10th IFAC International Workshop on Adaptation and Learning in Control and Signal Processing 2010

Istanbul, Turkey
26 – 28 August 2010

Editors:

Erdal Kayacan

CONTENTS

Regular Papers

Adaptive Output Feedback Control of Bouc-Wen Hysteresis Systems ...................................................... 1
J.B. Gning, F. Giri, F.Z. Chaoui

Induction Machine Control in Presence of Magnetic Hysteresis Modelling and Speed Reference Tracking .......... 7
H. Ouadi, F. Giri, A. Elfadili, Ph. Dorleans, J.F. Massieu

Adaptive Control for Systems Preceded by Hysteresis Represented by Preisach Model .................................. 13
Xinkai Chen

Modeling and Identification of a Small Scale Magnetorheological Damper .................................................... 19
N. Aguirre, F. Ikhouane, J. Rodellar, J. Wagg, S. Neild

On the Analysis of the Quasi-Static Regime .................................................................................................. 25
F. Ikhouane

Noise Covariances Estimation for Kalman Filter Tuning .................................................................................. 31
P. Matisko, V. Havlena

Model- and Kalman Filtering Approaches for Frequency Tracking ................................................................. 37
A. Dardanelli, S. Corbetta, I. Boniolo, S.M. Savaresi, S. Bittanti

Hybrid Observer for Multi-Frequency Signals ................................................................................................. 43
Daniele Carnevale, Sergio Galeani, Alessandro Astolfi

A New Respiratory Model Considering Hysteresis for Artificial Respiration ....................................................... 49
S. Kanae, M. Nakamichi, Z.J. Yang, K. Wada

A Two-Level Optimization Based Learning Control Strategy for Wet Clutches ................................................. 54
Bruno Depreactere, Gregory Pinte, Lieboud Van den Broeck, Jan Swevers

Sensorless Induction Machine Observer in Presence of Nonlinear Magnetic Characteristic ................................ 60
A. Elfadili, F. Giri, A. El Magri, H. Ouadi

Passification-Based Robust Flight Control System Design ............................................................................ 66
A.L. Fradkov, B. Andrievsky

Adaptive Coding for Position Estimation in Formation Flight Control ............................................................ 72
B. Andrievsky, A.L. Fradkov

Adaptive Control Augmentation of a Missile, ................................................................................................... 77
Kadriye Tiryaki Kutluay, Ilkay Yavrucek

Target Tracking Using Adaptive Gain Backstepping Control .......................................................................... 83
Baris Fidan, Veysel Gazi

Immersion and Invariance Based Adaptive Control of Three Dimensional Autonomous Vehicle Maneuvers ............ 89
Baris Fidan, Ismail Bayestiz

Neuro-adaptive Approach for Controlling a Quad-rotor Helicopter Using Sliding Mode Learning Algorithm ........ 94
Andon Venelinov Topalov, Nikola Shaker, Okyay Kaynak, Erdal Kayacan

SMDO-Based NGPC Control for Uncertain Nonlinear Systems .................................................................... 100
Lu Cheng, Chang-sheng Shaker, Mou Chen

Wiener-Hammerstein System Identification with Non-Gaussian Input ............................................................ 106
Grzegorz Mzyk

Bias Compensated State Space Identification Method in Closed Loop Environment ........................................... 112
Kenji Ikeda, Yoshio Mogami, Takao Shimomura

Grey-box Model Identification – Control Relevant Approach ...................................................................... 117
Jiri Rehor, Vladimir Havlena

Observer-Based Parameter Estimation in Lienard Systems ............................................................................. 123
G. Besancon, A. Voda

Comparing Recursive Estimators in the Presence of Unmodeled Dynamics ...................................................... 128
Magnus Nilsson, Bo Egardt
Fictitious Reference Iterative Tuning for Internal Model Controller
Osamu Kaneko, Yusuke Waseda, Shigeru Yamamoto

Model Free Design of Parallel Feedforward Compensator for Adaptive Output Feedback Control via FRIT with T-S Fuzzy Like Model
Ikuro Mizumoto, Hiroki Tanaka

An FRIT method for disturbance attenuation using input-output data for disturbance responses
Shiro Masuda, Guo-Dong Li

A Design of a FRIT Based Nonlinear PID Controller
Yasushi Ohnishi, Toshi Yamamoto

FRIT with Dead-Zone Compensation and its Application to Ultrasonic Motors
Yuji Wakisaka, Shinji Kanagawa, Kenta Tanaka, Tuki Nishimura

Robustness of discrete-time and sampled-data adaptive control
Dariusz Horla

Adaptive Nonlinear Control of a Continuous Stirred Tank Reactor
P. Dostal, V. Bobal, J. Vojtesek

An Improved Adaptive Control Algorithm based on Unfalsified Control
Ehsan Gholamzadeh Nabati, Sebastian Engell

Adaptive Control of Continuous-Stirred Tank Reactor in Two Stable Steady-States
Jiri Vojtesek, Petr Dostal

A robust MRAC modification and performance improvement in the presence of uncertainties
Michal Poliaek, Jan Murgas, Ludovit Farkas, Michal Blaho

Auto-tuning cascade loops subject to saturation
A.S. Butt, J.M. Maciejowski, H.M. McNaughton

Adaptive Hybrid Approach to Active Noise and Vibration Control by Piezoelectric Ceramic Transducers
Hiroshi Okumura, Hirokatsu Ohmori, Akira Sano

Performance/Robustness Limit Evaluation for Lyapunov-Stable Nonlinear Plants
Cs. Banyasz, L. Keviczky

A necessary and sufficient condition for n-D BIBO Stability and Functional Schur Coefficients
Ioana Serban, Flavius Turcu, Mohamed Najim

Global Tracking Result for Strict Feedback Systems in Presence of Actuator Saturation
F. Giri, F.Z. Chaoui, E. Chafer, J.B. Gning

A Multi-step Q(δ) learning Approach to Power System Stabilizer
Tao Yu, Wei-Guo Zhen

Stability in the Pseudo-state Formalism of Discrete Systems Controlled in the Presence of Intermittent Sensor Faults
R.V. Dionisio, J.M. Lemos

Determination of the Minimax Risk for the Normal Two-Armed Bandit
Alexander V. Kolmogorov

Determination of the Minimax Risk for Bernoulli Multi-Armed Bandit
Alexander V. Kolmogorov

Non-myopic Innovations Dual Controller
Miroslav Filip, Miroslav Simandl

Structure-preserving Computation of Stable Dealing Subspaces
Vasile Sima

On Optimal Control under Program Disturbances
Dmitry A. Serkov

Adaptive Fuzzy Weighted Template Matching Using Invariant Features for a Tracking Application
Nevres Imamoglu, Aydin Eresen, Mehmet Onder Efe

Identification of Local Model Networks Parameters Using Fuzzy Clustering
J. Novak, F. Chalupa, V. Bobal
Neural Network Based Bicriterial Dual Control with Multiple Linearization .................................................. 271
Ladislav Krai, Miroslav Simandl

Long Term Learning Adaptive Neural Network Estimator Based Limit Detection ........................................... 277
Gonenc Gursoy, Ilkay Yavcucuk

An On-line Rule Weighting Mechanism Based on Normalized Acceleration for Fuzzy PID Controllers ........... 282
Onur Karatasal, Mujde Guzelkaya, Ibrahim Eksin, Engin Yesil

Biped Robot Walking Control on Inclined Planes with Fuzzy Parameter Adaptation .................................... 288
Metin Yilmaz, Utku Seven, Kemalettin Erbatur

Inverse-model predictive control based on INFUMO-BB-BC optimization .................................................... 294
Simon Oblik, Tufan Kumbasar, Igor Skrjanc, Engin Yesil

Linear Algorithms for Control of Geometrical Allocation of Agents in Multi-Agent Systems ..................... 300
Yana I. Petrikevich

Robust decentralized control with scalar output of multivariable structurally uncertain plants with state delay... 304
Elizaveta Parsheva

An Agent Based Framework for Adaptive Control and Decision Making of Autonomous Vehicles ............... 310
Nicholas K. Lincoln, Sandor M. Veres, Louise Dennis, Michael Fisher, Alexei Lisitsa

Observer-Based Adaptive Neural Control of Time-Delay Uncertain MIMO Nonlinear Systems ..................... 318
M. Chen, J. Zou, X. Feng

Decentralized Adaptive Controller for Synchronization of Nonlinear Dynamical Heterogeneous Networks ....... 324
Alexander L. Fradkov, Ibragim A. Jimussov

Consensus in networks of integrators with unknown nonlinear couplings and communication delays .......... 330
Anton V. Proskurnikov

Direct Policy Search Method in Fault Tolerant Autonomous Systems ...................................................... 336
B. Abu Bakar, S.M. Veres
