# Table of Contents

HPDC 2011 Organization ......................................................................................... x

HPDC 2011 Sponsors & Supporters ....................................................................... xii

Keynote Address 1
- Exascale Opportunities and Challenges ......................................................... 1
  Katherine Yelick (University of California, Berkeley and Lawrence Berkeley National Laboratory)

Session 1: Parallel Performance
- Juggle: Proactive Load Balancing on Multicore Computers ............................ 3
  Steven Hofmeyr (Lawrence Berkeley National Laboratory),
  Juan A. Colmenares (University of California, Berkeley), Costin Iancu (Lawrence Berkeley National Laboratory),
  John Kubiatowicz (University of California, Berkeley)
- Cache Injection for Parallel Applications .......................................................... 15
  Edgar A. León, Rolf Riesen (IBM Research), Kurt B. Ferreira (Sandia National Laboratories),
  Arthur B. MacCabe (Oak Ridge National Laboratory)

Session 2: Data Management and Movement
- Just in Time: Adding Value to the IO Pipelines of High Performance Applications
  with JITStaging .................................................................................................. 27
  Hassan Abbasi, Greg Eisenhauer, Matthew Wolf, Karsten Schwan (Georgia Institute of Technology),
  Scott Klasky (Oak Ridge National Laboratory)
- A Cost-Intelligent Application-Specific Data Layout Scheme for Parallel File Systems .... 37
  Huaiming Song, Yanlong Yin (Illinois Institute of Technology), Yong Chen (Texas Tech University),
  Xian-He Sun (Illinois Institute of Technology)
- Six Degrees of Scientific Data: Reading Patterns for Extreme Scale Science IO .................. 49
  Jay Lofstead (Sandia National Laboratories), Milo Polte, Garth Gibson (Carnegie Mellon University),
  Scott Klasky (Oak Ridge National Laboratory), Karsten Schwan (Georgia Institute of Technology),
  Ron Oldfield (Sandia National Laboratories), Matthew Wolf (Georgia Institute of Technology),
  Qing Liu (Oak Ridge National Laboratory)
- Introspective End-System Modeling to Optimize the Transfer Time
  of Rate Based Protocols .................................................................................. 61
  Vishal Ahuja (University of California, Davis), Amitabha Banerjee (Oracle Corporation),
  Matthew Farrens, Dipak Ghosal (University of California, Davis), Giuseppe Serazzi (Politecnico di Milano)

Session 3: Deconstructing Applications
- Algorithm-Based Recovery for Iterative Methods without Checkpointing ............ 73
  Zizhong Chen (Colorado School of Mines)
- Vrisha: Using Scaling Properties of Parallel Programs for Bug Detection
  and Localization .................................................................................................. 85
  Bowen Zhou, Milind Kulkarni, Saurabh Bagchi (Purdue University)
- InContext: Simple Parallelism for Distributed Applications ............................... 97
  Sungwhan Yoo, Hyojong Lee, Charles Killian, Milind Kulkarni (Purdue University)

Keynote Address 2
- Energy-Efficient E-Puting Everywhere .......................................................... 109
  Wu-chun Feng (Virginia Tech)
Session 4: Scheduling Workloads

- **Towards a Profound Analysis of Bags-of-Tasks in Parallel Systems and Their Performance Impact** .......................................................... 111
  Tran Ngoc Minh, Lex Wolters (Leiden University)

- **Incremental Placement of Interactive Perception Applications** ......................................................... 123
  Nezih Yigitbasi (Delft University of Technology), Lily Mummert, Padmanabhan Pillai (Intel Labs), Dick Epema (Delft University of Technology)

Session 5: Virtual Machine Migration

- **Live Gang Migration of Virtual Machines** ................................................................. 135
  Umesh Deshpande, Xiaoshuang Wang, Kartik Gopalan (Binghamton University)

- **Going Back and Forth: Efficient Multideployment and Multisnapshotting on Clouds** ........ 147
  Bogdan Nicolae (INRIA Saclay), John Bresnahan, Kate Keahey (Argonne National Laboratory),
  Gabriel Antoniu (INRIA Rennes Bretagne-Atlantique)

- **VMFlock: Virtual Machine Co-Migration for the Cloud** .................................................. 159
  Samer Al-Kiswany (University of British Columbia),
  Dinesh Subbraveti, Prasenjit Sarkar (IBM Ahmed Research Center),
  Matei Ripeanu (University of British Columbia)

- **Performance and Energy Modeling for Live Migration of Virtual Machines** .................. 171
  Haikun Liu (Huazhong University of Science and Technology & Wayne State University),
  Cheng-Zhong Xu (Wayne State University), Hai Jin (Huazhong University of Science and Technology),
  Jiayu Gong (Wayne State University), Xiaofei Liao (Huazhong University of Science and Technology)

Session 6: Experience Papers

- **Experiences with Self-Organizing, Decentralized Grids Using the Grid Appliance** ........ 183
  David Isaac Wolinsky, Renato Figueiredo (University of Florida)

- **Experience of Parallelizing cryo-EM 3D Reconstruction on a CPU-GPU Heterogeneous System** .................. 195
  Linchuang Li, Xingjian Li, Guangming Tan, Mingyu Chen, Peiheng Zhang (Chinese Academy of Sciences)

- **Experiences Using Smaash to Manage Data-Intensive Simulations** ................................ 205
  Randy Hudson, John Norris (University of Chicago), Lynn B. Reid (WA Geothermal Centre of Excellence),
  Klaus Weide, G. Cal Jordan IV (University of Chicago), Michael E. Papka (Argonne National Laboratory)

Session 7: Cloud Resource Management

- **Supporting GPU Sharing in Cloud Environments with a Transparent Runtime Consolidation Framework** ............................................. 217
  Vignesh T. Ravi (The Ohio State University), Michela Beechi (University of Missouri),
  Gigan Agrawal (The Ohio State University), Srimat Chakradhar (NEC Laboratories America)

- **Tradeoffs Between Profit and Customer Satisfaction for Service Provisioning in the Cloud** ........ 229
  Junliang Chen (The University of Sydney), Chen Wang (CSIRO ICT Center),
  Bing Zhou (The University of Sydney), Lei Sun (China University of Mining and Technology),
  Young Choon Lee, Albert Y. Zomaya (The University of Sydney)

Session 8: Virtual Machine Scheduling

- **Dynamic Adaptive Scheduling for Virtual Machines** ............................................... 239
  Chuliang Weng, Qian Liu, Lei Yu (Shanghai Jiao Tong University),
  Minghu Li (Shanghai Jiao Tong University & Shanghai Key Laboratory of Scalable Computing and Systems)

- **Enhancement of Xen's Scheduler for MapReduce Workloads** ........................................... 251
  Hui Kang, Yao Chen, Jennifer L. Wong, Radu Sion (Stony Brook University), Jason Wu (Cornell University)
Poster Session

• Adapting MapReduce for HPC Environments .............................................................. 263
  Zacharia Fadika, Elif Dede, Madhusudhan Govindaraju (Binghamton University),
  Lavanya Ramakrishnan (Lawrence Berkeley National Laboratory)

• HyFlow: A High Performance Distributed Software Transactional Memory Framework .................................................. 265
  Mohamed M. Saad, Binoy Ravindran (Virginia Tech)

• ClusterSS: A Task-Based Programming Model for Clusters ............................................. 267
  Enric Tejedor, Montse Farreras (Barcelona Supercomputing Center / Universitat Politècnica de Catalunya),
  David Grove (IBM T.J. Watson Research Center),
  Rosa M. Badia (Barcelona Supercomputing Center / Spanish National Research Council),
  Gheorghe Almasi (IBM T.J. Watson Research Center),
  Jesus Labarta (Barcelona Supercomputing Center & Universitat Politècnica de Catalunya)

• Design Space Exploration for Aggressive Core Replication Schemes in CMPs ...................... 269
  Lluç Alvarez, Ramon Bertran, Marc González, Xavier Martorell, Nacho Navarro, Eduard Ayguadé
  (Barcelona Supercomputing Center & Universitat Politècnica de Catalunya)

• Capping the Electricity Cost of Cloud-Scale Data Centers with Impacts on Power Markets .............................................................. 271
  Yanwei Zhang, Yefu Wang, Xiaorui Wang (University of Tennessee)

• Interactivity on the Grid: Limitations and Opportunities .................................................. 273
  Marco Mooni (École Polytechnique Fédérale de Lausanne)

• Exclusive Squashing for Thread-Level Speculation ............................................................ 275
  Alvaro García-Yáñez, Diego R. Llano, Arturo González-Escribano (University de Valladolid)

• Wrangler: Virtual Cluster Provisioning for the Cloud ..................................................... 277
  Gideon Juve, Ewa Deelman (University of Southern California)

• A Distributed Look-Up Architecture for Text Mining Applications Using MapReduce ....... 279
  Atilla Soner Balkir, Ian Foster, Andrey Rzhetsky (University of Chicago)

• Software-Directed Data Access Scheduling for Reducing Disk Energy Consumption ....... 281
  Yuanrui Zhang, Jun Liu, Ellis Wilson, Mahmut Kandemir (The Pennsylvania State University)

Author Index .......................................................................................................................... 283
