CONTENTS

Preface vii

Chapter 1 Origin of the Highly Enriched Sb-abundances in Fine-Dust
Gerd Weckwerth 1

Chapter 2 Bridging Antimony Knowledge Gaps by Assessing Its
Behavior in a Semi Arid Creek
Jessica L. Ruiz, Jianhong Ren, Thomas C. Vaughan,
G. Christopher Shank and Alfred Addo-Mensah 19

Chapter 3 Leishmania Antimony Resistance: Challenges and Opportunities
Denis Sereno 43

Chapter 4 Structure of Liquid Sb and Sb-Based Alloys
A. Yakymovych and S. Mudry 63

Chapter 5 Type-II Antimonide-based Superlattice Photon Detectors
and Focal Plane Arrays
Manijeh Razeghi and Binh-Minh Nguyen 93

Chapter 6 Antimony Based Chalcogenide Thin Films
for Photovoltaic Applications
B. Krishnan, G. Alan Castillo,
T. K. Das Roy and S. Shaji 125

Chapter 7 Antimony Oxide Glasses and their Nanocomposites
for Optical, Photonic and Nanophotonic Applications
Tirtha Som and Basudeb Karmakar 143

Chapter 8 High Temperature Interactions of Antimony with Nickel
Olga A. Marina and Larry R. Pederson 175

Chapter 9 Adsorption of Antimony at Metal Electrodes
and their Application in Electrocatalysis
Qi-Hui Wu and Shi-Gang Sun 201
Chapter 10  Improved P-type Antimony Telluride Alloys (Sb2Te3) for Thermal Converters  
J. P. Carmo, M. F. Silva, J. F. Ribeiro, 
L. M. Gonçalves and J. H. Correia  

Chapter 11  Cobalt Antimonide - Synthesis, Properties and Applications  
Elzbieta Godlewska, Kinga Zawadzka  
and Krzysztof Mars  

Chapter 12  Antimony Complexes with o-Quinonato Ligands and Related O,N-, O,N,O-, O,N,O,O-Ligands  
Andrey I. Poddel'sky
