## TABLE OF CONTENTS

**PDCN 2011**

### SYSTEMS: HARDWARE, HPC, PERFORMANCE

- 719-017: Energy-Efficient Server Rack Cooling using Feedforward Control: Benefits and Problems  
  *Burkhard Hensel and Klaus Kabitzsch (Germany)*  
  1

- 719-055: Dynamic Communication Performance of a Hierarchical 3D-Torus Network  
  *M.M.H. Rahman, Yukinori Sato, Yasuyuki Miura, and Yasushi Inoguchi (Japan)*  
  9

- 719-067: Design of a Reconfigurable Pipelined Switch for Faulty On-Chip Networks  
  *Hsin-Chou Chi and Tat-Seng Chang (Taiwan)*  
  17

- 719-049: On BPC Permutations Admissibility to Variable-Stage Hybrid Optical Shuffle-Exchange Networks  
  *Gennady Veselovsky (Thailand)*  
  24

- 719-031: Redundant Execution of HPC Applications with MR-MPI  
  *Christian Engelmann and Swen Böhm (USA)*  
  31

- 719-036: Numerical Simulation of the Complex Ginzburg-Landau Equation on GPUs with CUDA  
  *Kenneth A. Hawick and Daniel P. Playne (New Zealand)*  
  39

- 719-059: Efficient Data Service Design for a SOA Approach to Scientific Computing  
  *Jaison P. Mulierikkal and Peter Strazdins (Australia)*  
  46

- 719-070: Invasive Programming as a Concept for HPC  
  *Michael Bader, Hans-Joachim Bungartz, Michael Gerndt, Andreas Hollmann, and Josef Weidendorfer (Germany)*  
  54

- 719-025: Task Allocation Method for Avoiding Contentions by the Information of Concurrent Communications  
  *Yoshiyuki Morie, Takeshi Nanri, and Motoyoshi Kurokawa (Japan)*  
  62

- 719-016: An Online System for Octuple-Precision Computation  
  *Takemitsu Hasegawa, Yohsuke Hosoda, and Kohntaro Hirai (Japan)*  
  70

- 719-026: Performance Evaluation of Semi-Fixed-Priority Scheduling on Prioritized SMT Processors  
  *Hiroyuki Chishiro and Nobuyuki Yamasaki (Japan)*  
  75

- 719-065: Failure Prediction in Video-Streaming Servers through Performance Analysis of Server and Client-Server Interactions  
  *Carlos A.S. Cunha and Luis M. e Silva (Portugal)*  
  83

### SYSTEMS: PARALLELISM

- 719-011: Adaptive Thread Scheduling Techniques for Improving Scalability of Software Transactional Memory  
  *Kinson Chan, King Tin Lam, and Cho-Li Wang (PR China)*  
  91

- 719-060: Expanding the COPAR Service using Mutual Exclusion, Optimization and C++ Threads in Opnet Modeler  
  *Rhea L. Seegobin and Michael A. Hosein (Trinidad & Tobago)*  
  99

- 719-061: Handling of Inter-Thread Memory Access Dependencies for Automatic Binary-Code Parallelization  
  *Kanemitsu Ootsu, Takashi Shiroto, Takashi Yokota, and Takanobu Baba (Japan)*  
  107

- 719-028: Reexamining the Parallelization Schemes for Standard Full Tableau Simplex Method on Distributed Memory Environments  
  *Basilis Mamalis, Grammati Pantziou, Georgios Dimitropoulos, and Dimitrios Kremmydas (Greece)*  
  115

- 719-033: Load-Balanced Generation of a Restricted Set of Combinations  
  *Boštjan Slivnik and Igor Rožanc (Slovenia)*  
  124

- 719-045: Parallelization Strategy for Hierarchical Run Length Encoded Data Structures  
  *Lado Filipović, Otmar Ertl, and Siegfried Selberherr (Austria)*  
  131

### CLOUDS/GRIDS: NETWORKS

- 719-020: Towards a Better Understanding of Distance-Vector Routing Protocols with Reset on Failures  
  *Tiago Quelhas and João L. Sobrinho (Portugal)*  
  139
719-032: A New Approach for Query Decomposition and Optimization in Multi-Sink Wireless Sensor Networks
Ali Asghar Pourhaji Kazem, Reza Ferdousi Beyrami, and Ali Ghaffari (Iran) ........................................ 148

719-037: UML Modeling of Forward Congestion Notification Schemes for Datacenter Ethernet Networks
Lamia Chaari, Siwar Kotti, and Lotfi Kamoun (Tunisia) ................................................................. 155

719-048: DTN Routing of Data Messages with Epidemic Distribution of Mobility Plans of Mobile Wireless Nodes
Yo Chigira and Hiroaki Higaki (Japan) ......................... 163

719-052: Secure Switching Messages Mechanism for Mobile Agent Communication and Tracking
Tarig M. Ahmed (Sudan) .............................................................. 170

CLOUDS/GRIDS: SERVICES

719-035: Adaptive Workflow Scheduler with Advance Reservation in Economic Grid Systems
Anthony Sulistio, Udo Honig, Christoph Reich, and Wolfram Schiffmann (Germany) ...................... 176

719-062: A New Replication Strategy for Data Grids
Faouzi Ben Charrada, Hanène Chettaoui, and Rakia Mili (Tunisia) .................................................. 184

719-063: Mapping Distributed Heterogeneous Systems to a Common Language by Applying Ontologies
Elisabeth Vinek (Switzerland), Peter P. Beran, and Erich Schikuta (Austria) ...................................... 190

719-024: SLA-based Asynchronous Coordination in Metacomputing Environments
Pawel Rubach (Poland) ......................................................... 198

719-050: Evaluating Nested Virtualization Support
Sam Verboven, Ruben Van den Bossche, Olivier Berghmans, Kurt Vanmechelen, and Jan Broeckhove (Belgium) ................................................................. 206

719-068: OSPaaS: OSGi Service Platform as a Service
Sebastian Garwers, Anthony Sulistio, and Christoph Reich (Germany) ........................................... 214

AUTHOR INDEX ................................................................. 223
Proceedings of the Tenth IASTED International Conference on
Software Engineering

Editor: A. Toptsis

February 15 – 17, 2011
Innsbruck, Austria
TABLE OF CONTENTS
SE 2011

VERIFICATION, VALIDATION, AND REQUIREMENTS

720-036: Verifying UML in Prolog
Li Tan, Zongyuan Yang, and Jinkui Xie (PR China) ............................................. 1

720-047: Translating Timed Automata to Tock-CSP
Maneesh Khattri, Joel Ouaknine, and Andrew W. Roscoe (UK) ........................... 9

720-057: Automatically Generating Functional Scenarios from SOFL CDFD for Specification Inspection
Mo Li and Shaoying Liu (Japan) ........................................................................ 18

720-015: Testability Metrics for Extended Finite State Machines
Binh T. Nguyen (Vietnam), Michel Delaunay, and Chantal Robach (France) ......... 26

720-055: Requirement Analysis for Reducing Energy Consumption without Degrading User Satisfaction
Takanobu Ando, Ryu Nakazato, and Tetsuji Fukaya (Japan) .............................. 33

720-064: Organizational Chart for Engineering of Requirements
José F. Zelasco and Judith Donayo (Argentina) .................................................. 41

720-013: Managing the Requirements Changes in the UML based Projects
Dariusz Dymek (Poland) .................................................................................. 49

720-048: Enhancement of Requirements Specification Traceability by Model Driven Requirements Analysis Employing Automatic Prototype Generation
Shinpei Ogata, Saeko Matsuura, Rie Sakai, Hiroyuki Sato, and Toru Kobayashi (Japan) ................................................................. 55

METRICS, TESTING, AND SECURITY

720-021: Testing Policy-based Systems with Scenarios
Mark Strembeck (Austria) ................................................................................. 64

720-005: Managing Evolution of Service Centric Systems by Test Models
Michael Felderer, Berthold Agreiter, and Ruth Breu (Austria) ............................ 72

720-066: Constructing Models to Enable Automated Testing of Distributed Functions in Component-based Systems
Thomas Bauer and Robert Eschbach (Germany) ........................................... 81

720-027: Efficient Detection of Function Clones in Software Systems using the Fractal Dimension and Metrics
Salwa K. Abd-El-Hafiz (Egypt) ................................................................. 88

720-028: Implementation and Evaluation of a Flexible Software Measurement System for Japan-Oriented Offshore Development
Xuan Zhang, Lei Zhang, Meiping Chai (PR China), Yoji Taniguchi, and Jun Hosoya (Japan) .................................................. 95

720-029: Does User’s Fatigue Overweight the Effect of Practice?
Miroslav Macik and Adam J. Sporka (Czech Republic) .................................... 103

TOOLS AND APPLICATIONS

720-026: Development of an Interactive Museum Guidance System with Ubiquitous Communication
Dawei Cai (Japan) ....................................................................................... 111

720-060: A Color-Content based Video Retrieval System with a Time-Sequence Analyzer
Ha H. Bui and Yasushi Kiyoki (Japan) .................................................... 116

720-032: GPU Accelerated Optimization for Large Data Sets from Pill Identification
Gundolf Haase and Andreas Kucher (Austria) ............................................. 122

720-020: Towards a Workflow Language for Software Engineering
Gregor Grambow, Roy Oberhauser, and Manfred Reichert (Germany) ............ 130

720-024: Deciphering Unfamiliar Code with Code Rocket
Craig Ramsay, Steve Parkes, and Alan Spark (UK) ........................................... 138

Takayuki Omori and Katsuhisa Maruyama (Japan) .......................................... 144
720-053: A Software Traceability Model to Support Software Testing Documentation
Azri Azmi, Suhaimi Ibrahim, Naz'ri Mahrin (Malaysia) .................................................. 152

MANAGEMENT AND COOPERATIVE WORK

720-054: Implementation of Agile Practices in a Distributed and Large Organization: A Contextual Factors Analysis
Karine Khalil and Valérie Fernandez (France) .......... 160

720-023: Competency based Task Assignment in Human Task Management Systems
Ivica Ljubicic and Zeljka Car (Croatia) ............... 168

720-056: Addon: A Paradigm for Large-Scale Document Discussion
Miltiadis Allamanis and Chris Mavrakis (Greece)...... 176

720-022: Model Driven Development - Attention to People and Processes
Susanna Teppola and Päivi Parviainen (Finland)...... 183

Frank Innerhofer-Oberperfler, Michael Hafner, and Ruth Breu (Austria) .............................. 191

720-068: Reassessing Brooks' Law through Consideration of Manpower Abilities
Mostafa Farshchi, Yusmadi Y. Jusoh, and Masrah A.A. Murad (Malaysia) .......................... 199

SOFTWARE COMPREHENSION

720-049: The Pham Nordmann Zhang (PNZ) Software Reliability Model Revisited
Khalid Edris and Omar Shatnawi (Jordan) .................. 205

720-059: Precisely Analyzing Loss in Interface Adapter Chains
Yoo Chung (Korea) ...................................................... 212

720-067: The IACFG-Tool to Generate the Interprocedural Aspect Control Flow Graph
Mario L. Bernardi, Giuseppe A. Di Lucca, and Raffaele Mezzullo (Italy) ............................... 218

720-063: Utility-based Roles-Fulfillers Selection
Boulehouache Soufiane, Maamri Remdane, and Sahnoun Zaidi (Algeria) .......................... 226

AUTHOR INDEX ............................................................... 233
