# TABLE OF CONTENTS

## VOLUME 1

### WSC10 – FEDERAL AND SECTOR ISSUES

Natural Disaster Response Lessons Learned for Water and Wastewater Utilities .................................................. 1
  *Gregory J. Welter*

Preparing for the Unexpected: New Water Sector Emergency Preparedness, Response, and Recovery Tools .............. 8
  *Steven Epting*

### DS10 – MODELING @ 30,000 FEET

Making the Most of Your Hydraulic Model: Integration of Master Planning, Design, and Operation .......................... 36
  *Benny Chi-Kong Wan*

Planning Distribution Systems for New Supply Sources ......................................................................................... 69
  *Jeff Cruickshank*

### WSC10 – SECURITY AND PREPAREDNESS

  *Jerry Brashear*

Assessment of Water Sector Threat Environment and Use of WaterISAC for Mitigation ........................................... 137
  *Aaron Levy*

### WSC10 – DISTRIBUTION SYSTEM MODELING

Contamination Warning System Demonstration Pilot Project .................................................................................. 156
  *Lauren A. Fahnestock*

### DS10 – MANAGE YOUR TANKS TO IMPROVE WATER QUALITY AND OPERATIONS

Mixing Up the Twins: Active Mixing and Other Water Quality Considerations for Storage Tanks ............................. 171
  *Raymond W. Ihlenburg*

How Poor Tank Maintenance Affects Water Quality ............................................................................................... 189
  *Ted W. Lund*

Keeping Water Quality From Tanking: How Inspecting Tanks Improves Service Life .............................................. 205
  *Neal D. Stubblefield*

In-Reservoir Water Treatment for Cleaner, Healthier Potable Water Storage Tanks and Reservoirs .......................... 229
  *Doug Crawshaw*

### DS10 – GREEN ENERGY MANAGEMENT FOR UTILITIES

Automation for Energy and Operations Optimization in Water Distribution Systems .................................................. 284
  *Julie Inman*

Real-Time Distribution System Energy Management and Operations Optimization System Implementation-Gwinnett County ....................................................................................................................... 307
  *Brian M. Skeens*

A Green Wave in the Blue Ridge Mountains: Asheville’s Strides in Sustainability in the Water System and Beyond .............. 349
  *Alan Gary LeBlanc*

City of Wilmington: Reduces O&M Costs by Over $0.5M and Goes Green Without Major Infrastructure Modifications ................................................................. 364
  *Colleen M. Arnold*
