- SMECS 2010 Welcome Message....................................................................................xliv
- SMECS 2010 Organizing Committee..........................................................................xlv
- SMECS 2010 Reviewers..............................................................................................xlvi
Context-based Multimedia Content Management Framework and Its Location-aware Web Applications .............................................. Shuhei Kumamoto, Shigeru Takano, and Yoshihiro Okada

Session 5: Multimedia Applications
Designing Networking Service for Multimedia Service Composition over Programmable Network Substrate ........................................ Namgon Kim and Jong Won Kim
The Development of Interactive Texture Designing Method for 3D Shapes ........................................................ Tsuneo Kagawa, Hiroaki Nishino, and Kouichi Utsumiya
An Interactive CG Learning System Through 3D Authoring and Programming .................................................. Shogo Sueyasu, Tatsuro Nagano, Hiroaki Nishino, Tsuneo Kagawa, and Kouichi Utsumiya

Session 6: Knowledge Management and Data Mining
An Adaptive e-Learning Recommender Based on User’s Web-Browsing Behavior ........................................................... Kosuke Takano and Kin Fun Li
A Faceted-Navigation System for QCDml Ensemble XML Data ...................................................................................... Toshiyuki Amagasa, Noriyoshi Ishii, Tomoteru Yoshie, Osamu Tatebe, Mitsuhisa Sato, and Hiroyuki Kitagawa
The Critical Success Factors for Implementation of CRM and Knowledge Management in a Work Setting ...................... Alireza Faed, Pedram Radmand, and Alex Talevski
Balanced Scorecard-Based Approach to Ascertaint the Quality of Education ........................................................... Khresna Bayu Sangka and Omar Khadeer Hussain

Session 7: Virtual Organizations, Enterprise and Cloud Computing
An Investigation into Energy Efficiency of Data Centre Virtualisation ........................................................................ M. Pretorius, M. Ghassemian, and C. Ierotheou
Reducing Energy Consumption by Load Aggregation with an Optimized Dynamic Live Migration of Virtual Machines ........................................ Daniel Versick and Djamshid Tavangarian
A Method to Increase Services Availability on Web-based Inter-Enterprise Service Delivery Platforms ................................... Natalia Kryvinska, Christine Strauss, and Peter Zinterhof
Future Supply Chain Processes and Data for Collective Intelligence ........................................................................ Martin Watmough, Simon Polovina, Babak Khazaeri, and Richard Hill
Session 8: Internet and Web Computing

Application Marketplace as a Service - A Reference Architecture
for Application Marketplace Service ......................................................... 186
Shih-Fang Chang

Towards MapReduce for Desktop Grid Computing ........................................... 193
Bing Tang, Mircea Moca, Stéphane Chevalier, Haiwu He, and Gilles Fedak

The RDF-based Information Capturing System from Web Pages ......................... 201
Tatsuya Ushioda and Shigeru Fujita

Implementing a Mobile Campus Using MLE Moodle ........................................ 207
Fatos Xhafa, Santi Caballé, Isaac Rustarazo, and Leonard Barolli

Session 9: Parallel, Distributed and Collaborative Systems

Synchronite - A Service for Real-Time Lightweight Collaboration ......................... 215
Christian Thum and Michael Schwind

Synthesizing Generic Experimental Environments for Simulation ........................ 222
Martin Quinson, Laurent Bobelin, and Frédéric Suter

An Ubiquitous Data Delivery System in Hybrid Wireless Environments ..................... 230
Chang-Hong Wu and Chin-Hsien Wu

Game-theoretic, Market and Meta-Heuristics Approaches for Modelling
Scheduling and Resource Allocation in Grid Systems ........................................ 235
Fatos Xhafa and Joanna Kolodziej

Session 10: Security, Dependability and Reliability

User-controlled Privacy Protection with Attribute-filter Mechanism for
a Federated SSO Environment Using Shibboleth ............................................. 243
Tananun Orawiwattanakul, Kazutsuna Yamaji, Motonori Nakamura,
Toshiyuki Kataoka, and Noboru Sonehara

Service Trustiness and Resource Legitimacy in Cloud Computing .......................... 250
Jong P. Yoon and Zhixiong Chen

Handling Fake Multimedia Contents Threat with Collective Intelligence
in P2P File Sharing Environments ................................................................... 258
ByungRae Cha and JongWon Kim

BIDS 2010 Workshop

Session: Business Intelligence and Distributed Systems

Approximate Address Matching ......................................................................... 264
Dengyue Li, Shengrui Wang, and Zhen Mei

Business Cycle Indication Using Query Logs of Search Engines ......................... 270
Jeng-Chien Chen and Chien Chin Chen

Internet Business Intelligence .......................................................................... 276
Kin Fun Li
DMAL-BPIDE: A Distributed Multi-Abstraction-Level Business Process IDE ................................................. 278
Xiaotian Xu, Hailong Sun, and Xu Wang

EDTCI 2010 Workshop

Session A: Advanced Concepts, Techniques and Methods

Ant Colony Optimization and Data Mining: Techniques and Trends ............................................................... 284
Ioannis Michelakos, Nikolaos Mallios, Elpiniki Papageorgiou, and Michael Vassilakopoulos

Constructing Ensemble Classifiers from Expression Trees ................................................................................. 290
Joanna Jedrzejowicz and Piotr Jedrzejowicz

Swarms of Metaheuristic Agents: A Model for Collective intelligence ......................................................... 296
Mehmet E. Aydin, Joyce Wu, and Liang Zhang

Visualising Computational Intelligence Through Converting Data into Formal Concepts .............................. 302
Simon Andrews, Constantinos Orphanides, and Simon Polovina

A Study on Strategic Points for Decision Making Under Time Constraint ................................................... 308
Hideyasu Sasaki

Session B: Emerging Interfaces, Simulations and Practices

Real Time Commit Protocol-ACTIVE ................................................................................................................. 314
Udai Shanker, Nikhil Agarwal, Prabhull Goel, Shalabh K. Tiwari, and Praveen Srivastava

A Resource Discovery Architecture of Loosely Coupled Grid Inter-cooperated Virtual Organisations Using Mobile Agents and Neural Networks ................................................................. 320
Stelios Sotiriadis, Nik Bessis, Paul Sant, and Carsten Maple

Semantically-enabled Intelligent Patient Recruitment in Clinical Trials ......................................................... 326
Vassiliki Andronikou, Efstatios Karanastasis, Efthymios Chondrogiannis, Konstantinos Tsipras, and Theodora Varvarigou

Increasing e-Infrastructure Usability: The EELA-2 Experience ........................................................................ 332
Roberto Barbera, Francisco Brasileiro, Riccardo Bruno, Leandro Ciuffo, and Diego Scardaci

AGUIA: Agents Guidance for Intelligence Amplification in Goal Oriented Tasks ............................................. 338
Ana Cristina and Bicharra Garcia

Session C: Prompting Future Directions in Collective Intelligence

Emerging Smart Service and Networking Technologies Facilitate Shared Intelligence via Unified Communication & Collaboration Platforms .................................................................................................. 345
Natalia Kryvinska, Christine Strauss, and Peter Zinterhof

The Big Picture, from Grids and Clouds to Crowds: A Data Collective Intelligence Case Proposal for Managing Disasters ........................................................................................................... 351
Nik Bessis, Eleana Asimakopoulou, Tim French, Peter Norrington, and Fotos Xhafa
Peer-to-Peer Networks and Collective Intelligence: The Case for Agency
Richard Hill and Nikos Antonopoulos

MiDiS 2010 Workshop

Session A: MiDiS: Peer-to-Peer and Grid Systems

Peer Interest-based Discovery for Decentralized Peer-to-Peer Systems
Andreea Visan, Mihai Istin, Florin Pop, Fatos Xhafa, and Valentin Cristea

SOPSys: Self-Organizing Decentralized Peer-to-Peer System Based on Well-Balanced Multi-Way Trees
Mihai-Dorin Istin, Andreea Visan, Florin Pop, and Valentin Cristea

A Solution for Fault-Tolerance Based on Adaptive Replication in MonALISA
Alexandru Costan, Mugurel Ionut Andreica, Valentin Cristea, and Costin Grigoras

Session B: MiDiS: Middleware Services

An OGSA Compliant Environment for eScience Service Management
Vladimir Florian, Gabriel Neagu, and Stefan Preda

The Interoperability between OGC Services and Grid Environment in EnviroGRIDS Project
Denisa D. Rodila, Dorian Gorgan, and Victor Bacu

Epidemic-Style Global Load Monitoring in Large-Scale Overlay Networks
Bogdan Ghit, Florin Pop, and Valentin Cristea

MWVRITA 2010 Workshop

Session A: Interfaces and Simulators

Multimedia Contents for User Interface Switching Function
Shinichi Inenaga, Kaoru Sitgita, Tetsushi Oka, and Masao Yokota

A Web Interface for Meta-Heuristics Based Grid Schedulers
Fatos Xhafa, Joanna Kolodziej, and Martin Bogdaski

Car Driving Behaviour Observation Using an Immersive Car Driving Simulator
Yoshisuke Tateyama, Yukihiro Mori, Keiichi Yamamoto, Tetsuro Ogi, Hidekazu Nishimura, Noriyasu Kitamura, and Harumi Yashiro

A 3D Simulator for Optimizing Production Line System
Hitoshi Kitani, Hideki Kudo, Hiroaki Nishino, Tsuneo Kagawa, and Kouichi Utsumiya

Session B: Multimedia Systems and Applications

An Experiment on Multipoint Tele-immersive Communication with Tiled Display Wall
Yasuo Ebara
Information and Communication Network Infrastructure Based on Experiences from Noto-Hanto-Oki Earthquake ................................................................. 426
  Akihiro Miyakawa and Yoshitaka Shibata
A User Attestation System Using a Cellular Phone Equipped with Digital Camera ......................................................................................................................... 431
  Noriyasu Yamamoto and Toshihiko Wakahara
A Volunteer Classification Method for Disaster Recovery ................................................................. 436
  Daisuke Endo and Kaoru Sugita

Session C: Multimedia Display and Processing
Convergence of Vectors in Paired Comparison-based Interactive Differential Evolution for Creating Scent ................................................................................................................................. 440
  Makoto Fukumoto, Yusuke Imamura, Makoto Inoue, and Jun-ichi Imai
Tiled Display System for Improved Communication Efficiency ................................................................. 446
  Kukimoto Nobuyuki, Guillaume Fleury, and Jason Leigh
Generation of Appropriate User Chord Development Based on Interactive Genetic Algorithm ................................................................................................................................. 450
  Shuta Nakashima, Yusuke Imamura, Shintaro Ogawa, and Makoto Fukumoto
Image Processing of Dotted Picture in the QR Code of Cellular Phone ................................................................. 454
  Toshihiko Wakahara, Noriyasu Yamamoto, and Hiroki Ochi

SIDEUS 2010 Workshop
Increasing Security and Privacy in User-centric Identity Management: The IdM Card Approach ................................................................................................................................. 459
  Ronald Marx, Hervais Simo Fhom, Dirk Scheuermann, Kpatcha M. Bayarou, and Alejandro Pérez
ZigBee/ZigBee PRO Security Assessment Based on Compromised Cryptographic Keys ................................................................................................................................. 465
  Pedram Radmand, Marc Domingo, Jaipal Singh, Joan Arnedo, Alex Talevski, Stig Petersen, and Simon Carlsen
OSN: When Multiple Autonomous Users Disclose Another Individual’s Information ................................................................................................................................. 471
  Cristina Pérez-Solà and Jordi Herrera-Joancomarti

SMDMS 2010 Workshop
Session A: Video Stream
Digesting Online Multimedia Presentation Archives Based on Visual Effects ................................................................. 477
  Yousuke Watanabe, Yi Wu, and Haruo Yokota
Design of a Cooperative Video Streaming System on Community Based Resource Sharing Networks ................................................................................................................................. 483
  Yasuhiro Kawano, Koji Hashimoto, and Yoshitaka Shibata
A Scheduling Method to Reduce Waiting Time for Node Relay-based Webcast Considering Available Bandwidth

Yusuke Gotoh, Tomoki Yoshihisa, Hideo Taniguchi, and Masanori Kanazawa

Churn Resilience of P2P System Suitable for Private Live-streaming Distribution

Takayuki Hisada, Yusuke Hirota, Hideki Tode, and Koso Murakami

Session B: Applications for Streaming Data

Extraction of Viewable Point from the Photograph Data with Location

Kenta Oku, Kazuki Miwa, and Fumio Hattori

Implementation of an Internet Broadcasting System with Video Advertisement Insertion Based on Audience Comments

Yoshia Saito and Yuko Murayama

A Geocast-based Multicast Method for Continuous Information Delivery in MANET

Yoh Shiraishi, Osamu Takahashi, and Ryo Miki

An Approach for Filtering Inaccurate Access Point Observation Report in WiFi Positioning System

Toyokazu Akiyama, Yuuichi Teranishi, Shingo Okamura, and Shinji Shimojo

Session C: Stream Processing and Protocols

Complex Event Processing over Uncertain Data Streams

Hideyuki Kawashima, Hiroyuki Kitagawa, and Xin Li

A Credibility Assessment for Message Streams on Microblogs

Yu Suzuki

Price Stability in Peer-to-Peer Resource Markets

Yutaka Okaie and Tadashi Nakano

Simple Tree Based Routing for Data Collection Networks

Akira Niinomi, Katsuhiko Naito, Kazuo Mori, Hideo Kobayashi, and Masaki Ehara

SMECS 2010 Workshop

Session A: Modeling and Simulation I

Simulation Model and Instrument to Evaluate Replication Techniques

Bogdan Eremia, Ciprian Dobre, Florin Pop, Alexandru Costan, and Valentin Cristea

Modelling of User Requirements and Behaviors in Computational Grids

Joanna Kolodziej and Fatos Xhafa

Modeling and Simulation of the Wetting Process on Brushlike and Wavelike Nanorough Surfaces

Claudiu Valentin Suciu
Session B: Modeling and Simulation II

Modeling and Simulation of the Fretting Hysteresis Loop .................................................. 560
  Claudiu Valentin Suciu and Tohru Uchida
Dynamic Period vs Static Period in Data Grid Replication .................................................. 565
  Faouzi Ben Charrada, Habib Ounelli, and Hanène Chettaoui
The Transition of Sports Marketing from E-CRM to E-SRM ............................................. 569
  Alireza Faed, Afshaneh Ashouri, and Mehdi Faed

Author Index ......................................................................................................................... 574
