CONTENTS

SESSION 1: FIRE RESISTANCE AND FIRE REACTIONS: NEW DEVELOPMENTS

Modelling Composite Fire Response under Load
A.G. Gibson, T.N.A. Browne, Centre for Composite Materials Engineering, Newcastle University, UK; S. Feih and A.P. Mouritz, RMIT, Royal Melbourne Institute of Technology, Australia

Polymer Nanocomposites: Thermal Degradation and Combustion Behaviour
A. Castrovinci, University of Applied Sciences and Arts of Southern Switzerland, and A. Fina, A. Frache, G. Camino, Politecnico di Torino, Turin, Italy

Natural Fibre-Reinforced Thermoplastic Composites: Flammability and Fire Resistance Issues
B.K. Kandola, S.C. Anand, B. Mottershead, S.I. Mistik, Institute for Materials Research and Innovation, University of Bolton, UK

Fire Retardancy in Composites: A Journey from Nano to Intermediate Scale
B. Schartel, BAM Federal Institute for Materials Research & Testing, Germany

Rapid Model Generation for Structural-Fire Modeling
A. Chemaly, Technosoft, Inc. USA, and B.Y. Lattimer, S.W. Case, Virginia Tech, USA

SESSION 2: TECHNOLOGY TRANSFER: MARINE AND AEROSPACE

Federal Aviation Administration Research on the Fire Safety of Advanced Composite Materials in Commercial Aerospace Applications
R.I. Ochs, T.R. Marker, S.M. Summer, United States Federal Aviation Administration, USA

Modeling of Carbon-Epoxy Laminate Swelling for Fire Environments
M.T. McGurn and P.E. DesJardin, Department of Mechanical and Aerospace Engineering, University at Buffalo, USA

Enclosure Fire Tests for Understanding Aircraft Composite Fire Environments
A.L. Brown, A.B. Dodd, Fire & Aerosol Science Department, Sandia National Labs, USA and B. Pickett, Air Force Research Laboratories, USA

Multi-Stage Decomposition Modelling of Polymer Matrix Composites. Fire Burnthrough Response of CFRP Aerostructures
D. Sikoutris, D. Vlachos and V. Kostopoulos, Department of Mechanical and Aeronautical Engineering, University of Patras, Greece

Large-Scale Fire Tests in a Passenger Cabin of PVC + GFRP Composite
M. Arvidson, P. Blomqvist and T. Hertzberg, SP Technical Research Institute of Sweden

Processing and Upscaling of Fire-Resistant Nano-Filled Thermosetting Resin – Initial Results from the POLYFIRE Project
B. Hargreaves, B. Weager, NetComposites Ltd, UK, C. Breen, Sheffield Hallam University, UK, C. Vaquero, TECNALIA, Spain, and J. Ballestero, GAIKER Centro Tecnológico, Spain.
SESSION 3: COMPOSITE STRUCTURES IN FIRE

Large-scale Structural Fire Investigation of Composite Panels under Compressive Load
1Empa, Swiss Federal Laboratory for Materials Science and Technology, Switzerland
2Virginia Tech, Virginia Polytechnic Institute & State University, Blacksburg, USA
3DSTO, Defence Science & Technology Organisation, Melbourne, Australia
4RMIT, Royal Melbourne Institute of Technology, Australia
5Centre for Composite Materials Engineering, Newcastle University, UK

A Rapid Route to the Development of Composite Passive Fire Protection Systems for Steel Structures
A.G. Gibson, Centre for Composite Materials Engineering, Newcastle University, UK; S. Feih, A.P. Mouritz and E. Kandare, RMIT, Royal Melbourne Institute of Technology, Australia.

Modelling of Glass Fibre-Polymer Composites with Surface Protection against Fire
E. Kandare1, S. Feih1, G.J. Griffin2, Z. Mathys3, A.G. Gibson4, B.Y. Lattimer5 and A.P. Mouritz1
1School of Aerospace, Mechanical & Manufacturing Engineering, RMIT, Australia; 2School of Civil, Environmental and Chemical Engineering, RMIT, Australia; 3Defence Science & Technology Organisation, Australia; 4Newcastle University, UK; 5Virginia Tech, USA

Fire Behaviour & Fire Protection of Composite Pipes
K. Rookus, FuturePipe Industries, The Netherlands and A.G. Gibson, Centre for Composite Materials Engineering, Newcastle University, UK.

SESSION 4: MATERIALS SELECTION AND MATERIALS COMPARISONS

Life Prediction Modelling of Compression-Loaded Aluminium in Fire
E. Kandare1,2, S. Feih1, Z. Mathys3, A.G. Gibson4 and A.P. Mouritz1
1School of Aerospace, Mechanical & Manufacturing Engineering, RMIT University, Australia
2Cooperative Research Centre for Advanced Composite Structures Ltd (CRC-ACS), Australia
3Defence Science & Technology Organisation, Australia
4Centre for Composite Materials Engineering, Newcastle University, UK

Comparison of the Structural Fire Performance of Lightweight Materials
P. Summers1, E. Fogle1, B.Y. Lattimer1, S.W. Case2, S. Feih3, E. Kandare3, A.P. Mouritz2
1Department of Mechanical Engineering, Virginia Tech, Blacksburg, USA
2Engineering Science and Mechanics, Virginia Tech, Blacksburg, USA
3RMIT, Royal Melbourne Institute of Technology, Australia

Modeling of Intermediate Scale Fire Tests of Aluminium Plates
