Advances in Civil Engineering

PART 6

Selected, peer reviewed papers from the 2011 International Conference on Civil Engineering and Building Materials (CEBM 2011), July 29-31, 2011, Kunming, China

Edited by

Jingying Zhao
PART 6

Chapter 10: Hydraulic Engineering

Numerical Simulation of Characteristics of Sudden Reduction Tube Flow Based on FLUENT

W.Z. Ai and B.G. Huang

3461
Large Eddy Simulation of Hydraulic Characteristics after New Lateral Aerator
G.J. Li, G.Q. Dai, Q. Yang and X.D. Ma ................................................................. 3466

Reinforcement Analysis of Wanjiakouzi Arch Dam Using 3D Nonlinear Finite
Element Method
W. Wei, Q.H. Jiang, C. Yao and T. Xie ................................................................. 3472

3D Finite Element Analysis on DongQing CFRD
D.W. Sun, K.P. Wang and H.Q. Yao ................................................................. 3478

Back Analysis about Shear Strength and Deformation Parameters of High Excavated
Accumulation Slope in Xiaowan Hydropower Station
L.H. Wang, J.L. Li, S.S. Yang, Z. Cheng and M. Zhu ........................................ 3482

Unsaturated Seepage and Fluid-Solid Coupling Analysis of Rainfall Infiltration
of Slope
B.L. Xiong, J.S. Tang and C.J. Lu ................................................................. 3488

Dam-Reservoir Interaction Including the Effect of Vertical Component of Earthquake
Acceleration on Hydrodynamic Pressure
R. Attarnejad and A. Bagheri ................................................................. 3493

Calculation Method and Application for Navigable Hydraulic Parameters of
Jinsha River
M. Chen, M.D. Chen and Z.C. Yang ................................................................. 3500

Dynamical Simulation of Magnetorheological Fluid Characteristics
J.Q. Zhang, J. Zhang, Y.N. Kong and H.L. Cuan ........................................ 3505

The Design of Cooling Water Pipe and Cooling Analysis in Mass Concrete
P.W. Li and Q.Q. Si ................................................................. 3510

The Arch Dam Foundation Rock Mass Unloading and Relaxation Deformation Characteristics
and their Monitoring Result Analysis
S.S. Li, Z.R. Dong, Q. Li, H. Zhao and H. Zhang ........................................ 3514

Influence of Hengsha Passage on Sediment Deposition in the Upper Reach of the Deepwater
Navigation Channel in the Changjiang River Estuary
J. Gu, W. Chen, C.P. Kuang, X. Qin and D.Q. Ma ........................................ 3524

Study on Depositional Environment of Soil Based on Multi-Fractal Theory
J.D. Cai, D.C. Yu, Y.D. Chen and Q. You ................................................................. 3530

Gravel Soil Landslide Sliding Mechanism and Stability Analysis Based on
Fluid-Solid Coupling
Z.B. Sun and X.L. Yang ................................................................. 3535

Analysis of the Atmospheric Temperature Stress on Mass Concrete by
ANSYS Software
P.W. Li, J.M. Gao and X.Z. Zeng ................................................................. 3539

Prefabricated Box Girder Crack's Reason Analysis and Preventative Measures
P.W. Li and Z.X. Xue ................................................................. 3543

Study of the Influence of Hydration Coefficient on Concrete Temperature Stress
P.W. Li, P.D. Qu and X.Z. Zeng ................................................................. 3548

Experimental Study on Micro-Pressure Hydraulic Characteristics of Drip Irrigation Emitters
with Multiple Types of Channels
J. Liu, Q.S. Wei, A. Li, C. Wang, W.T. He and Y.S. Shi ........................................ 3553

Experimental Study of Water Force Acting on Spur Dike
T. Yu, P.Y. Wang, C.Y. Yang, G.J. Gao and J.S. Zhang ........................................ 3558

Research on the Bearing Capacity for Rock Bolt Crane Girder in the Underground Powerhouse
of Large Hydropower Station
J.B. Xie, T.C. He, J. Yao and C.B. Zi ................................................................. 3563

Study on the Thermal Stress Field of Steel 1045 Quenched by Water
J.B. Xie, T.C. He and H.M. Cheng ................................................................. 3568
Study on the Properties of Mass Hydraulic Concrete with Admixtures of Limestone Powder and Water Quenched Iron Slag
J.B. Xie, T.C. He, Y.P. Ai and G.J. Ji

Study on Data Transfer Methods for Fluid-Structure Interaction Analysis
B. Su, R.J. Qian and X.K. Han

Study on System of Gravity Dams Aided Design
Z.Y. Hou, B. Tian and Z.Y. Xiao

Bed Load Transport under Complex Flow
C.R. Liu and D.L. Xu

The Prediction Model of Chaotic Series Based on Support Vector Machine and its Application to Runoff
G.R. Yu, J.R. Yang and Z.Q. Xia

Study on Restoration of Influence of the Waterway Landscape Ecology Due to the Water Conservancy Projects
G.R. Yu, J.R. Yang and J. Wang

A New Calculation Approach to Deal with Hydraulic Pressure in the Sandy Strata and its Application in Wuhan Subway
S.M. Wang, C. He, S.J. Liu and Y.L. Gao

Study on Swelling-Shrinkage Behavior of Vertisols along Fujian Coast
M.X. Chen and H.J. Zhu

Exploring of the Plunge Pool Shape Optimization
T. Yan, H.C. Chen, B. Wen and B. Chen

Dam Safety Reliability Analysis Based on Artificial Neural Network
H. Wei, H.S. Yang, L. Wu and Y. Gui

Dam Safety Monitoring Model Based on Markov Chain
H. Wei, H.S. Yang, D.P. Tian and Q.H. Wang

Assimilating Observation Data into Hydrological Model with Ensemble Kalman Filter
J. Xiong, X.L. Huang and Z.Y. Cao

Numerical Simulation Study on Slaking Deformation Properties of High Earth Core Dam
H. Xu, X.B. Rao, B. Huang, J.J. Pan and Y. Chen

Study on the Influence of Seepage Behavior of Dam Foundation during Wenchuan Earthquake

Experimental Study of Subgrade Scout Width Along River Bend
L. Liu, H.K. Chen and G.C. He

Analysis on Turbulent Debris Flow’s Movement Energy in Circulation Area
L. Liu and Q.H. Wei

Fluid-Solid Coupling Analysis of External Water Pressure Distribution Patterns on Drainage Segment Lining
Q.X. Yan, X. Cheng and J. Zheng

Comparison on Somatotype of X- and Y-Shape Flaring Gate Pier Connected with Stepped Spillway
Z. Ting, W. Chao and Z. Qi

Calculation and Control of Seepage of Hardfill Dam with Different Foundation
Y.F. Peng

Briefly Discuss Safety Monitoring of Underground Powerhouse
F. Li, B. Tian, S. Zhang and Z. Chen

Safety Analysis of the Temporary Dam Body of Concrete Faced Rockfill Dam during Construction Period
X.C. Lu, B. Tian and S. Zhang
Experimental Study on Flow Coefficient of Broad-Crest Ridge-Free Weir of Gudi Hydroelectric Power Station
J.B. Wang ............................................. 3682

Response of Liquid in Cylindrical Tank with Rigid Annual Baffle Considering Damping Effect
J.D. Wang, D. Zhou and W.Q. Liu .................................................. 3687

Research on the Numerical Simulation of Silting in Floodplain and Scouting in Main Channel of Over-Bank Flooding in the Lower Yellow River
X.L. Zhang, D.P. Sun and F.R. Zhang ............................................. 3692

Hydrodynamic Pressure Effect Analysis of Double-Column Pier in Deep Water under Earthquake Actions
F.R. Li and Z.H. Wang .................................................. 3697

Optimization Study of Advance Support in the Roadway of Paste Filling Working Face
S.J. Chen, W.J. Guo, H.L. Wang and B. Li ............................................. 3702

Chapter 11: Mining Engineering
Investigation on Deformation and Failure Characteristics and Stability Control of Soft Rock Roadway Surrounding Rock in Deep Coal Mine
J.C. Chang and G.X. Xie .................................................. 3711

The Research of Coat Materials Performance Based on Multi-Scale Method
K.L. Ren, Y. Dong and Y.C. Wang .................................................. 3717

Study on the Deep Rock Parameters of Fushun Mining Area
J.J. Zhou, Z.L. Fu, G.B. Zhao and G.Y. Han ............................................. 3722

Application of Ground Freezing Method in Underground Construction
W.Y. Zhang and J. Wei .................................................. 3727

Prediction Technology of Coal and Gas Outburst in Xuandong Coal Mine
S.S. Zhao, W.D. Pan, X. Wang and J.D. Liu ............................................. 3731

Character Evaluation of Ground Pressure in Fully Mechanized Top Coal Caving Face in Soft Coal Seams
W.D. Pan, X.H. Wu and Y. Li .................................................. 3735

Instability Identification of Goaf Risky in Mines Based on Distance Discriminant Analysis Method
X.M. Yan, X.Y. Chen and F.Q. Gong .................................................. 3740

The Coal Mining Mode of Paste-Like Fill and its Application Prospects
Y.C. Huang, R.M. Feng, H.P. Wang, W.P. Zhao and Y.F. Liu .................................................. 3744

Numerical Analysis on Tunnel Support Nearly Mined Area and Stability Evaluation
W.J. Yu .................................................. 3749

Analysis of Ground Fissures Induced by Underground Mining in a Metal Mine
H.J. Zhao, F.S. Ma and J. Guo .................................................. 3754

Water Bursting Mechanism of Coal Floor with Pattern Dynamics
Z.N. Gao and X.R. Meng .................................................. 3759

Experimental Investigation of Simulating Similar Materials of Multi-Seam Mining in Steep
K.X. Liu, X.G. Wei, S.X. Liu and L.P. Lv .................................................. 3765

Hysteresis Analysis of RC Columns Based on Fiber Cross-Section Model
Y.Q. Zhou, M.X. Ye, Z.S. Yang and L. Ou .................................................. 3770

Thick Board Theory on the Bolting Support of the Ribs in Coal Mine Roadway
S.S. Yang and S.Q. Niu .................................................. 3775

Study on the Structure Characteristics and Ground Pressure Behavior of Overlying Strata with Shallow Buried Coal Seam
L. Yu, Z.Z. Fan and G. Xu .................................................. 3780

Wheel/Rail Contact Geometry of Different Wheel Tread Profile in High-Speed Railway Turnout
R. Chen, P. Wang and Y. Song ................................. 3988

Effects of Shallow Gas on Diaphragm Wall Trenching Construction of Hangzhou Metro
Y. Wang, L.W. Kong and A.G. Guo .................................. 3993

Study on Prediction Model of Shrinkage and Creep of Prestressed Concrete Beam in Passenger Dedicated Line
J.L. Luo, Z.S. Xu, J. Li and J.H. Yang .................................. 3998

Observation Study on the Stability of Frozen Soil Roadbed Equipped with Thermosyphon in Chaider-Muli Railway
C. Ji, Z. Bo, R.F. Song, X.F. Dong and L.X. Zhang ......................... 4003

The Research of Existing Railway Survey and Evaluation Methods
X.S. Zhao, X.H. Diao and J.N. Zhu .................................. 4008

Study on the Relationship between Soil-Cement Parameters and Unconfined Compressive Strength
J.Q. Ma and Y.X. Wang ........................................ 4012

Study on Stability of Lateral Vibration for Train-Bridge (Track) System
Z.H. Zhou, L. Yang, L.K. Lin and Q.Y. Zeng .......................... 4017

Influence of the Track’s Stiffness Coefficient on the Acting Loads, Deflection and Dimensioning of Slab Track
K. Giannakos ................................................ 4022

The Application of Crushed Rock Materials upon Railway Embankments in Permafrost Regions
Y.H. Hu, W. Ma, Z.Z. Sun and Y.Z. Liu ................................. 4027

Analysis of Excavation Monitoring for the Fu-Qing Road Station in Ningbo Urban Rail Transit
R.H. Ye, G.B. Liu and J.N. Ye ........................................ 4034

Development of the Small-Sized Equipment for Detecting Short-Wave Irregularity of the Top Rail
Y.L. He, W.L. Zhu, J. Kun, B. Zeng and C. Yang .......................... 4039

The Influence of Cracks in Track Slab and its Reflection in Structure Design
P.R. Zhao .................................................. 4043

Chapter 14: Transportation Engineering

An Idea of T-Shaped Integer Cantilevered Road
Z.X. Zhou and L. Fan ........................................ 4051

Evaluation of Sustainable Urban Transport in China
J. Fang .......................................................... 4056

Traditional Traffic Demand Definition Defects Analyze and Redefinition
Y.G. Chen, W. Cheng and H.C. Xiao .......................... 4061

A Traffic Control Strategy for Sensitive Junction under Disaster Conditions
Y. Liu, Z.S. Yang and F. Liu ................................. 4065

The Optimum Selection of Instrument Flight Procedure Design Scheme Based on the Relative Superiority Degree
C. Ken .......................................................... 4070

Measuring the Impact of Latent Variables on Mode Choice Behavior between Bike and Electric Bike
M.W. He, M. He, X.Q. Yang and Q.Q. Zhao .......................... 4075

Multi-Criteria Optimization of Bridge Management
Z.Z. Wang, L.C. Fan and M. Hastak ................................. 4080
Study on the Coordination between Urban Rail Transit and Bus
Y.P. Wang and C.Q. Ma ................................................................. 4085

Special Considerations for TDOA Application to the Reconstruction of Traffic Accidents
L. Zhang, W.H. Qin, T.J. He and W.N. Li ...................................... 4090

On the Public Private Partnership Financing Strategies of Urban Rail Transit
J.X. Chen and J. Fang ................................................................. 4095

The Research of Vibration Influence to Surrounding Environment for Viaduct Railway Traffic
P. Wang and W.D. Huang ............................................................ 4100

Study on Quantitative Risk Assessment of LGP Transportation in Road Tunnel
Y.C. Zhang, C. He, Y. Fang and X.Q. Sun ..................................... 4105

Analysis of Barge Adjustment in Large-Scale Structures Ro-Ro Ship Process
M. Gong, Q. Zhang and M. Liu .................................................... 4110

Pre-Arrange Trim Method on Panamax Vessel when Transit through the Panama Canal
J. Shen and Y.T. Wang ............................................................... 4115

Research on the Impacts of Zhengzhou Urban Rail Transit to Residential Price
H.L. Zhao, J.P. Liu and Y.F. Sun .................................................... 4119

The Research on the Alignment Continuity of the Prairie Highway Based on Possible Speed
X.H. Li, S.L. Zhu and Y.B. Sun ........................................................ 4123

The Model of Short-Time Traffic Flow Prediction on High-Grade Highway
H. Chen, Y.W. Yuan, J. Sun and N. Bao ....................................... 4128

Chapter 15: Application and Others

Thermo Mechanical Simulation of the Flue in Coke Dry Quenching Technology
X. Chen, Q.M. Chang, C.J. Chen and Y.X. Zhang .......................... 4135

Simulation of the Thermo-Mechanical Behavior and Failure of Refractory of Converter
X. Chen, Q.M. Chang, C.J. Chen and Y.X. Zhang .......................... 4139

Thinking at Pedagogical Reforms of Architecture Design Course in China Three Gorges University
J. Xue ......................................................................................... 4143

Research on Design of Neotype Wire Rope Safety Barrier

Strategy and Realization for Obstacle Avoidance of Wheeled Mobile Robots Based on Dynamic Modeling
P. Jia, Y.M. Huang, X. Cheng and X.H. Yang .................................. 4155

Mobile Phone Laminator of Image-Based Feedback System
Z.X. Peng and Q. Zhang .............................................................. 4161

Virtual Assembly of Equipment in Large Steel Structure
G.Z. Zuo, Q. Zhang and M. Liu .................................................... 4166

Application of the EKE and LSE-UI Based Substructure Approach for Damage Detection with Limited Output Measurements
Y. Lei and C. Liu .................................................................. 4171

Parameter Revision of the Bailey Method on Gradation Examination
Y.L. Xu and H. Jiang .................................................................. 4176

Uniform Design and its Application in Grouting Simulation Experiment
Q. Liu, S.C. Li, L.P. Li, N. Zhang and Y. Zhao .............................. 4181
