2011 International Conference on Computer Distributed Control and Intelligent Environmental Monitoring

CDCIEM 2011

Table of Contents

Preface...................................................................................................................xlvix
Organizing Committee..........................................................................................I
Reviewers...............................................................................................................lii

Session 1: Distribution Control and Measuring Technology

A Data Acquisition System for Methane Drainage Based on ARM and FPGA ..........1
  Lu Ping, Liang Guangqing, and Yu Qing

A Multi-sensor Fusion Method of Agricultural Remote Sensing ............................4
  Ling Sun and Zesheng Zhu

A New Composite Switch for Low Voltage Equipment Control ............................8
  Zhao Hongwei, Zhuo Zhuxun, Mi Hongju, Liu Weidong, and Wang Hong

A New Measurement Method for Cavity Diameter of Porous Concrete ..................12
  Guo Qing-wei, Hu Yong-you, Zheng Bing-hui, Hu Chun-ming, and Wang Xin

A RS/GIS-Based System for Monitoring Crop Yield .............................................17
  Ling Sun and Zesheng Zhu

Accumulation and Distribution of PAHs in Organo-mineral Aggregates of Oil Contaminated Site .................................................................21
  Huang Qing, Li Fa-sheng, Gui Ming-ying, and Gao Xin

  Zhao Leiting, Wu Zuomin, Shua Lina, Wang Lei, and Liu Zhigang

Design of the Node System of Wireless Sensor Network and Its Application in Digital Agriculture ..............................................................29
  Ying Zhang

Detect Black Germ in Wheat Using Machine Vision ..............................................36
  FN Chen, F. Cheng, and YB Ying
<table>
<thead>
<tr>
<th>Session 2: Integrated Circuits and Electric Automation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adaptive Nonlinear Control for Multiphase PM Synchronous Motor Drive</td>
</tr>
<tr>
<td>Jun Li, Zhou Yang, and Weizu Wang</td>
</tr>
<tr>
<td>Analysis of Building Damages of Paste Backfill Mining under Villages</td>
</tr>
<tr>
<td>Chai Hua-bin, Zou You-feng, Guo Wen-bing, and Chen Jun-jie</td>
</tr>
<tr>
<td>Application of Combined Thermal Equivalent in Thermal Power Plant</td>
</tr>
<tr>
<td>Reducion</td>
</tr>
<tr>
<td>Zhang Zhuming, Li Hu, Wang Hua, Qing Shan, Li Liangqing, He Ping, and Ma Linzhuang</td>
</tr>
<tr>
<td>Application of Heat Pump Distillation in Gas Separation Device</td>
</tr>
<tr>
<td>Wang Ping, Li Weizhong, Quan Shenglin, and Xu Junliang</td>
</tr>
<tr>
<td>Automatic Acquisition Characteristic Parameters of Wheat Ear Based on Machine Vision</td>
</tr>
<tr>
<td>Kun Bi, Fei-fei Huang, Cheng Wang, Lei Li, and Dan-feng Huang</td>
</tr>
<tr>
<td>Design Analysis of the Selection of the Four Main Pipelines of the 1000MW Ultra Supercritical Unit</td>
</tr>
<tr>
<td>Xie Ying-Bai, Wang Shao-Heng, Li Bing, and Liu Yun</td>
</tr>
<tr>
<td>Title</td>
</tr>
<tr>
<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td>Design and Performance Analysis of the Heat Pump-Based Condensing Heat</td>
</tr>
<tr>
<td>Min Li, Zhan Li, Xiaoqiang Jiang, and Biao Ye</td>
</tr>
<tr>
<td>Design of Acoustical System of Circulatory Multi-step Ultrasonic Reactor</td>
</tr>
<tr>
<td>Dai Sheng and Zhang Yundian</td>
</tr>
<tr>
<td>Electrochemical Tests on the Optimum Cathodic Protection Potential of X70 Steel in the Presence of AC Interference</td>
</tr>
<tr>
<td>Zili Li, Hongna Hao, and Qingmiao Ding</td>
</tr>
<tr>
<td>Electronic Differential Control with Vehicle State Observer Based on Extended Kalman Filter</td>
</tr>
<tr>
<td>Li Jun, Duan Jie-li, and Tian Shen</td>
</tr>
<tr>
<td>Emergy Analysis and Assessment of Sustainability on the Agro-ecosystem in Heilongjiang Province: As a Case of Xinglong Town</td>
</tr>
<tr>
<td>Zhang Limin, Lei Jia, and Zhang Xueping</td>
</tr>
<tr>
<td>Energy and Exergy Analysis for 300MW Thermal System of Xiaolongtan Power Plant</td>
</tr>
<tr>
<td>Lv Guoqiang, Wang Hua, Ma Wenhui, and Yu Chunwei</td>
</tr>
<tr>
<td>Energy Conservation Analysis of Single-Pipe and Multi-heat Sources with Multi-pumps of Direct Connected System in Central Heating</td>
</tr>
<tr>
<td>Wang Fei, Zhang Zhixiong, Wang Guowei, and Zhao Jianing</td>
</tr>
<tr>
<td>Energy Optimization of Biomass Pyrolysis and Liquefaction System in CFB</td>
</tr>
<tr>
<td>Zhang Jun, Teng Wenrui, and Wei Xinli</td>
</tr>
<tr>
<td>Energy Recovery and Recycle Network Optimization Considering Energy Load Variation for Large Public Buildings</td>
</tr>
<tr>
<td>Chen Ying, Lv Feng, and Luo Xianglong</td>
</tr>
<tr>
<td>Energy Substitution and Carbon Abatement Cost</td>
</tr>
<tr>
<td>Wang Lijuan, Wang Zheng, and Huang Rui</td>
</tr>
<tr>
<td>Excess Sludge Disintegration by Combined Effects of Ultrasonic and Mechanical Treatment</td>
</tr>
<tr>
<td>Zhu Tong, Han Jin, Liu Jianfeng, Wang Zhan, Luan Xianyu, Xie Yuanhua, Wang Yang, and Huang Yonggang</td>
</tr>
<tr>
<td>Exergy Analysis and Energy-Saving Evaluation of the Fuming Furnace Device in SKS Lead Smelting System</td>
</tr>
<tr>
<td>Jiang Aihua, Mei Chi, Shi Zhangming, Wang Hongcai, Yu Huang, and Zhu Xiaojun</td>
</tr>
<tr>
<td>Exergy Analysis for LNG Refrigeration Cycle</td>
</tr>
<tr>
<td>Lin Ri-yi, Yu Xichong, Li Jian, Li Yuxing, and Wang Wuchang</td>
</tr>
<tr>
<td>Flow Field Analysis and Optimum Design of Jet-Mixing Apparatus Based on CFD</td>
</tr>
<tr>
<td>Xu Xichao and Qiu Baijing</td>
</tr>
</tbody>
</table>
Free Energy Calculation of Al-Li-Mg Alloy from Electron Level .............................219
Zhang Jian-jun, Chen Zheng, and Wang Yong-xin

Full Load Calculation of Large-Scale Wind Turbine .............................................223
Huachao Jiao and Wenlei Sun

Future Energy System in Low-Carbon Community-Energy Internet .......................227
Liang Hao and Long Weiding

Gangue Harmful to Environment and Integrated Control Measures .........................231
Li Yibao, Kang Tianhe, and Wang Dong

Gas-Solid Two Phase Flow in Internally Circulating Two-Stage Spouted Desulfurization Tower .................................................................234
Qiaoqun Sun, Weibing Zhu, Xiaobin Zhang, and Jianmin Gao

Energy Efficiency in High Voltage Pulsed Discharge ...........................................238
Linan Zhu, Yongjun Wang, Zhijun Ren, Guifang Liu, and Lai Lv

Multi-objective Decision-making on Wind Power Projects Based on AHP Method ..........242
Zhi Zhao and Wenjie Huang

Product Strength Properties Study of Waste Printed Circuit Board with Pyrolysis Process Approach ..........................................................246
Guan Jie and Xu Min

Radio Frequency-Based Body Temperature and Walking Steps Monitor of Dairy Cow .................................................................249
Wang Jian, Zhang Hanqun, Xie Jiaxin, and Song Yuxiao

Recovery Process of Mixed Electroplating Wastewater ........................................253
Zhang Xianqiu, Du Mingxia, Yangliu, Zhang Yong, and Jia Guozheng

Research on Driving Circuits of PV Hybrid LED Street Lighting System ................257
Zhou Jianping, Zheng Yingping, and Yang Ning

Research on Environmental Friendly and Energy Saving Hot Water/Split Air-Conditioner Combination .................................................................261
Fen Li, Jianbo Chen, and Dan Chen

Research on Estimation of Trees Crown Volume by 3D Laser Scanning System .........265
Wu Lulu and Wu Bin

Research on Green Remanufacturing of Armored Vehicle Engine .........................269
Han Shu, Zhang Zhiyuan, Li Li, and Ma Xiangping

Research on Spring-Type Brush On-Line Cleaning Technology inside the Exchanger Pipe .................................................................272
Qu Yun-xia, Feng Yuan, and Pan Xue-liang

Research on Swirler for Intake Induced Swirl in Di Diesel Engine ..........................275
Zuooyu Sun, Xiangrong Li, and Wei Du
System Dynamics Modeling and Simulation of China's SO2 Emission Trading Policy
....................................................................................................................................................280
  Xianling Liao, Xiuli Li, and Bingxuan Zhang

Research on the Control Strategy of Low Voltage Ride-Through for Doubly Fed Induction Generator
....................................................................................................................................................284
  Zhang Jianhua, Wang Jian, Mo Yueping, and Xin Fulong

Speed Sensorless Induction Motor Drive Based on EKF and Φ-1 Model
....................................................................................................................................................290
  Sun Danan, Lin Wenli, Diao Lijun, and Liu Zhigang

Study of a Novel Over-Modulation Technique Based on Space-Vector PWM
....................................................................................................................................................295
  Hengli Quan, Zhang Gang, Chen Jie, Zuomin Wu, and Zhigang Liu

Thermal Analyses and Calculations of 1.5MW Half-Direct Permanent Magnet Wind Power Generator When PM Embedded in Different Rotor Positions
....................................................................................................................................................299
  Wei-li Li, Peng Cheng, Shi-peng Yuan, and Mei-wei Zhang

Thermal Decomposition Characteristics of the Ethylene Oxide-Tetrahydrofuran Copolyether Binder
....................................................................................................................................................304
  Yunlan Sun, Hongchang Dang, Baozhong Zhu, and Shufen Li

Thermal Efficiency Analysis and Energy Optimization of Steam Injection Boiler
....................................................................................................................................................308
  Liu Bingcheng, Wu Haichao, Zhang Yu, Li Qingling, and Zhang Jian

Thermaleconomic Analysis of Supercritical Compressed Air Energy System
....................................................................................................................................................312
  Lu Yuanwei, Liu Guanglin, Ma Chongfang, Lv Pengfei, and Li Qiang

Thermodynamic Behaviour of Gatifloxacin by Sludge Activated Carbon
....................................................................................................................................................316
  Yao Hong, Lv Zeyu, Zhou Yanmei, and Yu Xiaohua

Thermodynamic Comparison between Thermoelectric Refrigerator and Compression Ones
....................................................................................................................................................321
  Qinghai Luo, Weili Gu, and Yanjin Wang

Thermodynamic Study of Simultaneous Removal of SO2 and NO by Using NaClO/Ammonia
....................................................................................................................................................325
  Zhang Xiaobo, Guo Ruitang, Pan Weiguo, Xu Hongjian, and Wu Liming

UASB-CASS Joint Technology Applied to Treatment of Brewery Wastewater
....................................................................................................................................................330
  Wang Ting-yu and Huang Jin

Session 3: Artificial Intelligence, Communication, and Networking

A Mass-Load Based Source Shift Algorithm to Simplify Water-Using Networks
....................................................................................................................................................334
  Qiu-Han Li and Zhi-Yong Liu

A Method Based on Digital Image Analysis for Estimating Crop Canopy Parameters
....................................................................................................................................................338
  Wang Juan, Wei Changzhou, Guo Jinqiang, and Lei Yongwen
Session 4: Simulation Modeling, Visualization, and Optimization

300MW CFB Direct Air Cooled System Frostproof Control Strategy
Optimization ........................................................................................................372
Bai Jianyun and Shao Jiaxiao

A New Model Enforcing Water Mass Balance of Proton Exchange Membrane
Fuel Cell ...............................................................................................................377
Zhou Wenhe, Wang Liangcheng, and Wang Liangbi

A New Simulation Method of the Electric Field Distribution in a PWM
Inverter-Fed Motor Stator Winding Subjected to Steep-Fronted Surge Voltage ........381
Luan Ru and Xiao Fukai

New System for the Spectrophotometric Determination of Arsenic in Water ........385
Guifeng Lin, Yanhong Wang, Guochen Li, Shicheng Wang, Hong Zhang, and Bo Li

A Simplified Mathematical Model of Heat Transfer Process in Double Skin
Façade ................................................................................................................389
Zhu Xianfeng, Fu Junping, and Yi Xiaoqing

A Simplified One-Dimensional Model of Low NOx Ignition for the Direct Flow
of Pulverized Coal .................................................................................................394
Xiang Gou, Bernard M. Gibbs, Jinxiang Wu, Liansheng Liu, Enyu Wang,
Junhu Zhou, Jianzhong Liu, and Kefa Cen

A Study on Optimal Operation and Energy Saving of Super Heavy Oil Pipeline ......400
Wu Yuguo
Application of Improved Set Pair Analysis Model for Evaluation of Lake Eutrophication ............................................................... 404
   Fanxiu Li

Biodegradation of O-chlorophenol by Rhodopseudomonas palustris PSB-1D and Optimization of Cometabolism Substrates ............................................................... 408
   Dong Yihua, Hu Xiaomin, He Yingdian, and Li Liang

Combinatorial Optimization of Pulverizers for Blended-Coal-Fired Power Plant ............................................................... 413
   Xia Ji, Peng Peng, Hua Zhigang, Lu Pan, and Chen Gang

Discrete Element Method Simulation of Impact-Based Measurement of Grain Mass Flow ............................................................... 419
   Jiang Guowei and Qiu Bajie

Discussion of Transient Response Optimization Strategies of Turbocharged Diesel Engine under EGR Step Change Operation ............................................................... 423
   Sui Ling-ge, Liu Zhong-chang, Han Yong-qiang, Shen Zhao-jie, and Zheng Guang-yong

Experimental Research on the Characteristics of Dense Spray of Diesel Engine ............................................................... 428
   Wang Changyuan, Liu Fushui, and Li Xiangrong

Fermentation Condition Optimization of Bio-demulsifying Bacteria (a Bacillus sp.) Using Response Surface Methodology ............................................................... 433
   Li Xu, Liu Chang, Ma Fang, Yang Jixian, and Wang Jinya

Field Synergy Analysis and Optimization of One-Strand Tundish ............................................................... 438
   Meijie Zhang, Xiaolong Lin, Lin Luo, Hongxi Zhu, Chengji Deng, and Cheng Bai

Investigation and Experimental Research on Residential Kitchen Environment ............................................................... 442
   Song Jialin, Wang Yue-ren, and Ma Zhongjiao

Model and Algorithm for Simulation of a Novel Dry-Type Shell-Tube Evaporator Used in Sewage Source Heat Pump ............................................................... 446
   Chao Shen, Yi Qiang Jiang, and Yao Yao

Modeling and Analysis of the Effect Mechanism of Glass Sun-Shading on Building Cooling Energy Efficiency in Guangzhou ............................................................... 450
   Wu Huijun, Wang Huan, Ding Yunfei, and Zhou Xiaoqing

Modeling and Application of the Membrane Flux in PAC and UF Combination ............................................................... 454
   Jian Zhan, Fuchang Huang, Zhanli Chen, and Na Mei

Modeling and Experimental Research on Ground-Source Heat Pump in Operation by Neural Network ............................................................... 459
   Jianping Chen, Zhiwei Lian, Lizheng Tan, Weifeng Zhu, and Weiqiang Zhang

Modeling and Simulating of Short-Circuiting Transferring in GMAW ............................................................... 463
   Zuo Shiwei, He Jianping, Wang Fuxin, and Xiang Feng
Modeling of Thin-Layer Drying for Dewatered Sewage Sludge ..................................................467
  Wang Weiyun, Li Aimin, Zhang Xiaomin, and Yin Yulei

Modified Pyrolytic Carbon Black from Scrap Tires and Its Reinforcement Performance in Natural Rubber ........................................................................................................472
  Zhou Jie, Wu Shengji, Yu Tianming, and Xie Zhengmiao

Modify of Thermoplastic Soy Protein Isolated by Methyl Methacrylate ........................................476
  Yan Lu, Xuegang Luo, and Xiaoyan Lin

Module Design for Parameter Optimization of Pricking Hole Mechanism of Deep-Fertilization Liquid Fertilizer Applicator .................................................................480
  Xiaohuan Xi, Jinwu Wang, and Chunling Lang

Numerical Modeling of Soot and NOx Emissions of a Diesel/Methanol Dual Fuel Engine .................................................................483
  Peiyong Ni, Xiangli Wang, Zhong Wang, Gongping Mao, and Shengli Wei

Numerical Analysis of Performance of Dehumidification Cooling on Metal Packing Surface ........................................................................................................487
  Niu Run-ping and You Shi-jun

Numerical Analysis of Shaft Tubular Pumping Systems ........................................................................491
  Honggeng Zhu, Rentian Zhang, Linbi Yao, and Jun Wei

Numerical Investigation on Thermal Flow-Reversal Oxidation of Dilute Methane ..........................................................496
  Deng Yangbo, Yan Chunji, and Xie Maozhao

Numerical Simulation of "Three Zones" Partition of Spontaneous Combustion in Goaf under the Moving Coordinates ..........................................................501
  Zhu Jianfang and Ma Hui

Numerical Simulation of Heat-Transfer Character of Ribbon-Tubular Radiator on Air Side ..........505
  Haizhen Huang, Fang Mao, and Xiaowen Zhao

Numerical Simulation of Polycyclic Aromatic Hydrocarbon Formation in n-Heptane HCCI Combustion ..................................................................................509
  Zeng Wen and Ma Hong-an

Numerical Simulation on Forced Swirl Combustion Chamber in Diesel Engine ................................513
  Shang Yong, Liu Fu-shui, and Li Xiang-rong

Numerical Simulation Research of Deformation Failure Law Regularity for Overlying Strata ..................................................517
  Wen Zhi-jie, Shang Yan-dong, Lu Guo-zhi, and Liu An

Numerical Simulation Study of Premixed Hydrogen-Oxygen Combustion Process in Micro-scale Rectangular Channel ........................................520
  Tang Aikun, Pan Jianfeng, Shao Xia, and Xue Hong
Numerical Simulation on the Performance of the Steam Ejector ................................................................. 525
Yu Wenyuan, Tian Rui, Yan Suying, and Gao Hong

Numerical Study on Heat Transfer Characteristics of Different Rectangular Impinging Jets ......................................................... 529
Geng Liping, Zhou Jingwei, Hong Feifei, and Yang Mo

Optimal Analysis of Energy Utilization in Typical Heavy Industry Areas: A Case Study for Shenyang ............................................. 533
Gao Chengkang, Gao Ruihua, Cai Jiuju, and Zhu Weiguang

Optimization of Fuzzy Power System for Distributed Generation System Using Genetic Algorithm ................................................. 537
Aihua Wang

Optimization of Microwave-Assisted Extraction Technology of Flavonoids from Solid Wastes (Hawthorn Seed) ............................................. 541
Guangyan Pan, Jufin Qiao, Chuanhe Zhu, and Fang Wang

Optimization of Slurry PH Value for Limestone Wet Desulfurization Technology ................................................................. 545
Bai Jian-yun and Hou Peng-fei

Optimization of the Combustor for the Modular Micro-thermophotovoltaic System ................................................................. 550
Pan Jianfeng, Wan Yanhui, Li Xiaochun, and Xue Hong

Optimization of the Preparation Conditions for Activated Carbons from Sugarcane Bagasse: An Agricultural Waste .................. 555
Zelong Xu, Yinian Zhu, Meina Liang, Hua Zhang, and Huili Liu

Processing Parameter Optimization for Injection Moulding Products in Agricultural Equipment Based on Orthogonal Experiments and Analysis .................................................. 560
Yanwei and Huyong

Regional Digital Agricultural Structure Model Based on Grey-Situation Decision-Making ................................................................. 565
Yan Luming

Research on Optimization of Water Quality Monitoring Sites Using Principal Component Analysis and Cluster Analysis ................. 570
Cheng Yongqian, Song Qianwu, and Ma Hongmei

Research on Parametric Design of Double Swirl Combustion Chamber ................................................................. 574
Xiangrong Li, Zuoyu Sun, Fushui Liu, and Bing Bai

Design and Implementation of an Electronic Control System for Oil-Free Scroll Air Compressor .................................................. 582
Wei Li, Shusheng Xiong, Wei Shi, Yachua Jiang, Xijiang Wu, Xiaoqhuai Ren, Wenhua He, Yiding Lv, and Zhengai Qu
Simulation and Experimental Study on High Pressure Common Rail Fuel System of Diesel Engine ................................................................. 586
   Minghe Wang, Guangyao Ouyang, and Jiadong Zhou

Simulation on Two-Stage Injection Combustion of Diesel Engine under Light Load ........................................................................... 590

Simulation Research on Control System of Micro-plasma Arc Welding Machine .............................................................................. 595
   He Jianping, Xiang Feng, Wang Fuxin, and Zuo Shiwei

Simulation Study on Fluid-Solid Coupled Heat Transfer of Cylinder of Small Aerial Two-Stroke Air-Cooled Engine ......................... 600
   Tang Zijie, Ding Shuiting, and Du Farong

Simulation Study on the Effects of Charge Stratification on HCCI Combustion ................................................................. 604
   Hua Li, Fafa Liu, Peng Cheng, Yunkai Wang, Fengjun Gao, Mangzhi Tan, and Yingnan Guo

Simultaneous Adsorption of Humic Acid and Copper (II) Ions from Aqueous Solution onto Cetylpyridinium Bromide (CPB) Modified Zeolite ........................................................................... 608
   Zhan Yanhui, Lin Jianwei, and Zhu Zhiliang

Simultaneous Determination of Ten Kinds of Polybrominated Diphenyl Ethers (PBDEs) in Human Serum by Gas Chromatography: Mass Spectrometry .............................................. 613
   Li Ziyang, Chen Yongheng, Liu Juan, and Zhang Ping

Study on Structure Optimization of Diesel Particulate Filter Based on Flow Field Distribution Characteristics ......................... 616
   Fu Jun, Gong Jinke, Liu Yunqing, and Jia Guohai

Technology Research and Application Prospect of Filling Mine Goaf with Bags of Municipal Solid Waste ........................................... 620
   Liu Yin, Guo Xiaojia, and Chen Juntao

The Application of Optimized GM(1,1) in Mine Gas Flow Volume Forecast ........................................................................... 624
   Zhang TianJun, Su Lin, Qiao BaoMing, and Ma Mina

The CFD Simulation and Experimental Analysis of Smoke Diffusion in a Train ........................................................................... 628
   Zhigang Shi, Liangwei Sheng, Xiangming Cheng, and Yujin Zhang

The Optimization Model and Its Application Research on the Thermal System of CHP Cogeneration Unit Based on "Unit Fuel Consumption" Theory .......................................................... 633
   Bi Qingsheng, Han Xue, and Ren Guoxu

The Performance of a Two-Stage BAF Treating Mature Landfill Leachate with Different Carbon Source and HRT ......................... 637
   Li Yuxiang, Wang Xiaojun, and Liu Jianyu
The Prediction Model for Soil Water Evaporation Based on BP Neural Network ........................................641
   Lili Ma, Yun Wu, Jianwei Ji, and Chaoxing He

The Reactive Light Yellow Dye Wastewater Treatment by Sewage Sludge-Based Activated Carbon ..................................................646
   Yang Lijun and Dai Qunwei

The Realization of Agriculture Model Component Sharing through Topic Map Merging ...........................................650
   Haiyan Jiang, Mei Zhang, Bing Fu, Yan Zhu, and Weixin Cao

Session 5: Physical Science and Engineering

A Heat Energy Assessment Method of the Plant Secondary Effluent as Cold and Heat Sources for Heat Pump ................................655
   Zhuang Zhao-yi, Zhang Cheng-hu, Sun Qiong, and Sun De-xing

A Novel Anti-fouling Polymer-Ceramic Composite Membrane by Graft Polymerization of Acrylic Acid ........................................660
   Hui Wang, Yijiang Zhao, Shouyong Zhou, Meisheng Li, and Weihong Xing

A Novel Combined System Using Cascaded Active Power Filter and Static Var Compensator for High-Power Applications ........................................664
   Chen Junling, Li Yaohua, Wang Ping, Yin Zhizhu, and Dong Zuyi

A Novel Fibrous Zirconium Sulfate Solid Acid Catalyst for Esterification Reaction ...........................................668
   Liao Yang, Li Yan, Tong Peijie, Zhao Shilin, and Liao Xuepin

A Novel Oxidative Desulfurization Process to Remove Sulfur Compounds from Diesel Fuel ..............................................672
   Wang Liang and Li Chunhu

A Novel Thermodynamic Performance Evaluation Method for Trigeneration System ........................................674
   Ge Bin and Zhang Junli

A Preliminary Study on Shallow Groundwater Organic Pollution in the Alluvial Plain of Hutuo River ........................................678
   Yasong Li, Zhaoji Zhang, Yuhong Fei, Yong Qian, and Suhua Meng

A Preliminary Study on the Components of Cotton Stalk Wood Vinegar by TG-FTIR ........................................683
   Zhou Ling, Xu Chao, Liu Yi, Jiang En-chen, and Xu Xi-wei

Combustion Characteristics and Kinetic Analysis of Biomass Coal Oil Water Slurry ..............................................686
   Luo Zuyun and Lin Rongying
