# TABLE OF CONTENTS

## PLENARY LECTURES

A Perspective On Development Of Novel Fluidized Bed Processes For A More Sustainable Global Future .............................................. 1  
John Grace  

A Single Particle View Of Fluidization .............................................. 11  
Jonathan Seville  

Fluidization Of Nanopowders: Experiments, Modeling, And Applications .............................................. 21  
J. Ruud van Ommen, Robert Pfeffer  

Fluidization—Past & Future .............................................. 31  
Masayuki Horio

## DENSE FLUIDIZATION: BUBBLING AND SLUGGING I

Bubble-Free Fluidization Of Particles In The Void Of A Packing Of Coarse Spheres .............................................. 41  
Bruno Formisani, Rossella Girimonte, Patrizia Baffaro, Vincenzo Vivacqua  

Particle Clusters In Fluidized Beds .............................................. 51  
Ray Cocco, Frank Shaffer, S.B. Reddy Karri, Roy Hays, Ted Knowlton  

Gas-Solid Fluidization In A Microfluidic Channel .............................................. 62  
Fei Wang, L.S. Fan  

Investigation Of The Shifting-Parameter As A Function Of Particle Size Distribution In A Fluidized Bed Traversing From A Fixed To Fluidized Bed .............................................. 72  
Christo Rautenbach, M.C. Melaaen, B.M. Halvorsen  

Motion Of A Large Object In A 2D Bubbling Fluidized Bed .............................................. 82  
Antonio Soria-Verdugo, L.M. Garcia-Gutierrez, S. Sanchez-Delgado, U. Ruiz-Rivas  

Multiple Orifice Bubble Generation In Gas-Solid Fluidized Beds: The Activation Region Approach .............................................. 92  
Sergio Sanchez Delgado, J.V. Briongos, A. Acosta-Ibarra, D. Santana  

Prediction And Validation Of Effect Of Bed Length On RTD Of Coal In A Bubbling Fluidized Bed .............................................. 103  
Zhilhong Liu, Masahiro Narukawa, Makoto Takafuji, Yoshysuke Suda  

Particle Attrition Measurements Using A Jet Cup .............................................. 113  
Ray Cocco, S.B. Reddy Karri, Yoojung Arrington, Roy Hays, John Findlay, Ted Knowlton  

Mixing Behavior And Hydrodynamic Study Of Gas-solid-Solid Fluidization System: Co-Fluidization Of FCC And Coarse Particles .............................................. 124  
Zeeshan Nawaz, Yujian Sun, Yue Chu, Fei Wei  

Effects Of Imposed Solids Flux And Pressure On Gas Bypassing In Deep Fluidized Beds Of Group A Materials .............................................. 134  
Allan Issangya, Reddy Karri, Ted Knowlton

## MEASUREMENT AND INSTRUMENTATION

Comparison Of Various Measurement Techniques For Characterizing The Hydrodynamics Of Gas-Solid Fluidized Beds .............................................. 144  
Rahmat Sotudeh-Gharebagh, Navid Mostaafi, Reza Zarghami, Mojgan Abbasi, Nastin Salehi-Nik  

Understanding Capture Efficiency In Fluidized Beds .............................................. 148  
K Seng Lim, Trevor D. Hadley, Jonian Nikolov  

Dynamic Elutriation Measurement In A Continuously Operated Bubbling Fluidized Bed .............................................. 158  
Willie Nicol, E. du Toit, W. de Vos  

Numerical Investigation Of Gas Sampling From Fluidized Beds .............................................. 168  
John Grace, Tingwen Li, Yongmin Zhang, Xiaotao Bi  

Fibre-Optic Probe For The Simultaneous Measurement Of Gaseous Species Composition And Solids Volume Fraction .............................................. 178  
Jamal Chaouki, Jean-Philippe Laviolette, Gregory S. Patience  

Magnetic Resonance (MR) Measurements Of The Mass Flux In Gas-Solid Fluidized Beds .............................................. 188  
Andrew J. Sederman, Daniel J. Holland, L. F. Gladden, J. S. Dennis, C. R. Miller
An Electrical Capacitance Tomography Study Of Pressurized Fluidized Beds ................................................................. 198
Niels G. Deen, Willem Godlieb, Sander Gorter, J.A.M. Kuipers

Fast X-Ray Tomography Of A Bubbling Fluidized ................................................................. 208
Robert Frank Mudde

Digital Image Analysis Of Bubble Flow Distribution – Influence Of Operational Parameters ................................................................. 218
Johanna Olsson, David Pallaris, Filip Johnsson

Geldart Group Indication From Powder Measurements With A Rotating Drum Instrument ................................................................. 228
Clive Davies, Emile S. Webster

DENSE FLUIDIZATION: BUBBLING AND SLUGGING II

Particle Breakage In The Cyclones Of Fluidized Bed Systems ................................................................. 238
Marvin Kramp, Anja Püttmann, Andreas Than, Ernst-Ulrich Hartge, Joachim Werther

Study Of Solids Entrainment Into Attrition Jets In Fluidized Beds ................................................................. 249
Fen Li, Cedric Briese, Franco Berruti, Jennifer McMillan

Evaluation Of The Minimum Velocity Of Polydisperse Bed Fluidization Compounded Of Biomass Pellets And Their Mixtures With Fine Particles Of Coal ................................................................. 259
Zorin Alexander, Isemin Rafail, Virysav Dimitriy, Kazmin Sergey

Prediction Of Catalyst Attrition In An Industrial Fluidized Bed Plant Based On Lab Scale Attrition Tests ................................................................. 269
Ernst-Ulrich Hartge, Stefan Heinrich, Joachim Werther, Anja Püttmann, Andreas Than, Gregory Patience, Richard Bockrath

The Transport Disengagement Height (TDH) In A Bubbling Fluidized Bed (BFB) ................................................................. 279
Chian Chan, Jonathan P.K. Seville, Jan Baeyens

Effects Of Particle Size And Fluidizing Velocity On The Charge Density Of Entrained Fines ................................................................. 289
Xiaotao T. Bi, John Grace, Kwang Seok Choi, Muammar Omor

Agglomeration During Fluidized-Bed Combustion Of Biomass ................................................................. 299
Li Shiyuan, Lu Qinggang, Teng Haipeng

Investigation Of The Effect Of Fluidization Time On Electrostatic Charge Generation In Gas-Solid Fluidized Beds ................................................................. 309
Amanda Giffin, Andrew Sowinski, Poupak Mehrani

LIQUID AND THREE-PHASE FLUIDIZATION

A Study On Denitrification In A Fluidized Bed Bioreactor ................................................................. 319
L. Pratanna Lakshmi, Y. Pydi Setty, K. Vimala

Impact Behaviour Of Particles With Liquid Films: Energy Dissipation And Sticking Criteria ................................................................. 329
Sergiy Antonyuk, Stefan Heinrich, Stefan Palzer

Processing Of Pure Vegetable Oils In A Continuous FCC Pilot Plant ................................................................. 339
Peter Bielansky, Alexander Reichhold, Christoph Schönberger

Hydrodynamic Characteristics Of Liquid-Solid Fluidization Of Binary Mixtures In Tapered Beds ................................................................. 349
Sankarshana Talapuru Dr, J S N Murthy, S Nandana, Phani Kiran S V G R, V Ramesh

Effects Of Liquid Swirling On Gas-To-Liquid Mass Transfer In Three-Phase Fluidized Beds ................................................................. 359
Yong Kang, Myung-Joe Seo, Hyung Oh Lim, Sung-Mo Son, Yong Jun Cho, H Chul Yang, Sang-Don Kim, Heon Jung, Ho Tae Lee

Electricity Generation Characteristics Of An Anaerobic Fluidized Bed Microbial Fuel Cell ................................................................. 369
Qingjie Guo, Shuju Zhao, Xiuyan Wang, Xiaohai Yue, Liangyu Hou

NOVEL FLUIDIZED-BED REACTORS I

A Novel Construction Of A Low-Pressure-Drop Air Nozzle Working With A 535MWe CFB Boiler ................................................................. 379
Pawel Mirek, Wojciech Nowak, Marcin Kijajny, Janusz Jaboski

Chemical-Looping Steam Methane Reforming For Hydrogen Production In A Circulating Fluidized Bed Reactor ................................................................. 389
Song Done Kim, Kang Seok Go, Young Wook Jeon, Chu Sik Park

Development Of A Continuous Nanoparticle Coating With Electrospaying ................................................................. 399
N. Ellis, J. Ruud van Ommen, C.U. Utteri

Spinning Straw Into Gold: Turning Academic Papers Into Commercial Fluidized Bed Reactor Solutions ................................................................. 409
Charles O. Bollhrunis, Michael Hagan, Waheed A. Mukaddam
