30th Anniversary of the International Conference on Ground Control in Mining
Lifetime of Lessons and Memory Making Moments
July 26-28, 2011

Academic Excellence
Guidance
Good times
Loyalty
Leadership
Laughter and friendship
Challenging debate
# TABLE OF CONTENTS

## Syd S. Peng Award Recipient Papers

1. Think Like a Rock, T. Barczak, NIOSH, Office of Mine Safety and Health Research, Pittsburgh, PA .......................................................... 1
2. Investigation Into Abnormal Surface Subsidence Above a Longwall Panel in the Southern Coalfield, Australia, W. Gale, SCT Operations, Wollongong, Australia ......................... 12
3. A Retrospective on LaModel (Or Dr. Heasley's Wild Ride), K. Heasley, West Virginia University, Morgantown, WV ........................................... 21
4. Applications of ARMPS (Version 6) to Practical Pillar Design Problems, C. Mark, M. Gauna, J. Cybulski, G. Karabin, MSHA, Pittsburgh, PA .......................................................... 30
5. A Retrospective Assessment of Ground Control Research and Applications in the Coal Industry, D. Su, CONSOL Energy Inc., Canonsburg, PA ....................................................... 39
6. Streams and Longwall Coal Mining Subsidence: a Pennsylvania Perspective, A. Iannacchione, S. Tonsor, University of Pittsburgh, Pittsburgh, PA ........................................... 51

## Fundamental Research Studies

8. Calculating the Mining-Induced Horizontal Deformation Indices, K. Tajduš, Strata Mechanic Research Institute - Polish Academy of Science, Kraków, Poland, A. Sroka, TU Bergakademie Freiberg, Strata Mechanic Research Institute - Polish Academy of Science, Freiberg, Germany, A. Preusse, University of Aachen, Aachen, Germany .......................................................... 67
9. Assessment of the Dynamic Loads Effect on Underground Mines Supports, K. Oraee-Mirzamani, Stirling University, Stirling, United Kingdom, A. Goodarzi, Ministry of Labor and Social Affairs(Center for Research and Training in Occupational Safety and Health), Tehran, Iran, N. Oraee-Mirzamani, Imperial College London Business School, London, United Kingdom .. 74
11. The Influence of Interface Friction and W/H Ratio on the Violence of Coal Specimen Failure - A Comparison Between a Bump and Non-Bump Prone Mines, S. Prasetyo, R. Gamal, Y. Li, Y. Luo, S. Peng, West Virginia University, Morgantown, WV .......................................................... 92

## Pillar and Mine Design

12. Safe Pillar Extraction Practice - Some Geotechnical Principles Based on Australian Experience, B. Hebblewhite, University of New South Wales, Sydney, Australia .......................................................... 105
13. The Duncan Method of Partial Pillar Extraction at Tasman Mine, K. Mctyer, T. Sutherland, Donaldson Coal Pty Ltd, Newcastle, Australia .......................................................... 112
30th International Conference on Ground Control in Mining

Roof and Rib Control Strategies

14. Why Dead Load Suspension Design for Roadway Roof Support Is Fundamentally Flawed Within a Pro-Active Strata Management System, R. Frith, Frith Consulting Services Pty Ltd, Floraville, Australia, M. Colwell, Colwell Geotechnical Services, Caloundra, Australia ................................................................. 118

15. Protecting Underground Coal Miners From Rib Falls, M. Gauna, Pittsburgh Safety and Health Technology Center, Pittsburgh, PA, C. Mark, Coal Mine Safety and Health, Pittsburgh, PA ......................................................................................................................... 126

16. Gateroad Support in the Czech and Polish Coal Mining Industry – Present State and Future Developments, S. Prusek, Z. Lubosik, Central Mining Institute, Katowice, Poland, P. Dvorsky, P. Horak, OKD a.s., Ostrava, Czech Republic ......................................................................................................................... 135

17. The Introduction of UK Rockbolting Technology Into Coal Mines Around the World, G. Daws, Graham Daws Associates Ltd, Riddings, United Kingdom, A. Oxley, Minova Weldgrip Ltd, Barnsley, United Kingdom, N. Woodward, Rockbolting Technology Ltd, Castle Gresley, United Kingdom ......................................................................................................................... 146

New Roof Support Product Developments

Rock Mass Characterization and Risk Assessment

20. Mapping and Application of Roof Joint Patterns for Ground Control in An Illinois Mine, K. Basnett, Southern Illinois University, Carbondale, IL, Y. Chugh, Southern Illinois University, Carbondale, PA ......................................................................................................................... 168

21. A Study on Geotechnical Risks in Interaction Between Open-Pit and Block Caving, E. Bakhtavar, Urmia University of Technology, Urmia, Iran ......................................................................................................................... 174

22. Gis Supported Evaluation of Surface Level Impacts Due to Abandoned Near-Surface Mine Locations, A. Kattner, RWTH Aachen University, Aachen, Germany, A. Preusse, RWTH - Aachen University Institute of Mine Surveying, Mining Subsidence Engineering & Geophysics in Mining (IFM), Aachen, Germany ......................................................................................................................... 177

24. Prediction of Roof Fall Rate in Coal Mines Using Fuzzy Logic, E. Ghasemi, M. Ataei, Shahrood University of Technology, Shahrood, Iran, K. Shahrizat, Amirkabir University of Technology, Tehran, Iran ......................................................................................................................... 186
30th International Conference on Ground Control in Mining

Numerical Modeling Developments and Applications

25. Numerical Analysis of Dynamic Impact of Rock Mass Tremors on Mine Roadways Support, W. Masny, A. Walentek, Central Mining Institute, Katowice, Poland ...........................................192

26. Numerical Modeling of the Pillar Confinement with Backfilling Material in Room-and-Pillar Coal Mining, A. Zingano, University Federal of Rio Grande do Sul, Porto Alegre, Brazil, C. Gomes, Sindicato da Ind. de Extração de Carvão de Santa Catarina, Criciúma, Brazil, J. Koppe, University Federal of Rio Grande do Sul, Porto Alegre, Brazil ...........................................201

Engineering Design/Monitoring Software Developments

27. Early Warning of Longwall Weighting Events and Roof Cavities Using LVA Software, D. Hoyer, LVA Pty Ltd, Sydney, Australia ..................................................................................207

29. Understanding the Causes of Roof Control Problems on a Longwall Face From Shield Monitoring Data - A Case Study, R. Trueman, Strata Engineering Pty. Ltd., Charlestown, Australia ..................................................................................................................222

Operator Case Histories and Experiences

31. Geotechnical Considerations for Longwall Top Coal Caving at Austar Coal Mine, A. Moodie, J. Anderson, Austar Coal Mine Pty Ltd, Cessnock, Australia ..............................................................................................................................238

33. Roof Bolting for Long-Term Entries in Underground Coal Mines, P. Zhang, S. Peterson, M. Mishra, Alpha Natural Resources, Waynesburg, PA .....................................................................................................255

35. Preventing Roof Fall Accidents – An Operation’s Approach, J. Zelanko, Rosebud Mining Company, Kittanning, J. Hefferan, Rosebud Mining Company, Kittanning, PA ..................................................................................................................271

Regulatory Issues

30th International Conference on Ground Control in Mining

**Subsidence Issues**

40. The Effects of Longwall Coal Mining on the Hydrogeology of Southwestern Pennsylvania, M. Witkowski, University of Pittsburgh, Pittsburgh, PA 314

**Tunnel/Slope Ground Control Issues**

41. Designing Shotcrete As Primary Support in Tunnels, B. Oraee-Mirzamani, Imperial College London, London, United Kingdom, M. Tavassoli, Tarbiat Modares University, Tehran, Iran, K. Oraee, University of Stirling, Stirling, United Kingdom 320

42. Application of Stress, Geologic, and Support Design SYSTEM (SGSSM) to Ground Control for Mine Slope Entries, J. Stankus, K. Ma, H. Chen, X. Li, Jennmar Corporation, Inc, Pittsburgh, PA 326

**Ultra Thick Mining Practices**

**Chinese Mining Practices and Solutions**

45. Research on Mine Pessure Behaviors and Overlying Strata Movement Laws in Solid Backfill Mining Methods, S. Yang, J. Wang, S. Wang, China University of Mining and Technology (Beijing), Beijing, China 351

46. Surface Subsidence Velocity of Fully-Mechanized Thick Seam Top Coal Caving Mining, W. Guo, X. Ma, C. Huang, Henan Polytechnic University, Jiaozuo, China 357

47. The Technical Progress and Problems to Be Solved of Thick Coal-Seam Mining in China, J. Wang, China University of Mining and Technology, Beijing, China 363
