2010 International Conference on Broadband, Wireless Computing, Communication and Applications

(BWCCA 2010)

Fukuoka, Japan
4 – 6 November 2010

Editors:

Leonard Barolli
Fatos Xhafa

Minoru Uehara
Ilsun You

IEEE Catalog Number: CFP1098K-PRT
2010 International Conference on Broadband, Wireless Computing, Communication and Applications

BWCCA 2010

Table of Contents

Message from the BWCCA 2010 International Conference Organizers
Message from the BWCCA 2010 International Conference Workshop Co-chairs
BWCCA 2010 Organizing Committee
BWCCA 2010 Program Committee
BWCCA 2010 Reviewers
Keynote
Message from ASTSA 2010 International Workshop Organizers
ASTSA 2010 Organizing Committee
ASTSA 2010 Reviewers
Message from CWECS 2010 International Workshop Organizers
CWECS 2010 Organizing Committee
CWECS 2010 Reviewers
Message from DCS 2010 Workshop Organizers
DCS 2010 Organizing Committee
DCS 2010 Reviewers
Message from ISSE 2010 Workshop Organizers
ISSE 2010 Organizing Committee
ISSE 2010 Reviewers
Message from MAPWC 2010 International Workshop Organizers
MAPWC 2010 Organizing Committee
Session 1: Ad Hoc Networks

Efficient Address Management for Mobile Ad Hoc Networks ............................................ 1
   Sudath Indrasinghe, Rubem Pereira, and John Haggerty

Analysis of MANET Routing Protocols for Indoor Environment ......................................... 9
   Makoto Ikeda, Elis Kulla, Masahiro Hiyama, Leonard Barolli, and Makoto Takizawa

A Zone Based Routing Protocol for Ad Hoc Networks and Its Performance
Improvement by Reduction of Control Packets ................................................................. 17
   Yuki Sato, Akio Koyama, and Leonard Barolli

Session 2: Sensor Networks I

Impact of Mobile Sink for Wireless Sensor Networks Considering Different
Radio Models and Performance Metrics ............................................................................ 25
   Tao Yang, Gjergji Mino, Leonard Barolli, Fotos Xhafa, and Arjan Durresi
A Communication Protocol to Improve Fairness and Data Amount on Sensor Data Collection with a Mobile Sink ....................................................... Wataru Seino, Tomoki Yoshihisa, Takahiro Hara, and Shojiro Nishio

Session 3: Parallel and Multi-core Systems

Parallel Implementation of a Balancing Domain Decomposition Method for Multi-core Processors ........................................... Masao Ogino, Hiroshi Kawai, Ryuji Shioya, and Shinobu Yoshimura

Parallel CAE System for Large Scale Problems Based on Computer Network ................................................................. Ryuji Shioya, Masao Ogino, and Hiroshi Kawai

Architecture and Design of Efficient 3D Network-on-Chip (3D NoC) for Custom Multicore SoC .................................................. Akram Ben Ahmed, Abderazek Ben Abdallah, and Kenichi Kuroda

Session 4: Mesh and Ad Hoc Networks

Autonomous Power Supplied Wireless Mesh Network for Disaster Information System ......................................................... Toshihiro Suzuki and Yoshitaka Shibata

Impact of Source and Destination Movement on MANET Performance Considering BATMAN and AODV Protocols ................................ Elis Kulla, Makoto Ikeda, Leonard Barolli, and Rozeta Miho
Provisioning Vehicular Ad Hoc Networks with Quality of Service
Gongjun Yan, Danda B. Rawat, and Bhed B. Bista

Session 5: Practical Security and Privacy Application I
A Solution to Protecting USB Keyboard Data
Kyungroul Lee, Wansoo Kim, Kwangjin Bae, and Kangbin Yim
Managing Some Security Risks Related to the Deployment of Multifarious
Authentication and Authorization in a Virtualized Environment
Annette Tolnai and Sebastiaan von Solms
An Analytical Evaluation of Network Security Modelling Techniques Applied
to Manage Threats
Valentino Viduto, Carsten Maple, and Wei Huang

Session 6: Optical Networks
Differentiated Bandwidth Allocation and WaveLength Assignment Method
in WDM EPON
Min-jun Kim, Yong-suk Jang, Yong-do Choi, and Sung-ho Kim
Design and Evaluation of Fiber Direct Coupling Optical Antennas for Next
Generation Optical Wireless Communication Systems
Koichi Takahashi and Nobuo Nakajima
Inter-ONU Scheduling Scheme for QoS Guarantee in 10G EPON
Jae-Hyun Jun, Zhibin Yu, Min-Suk Jung, and Sung-Ho Kim

Session 7: Sensor Networks II
Examination of Selection for Relay Nodes Adapted to Priority
of Transportation in Triage Network
Hiroki Tamura, Hikaru Kobayashi, Hiroshi Shigeno, and Ken-ichi Okada
Energy-Efficient Code Dissemination Using Minimal Virtual Backbone
in Sensor Networks
Jisun Kim, Jiyoung Lim, and Kijoon Choe
Defect Identification by Sensor Network Under Uncertainties
Tomonari Furukawa, Jinquan Cheng, Shen Hin Lim, Fei Xu, and Ryuji Shioya
Session 8: Networks Algorithms and Protocols

Energy-Efficient Server Selection Algorithms for Network Applications .................................................. 159
  Tomoya Enokido, Ailixier Aikebaier, and Makoto Takizawa

Modified Estimation Algorithm for Radio Communication Distance
along Random Rough Surface ................................................................. 167
  Junichi Honda, Kazunori Uchida, and Kwang-Yeol Yoon

Bandwidth Reservation Method to Consider Reservation Failure in VLAN ............................................... 175
  Yong-Do Choi, Jae-Hyun Jun, Gi-Beom Kil, and Sung-Ho Kim

Solid Convex-Hull Sequential Support Vector Machine ................................................................. 181
  Zhibin Yu, Min-Jun Kim, Kyung-Seok Park, and Sung-Ho Kim

Session 9: Practical Security and Privacy Application II

Towards a Common Notion of Privacy Leakage on Public Database .................................................. 186
  Shinsaku Kiyomoto and Keith M. Martin

Constructivist Approach to Information Security Awareness in the Middle East ........................................ 192
  Mohammed Boujettif and Yongge Wang

A Contextual Access Control Model ................................................................. 200
  Narhimene Boustia and Aicha Mokhtari

Redundancy and Defense Resource Allocation Algorithms to Assure Service Continuity against Natural Disasters and Intelligent Attackers ................................................................. 206
  Frank Yeong-Sung Lin, Yu-Shun Wang, Po-Hao Tsang, and Jui-Pin Lo

Session 10: Distributed Schemes and Protocols

A Scalable Hybrid Time Protocol for a Heterogeneous Group .................................................. 214
  Isamu Tsunetsumi, Ailixier Aikebaier, Makoito Ikeda, Tomoya Enokido, and Makoto Takizawa

Queue Management for the Heavy-Tailed Traffics .................................................. 222
  Takuo Nakashima

Fault Tolerant Methods for Intermittent Failures in Virtual Large Scale Disks ........................................ 229
  Minoru Uehara
Session 11: Wireless Networks

Mobility Based MIMO Link Adaptation in LTE-Advanced Cellular Networks ..............................................235
Vishwanath Ramamurthi and Wei-Peng Chen

Reliable Message Broadcast Schemes in Distributed Agreement Protocols .....................................................242
Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Adimir Barolli, Makoto Takizawa, Fatos Xhafa, and Leonard Barolli

Session 12: Disaster Information Systems

Wireless Distributed Network System for Relief Activities after Disasters - A Field Experiment for Channel Setting and a System for Information Exchange among Shelters ..................................................260
Misako Urakami, Satoshi Innami, Makoto Kamegawa, Tetsuya Shigeyasu, and Hiroshi Matsuno

Performance Evaluation of PC Router Based Cognitive Wireless LANs for Disaster Information System ...........................................268
Goshi Sato and Yoshitaka Shibata

Distributed Disaster Information System in DTN Based Mobile Communication Environment ...........................................274
Yutaka Sasaki and Yoshitaka Shibata

Session 13: Network Security, Privacy and Trust

Darknet Monitoring on Real-Operated Networks ..................................................278
Seiichiro Mizoguchi, Yoshiro Fukushima, Yoshiaki Kasahara, Yoshiaki Hori, and Kouichi Sakurai

Secure Hybrid Communications for Medical Applications ..................................................286
Arjan Durresi, Mimoza Durresi, Zeynep Salih, and Leonard Barolli

Comments on a One-Way Hash Chain Based Authentication for FMIPv6 ..................................................293
Ilsun You and Jong-Hyouk Lee

Malware Obfuscation Techniques: A Brief Survey ..................................................297
Ilsun You and Kangbin Yim
Session 14: Distributed Algorithms and Systems

An Iterative Domain Decomposition Method of Magnetostatic Problems Based on a Mixed Formulation ................................................................. 301
Daisuke Tagami

Introduction of a Direct Method at Subdomains in Non-linear Magnetostatic Analysis with HDDM ................................................................................. 304
Shin-ichiro Sugimoto, Masao Ogino, Hiroshi Kanayama, and Shinobu Yoshimura

A Parallel Skyline Solver for Coarse Grid Correction of BDD Pre-conditioning in Domain Decomposition Method ......................................................... 310
Hiroshi Kawai, Masao Ogino, Ryuji Shioya, and Shinobu Yoshimura

Session 15: Multimedia and Web Applications

A Cloud-Based Support System for Offshore Software Development ................................................................. 315
Yuki Kaeri, Yusuke Manabe, Claude Moulin, Kenji Sugawara, and Jean-Paul A. Barthès

Two Types of Trustworthiness of Acquaintances in Peer-to-Peer (P2P) Overlay Networks ................................................................. 320
Soichir Sawamura, Admir Barolli, Allissier Aikebater, Valbona Barolli, and Makoto Takizawa

Multihopped Wireless Disaster Information Network by Automatic Directional Antenna Control Method ................................................................. 328
Daisuke Asahizawa and Yoshitaka Shibata

Session 16: Wireless Communication

An Approximation for Fresnel Function to Reduce Computation Time Based on DRTM ................................................................. 334
Kazunori Uchida, Junichi Honda, and Yuuki Kimura

Wireless Link Selection by Time Transitional AHP Based on Emergent Policy in Cognitive Wireless Network ................................................................. 340
Noriki Uchida, Kazuo Takahata, and Yoshitaka Shibata
ASTSA 2010 Session 1: Sensors and Applications

LiNS: A Library Navigation System Using Sensors and Smartphones ................................................. 346
   Kazuki Watanabe, Tomoyuki Takahashi, Toshihiko Ando, Kaoru Takahashi,
   Yoshifumi Sasaki, and Tatsuya Funakoshi

Network-Adaptive Multipath Video Delivery over Wireless Multimedia
Sensor Networks Based on Packet and Path Priority Scheduling ....................................................... 351
   Amir Rastegar Lari and Behzad Akbari

Received Signal Strength Technique Performance in Sensor Network Localization Application ................................................. 357
   Kazim Firat Taraktas, Osman Ceylan, and Bulent Yagci

Hop-by-Hop Reliable Data Deliveries for Underwater Wireless Sensor Networks ......................................................... 363
   Muhammad Ayaz, Azween Abdullah, and Ibrahima Faye

ASTSA 2010 Session 2: Protocols and Algorithms

Enhancing RSSI Technologies in Wireless Sensor Networks by Using Different Frequencies ................................................. 369
   Osman Ceylan, K. Firat Taraktas, and H. Bulent Yagci

A Novel Adaptable Routing Protocol for Wireless Sensor Networks ......................................................... 373
   K.G. Aravind and M.M. Manohara Pai

Multipath Data Transfer in Wireless Multimedia Sensor Network ......................................................... 379
   Shobha Poojary and M.M. Manohara Pai

CWECS 2010 Session 1: Digital Signature

Contract Signatures in E-Commerce Applications ......................................................... 384
   Lien Harn, Chu-Hsing Lin, and Che-Wei Hu

A Proxy Partially Blind Signature Scheme with Proxy Revocation ......................................................... 389
   Fuow-Yi Yang and Ling-Ren Liang

Varied Oblivious Transfer Protocols Enabling Multi-receiver and Applications ................................................. 395
   Shiuh-Jong Wang, Yuh-Ren Tsai, and Chien-Chih Shen
Efficient Modular Exponentiation Resistant to Simple Power Analysis in DSA-Like Systems .......................................................... 401
Chia-Yu Lu, Wu-Chuan Yang, and Chi-Sung Laih

CWECS 2010 Session 2: Computer Forensics
VoIP Digital Evidence Forensics Standard Operating Procedure (DEFSOP) ................................................................. 407
I-Long Lin, Yun-Sheng Yen, Bo-Lin Wu, and Hsiang-Yu Wang

Fast Deployment of Computer Forensics with USBs .......................................................... 413
Chung-Huang Yang and Pei-Hua Yen

Source Camera Identification in Real Practice: A Preliminary Experimentation ................................................................. 417
Aniello Castiglione, Giuseppe Cattaneo, Maurizio Cembalo, and Umberto Ferraro Pettrillo

CWECS 2010 Session 3: Authentication and Privacy
Based on Mobile RFID Device to Design a Secure Mutual Authentication Scheme for Market Application ................................. 423
Chin-Ling Chen, Jinn-Ke Jan, and Chih-Feng Chien

The Iterative Distributed Re-authentication Scheme Based on EAP-AKA in 3G/UMTS-WLAN Heterogeneous Mobile Networks .......................................................... 429
Shen-Ho Lin, Jung-Hui Chiu, and Sung-Shiou Shen

Transparent Digital Rights Management System with Superdistribution ................................................................. 435
Chih-Ta Yen, Hrong-Twu Liaw, Nai-Wei Lo, Ting-Chun Liu, and Jay Stu

CWECS 2010 Session 4: Cloud and Wireless Security
Mutual Authentication with Dynamic Keys in an IEEE802.16e PKM Environment ............................................................. 441
Yi-Fung Huang, Fang-Yie Leu, and Chao-Hong Chiu

Securing the Cloud’s Core Virtual Infrastructure .......................................................... 447
A. Tolnai and S.H. von Solms

A Biologically Modeled Intrusion Detection System for Mobile Networks ................................................................. 453
Brian C. Williams and Errin W. Fulp

High-Capacity Multi-secret Sharing by Random Grid ...............................................................459
   Tzung-Her Chen, Yao-Sheng Lee, and Ci-Lin Li

Noise-Resistant Joint Fingerprinting and Decryption Based on Vector Quantization ................463
   Chih-Yang Lin, Wei-Lun Huang, and Tzung-Her Chen

Lifetime Security Improvement in Wireless Sensor Network Using Queue-Based Techniques ..........469
   Fuu-Cheng Jiang, Hsiang-Wei Wu, Der-Chen Huang, and Chu-Hsing Lin

An Enhanced Firewall Scheme for Dynamic and Adaptive Containment of Emerging Security Threats ........................................475
   Aniello Castiglione, Alfredo De Santis, Ugo Fiore, and Francesco Palmieri

DCS 2010 Session 1: Fault Detection and Diagnosis

A Wrapper Approach Based on Clustering for Sensors Selection of Industrial Monitoring Systems ........................................482
   Cesar Uribe, Claudia Isaza, Oscar Gualdron, Cristian Duran, and Adrian Carvajal

Discrete Flatness for Non Linear Systems FDI .............................................................488
   Nan Zhang, Andrei Doncescu, and Felix Mora-Camino

Feature Selection for Fault Diagnosis Using Fuzzy-ARTMAP Classification and Conflict Intersection ........................................495
   M. Benkaci, A. Doncescu, and B. Jammes

A Diagnosis Approach Based on Kolmogorov Complexity ...........................................501
   N. Kabbaj, A. Doncescu, and M. Benkaci

ISSE 2010 Session 1: Intelligent Networks

Detour Routing Protocol for Geographic Sensor Networks ...............................................505
   Lih-Chyau Wuu, Wen-Bin Li, and Wen-Chung Kuo

Fast Seamless Secure Handoff for Loosely Coupled Systems in Heterogeneous Wireless Mobile Networks ........................................511
   Ben-Jye Chang, Ying-Hsin Liang, and Shou-Chi Liang
The Decision Scheme of Frame Importance Factor for Video Streaming

Huan-Yao Kang and Ching-Lung Chang

ISSE 2010 Session 2: Human Behavior Understanding

Frequency Domain Analysis of Human Motions in Surveillance Video
Hsuan T. Chang, Chang-Sian Chen, Chun-Wen Hung, and Day-Fann Shen

Automatic Facial Skin Defect Detection System
Chuan-Yu Chang, Shang-Cheng Li, Fau-Choo Chung, Jui-Yi Kuo, and Yung-Chin Tu

Fingertip-Writing Alphanumeric Character Recognition for Vision-Based Human Computer Interaction
Chien-Cheng Lee, Cheng-Yuan Shih, and Bor-Shenn Jeng

A Motion Planning of Swarm Robots Using Genetic Algorithm
Chien-Chou Lin, Po-Yuan Hsiao, and Kun-Cheng Chen

ISSE 2010 Session 3: Image and Video Analysis

Gaussian Distributive Filtering in Histogram Equalization
Ping-Hsien Lin, Hsu-Chun Yen, and Chia-Chen Yu

A 3D Model Retrieval System Based on the Cylindrical Projection Descriptor
Jau-Ling Shih, Chang-Hsing Lee, Chih-Hsun Chou, and Hsiang-Yuen Chang

An Information Hiding Scheme Using Magic Squares
Ming-Gun Wen, Su-Chieng Huang, and Chin-Chuan Han

MAPWC 2010 Session 1: Scattering and Diffraction

Numerical Analysis of Scattered Electromagnetic Wave by a Dielectric Cylinder with High Contrast by CIP Method
Hiroshi Maeda, Hiroyuki Terashima, Tetsuo Maruyama, and Shinjiro Hironaka

Back Scattering from Target above Random Rough Surface
Kazunori Uchida, Junichi Honda, Shunsuke Nakasima, and Kwang-Yeol Yoon

Characteristics of Diffracted Waves Going over Building Rooftop
Jiro Iwashige, Leonard Barolli, and Katsuki Hayashi
Electromagnetic Scattering from Cylinders Located near Periodic Cylinder Array

Koki Watanabe and Yoshimasa Nakatake

MAPWC 2010 Session 2: Wireless Modelling and Applications

Relations among 10-Minute Precipitation, Rainfall Intensity and Ku-Band Rain Attenuation in Kyushu Island, Japan

Kiyotaka Fujisaki, Goshi Satoh, and Mitsuo Tateiba

Delay Profile Using Scale Model Method for Microcells in Urban Areas

Ryuichiro Iwakuma, Yu Funaki, Toyokazu Mine, and Shinichi Ichitsubo

Application Techniques of Particle Swarm Optimization

Zhigui Meng

MAPWC 2010 Session 3: Wireless Technologies

2D Wave Propagation Characteristics of the CIP Method with Amplitude Error Compensation

Tsuyoshi Matsuoka

Frequency-Selection Properties for Composite Periodic Structures

Maurice Sesay and Mitushiro Yokota

Heuristic Maxmin Fairness for the Wireless Channel Allocation Problem

Mario Köppen, Rodrigo Verschae, Kaori Yoshida, and Masato Tsuru

A New Design of Circular Polarized Planar Antennae

Mayumi Matsunaga and Toshiaki Matsunaga

NGWMN 2010 Session 1: Wireless Traffic Control and Resource Allocation

Evaluation of a Fuzzy-Based CAC Scheme for Different Priorities in Wireless Cellular Networks

Taku Ikebata, Gjergji Mino, Leonard Barolli, Fatos Xhafa, Arjan Durresi, and Akio Kayama

Adaptive Mixed Bias Resource Allocation for Wireless Mesh Networks

Jason B. Ernst and Thabo Nkwe
Effect of Adaptive RTS/CTS ON/OFF Control Method for Mitigating Transmission Overhead of IEEE802.11DCF

Tetsuya Shigeyasu and Hiroshi Matsumo

NGWMN 2010 Session 2: Wireless Communication

Field Estimation for Terrestrial Digital Broadcasting in Western Part of Fukuoka

Kazunori Uchida, Junichi Honda, Masafumi Takematsu, and Toshiaki Tazume

Particle Swarm Optimization on DSI Method for PAPR Reduction in OFDM Systems

Shu-Hong Lee and Ho-Lung Hung

Phase Error Cancellation for OFDM Systems Using Adaptive Filters

Chia-Hsin Cheng, Kai-Jie Chen, Gwo-Ruey Lee, and Yung-Fa Huang

NGWMN 2010 Session 3: Intelligent Algorithms

An Intelligent Fuzzy-Based Cluster Head Selection System for WSNs and Its Performance Evaluation for D3N Parameter

Hironori Ando, Leonard Barolli, Arjan Durresi, Fatos Xhafa, and Akio Koyama

Jump Resonance Analysis for Systems with Parametric Uncertainties

Li-Shan Ma, Chih-Hung Wu, Jieh-La Jaw, Bing-Fei Wu, and Jau-Woei Perng

Dynamic Forensics System with Intrusion Tolerance Based on Hierarchical Coloured Petri-nets

Hsing-Chung Chen, Jai-Zong Sun, and Zhen-Dong Wu

NTCCA 2010 Session 1: Network Performance Analysis

Behavior Shaver: An Application Based Layer 3 VPN that Conceals Traffic Patterns Using SCTP

Mamoru Mimura and Hidehiko Tanaka

DDoS Detection Technique Using Statistical Analysis to Generate Quick Response Time

Shunsuke Oshima, Takuo Nakashima, and Toshinori Sueyoshi
Experimental Evaluation of a MANET Testbed in Indoor Stairs Scenarios .................................678
Masahiro Hiyama, Makoto Ikeda, Leonard Barolli, Elis Kulla, Fatos Xhafa, and Arjan Durresi

Implementation and Evaluation of Distributed Hash Table Using MPI .................................684
Daisuke Tsukamoto and Takuo Nakashima

NTCCA 2010 Session 2: Network Services
A Development of Environment Verification System “View-Aid” Using Digital Wireless Camera for Low Vision .................................................................689
Yoshifumi Oyama and Yuki Shimada

A Mailing List Management System Mashing-Up with Web Services ..................................695
Keisuke Fujiwara, Yoshinari Nomura, and Hideo Taniguchi

Advanced Relay Nodes for Adaptive Network Services - Concept and Prototype Experiment ...........................................................................................................701
Masayoshi Shimamura, Takeshi Ikenaga, and Masato Tsuru

Gathering Large Scale Human Activity Information Using Mobile Sensor Devices ........................708
Yuichi Hattori, Sozo Inoue, Takemori Masaki, Go Hirakawa, and Osamu Sudo

RI3C 2010 Session 1: Teleoperation and Robot Control
Teleoperation of a Robot Arm System Using Pneumatic Artificial Rubber Muscles: Teleoperation over the Internet Using UDP and a Web Camera ..................................................714
Tomonori Kato, Tomoaki Higashi, and Kenichi Shimizu

Application of a JXTA-Overlay P2P Control System for a Biped Walking Robot ..........................719
Keita Matsuo, Yuichi Ogata, Evjola Spaho, Fatos Xhafa, and Leonard Barolli

Study on Increase in Propulsion of Flexible Linear Actuator ....................................................725
Kazuhiro Ohyama, Yasushi Hyakutake, and Hitoshi Kino
RI3C 2010 Session 2: Intelligent Methods and Models for Robotics

Decision Method of Internal Force for Sensorless Positioning of Musculoskeletal System ................................................................. 731
   Hitoshi Kino, Shiro Kikuchi, and Kenji Tahara

Character Modeling and Calligraphic Learning by Haptic Device ................................................................. 737
   Hiroyuki Fujioka, Hiroyuki Kano, and Sousuke Kakehi

Operational Feel Adjustment for Power-Assisted Positioning by an Actor-Critic Method ................................................................. 743
   Tetsuya Morizono

RI3C 2010 Session 3: Robot Applications

A Method for Event Handling on Robot Town Platform and a Sharable Personal Mobility Robot ................................................................. 749
   Takafumi Ienaga, Yosuke Senta, Daisaku Arita, Yoshihiko Kimuro, Kouji Murakami, and Tsutomu Hasegawa

Experimental Studies on Various Types of Animal Mimicking Robots ................................................................. 755
   Y. Kawamura

Iterative Learning Scheme for a Redundant Musculoskeletal Arm: Task Space Learning with Joint and Muscle Redundancies ................................................................. 760
   Kenji Tahara and Hitoshi Kino

Development of Detection System for the Bed Accident Using Ultrasonic Wave Sensor ................................................................. 766
   Hiroyuki Agatsuma, Takehiko Abe, Takuya Tajima, and Haruhiko Kimura

SCMAS 2010 Session 1: Agent Technology and Multiagent Systems

Design and Implementation of Repository-Based Agent Organization Method on Heterogeneous Agent Platform ................................................................. 772
   Takahiro Uchiya and Tetsuo Kinoshita

An OWL-Based Ontology to Represent Knowledge about Location, Space and Perceptual Primitives ................................................................. 780
   Shigeru Fujita and Kenji Sugawara

xix
Multiagent Architecture of Knowledge Based Network Management Support  
Kazuto Sasai, Gen Kitagata, and Tetsuo Kinoshita  
Page 782

Perceptual Integration of Real-Space and Virtual-Space Based on Symbiotic Reality  
Hiroshi Noguchi, Takuo Sogauna, and Tetsuo Kinoshita  
Page 788

SCMAS 2010 Session 2: Symbiotic Computing and Applications

Implementation of SmartBox End-Device for a P2P System and Its Evaluation for E-Learning and Medical Applications  
Yasushi Ogata, Keita Matsuo, Evjola Spahic, Leonard Barolli, and Fatos Xhafa  
Page 794

Moving Object Detection by a Ghost Cancel Method on Indoor Images  
Hiroyuki Utsunomiya and Shigeru Fujita  
Page 800

A Road Location Estimating Method by Many Trajectories to Realize Rapid Map Survey for a Car Navigation System  
Hiromitsu Sugawara, Nobuyoshi Sato, Tsuyoshi Takayama, and Yoshitoshi Murai  
Page 806

WSNR 2010 Session 1: Wireless Sensor Networks Protocols

A.J. Dinusha Rathnayaka, Vidyasagar M. Potdar, Atif Sharif, Saeed Sarenchek, and Samitha Kuruppu  
Page 812

Prototype Design and Analysis of Wireless Vibration Sensor  
Mohammad Reza Akhondi, Alex Talevski, and Tsung-Hsien Chou  
Page 818

Wireless Sensor Networks: Challenges Ahead  
A.J. Dinusha Rathnayaka, Vidyasagar M. Potdar, Atif Sharif, Saeed Sarenchek, and Samitha Kuruppu  
Page 824

WSNR 2010 Session 2: Wireless Sensor Networks

State of the Art: Carbon Emission Accountability Modeling  
Valencia Lo and Vidyasagar Potdar  
Page 830

Criteria for Hardware Selection of Wireless Vibration Sensor  
Mohammad Reza Akhondi, Alex Talevski, and Tsung-Hsien Chou  
Page 836
