traditional Construction Materials**

</table>
Study on RC Short Column Strengthened Reliability
Y.P. Chu, Y. Yao, B. Jia and Z.Q. Zhang .......................................................... 100

The Relationship between the Strength and the Pore Structures of Cement Paste with
Mineral Admixtures
Y. Li, J.L. Bao, C.E. Sui and X.L. Du ................................................................. 104

Effect of Heat Treatment on Microstructure and Mechanical Properties of 30MnSi
Pre-Stressed Concrete Steel
H.B. Cui and L.F. Zheng ..................................................................................... 109

Chloride Diffusivity in Cracked Concrete
S.P. Zhang, L. Zong and J.P. Liu ........................................................................ 113

Prediction of Cement Compressive Strength Based on Accelerated Curing Method

Mechanical and Microstructure Characterization of Fresh High- and
Normal-Strength Concrete with Non-Contact Electrical Resistivity Measurement
Y. Tian, X.Y. Jin, Y. Zhan and N.G. Jin .............................................................. 122

Solubility of Phosphogypsum in Pure Water and Lime Solution
M. Yang ............................................................................................................. 131

Present Situation and Consideration of Rock Burst Hazard
L. Deng, Y. Lv and R.G. Deng ........................................................................... 136

A Study on Smelting Cold Heading Steel SWRCH6A Using Double-Slag Process

Influence of Cooling Methods and Standing Time on Different Aggregate Concrete
Strengths after Elevated Temperature
Q.Q. Zhang, G.L. Yuan and Y.N. Dong ............................................................... 155

Cause Analysis of the Dangerous Factors in Construction Accidents and
their Countermeasures
Z.G. Su, Z.A. Jiang and W.G. Dong ................................................................. 160

Experimental Research on the Dynamic Young's Modulus of Specified
Density Concrete
X.E. Zhou, Y.K. Zhang and D.M. Jiang ............................................................ 164

Finite Element Analysis on Mechanical Properties of Light-Weight Aggregate Concrete
Composite Slab
Y.K. Zhang, S.Y. Zhang and X.E. Zhou ............................................................ 168

Accelerated Carbonation Curing of Foam Concrete with Lower Density
D.P. Chen, J.Y. Liu and M. Liu ........................................................................... 172

Influence of Variable Temperature Curing on Mechanical Properties of Fly Ash Concrete
Y.D. Zhao, X.Y. Li, L.C. Kong and W. Du .......................................................... 178

Effect of Naphthalene Based Superplasticizers on Performance of Ultrafine
White Cement
W.J. Guo, G.X. Du, Q. Xue and J.H. Liao ........................................................ 182

Discussion on Application of Electrical Resistivity Method in Cemented Soil after Pollution
X.Q. Dong, X.H. Bai and Y.K. Lv ...................................................................... 188

Simulation Analysis of Surface Deformation by Strip Replacement Mining in the
Short-Distance Thin Coal Seam
P.S. Zhang, W. Yan and W.Q. Zhang ................................................................. 193

A New Approach of Steel Frames-Reinforced Concrete Shear Wall Hybrid Structure
Considered Semirigid Connection
Influencing Parameters Analysis of Chloride Threshold Value on Reinforcements Embedded in Concrete
W.Q. Cao, X.M. Wan and T.J. Zhao .............................................................. 202

Corrosion Behavior of HRB400 Reinforcing Steel Using Cyclic Potentiodynamic Polarization Technique
Y.Y. Xu and B.L. Lin .................................................................................. 207

Multiscale Modelling of Progressive Damage in Fiber-Reinforced Composites
F. Wang, Z.Q. Chen and Q.F. Meng ............................................................ 213

The Study of Convertibility of Water Cement Ratio in Recycled Water Permeable Concrete
Y. Li, J.R. Yang and T.T. Guo ..................................................................... 218

Corrosion Behavior of Hot-Dip Galvanized Reinforcing Steel Using Electrochemical Impedance Spectroscopy
B.L. Lin and Y.Y. Xu .................................................................................. 222

Mechanical Analysis of Bending Accidents for Tower Crane Lifting Boom
X.Y. Jiang, T.B. Li and J.M. Xie .................................................................. 228

Discussions on the Two Properties and Applications of Elastic Deformation and Deformation Energy
Z.H. Li, J.P. Shi and A.M. Tang .................................................................... 232

Rolling Stones under the Action of the Numerical Simulation Research Shed Hole
L. Yang, S.M. Li, D.H. Chen and Z.M. Wu .................................................... 238

Behavior of Reinforced Concrete Subjected to Boric Acid Corrosion of Nuclear Power Plant
Y. Zhan, Q. Li, X.Y. Jin, Y. Tian and N.G. Jin ............................................. 242

Experimental Study on Strength and Abrasion-Resistance Enhancement Admixture
D.J. Xu, C.Q. Fu, X.Y. Jin, Y. Tian and N.G. Jin .......................................... 247

Microstructure and Durability of RC in Boric Acid
H.Z. Jin, Q. Li, X.Y. Jin, Y. Tian and N.G. Jin ............................................. 252

Study on the Chloride Contents of Sea Sand in Ningbo
J.Z. Liu, J.B. Chen, G.L. Zhang and Z.M. He ............................................. 257

Study on the Strength of Sea Sand Concrete in Ningbo
J.Z. Liu, G.L. Zhang, J.B. Chen and Z.M. He ............................................. 262

Comparison of Post-Buckling Behaviors of a S-S FGM Beam under Conservative and Non-Conservative Distributed Forces
Q.L. Li and S.R. Li ...................................................................................... 266

The Creep Rupture Numerical Simulation of Coal (Rock) Layered Slope
F. He, L.G. Wang, Z.X. Yao, L.L. Zhang and G.C. Zhao ............................ 271

Mechanical Analysis of the Recycled Concrete Brick Masonry Wall under In-Plane Load
S. Gu, G.P. Chen and S.W. Zhu .................................................................. 278

A New Technique to Manufacture Desalinated Sea Sand Concrete and its Properties
B.Q. Sun, L.J. Wang, C.H. Chen and H. Wang ............................................ 283

Discontinuous Galerkin (DG) Finite Element Method for the Improved Stokes Equations
S.H. Zhang, X.J. Yuan and Q. Yin ............................................................... 291

The Finite Element Analysis of Coupling Law of Stress Field / Seepage Field in Impermeable Stratum Medium
J.Y. Li ........................................................................................................ 298
Chapter 2: Advanced Construction Materials

Experimental Study on Sustainable Concrete with the Mixture of Low Calcium Fly Ash and Lime as a Partial Replacement of Cement
M. Jayakumar and M.S. Abdullahi ............................................................. 307

Influence of Retarders on the Microstructure of Hardened Building Gypsum Paste and the Mechanism of its Strength Loss
J.D. Qu, B.Z. Li and J.H. Peng ................................................................. 313

Effect of Citric Acid on the Crystal Morphology of Gypsum and its Action Mechanism
J.D. Qu, J.H. Peng and B.Z. Li ............................................................... 321

Research on the Sulfate Corrosion-Resistance Admixture for Concrete
B.J. Yang, Q.Y. Li, S. Gao and T. Li ...................................................... 327

Finite Element Analysis of Compressive Strength of Recycled Coarse Aggregate-Filled Concrete
J. Li, Z. Liu, X.F. Qu, C.Q. Zhu and Y. Zhang ........................................ 331

Numerical Experiment on Size Effect for SFRC Splitting Fracture
C.Q. Fu, X.Y. Jin, Y. Tian and N.G. Jin ................................................. 335

The Gray Solar Heat Reflecting Coating with Insulating Heat and Lowering Temperature

Assessment of Government Contractor Classification System in Saudi Arabia
A.M. Alsugair and M.M. Abuthnain ....................................................... 345

Performance Experimental Study and Energy Consumption Calculation of Hollow Glass Window Film
D.P. Yang, J.P. He and Z.S. Zhang .......................................................... 356

Mechanical Properties of Concrete with Recycled Clay-Brick-Powder
Z. Ge, R.J. Sun and L. Zheng ............................................................... 360

Modification Mechanism of SEAM-Added Asphalt Mixture and its Application in Severely Frigid Zone
B. Zhao, S.X. Ma and P.W. Hao .......................................................... 365

Experimental Study on the Axial Compression Behaviors of Short Rectangular Concrete Columns Encased in CFRP Tube
W.B. Sun .............................................................................................. 370

Effects of Gradation of Sand on the Mechanical Properties of Engineered Cementitious Composites
Y.Z. Yang, Y. Yao and Y. Zhu ............................................................... 374

Research on Flexural Behavior of Coarse Recycled Aggregate-Filled Plain Concrete Beam
J. Li, L.F. Wang, J. Li, X.F. Qu and L. Jang ............................................ 379

Shrinkage Cracking Resistance Property of Self-Compacting Concrete
X.Y. Jin, C.Q. Fu, N.G. Jin, F. Ge and Y.B. Zhao .................................... 383

Design and Experimental Investigation of a New-Style Pultruded GFRP Mid-Beam
W. Zhang, M.Y. Zhang and L.T. Gao .................................................... 388

Research Status and Prospects of the Self-Repairing Concrete
J. Sun and W.X. Ding ............................................................................ 393

Interfacial Transition Zone Characteristics of Light-Burnt MgO Concrete

Synthesis and Dispersibility of Polycarboxylate Copolymers with Poly(ethylene oxide) Side Chain
S. Li, Q.J. Yu, J.X. Wei and Z.Y. Wen ................................................. 401

Study on Self-Healing Concrete with Pre-Embedded Healing Agent
M. Zhang, F. Xing, H.Z. Cui and H. Lu ................................................ 405
Correlations between Fresh Properties of Self-Consolidating Concrete Including Palm Oil Fuel Ash
M. Safiuddin, M.A. Salam and M.Z. Jumaat ................................................................. 409

Impact Property of Concrete Containing Nano-Particles for Pavement
M.H. Zhang and S.N. Yu ................................................................................................. 417

Experimental Research on the Mechanical Properties of Compacted Cement Soil in Collapsible Loess Area and Engineering Application
Y.X. Yu, Y.F. Jiao, B. Liang and W. Zhang .................................................................. 421

Permeability of Concrete Containing Air-Entraining and Mineral Admixtures
W.R. Huang, D.B. Yang, J.T. Zhou, L. Li and W.N. Zhang ......................................... 425

Optimal Design of DFRCC Subjected to Fatigue Loading
P.J. Chun and T. Matsumoto ......................................................................................... 430

Tensile Creep Behavior of HPC at Early Ages under Different Curing Temperatures
Y. Yang, P. Li and Y.P. Wu ............................................................................................ 434

Mechanical Property Study of the Slab Filled with DEPP

Influence of the Fly-Ash Content of Concrete at Low Water-Binder Ratio on Hydration Degree of Binders and Cement
L.W. Xu and J.L. Zheng ................................................................................................. 445

Preparation and Performance Research on Phenolic Insulation Foam Used Low-Temperature Foaming Technology

Experimental Research and Numerical Analysis on Fiber Reinforced Plasterboard-Reinforced Concrete Composite Floor Slabs
X.L. Huan and C.L. Li .................................................................................................. 455

Orthogonal Test of Characteristics of Complex Cementing Material of FGD Gypsum-Fly Ash
Y. Zhang, X.T. Wang, M. Zhou and W.Z. Wang ............................................................ 460

Influencing Factors of the Fluidity and Strength of Phosphate Concrete
H.T. Wang, J.H. Cao, S.M. Li and M. Xue .................................................................... 464

Effect of Mineral Admixtures and Chemical Activators on the Strength of FGD Gypsum-Fly Ash Complex Cementing Material
X.T. Wang, Y. Zhang and M. Zhou ............................................................................. 469

Fireproof Performance of Foam Concrete Insulation Board

Influence of Nano-SiO2 and Nano-CaCO3 on the Mechanical Properties of Concrete with Different Strength Grades
M.Z. Huang, T. Meng, X.Q. Qian and J.J. Zhang ........................................................ 480

Experiment and Research on the Influence of Basalt Fiber on Cement-Based Material Performance
X.H. Cong, J. Sun, F. Zhao and H.B. Liu ..................................................................... 485

Research on Shrinkage and Cracking of Cement Paste Based on Environmental Scanning Electron Microscope
Y. Li, C.E. Sui and X.H. Li .......................................................................................... 489

Experiment Study on the Durability of Dry-Mixing Self-Compacting Concrete
L. Zong, S.P. Zhang and P.X. Liang ............................................................................ 493

Experimental Study on Thermal Expansion Properties and Micro-Pore Texture of High Strength Concrete in Early Age
A.K. Wang, Y.D. Xue, R. Wang, S.X. Lv, X.K. She, B. Li and H.J. Tian ....................... 497
A New Binding Agent of Na$_2$O-B$_2$O$_3$-SiO$_2$ System Sol for Expanded Perlite Thermal Insulation Board

A Novel Building Thermal Insulation Material: Expanded Perlite Modified by Aerogel

High Performance and Low Cost Compound Admixture of Expanded Perlite Powder/Redispersible Polymer Powder for Dry-Mixed Mortar

Study for Aeolian Sand Characteristics by Static Experiment
Y.L. Song, Y.W. Zhang and J. Yu .................................................................519

The Influence of Formaldehyde/Phenol Ratio on Properties of Foamy Phenolic Resin and Phenolic Foam
W. Zhang, Y.F. Ma, F.X. Chu and C.P. Wang .................................................................523

Microstructure of Alkali-Activated Granulated Blast Furnace Slag-Based Geopolymer
Y.J. Zhang, H.H. Li, Y.L. Zhao, Y.C. Wang and D.L. Xu .........................................................528

Compressive Properties of Steel Fiber Reinforced Ultra High Strength Concrete
J. Su, J.L. Tao, T. Li and Y. Yin .................................................................532

A Study of Thermal Performance on Cool Colorful Water-Based Reflective Coatings for Building

High Performance Thin-Bed Dry-Mix Mortar for Autoclaved Aerated Concrete Blocks
Z.M. Huang, Y.F. Yuan and Z.Y. Wen .................................................................540

Study on the Corrosion Resistance of Polymer-Modified Reactive Powder Concrete
D. Lin, Y.F. Yuan and Z.Y. Wen .................................................................548

Preparation and Properties of MgO-MgAl$_2$O$_4$-FeAl$_2$O$_4$ Bricks in Cement Kiln
S.L. Ma, Y. Li, J.L. Sun, Y. Li and W.B. Xia .................................................................554

Defects in ZrO$_2$-Reinforced Aluminum Foam Prepared by Infiltration Process
F. Wang, J.G. Wu and L.C. Wang .................................................................561

Influence of Silane Treatment on the Freeze-Thaw Resistance of Concrete
X.J. Gao, H.W. Deng and Y.Z. Yang .................................................................565

Study on High-Efficiency Complexed Foaming Agent for Lightweight Foamed Concrete
X.M. Liu, L.Y. Wang, S.L. Li and J.P. Wang .................................................................569

Experimental Study on the Mechanical Properties of Q460C Construction Steel at Low Temperature
Y.Q. Wang, Y. Lin, Y.N. Zhang and Y.J. Shi .................................................................574

Research on the Properties and Application of Spheroidizing Pumice Concrete Block

New Type Spherical Pores Al Foam and its Properties
Z.G. Wang, P. Cai and Z.W. Wang .................................................................584

Optimizing Performance of Magnesia-Spinel Brick Used at Cement Rotary Kiln
D. Wang, Y. Li, Y. Li, R. Li and Y. Li .................................................................588

Investigation on Application Performances of Chrome-Free MgO-Al$_2$O$_3$-ZrO$_2$ Bricks for Sintering Zone in Cement Kiln
Y. Li, Y. Li, W.B. Xia, W. Zhou, S.L. Ma and D. Wang .................................................................595

Study on Test about the Impermeability of Magnetic Water Concrete
Y.X. Wang, X. Wang and Y.K. Wang .................................................................601

Experimental and Economic Analysis of Airport Crumb Rubber Concrete (CRC) Pavement
Y.R. Li, H. Zhu and C.S. Liu .................................................................605
Statistical Evaluation for Impact Resistance of Steel Fiber Reinforced Lightweight Aggregate Concrete
H.W. Song and H.T. Wang ..............................................609

Application of Capillary Absorption on Characterization of Structure of Cement Compacts Containing Micro Silica Fume
Y.Q. Shen and M. Deng ..................................................614

The Impact of Barium Aggregate on the Microstructure of Sand-Lime Products
R. Dachowski and A. Stepieri ..........................................618

Linear Analysis and Strength Prediction of Experiment on Lightweight Heterogeneous Soil Mixed with Expanded Polystyrene
X.L. Sui, M.S. He and X.J. Fu .........................................622

Research on Improving the Durability of Fly Ash Concrete
H.Z. Quan ........................................................................626

Bonding Force Investigation between C-S-H Clusters in the C3S Pastes and AFM Tip
H.Y. Sun, A.M. Gong and Y.L. Peng ..................................630

Study on the Simulation of Damage Constitutive Relationship for High Strength and High Performance Concrete
S.S. Zheng, Y. Hu, B. Liu, M. Xie and Q.L. Tao .....................636

Research Progress on the Mechanical Property of High Strength Structural Steels
H.Y. Ban, G. Shi, Y.J. Shi and Y.Q. Wang ............................640

Study of CaCO3 Whiskers: Preparation and Applicability in Construction Materials
J.Q. Wei and M.L. Cao ....................................................649

Experimental Study on Mechanical Properties of New Self-Compacting Concrete for Strengthening Engineering
K.X. Hu, Y.B. Zhang and K. Xu ..........................................657

Effect of Clay Dosage on Mechanical Properties of Plastic Concrete
Q.Y. Guan and P. Zhang ..................................................664

Configuration and Pyrological Performance of Self Thermal Insulating Blocks
X.W. Ma, L.X. Yang and Y.Y. Ji ........................................668

Comparative Experiment on Frost Resistance of Different Kinds of Polymer Fibrous Concrete
Z.W. Shi, S. Liu and R.R. Zhang ........................................673

Studies on Improving PP Fiber Reinforced Concrete
L.H. Chou, C.K. Lu and M.T. Lee ......................................678

Application and Analysis on Polypropylene Fibrous Concrete
Y.H. Wang and X.D. Liu ..................................................682

Study on the Ultra High Performance Concrete Containing Limestone Powder
S.H. Liu, Z.Y. Gao and M.J. Rao ........................................686

Effect of Air Plasma Treatment on Property of PET Fibers Used in Conductive Asphalt Concrete
F.T. Ruan, X. Jin, W.Y. Wang, C.F. Xiao and C. Xie ...............690

Synthesis and Water Absorbency of Poly(acrylic acid-co-acrylamide)
T. Li, N. Kong, S.S. Gao, P. Sui, Y.H. Zhao and C.Q. Yuan ....695

Mechanical Properties Analysis of the Microstructure of Rubber Modified Concrete
L. Kou, F.T. Pan and C.Y. Wang .......................................699

High Temperature Rheological Characteristics of Brucite Fiber Modified Asphalt Mastics
B.W. Guan, S.F. Chen, R. Xiong, Y.P. Sheng and L.L. Ma .......703

Utilization of Desulfuration Residues in Non-Autoclaved Aerated Concrete
F.X. Li, Y.Z. Chen, Q.J. Yu and J.X. Wei ............................707
The Compounding and Application Mechanism of Polycarboxylate-Based Superplasticizers in the Self-Compacting Concrete

The Impact of Lithium Polysilicate on the Microstructure of Sand-Lime Products
R. Dachowski and Z. Owsiak ........................................718

Research on Durability Performance of Novel Double Solution Grouting Material with Metakaolin
C. Yan, Q.J. Ding, J.P. Xu and H.X. Wang ........................................722

Performance Study on Alumina Red Mud-Cement Stabilized Macadam Base
M. Qin, N.X. Liang and Z.F. Lu ........................................728

Effects of Nickel on Structure and Properties of Ferro Superalloy
H.T. Wang, C.L. Chen and D.C. Kang ........................................733

Study on Carbonation and Corrosion Resistance of Reinforced Recycled Concrete
Y.L. Sun, F. Tian, X.S. Xie and Y.Y. Chen ........................................737

Failure Load Prediction of Bolted Single-Lap Composite Joint Based on XFEM
Z.Q. Wang, S. Zhou, J.F. Zhang and X.Q. Wang ........................................742

Test of Thermal Capability to Rubber Concrete
L.Q. Yang, L.W. Zhang and R. Gao ........................................746

Optimization Study of Expansive Agents of Shrinkage-Compensating Concrete
Q.Y. Ma, W. Huang and P.B. Cui ........................................750

Effect of Fly Ash and Lime Treatment on Mechanical and Swell Properties of Dunkirk Dredged Sediments

Defects of Conventional Concrete and Developments of Self Compacting Concrete along with its Applications
Z.Z. Wang and F.X. Supartono ........................................761

Study on the Flexural Property of PVA-High Toughness Cementitious Composites
W.L. Tian, L. Xu and X.W. Wang ........................................765

S.X. Wang, J. Yang, X.Q. Ouyang and D.H. Han ........................................769

Research on Superplastic Zn-22Al Alloy with a Large Size to a New Seismic Damper

Chapter 3: Green Building Materials

Carbonation Behavior of Recycled Aggregate Concrete under Loading
P.H. Zhu, X.J. Wang and J.C. Feng ........................................779

Fuzzy Synthesis Method for Evaluating Quality Class of Coarse Recycled Concrete Aggregate
P.H. Zhu, J.C. Feng and X.J. Wang ........................................783

Research about the Effect of Polypropylene Fiber on Mechanical Properties of Curing Sludge
S.L. Zhan, S.S. Gao and J.Y. Lai ........................................788

Preparation of a New Kind of Ultra-High Performance Water Reducer and its Application Study
G.R. Duan, X. Wang, G.H. Huang and Y. Gong ........................................795

Discussion on Application Prospect of Starch-Based Adhesives on Architectural Gel Materials
Y. Wang ........................................800
Syntheses of Ethyl Cellulose Acrylate Hybrid Latex via Mini-Polymerization

Fly Ash-Desulfurization Gypsum Mortar and Concrete Part I: Mix Proportions and Hydration
Y. Chen and Y.L. Gao................................................................. 809

Freeze-Thaw Model and Service Life Prediction of Hybrid Fiber Reinforced Lightweight Aggregate Concrete
J.F. Huo, D.P. Liu, X.D. Shen, J.J. Chu and D.T. Song ............................................................ 817

Study on Frost Resistance Durability of Lightweight Aggregate Concrete Improved by Fiber
J.F. Huo, H. Yang, Y.L. Hou, J.J. Chu and W.L. Li ............................................................ 822

Research on Contributing Factors of Gypsum-Based Composite Material Performance
Y.P. Ai, L.J. Liu, Y.Y. Zeng and T.P. Zhou ............................................................... 828

Properties of Cement-Based Materials Containing Melting Incinerator Bottom Ash

The Effect of Hyperdispersant on the Mechanical Properties and Morphology of Sisal Fiber/Polypropylene Composites

Mechanical Properties of the Ecological Filling Blocks of the New Composite Wall Based on the Unified Strength Theory
W. Huang, H.Z. Wu, G.X. Chen, Y. Zhang, J.Y. Wang and D. Zhao ........................................... 843

A Study of the Mixing Ratio and Mechanical Properties of Clay-Carbide Slag-Fly Ash Unfired Brick
W.X. Hu .......................................................... 849

Experimental Study on Aerated Concrete Produced by Iron Tailings
Y.Z. Tian .......................................................... 853

Evaluating the Influence of Mix Proportion Parameters on Anti-Permeability of Green High Performance Concrete with Grey Relational Analysis
Q.Y. Guan and P. Zhang .......................................................... 857

Research on Influences of Activity Mineral Admixture on Workability and Mechanical Properties of High Strength Lightweight Aggregate Concrete
X. Dong, J.M. Gao and A.Y. Hu .................................................. 861

Study on Properties of Self-Compacting Concrete with Recycled Powder
H.Z. Quan .................................................. 866

Utilization of Ground Granulated Blast-Furnace Slag Seed Crystal in Eco-Cement
H.M. Ai, J. Wei, J.Y. Bai and P.G. Lu .................................................. 870

Study on Interface Properties of EVA-Modified Cement Mortar
Y.Y. Wu, B.G. Ma, J. Wang, F.C. Zhang and S.W. Jian .................................................. 875

The Effect of Process Conditions on the Preparation of α-Calcium Sulfate Hemihydrate from FGD Gypsum Using the Hydrothermal Method under Atmospheric Pressure
X.F. Liu, J.H. Peng, C.Y. Zou, L. Bai and M. Li .................................................. 881

Property of High Volume Industrial Residue Concrete
K.L. Li, Z.Z. Yang, G.H. Huang and X.S. Tang .................................................. 890

X.H. Guo, Z. Li and G.Q. Zhu .................................................. 895

Experimental Study on Application Properties of Macroporous Ecological Concrete without Sand
Z.X. Xing and Y. Xing .................................................. 901
Exploration on Feasibility of Preparing Cement Clinker with Artificial Aggregate Concrete
J.B. Wang, Z.H. Zhou and D.Y. Xu ...................................................... 906

Preparation of Conductive Fine Flake Expanded Graphite/Polyaniline Composites
Y.F. Li, X. Luo and L. Wang ................................................................. 910

Strength Characteristics of Recycled Concrete after Freezing and Thawing
W.B. Xu, Y. Hu, T.F. Liu and X. Li ..................................................... 914

Studies about the Initial Curing Conditions on the Carbonation Resistance of Fly-Ash Concrete
E.L. Lu, G. Li, Y.S. Yuan, O. Geng and J.M. Du .................................. 920

Research on Light-Duty and Energy-Saving Characteristic of Membrane Structure and its Development Prospect
J.R. Sheng and T.J. Zhang ................................................................. 925

Effect on Structure and Early Hydration Activity of Steel Slag Modified by Adjusting Materials and Temperature
H.J. Zhao, Q.J. Yu, J.X. Wei and J.X. Li .............................................. 931

Study on Determination Method of the Volatile Organic Compounds Emissions from Particleboards for Indoor Finishing
S.J. Sun, J. Shen and Z.Y. Zhao ......................................................... 935

Modulus of Rupture Test and Numerical Fitting of Plybamboo Form

Volatile Organic Compounds Emissions of Particleboards in Response to Processing Parameters
Y. Liu, J. Shen and X.D. Zhu ............................................................. 943

Effect of Processing Parameters on Properties of Wheat-Straw Boards with FRW
X.D. Zhu, F.H. Wang and Y. Liu ....................................................... 947

The Implementation of Statistical Inference to Study the Bending Strength of Sustainable Hybrid Sandwich Panel Composite
J. Fajrin, Y. Zhuge, F. Bullen and H. Wang ......................................... 956

Properties of Fly Ash Based Geopolymer Concrete Exposed to Sustained Elevated Temperatures
M.S. Sudarshan and R.V. Ranganath ................................................. 962

Experimental Study of the Effect of Water Reducer on the Plaster Board Production in Low Energy-Consumed Way
J. Sun, X.H. Cong, H.B. Liu and L. Sun ............................................. 969

Review of Study on Polyurethane Foams from Biomass

Dynamic Simulation of the Pile-Soil Interaction in the Vibratory Pile Driving Process
X.P. Li, Z.L. Duan, T. Li and B.C. Wen ............................................. 980

Study on Preparation and Dispersion Effect of Polycarboxylate Superplasticizer with Broken Dentiform Structure
Z.Y. Liu, C. Cui and L. Li ................................................................. 984

Effect of Cement Clinker on the Properties of Flue Gas Desulphurization Gypsum-Steel Slag Cementitious Composites
Z. Wang, L. Zhang, L.Y. Fan and G.P. Shi ......................................... 990

Experiment Research on Basic Mechanic Property of Recycled Concrete with Different Ratio of Recycled Aggregate
Y.D. Sun and X. Xiao .................................................................. 994
Evaluation Indexes System for Assessing Road Construction with Recycled Waste Materials to Achieve Better Environmental Impacts
  D.Z. Chen, C.J. Geng and W.Z. Sun ................................................................. 1001

Preliminary Research on Waste Incineration Bottom Ash Concrete
  R. Zhang and T. Zhang ................................................................. 1007
