Photonic Applications for Aerospace, Transportation, and Harsh Environment II

Alex A. Kazemi
Bernard Kress
Eric Y. Chan
Nabeel A. Riza
Lothar U. Kempen
Editors

25-26 April 2011
Orlando, Florida, United States

Sponsored and published by
SPIE

Digital micromirror device-based robust object boundary mapping sensor [8026-09]
P. J. Marraccini, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States); C. Baxley, Univ. of Central Florida (United States); N. A. Riza, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

High resolution wide dynamic range distance sensor using spatial signal processing [8026-10]
P. J. Marraccini, N. A. Riza, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

Multimode laser beam characterization using agile digital-analog photonics [8026-11]
P. J. Marraccini, N. A. Riza, CREOL, The College of Optics and Photonics, Univ. of Central Florida (United States)

Evanescent wave absorption measurements of corroded materials using ATR and optical fibers [8026-26]
J. Namkung, Naval Air Systems Command (United States); M. Hoke, Air Force Research Lab. (United States); A. Schwartz, Naval Air Systems Command (United States)

Wireless/integrated strain monitoring and simulation system [8026-12]
F. Abdi, R. Dutton, T. Takahashi, C. Godines, G. Abumeri, AlphaSTAR Corp. (United States)

All optical O2 sensors using innovative phase fluorimetry for monitoring of headspace in ullage for FAA mandated inerting fuel tanks of commercial airlines [8026-13]
A. Panahi, ARK International (United States)

Battery outgassing sensor for electric drive vehicle energy storage systems [8026-16]
M. Beshay, J. G. Chandra Sekhar, L. U. Kempen, Intelligent Optical Systems, Inc. (United States)

High speed laser communication network for satellite systems [8026-17]
A. Panahi, A. A. Kazemi, ARK International (United States)

Wireless optical links for avionics applications (Invited Paper) [8026-18]
E. Chan, D. Koshinz, W. Krug, H. Hager, The Boeing Co. (United States)

Towards development of a fiber optic-based transmission monitoring system [8026-19]
C. S. Baldwin, J. S. Kiddy, Aither Engineering, Inc. (United States); P. D. Samuel, Daedalus Flight Systems (United States)

Review of optical fiber sensor technologies for hydrogen leak detection in hydrogen energy storage [8026-20]
C. Perrotton, N. Javahiraly, Univ. de Strasbourg (France); A. Kazemi, The Boeing Co. (United States); P. Meyrueis, Univ. de Strasbourg (France)
VISION-BASED AND IMAGING SENSORS

8026 OP  Speckle reduction technique for laser based automotive Head Up Display (HUD) projectors (Invited Paper) [8026-21]
B. Kress, V. Hejmadi, USI Photonics Inc. (United States)

8026 OQ  Diffractive elements manufactured by grey tone mask and global laser lightning for transportation applications [8026-22]
F. Quentel, THALES (United Kingdom); K. Boehlen, Exitech Ltd. (United Kingdom); J. Fieret, A. Holmes, Imperial College London (United Kingdom); P. Meyrueis, V. Raulot, Univ. de Strasbourg (France)
