VOLUME 2

Some Preliminary Comparisons Between the Diffusion Equation Model and the Room-Acoustic Rendering Equation in Complex Scenarios ................................................. Juan M. Navarro, Jose Exiniano, Jose J. Lopez .......................... 662
Spatial Room Impulse Responses with a Hybrid Modelling Method ......................................................... Alex Southern, Samuel Siltanen, Lauri Saviola ............... 672
Comparison of Speech Intelligibility in Artificial Head and Jecklin Disc Recordings ...................................... Roger Johnson, Arne Nykanen ........................................................... 686
A Comparison of Speech Intelligibility for In-Ear and Artificial Head Recordings .................................. Arne Nykanen, Roger Johnson ......................................................... 695
Perceptually Robust Headphone Equalization for Binaural Reproduction ............................................. Bruno Mastiero, Janina Fels ................................................................. 703
Prediction of Perceived Elevation Using Multiple Pseudo-Binaural Microphones ................................ Tommy Ashby, Russell Mason, Tim Brookes ........................................ 710
BRTF (Body Related Transfer Function) and Whole-Body Vibration Reproduction Systems ........................ M. Ercan Alinsay, Sebastian Merchel .............................................. 718
HRTF-enabled Microphone Array for Binaural Synthesis ................................................................. M.O.J. Hawksford ........................................................................ 723
Interpolation and Range Extrapolation of Head-Related Transfer Functions Using Virtual Local Wave Field Synthesis ................................................................ Saszko Spora, Hagen Wierstorf, Jens Ahrens ................... 738
A Comparison of Kanun Recording Techniques As They Relate To Turkish Makam Music Perception
Can Karadogan

Objective Measurement of Music Quality Using Inter-Band Relationship Analysis
Steven Fenton, Bruno Fazenda, Jonathan Wakefield

Evaluation of a New Algorithm for Automatic Hum Detection in Audio Recordings
Matthias Brandl, Thorsten Schmidt, Joerg Bitter

Interactive Mixing Using WiL Controller
Rod Selfridge, Josh Reiss

The Quintessence of a Waveform: Focus and Context for Audio Track Displays
Jorn Loviscach

Spatial Audio Processing for Interactive TV Services
Johann-Marx & Bartk Bayre, Jens Spille, Holger Kropp, Stefan Abeling, B. Shirley, Rob Oldfield

Wireless High Definition Multichannel Streaming Audio Network Technology based on the IEEE 802.11 Standards
Seppo Nikkila, Tom Lindeman, Valentin Manea

Spatial Analysis of Room Impulse Responses Captured with a 32-capsules Microphone Array
Angelo Farina, Alberto Amendola, Andrea Capra, Christian Varani

Control of the Beamwidth of a Beamformer with a Fixed Array Configuration
Wan-Ho Cho, Marins M. Boone, Jeong-Gwon Ih, Takeshi Tai

Design 3-D High-Order Ambisonics Encoding Matrices Using Convex Optimization
Haohai Sun, U. Peter Svensson

Principles in Surround Recordings with Height
Gunnther Thiel, Helmut Wittk

Efficient 3D Sound Field Reproduction
Mincheol Shin, Filippo M. Fazi, Jeongki Soo, Phillip A. Nelson

On the Scattering of Synthetic Sound Fields
Jens Abrons, Sascha Spors

Towards Mass-Customizing Up/Down Generic 3D Sounds for Listeners: A Pilot Experiment Concerning Inter-Subject Variability
John Au, Richard So, Andrew Horner

A New Robust Hybrid Acoustic Echo Cancellation Algorithm for Speech Communication in Car Environments
Y. Zhou, C.S. Zheng, X.D. Li

Speech Source Separation Using a Multi-Pitch Harmonic Product Spectrum Based Algorithm
Rehan Ahmed, Roberto Gil-Pita, David Aylion, Lorena Alvarez

User-Orientated Subjective Quality Assessment in the Case of Simultaneous Interpreters
Judith Liebetrau, Thomas Spoerer, Paolo Tosarotti, Daniel Frohlich, Sebastian Schneider, Jens-Oliver Fisc

Analysis of Parameters of the Speech Signal Loudness of Professional Television Announcers
Miriana Mihajlovic, Dejan Todorovic, Iva Salom

Improved Prediction of Nonstationary Frames for Lossless Audio Compression
Florin Ghido

A Lossless/Near-Lossless Audio Codec for Low Latency Streaming Applications on Embedded Devices
Neil Smyth

Low-Delay Directional Audio Coding for Real-Time Human-Computer Interaction
Tapant Pihlajamaki, Ville Pulkk

A New Approach to Designing Decimation Filters for Oversampled A/D Converters
Jannie A.S. Angas

Warped IIR Filter Design with Custom Warping Profiles and Its Application to Room Response Modeling and Equalization
Baklaaz Bank

Computationally Efficient Nonlinear Chebyshev Models Using Common-Pole Parallel Filters with the Application to Loudspeaker Modeling
Baklaaz Bank

Event-Driven Real-Time Audio Processing with GPGPUs
Tiziano Leidi, Thierry Hech, Marco Colla, Jean-Philippe Thiran

A Comparison of Parametric Optimisation Techniques for Musical Instrument Tone Matching
Matthew Yee-King, Martin Rush

On the Multichannel Sinusoidal Model for Coding Audio Object Signals
Toni Hirvonen, Athanasios Mountsara
An Additive Synthesis Technique for Independent Modification of the Auditory Perceptions of Brightness and Warmth ........................................... 988
Asteris Zacharakis, Josh Reiss

Repeatability of Localization Cues in HRTF Databases ........................................... 997
Elena Blainco-Martín, Silvia Merino Saiz-Miera, Juan Jose Gomez-Alfageme, Luis Ortiz-Bere

Dynamic Head-Related Transfer Function Measurement Using a Dual-Loudspeaker Array ........................................... 1003
Qinghua Ye, Qiujie Dong, Lingling Zhang, Xiaodong Li

Statistical Analysis of Binaural Room Impulse Responses ........................................... 1011
Eleftheria Georganti, Alexandros Tsilfidis, John Mourjopoulos

Spatial Sound and Stereoscopic Vision ........................................... 1018
Pauli Mannerheim

Designing Ambisonic Decoders for Improved Surround Sound Playback in Constrained Listening Spaces ........................................... 1030
David Moore, Jonathan Wakefield

Decoding for 3D ........................................... 1043
Johannes Boehn

Real-Time Reproduction of Moving Sound Sources by Wave Field Synthesis: Objective and Subjective Quality Evaluation ........................................... 1059
Michele Gasparrini, Paolo Peretti, Stefano Cecchi, Laura Romoli, Francesco Piazza

Assessing Diffuse Sound Field Reproduction Capabilities of Multichannel Playback Systems ........................................... 1069
Andreas Waithor, Christof Faller

Dereverberation in the Spatial Audio Coding Domain ........................................... 1079
Markus Kallinger, Giovanni Del Galdo, Fabian Kuech, Oliver Thiergart

Blind Single-Channel Dereverberation for Music Post-Processing ........................................... 1088
Alexandros Tsilfidis, John Mourjopoulos

Joint Noise and Reverberation Suppression for Speech Applications ........................................... 1096
Elias K. Kokkins, Alexandros Tsilfidis, Eleftheria Georganti, John Mourjopoulos

System Identification for Acoustic Echo Cancellation Using Stepped Sin Method Related to FFT Size ........................................... 1106
Tae Jin Park, Seung Kim, Koeun-Hee Sung

Using Spaced Microphones with Directional Audio Coding ........................................... 1113

Parameter Estimation in Directional Audio Coding Using Linear Microphone Arrays ........................................... 1121
Oliver Thiergart, Michael Kramberger, Markus Kallinger, Giovanni Del Galdo

Extraction of Voice from the Center of the Stereo Image ........................................... 1130
Aki Hama, Minhun Park

Directional Segmentation of Stereo Audio via Best Basis Search of Complex Wavelet Packets ........................................... 1140
Jeremy Wells

System Identification of Equalized Room Impulse Responses by an Acoustic Echo Canceller using Proportionate LMS Algorithms ........................................... 1150
Steffen Goetz, Feifei Xiong, Jan Ole Jørgenmann, Markus Kallinger, Karl-Dirk Kammeyer, Alfred Martins

Virtual Room Acoustics: A Comparison of Techniques for Computing 3D-FDTD Schemes Using CUDA ........................................... 1163
Craig J. Webb, Stefan Bilbao

Acoustic Parameters of Chosen Orthodox Churches Overview and Preliminary Psychoacoustic Tests Using Choral Music ........................................... 1170
Paweł Malecki, Jerzy Wiciak

A Comparative Study of Various ‘Optimum’ Room Dimension Ratios ........................................... 1176
John Saris

Perception of Spatial Distribution of Room Response Reproduced Using Different Loudspeaker Setups ........................................... 1185
Javier Gomez, Rafael C.D. Páva, Kai Saksela, Thomas Svedbom, Ville Polikki

Modal Analysis and Sound Field Simulation of Vibration Panels in a Free Sound Field and in a Rectangular Enclosure ........................................... 1193
Kazuhiro Iwabu, Akira Noguchi, Shin-ya Sato

Simple Room Acoustic Analysis Using a 2.5 Dimensional Approach ........................................... 1200
Patrick Macey

Early Reflections Design for Natural Stereo Sound Listening ........................................... 1205
Chul-Joe (Jay) Yoo

Selection of Audio Stimuli for Listening Tests ........................................... 1211
Jonas Ekeroot, Jan Berg, Arne Nykanen
A Listening Test System for Automotive Audio: Part 5 - The Influence of Listening Environment on the Realism of Binaural Reproduction

Patrick Hegarty, Soren Bech, Francois Pastel

Differences in Preference for Noise Reduction Strength Between Individual Listeners

Rolph Houben, Tjeerd M.H. Dijkstra, Wouter A. Dreschler

Assessment of Stereo to Surround Upmixers for Broadcasting

David Marston

Automatic Classification of Musical Audio Signals Employing Machine Learning Approach

Pawel Zwan, Beazna Kosiek, Adam Kupryjanow

Evaluation of Onset Detection Algorithms in Popular Polyphonic Music on a Large Scale Database

Stephan Hubler, Rudiger Hoffmann

Using the Viterbi Algorithm for Error Correction In An Autocorrelation Based Pitch Detector

Bob Couver

Spectral Equalization for GHA-Applied Restoration to Damaged Historical 78 rpm Records

Tetsu Muraoka, Takahiro Shinya, Toshihiko Ifakabe

Selection of Approximated Activation Function in Neural Network-Based Sound Classifiers for Digital Hearing Aids

Lorena Alvarez, Cosme Llerena, Enrique Alexandre, Roberto Gil-Pita, M. Rosa-Zurera

Development of Multiband Dynamic Range Compressor Regarding Noise Characteristics

Hoon Heo, Mingyu Lee, Seokjin Lee, Koeng-Mo Song

Designing Sets of N Doubly Complementary IIR Filters

Alexis Favrot, Christof Faller

Gestures to Operate DAW Software

Wincent Balin, Jorn Loviscach

Author Index
