2010 Third International Symposium on Information Processing

(ISIP 2010)

Qingdao, Shandong, China
15 – 17 October 2010

Editors:

Qingling Li
Fei Yu
Yun Liu

IEEE Catalog Number: CFP1014E-PRT
ISBN: 978-1-4244-8627-4
ISIP 2010 Technical Papers

Study on the Example Validation for the Linear Approximation Optimization Method

Zhang Chunling

A Measuring Approach of Portfolio's VaR Based on APGARCH-EWMA Model

Ping Wang

A New Method of License Plate Location Based on Multi-threshold Quantization Segmentation of Color Image

Kang Xie and Ying Wang

Study on Risk Assessment of Power Network Planning Projects Based on G1 Method and F-DS Evidential Theory

Hui Shi and Jianqing Li

The Study of Enterprise Human Resource Evaluation Research Based on Neural Network

Xinchun Wang and Yubo Jiang

Research on Robot Network Communication System in Underground Coal Mine Based on ZigBee

Quanxi Li, Hongtu Zhao, and Peiqian Liu

Research of Congestion Control in Wireless Video Transmission

Zhou Zurong and Chen Rongzhen
A Reinforced Approach for Enhancing Stochastic Search .......................................................... 29
    Jiarui Si, Jing Yang, Xiaopei Li, and Chunhua Tao

Research on Force Control Algorithm of Parallel System ......................................................... 32
    Hui Liang, Hongfang Li, and Xiaona Zhang

A Prediction Approach of Transmembrane Helical Segments in Membrane Proteins Based on Wavelet Transform ................................................................. 35
    Bin Yu and Yan Zhang

QoS Routing Scheme for Wireless Multimedia Networks Based on UWB .................................... 39
    Qiuna Niu

Applying Semi-supervised Cluster Algorithm for Anomaly Detection ...................................... 43
    Gao Xiang and Wang Min

Study of Multiple Instances Schedule Based on Object Pool ..................................................... 46
    Linlan Liu, Shuang Cao, Yebin Chen, and Jian Shu

RET: A Random and Encounter Time Based Forwarding Mechanism for Opportunistic Network ................................................................. 50
    Jian Shu, Kun Yu, Linlan Liu, Yebin Chen, and Youlei Fan

SANATOMY: Privacy Preserving Publishing of Data Streams via Anatomy ................................ 54
    Pu Wang, Lei Zhao, Jianjiang Lu, and Jiwen Yang

Processing Online Market Information Based on Users’ Online Information Behavior ................ 58
    Liu Yanbin and Yuan Ping

Mechanism of Particle Swarm Optimization and Analysis on Its Convergence ......................... 63
    Wen-fei Zeng, Ying-jie Zhang, and Ling Yan

Cryptanalysis of a Substitution-Diffusion Based Image Cipher Using Chaotic Standard and Logistic Map ................................................................. 67
    Jin-mei Liu and Qiang Qu

A Telemetry System for Neuronal Signal Acquiring and Processing .......................................... 70
    Wang Min, Zhao Yiliang, Ai Hongbin, Guang Kui, Yang Maoquan, and Zhang Xiao

Tabu Search Algorithm for Solving the Vehicle Routing Problem ............................................ 74
    Cui-hua Guan, Yan Cao, and Jing Shi

A Project Management System for Product Development ......................................................... 78
    Peng Wuliang, Meng Fanbo, and Kong Decai

I2C Protocol Design for Reusability ......................................................................................... 83
    Zheng-wei Hu

An Adaptive Airspace Sectorization Algorithm and Intelligent Controlling ............................... 87
    Jun Luo, Lin Zhang, and Haiwen Xu
Hybrid Particle Swarm Optimized Wavelet Network for Video OCR

Tongcheng Huang and Liping Yin

Survivable Storage Architecture

Zhang Wei, Liu Shuguang, and Zhong Weidong

Interpretation and Simulation of the JVM

Hong-Na Zhang and Yi-Jun Liu

Evaluation of Market Feedback about the Price Strategy of Enterprises

Yang Junqi, Chen Lijia, Gao Xia, and Li Junmei

A Grey Forecasting Model Based on BP Neural Network for Crude Oil Production and Consumption in China

Hongwei Ma and Yonghe Wu

The Impact of Reward Programs on Customer Behavior of Commercial Bank

Yanan Gu

Research on Hamilton Graph Discrimination

Yan Cui and Chao-Dong Cui

Approach to Construct Cluster in Unstructured P2P Networks Based on Small-World Theory

Zhen Zhang

Pedestrian Detection Based on Active Contour Models

Jin Feifei, Zheng Aibo, and Wang Shengke

Spatial Heterogeneity of Vegetation and Its Causes in Southern Yunnan Province

Chengyuan Hao and Xiaoping Lu

Weak Signal De-noising Method Based on Accumulation in Frequency Domain and Wavelet Transform

Wei Chongyu and Zhu Weijuan

The Research of Optimization Algorithms of Vertical Handoff in Heterogeneous Network

Longjiang Li and Xianwu Zeng

A Compressed Format Index Based on the Wavelet Tree and Its Implement

Zhang Yi, Li Xiao-qi, Lu Yan, and Zhao Xiao-hui

CLSP2P: A P2P Overlay Combination Location and Semantic Clustering

Huo Ying

Research on Long Running Transaction Consistency Based on CSP Trace Semantic

Wang Xiaolan and He Hong
Research on Aquatic Vegetation Monitoring Technology Based on WSN ............................................. 153
   Wenliang Tang and Zhishui Huang

On Customer Churn and Early Warning Model of Telecom Broadband ............................................. 157
   Ding Pan

Codeless Data Acquisition and Analysis Software (CDA&A) Development Platform ............................................. 161
   Xin Wang, Shumao Wang, and Junping Shang

Research on Soft Sensing Technology for Column Efficiency of Ion Chromatography ............................................. 166
   Ma Xinglu

Breaking a Chaotic Encryption Based on Henon Map ............................................. 169
   Jiansheng Guo, Zhenzhen Lv, and Lei Zhang

Hierarchically Clustering IDS Alarms Using a GA with Vary-lengthed Chromosomes ............................................. 172
   Aiguo Fei and Xiaoli Dong

A New Data Transmission Protocol in Delay Tolerant Mobile Wireless Sensor Networks ............................................. 178
   Jian-bo Xu and Jia-tao Hou

Energy Saving Routing Algorithm Based on Stable Zone in Mobile Ad Hoc Networks ............................................. 181
   Hong Peng and Lin Shao

Based on E-Commerce Enterprise Knowledge Chain Management Model and System Building Research ............................................. 186
   Yi Liu and Shuren Zhang

Research of Crankshaft Grinding Wheel Dresser Based FANUC NC System ............................................. 189
   Xiao Ying, Yang Qiangqiang, and Luo Fuyuan

Detection and Segmentation of Moving Objects Based on Support Vector Machine ............................................. 193
   Hongyan Li and Jianrong Cao

Research on the Performance of OFDM Communication System Based on LDPC-BICM-ID Scheme ............................................. 198
   Gu Pin-biao, Lennan Wu, and Du Na

Statistically Exploring Semantic Accessibility Scale Based on English, French and Japanese Corpora: A Comparative Perspective ............................................. 203
   Ping-fang Yu and Jia-Li Du

Are Students Willing to Use Your Online Open Resources? ............................................. 208
   Yanjun Sun, Tao Zhou, and Junjun Li
On the Signal Processing in the Life-Detection Radar Using an FMCW Waveform .................................................................213

Wei Chongyu and Wang Daquan

Study on the Edge Detection Algorithms of Road Image .................................................217

Chun-ling Fan and Yuan-yuan Ren

Road Edge Detection Based on Multiscale Geometry Analysis ......................................221

Chun-ling Fan and Wei Wang

Study on the Signal Detection Algorithm of Weak Laser Radar Target Based
on Wavelet Transform ........................................................................................................225

Jianhua Sun, Pengge Ma, Ning Zheng, and Jinfa Shi

A New Protection Method of Private Key File in Smart Card ........................................228

Yongtao Hu, Jingjing Yao, and Shanxue Hu

Multiplicative Update for Projective Nonnegative Matrix Factorization
with Bregman Divergence ....................................................................................................233

Jiaojiao Jiang and Haibin Zhang

The Application of an Improved Baker Map in Image Scrambling
and Watermarking ..............................................................................................................238

Ruisong Ye and Leyi Zhuang

White Peony Root Intelligence Quality Assessment Based on Information
Reduction .................................................................................................................................243

Jianyang Lin, Yajie Xu, Zhoumi Kan, and Mingyan Jiang

Applied Research of Scheme Optimization in the Drilling Support System ..................247

Cui Meng and Zhai Ying-hu

Chirp Sub-pulse Stepped Frequency Radar Signal Processing ........................................251

Wei Chongyu, Yang Yang, and Cheng Junxian

Remote Diagnosis in Traditional Chinese Medicine Using Wireless Sensor
Networks ..............................................................................................................................255

Zhengyu Dong, Hongmei Xiang, and Weisong He

Characteristic Analysis of Gas/Liquid Two-Phase Flow Regimes Based
on Wavelet Packet Entropy ..................................................................................................258

Chun Fu, Feng Dong, and Chun Fu

A Study on Dynamic Forecast Technique of Regional Rice Productivity ....................263

Shi Chunlin, Jin Zhiqing, and Feng Huihui

The Semantics Research of StateCharts ........................................................................267

Ming Li, Ge-ming Tong, and Fu-zhong Nian

ix
Analyzing Logistics Industry Association of Zhejiang in China Based on Extension of Input-Output Table .................................................................272

Dongya Ji

The Hardware Realization of the Bicubic Interpolation Enlargement Algorithm Based on FPGA .................................................................277

Yunshan Zhang, Yuhui Li, Jie Zhen, Jionghao Li, and Ran Xie

The Investigation and Analysis of Logistics Enterprises of Zhejiang Province in China .................................................................282

Changbing Jiang, Lijun Bai, and Di Pan

The Inexact Newton Method with Semi Automatic Differentiation .................................................................286

Haibin Zhang and Jiaojiao Jiang

A BP-Neural Network Predictor Model for Operational Risk Losses of Commercial Bank .................................................................291

Qingguang Chen and Yanping Wen

FPGA Design and Simulation of the Adaptive Edge Detection Pre-processor .................................................................296

Ting-qiang Song

Data Imbalance Problem in Text Classification .................................................................301

Yanling Li, Guoshe Sun, and Yehang Zhu

A Dynamic Quality Management Model for E-Commerce Based on Bayesian Network .................................................................306

Chang Jinling and Zhao Yi

An Approach of Domain Ontology Construction Based on Resource Model and Jena .................................................................311

Shao-min Zhang, Jian-yi Guo, Zheng-tao Yu, Chun-ya Lei, Cun-li Mao, and Hai-xiong Wang

Application and Research of C Language Programming Examination System Based on B/S .................................................................316

Zhikao Ren, Chen Ye, and Guozu Liu

Development and Research of Experiment Assistant System on C Language Programming .................................................................320

Chen Ye, Zhikao Ren, Guozu Liu, and Guangqian Zhu

Response Simulation of Multi-path Directional Interferences on Sonar Array .................................................................323

Bin Zhang

The Field of Automatic Entity Relation Extraction Based on Binary Classifier and Reasoning .................................................................327

Chun-ya Lei, Jian-yi Guo, Zheng-tao Yu, Shao-min Zhang, Cun-li Mao, and Chao-shen Zhang
Directional Interference Cancellation Using Empirical Mode Decomposition ........................................... 332
  Bin Zhang

The Study and Design on Secure-Intranet Storage System ........................................................................ 337
  Yanshen Chen and Dezhi Han

Adaptive Time-Sharing Distribution Information Publication System ...................................................... 342
  Lixin Lin, Xuan Li, Xin Liu, and Dejian Ye

Design and Implementation of the Oil Depot Training System Based on Database .................................... 347
  Liu Weiyuan, Gao Ying, Ji Weijun, and Guo Shuxia

Design and Realization of Glass Batching Microcomputer Intelligent Control System Based on the Network ........................................................... 351
  Cui Zhi-heng, Xu He-li, and Yan You-yun

A Continuous Knowledge Discovery Framework with Time Granularity .............................................. 355
  Ding Pan

Design of Coal Mine Monitoring and Controlling Configuration Software .............................................. 360
  An Weipeng and Li Miao

Robust Image Watermarking Using Independent Component Analysis .................................................. 363
  Abolfazl Hajisami and Shahrokh Ghaemmaghami

Basketball Court Detection Based on Adaptive Gaussian Mixture Model and the Application in Basketball Video Annotation .................................................. 368
  Liu Yun, Huang Chao, and Liu Xueying

Failure of Rotary Forging Die and Its Finite Element Simulation .......................................................... 372
  Li He-ping and Liu Zhao-hui

Research on Semi-axle Rotary Forging Composite Process ..................................................................... 376
  Li He-ping and Liu Zhao-hui

The Generator Speed Detection System Based on STC89C58RD ......................................................... 380
  Peng Xuange and Xiao Ying

Research on Traffic Information Demand and Supply Analysis of Comprehensive Traffic Information Platform .................................................................................. 384
  Wang Li, Zhu Xiao-ning, and Xie Zheng-yu

A Robust Watermarking Algorithm against Geometric Distortions ....................................................... 389
  Lingfang Zhang, Xine You, and Yuping Hu

Feature Extraction of Lung Sounds Based on Bispectrum Analysis ...................................................... 393
  Shengjun Li and Yi Liu

Ultrasound Image Denoising Using Improved Image Decomposition Method ........................................ 398
  Guodong Wang, Zhenkuan Pan, Ximei Zhao, Zengfang Zhao, and Shixiu Zheng
Authenticating Mobile Users Protocol in Wireless Networks .................................................. 404
   Jin Li

A Review on the Value-Added Services of Government Information
Resources ......................................................................................................................... 407
   Liu Weizhe and Wang Tianmei

An Improved Iterative Receiver Scheme for Turbo-BLAST System
with Anti-gray Mapping ............................................................................................... 411
   Du Na, Gu Pin-biao, and Cao Ning

The Design and Implementation of Software Assurance Process Management
Supported Tool SAPM ................................................................................................. 415
   Yuan-yuan Tian, Tao Han, and Yu-qing Lan

The Research of Wireless Sensor Networks Optimization Algorithm Based
on the Energy Control ................................................................................................. 420
   Liu Ban-teng, Chen You-rong, Zhou Kai, and Jingyu Hua

Key Frame Extraction from MPEG Video Stream ......................................................... 423
   Guozhu Liu and Junming Zhao

Research on Construction Method of Human-Computer Interface
for Distribute System Based on Real-Time Component Assembly ............................ 428
   Qing-tao Wu, Hai-xia Zhao, Ming-chuan Zhang, Hong-yi Wang, and Guan-feng Li

Design of Distributed Network Management System Based on Multi-agent ............ 433
   Guo-zhu Liu and Du Juan

A PERCLOS-Based Driver Fatigue Recognition Application for Smart
Vehicle Space .................................................................................................................. 437
   Wu Qing, Sun BingXi, Xie Bin, and Zhao Junjie

Continuous Auditing: Technical Innovation and Value-Added .................................. 442
   Yugui Hao and Yunping Zhang

The Analysis and Simulation of First-Order Inverted Pendulum Control
System Based on LQR .................................................................................................... 447
   BaiLi Zhang and JiangGuo Wang

Research on Multi-level Security of Shibboleth Authentication Mechanism ............ 450
   Wang Ying

Analysis and Implementation of Power Supply Capacity Based on Multi Date
Acquisition ...................................................................................................................... 454
   Wei Li, Shasha Sun, and Cheng Duan

Application Improvement of PLS in the Boiler NOx Emission Testing ....................... 458
   Ming-Jun Liu and Zeng-Shou Dong
