Advances in Grinding and Abrasive Technology XVI

Selected, peer reviewed papers from the 16th Conference of Abrasive Technology in China, 7-10 August, 2011, Urumqi China

Edited by

Feng Zhu, Xipent Xu and Renke Kang
# Table of Contents

Preface v  
Organizing Committees vi  

Surface and Subsurface Damages of CdZnTe Substrates Ground by Diamond Grinding Wheel  
S. Gao, R.K. Kang, Y. Li and H. Gao 1  

Research on Micro-Grinding Method and Surface Quality  

The Study of Wear Flat Effect on the Single Grain Micro-Cutting Performance in Superabrasive Grinding from a Simulation Perspective  
X.K. Li, L. Yan, M.J. Yi and Y.M.K. Rong 11  

Temperatures in Grinding Cemented Carbide (YT30) with a Vacuum Brazed Diamond Wheel  
Y.J. Zhan, Y. Li, H. Huang and X.P. Xu 16  

Investigation on the Workpiece Surface Residual Stress in High Efficiency Deep Grinding with Ultra High Wheel Speeds  
J. Tan, D.J. Stephenson and X.M. Sheng 24  

Ultra-Precision Fabrication of Small-Size Aspherical Glass Lens Mold  

Study on Grinding Machinability of Titanium Alloy Using SiC Abrasive  

Removal Mechanism of Titanium Alloy Ti6Al4V Based on Single-Grain High Speed Grinding Test  
L. Tian, Y.C. Fu, W.F. Ding, J.H. Xu and H.H. Su 39  

Single Grit Scratching and Diamond Grinding on Optical Glasses  
Q.L. Zhao, L.L. Zhao and B. Guo 44  

Study on Residual Stress Distribution in Surface Grinding  
G.C. Wang, C.L. Hua, J.D. Liu, H.J. Pei and G. Liu 49  

Influences of Grinding Parameters on Flexural Strength in the Grinding of Li-Spinel Ferrites with Electroplated Diamond Wheel  
L.P. Sun, Y.G. Wang, Y. Yang, X.R. Yu and B. Lin 54  

Research on the Ductile Chip Formation in Grinding of Brittle Materials  

Experimental Investigation of White Layer in Grinding of AISI 52100 Annealed Steel  
X.M. Huang, Z.X. Zhou and W. Li 63  

Finite Element Simulation of Temperature Field during Grinding of SiCp/Al Composites  
C.Y. Zhang, L. Zhou and S.T. Huang 70  

The Grinding Temperature of Alumina Ceramic in High Speed Deep Grinding (HSDG)  
G.Z. Xie, X.M. Sheng, J. Tan, Z.T. Shang and Y. Wu 75  

Force and Energy in Grinding Zirconia Ceramics by Brazed Monolayered Diamond Wheels  
S.S. Li, J.H. Xu, Y.C. Fu and H.J. Xu 80  

Investigation of Grinding Ti-6Al-4V under Minimum Quantity Lubrication (MQL) Condition  
Experimental Research on Surface Integrity with Less or Non Fluid Grinding Process
S.C. Xiu, C.X. Chao and S.Y. Pei ................................................................. 89

Study on Depth and its Uniformity of 65Mn Steel Grind-Hardened Layer
J.Z. Zhuang, J.D. Liu and Y.Z. Zhang ...................................................... 94

The Inner Hole Grinding Surface Roughness Analysis of Zirconia Ceramics
Electric Spindle

High-Speed Grinding for Superalloy
B.F. Feng, Q.F. Gai, Z. Lei and Z.L. Su ..................................................... 104

A Study of Machining Characteristics of YG8 in High Speed Grinding

The Experimental Study on Characteristics of Low-Temperature Grinding of Ceramic
Hollow Ball Super-Hard Composite Abrasive
Z.M. Cui, J.P. Kong, X.P. Yang and L. Du .................................................. 113

Effect of Arraying Patterns of Diamond Grits on the Grinding Forces of Mono-Layer
Brazed Diamond Tool
F.L. Zhang, M.J. He, Y.M. Zhou, H.P. Huang and J.M. Fan ........................... 116

Experimental Research of Grinding TC4 Titanium Alloy Using Green Silicon
Carbide Wheel

Experimental Study on Microstructure Evolution in AISI D2 Steel Surface Grinding
L. Yan, F. Jiang and Y.M.K. Rong .............................................................. 126

Surface Strain and Roughness Change of Aluminum Block Ground by Fixed Abrasives
Q.L. Han and H.J. Zhao ........................................................................... 131

Experimental Study of Grinding Characteristics on SiCp/Al Composites
L. Zhou, S.T. Huang and X.L. Yu .............................................................. 135

Experiment Investigation of the Influence Factors on Surface Grinding Temperature
C. Mao, H.F. Zou and Z.X. Zhou ............................................................... 140

Performance of Laser Brazing Diamond Grinding Wheel in Face Grinding
Z.B. Yang, L.M. Zhang, J.H. Xu and G.L. Zhao ........................................ 145

Three-Dimensional Simulation of Wheel Topography
Q. Feng, Q. Wang and C.Z. Ren ................................................................. 149

Comparative Study on the Tribological Performance of HFCVD Diamond and DLC Films
under Water Lubricating Condition
B. Shen, F.H. Sun and Z.M. Zhang ............................................................ 155

Development of a Multiple Micro Diamond Wheel-Tools
S.T. Chen and Y.C. Lai ................................................................. 160

First Principle Calculations on Structures and Properties of Diamond-Like
B$_2$(CN)$_3$ Compounds
D.X. Li, D.L. Yu and J. Lu ................................................................. 164

Influence of Pore-Forming Agent on the Performance of Resin Bond Diamond Grinding
Wheel in Back-Grinding Silicon Wafers
K.H. Li, Q. Guo, M.Y. Liu, Y.J. Zhao and D.L. Shi .................................... 169

Particle Flow Simulation on Semi-Fixed Abrasive Tool Processing
P. Zhao, W.F. Yao, Q.F. Deng, D. Liu and J.L. Yuan .................................. 175

Effect of Ultrasonic on Coating Performances of Electroplated Diamond Tools
Y.G. Wang, B. Lin, Y.H. Liu and A.B. Yu ................................................. 180

Finite Element Analysis of Stress Distributions on the Diamond Pick
S.T. Huang, L. Zhou and J. Li ................................................................. 184
Experiment Study on Abrasives Performance on Vitrified CBN Wheel
X.L. Liu, Z.R. Pang and W.S. Wang

Manufacturing and Experimental Research of Fine Grain Diamond Grinding Wheel Based on Magnetic Field Controlling

Investigation of Interface Microstructure of Diamond and Ti Coated Diamond Brazed with Cu-Sn-Ti Alloy
Y. Chen, H.H. Su, Y.C. Fu and Z.C. Guo

Research on the CAD Technology of Resin-Bonded Diamond Abrasive Tool Based on Quality Control
N.B. Liu, Z.Y. Wu, G.Y. Li and N. Weng

Simulation of Grinding Wheel with Random Three-Dimensional Abrasive and Microporous Bond
J.Q. Zhang, P. Guan, C. Su, T.B. Yu and W.S. Wang

Recovery of Electroplated Diamond Tool with Thermal Shock Method
A.B. Yu, L. Wu and B.Y. Gao

Self-Sharpening Abrasive Composite Bulks with PCBN Grains
B. Zhang, W.F. Ding, J.H. Xu, Q. Pan and Y.J. Shi

Research on the Milling Toughness of Black Silicon Carbide and the Repeatability of the Testing Results
M. Liu and S.J. Jiang

Performance of Monolayer Brazed CBN Wheels Manufactured with Rare Earth Lanthanum Modified Ag-Cu-Ti Filler
C.Y. Yang, J.H. Xu, W.F. Ding, Y.C. Fu and H.H. Su

Surface Characterization of Silicon Wafers Polished by Three Different Methods
G.Q. Hu, J. Lu, J.Y. Shen and X.P. Xu

Study on Compound Machining of Polyurethane Polishing Pad and Cluster Abrasive Brush Based on MR Effect
M. Li, Q.S. Yan, J.B. Lu and J.F. Chai

Study on Lubricating Behavior in Chemical Mechanical Polishing

Processing of Lapping Track in Dual Rotated Plates Eccentric Lapping Mode
W. Yu, D. Liu, J.L. Yuan, W.F. Yao and C.Y. Jin

Research on Subsurface Damage After Abrasives and Fixed-Abrasive Lapping of K9 Glass
J. Li, P. Gao, Y.W. Zhu, B. Li, Y.L. Sun and D.W. Zuo

Study on Machining Process of Lapping for BK7 Glass
C.Y. Wang, W.S. Luo, C.H. He and Y.X. Song

Finishing of Display Glass for Mobile Electronics Using 4S-4μm 3M Trizact Diamond Tile Abrasive Pads
T.K. Na and L.B. Zheng

Theoretic and Experimental Study on the Accuracy of Gears by Generative Electrochemical Mechanical Finishing

Research on Tests of Magnetic Abrasive Finishing by Sintering Method
G.B. Liao, M.M. Zhang, Y.J. Li, Z.Q. Liu and Y. Chen

Investigation of Elastic Deformation Machining Method for Aspheric Surface Generation
D.N. Nguyen, J.L. Yuan, B.H. Lv and Z. Wu

Ultra Smooth Polishing Research Based on the Cluster Magnetorheological Effect
Z.C. Wu, Q.S. Yan, Z.W. Bai, L.Y. Kong and J.F. Chai
Investigation of a New Kind of Magnetic Abrasive Grains Used for Finishing Inner-Hole Surface
Y.H. Ding, X.G. Yao, G. Ya and P. Lu .................................................. 289

Z. Wu, J.L. Yuan, B.H. Lv and D.N. Nguyen ......................................... 293

Development of a New Magnetic-Electrochemical Compound Polishing Tool
L.M. Shi, J.N. Yong, J. Liu and E.L. Liu ................................................. 298

Research on Precision Mirror Machining Technology for W-Mo Alloy
J.L. Guan, H.W. Lu, X.H. Xiao, Y.C. Wu and Z.D. Chen ......................... 303

Comparative Research of Several Grinding Media Based on Electro-Magnetic Barrel Finishing Method
K.Q. Yu, F. Yan, G.B. Liao and Y. Chen .............................................. 308

Flow State Analysis on Abrasive Motion of Centrifugal Grinding under Different Working Conditions
H.C. Wang, D.L. Zhang and X. Fang .................................................... 312

Research on Surface Grinding and Polishing Process of Precise Hydraulic Couples
W.H. Wang, L. Teng, B.L. Zhao, Q.Q. Yang, J.J. Wang and B. Tong........... 317

The Mechanical Polishing Research on the Surface of WC-Co Cemented Carbide Based on ELID Grinding

Study of Abrasive Water Jet Polishing Technology
C.L. Che, C.Z. Huang, J. Wang and H.T. Zhu ...................................... 327

Surface Quality Investigation of Nanoparticle Colloid Hydrodynamic Cavitation Jet Polishing Technology
Y. Zhang, X. Wang, F.H. Zhang and M. Zhou ..................................... 332

Study on the Efficient Processing Technology of Countertop Board with Disc Circular Saw Blades
S. Gao, J.S. Zhang, Z. Wang, Z.M. Zhang and T. Li ................................ 337

Material Fracture Character of Marble Processing by Single Diamond Tools
S.S. Hu, C.Y. Wang, Y.N. Hu, C.B. Pan and X.Q. Lu ............................. 342

Investigation of High Performance Diamond Brazed Saw for Cutting AZ31 Magnesium Alloy
B.J. Ma, X. Cai and L.A. Li ................................................................. 347

Machining Mechanism of Diamond Fibers Cutter
G.F. Zhang, Y.Q. Tan, B. Zhang and Z.H. Deng .................................. 352

The Effects of Machining Parameters on the Position of Resultant Force in Sawing of Granite
C.F. Fang and X.P. Xu ................................................................. 357

Study on the Wear Topography of Diamond Endless Wire Saw when Cutting Granite
W. Gao, J.T. Zhang and J.Y. Duan .................................................... 361

Research on Finite Element Simulation and Experiment of Temperature Field in Surface Cutting Used a New PDC Cutter

Drilling C/E Composites with Electroplated Diamond Abrasive Tool and its Damage Evaluation Method
Q. Wen, H. Gao, D. Zhao and D.M. Guo .......................................... 371

Mechanism Analysis of High Efficiency Axial Turn-Grinding of Engineering Ceramics
Study on Bit Body Materials Made of Tungsten Carbide and Steel Shot
J.L. Peng, L.C. Duan, H. Shi and S.L. Xu..........................................................381

3D Noise Generation and Removal of Measured Grinding Wheel Topography Using a
White Light Interferometer
J. Xie, F. Zhang and H.F. Xie .................................................................386

The Identification of Amplitude and Phase in Imbalance Mass of Grinding Wheel
S.X. Yuan and Z.L. Guan.................................................................391

Spherical Head Surface Roughness Analysis and Experimental Research Based on the
Abrasive Belt Grinding
Y. Zhang, Y. Huang and Z. Huang ..........................................................396

Design of Temperature Gathering System Based on Spray Cooling Grinding Experiment
J.L. Ren, C.Y. Zhang, Y.W. Li and J.H. Yu ..................................................402

Study of the on-Line Testing Method for the Abrasive Belt Follow-up Grinding of the
Crankshaft Crankpin
L. Zhang, Y. Huang, Y.J. Wang and M. Zhang .............................................407

Influence of Ultrasonic Assistance on Material Removal Mechanism of Hard and Brittle
Materials Based on Single-Point Scratch
F. Jiao and B. Zhao..................................................................................413

Development of a Two-Dimensional Ultrasonic Vibration Assisted Machining Technology
with Tool Vibration
Z.Z. Wang, Y.B. Guo and Y.B. Wu........................................................419

Finite Element Analysis of Ti-6Al-4V Alloy Crater Geometry for EDM Based on a
Single Discharge
Y. Wang, J.H. Xu and F. Gao ..................................................................423

Experimental Study of the Relationship between Tool Rod Parameters and Vibration
Parameters on Ultrasonic Grinding (Wheel Vibration)
Z.D. Li and B. Zhao..............................................................................429

Research on Dynamic Grinding Force in Ultrasonic Honing Chatter
X.J. Zhu, J.Q. Wang, Q. Chen and Z.M. Lu ..................................................433

Precision Honing of Stainless Steel Valve Core
Z.G. Dong, C.W. Kang and L. Xu ..................................................................438

Research on Surface Roughness of Nano-Composite Ceramics under Multi-Frequency
Ultrasonic Grinding and Dressing
J.X. Xue and B. Zhao...............................................................................443

Research on Surface Residual Stress of Nano-Composite Ceramics under Multi-Frequency
Ultrasonic Grinding and Dressing
B. Zhao, J.X. Xue and M.L. Zhao.................................................................447

Experimental Research on the Abrasive Belt Grinding Turbine Blades Material 1Cr13
Stainless Steel
H.L. Wu, Y. Huang, Z. Huang and G.J. Cheng.............................................452

Research on the Mechanism of Coordinate Polishing Crankshaft Crankpin with
Abrasive Belt
M. Zhang, Y. Huang and L. Zhang...............................................................457

The Experimental Investigation of Stone Wear in Honing
Q. Wang, Q. Feng, Q.F. Li and C.Z. Ren.....................................................462

Study on Jet Formation and Modeling for High Pressure Abrasive Water-Jet
Z.W. Liu, C.Z. Huang, H.T. Zhu, H.L. Liu and B. Zou..............................468

The Vibration Detection System of CNC Machine Tools and the Application of Spindle Test
Y.H. Wu, L.W. Rao, D.H. Zhao and K. Zhang.............................................473
Study of the Floor Typed Abrasive Water Jet Spatial Machining Robot
R.G. Hou, C.Z. Huang, H.T. Zhu, H.L. Liu and B. Zou .........................................................478

Research on Dynamic Balance of Grinding Wheel Spindle
Q.Y. Zhou, Z.X. Zhou and Y. Li..................................................................................482

Analysis of Ultrasonic System in Acoustic Levitation Polishing
W.F. Wang, P.F. Gao and D.H. Wen ........................................................................486

Numerical Investigation into Spindle System Stiffness of High-Speed Grinder
C.H. Li, W. Mao and Y.C. Ding .................................................................................490

Research on Function Simulation of Web-Based Virtual Grinding Machine Tool
T.B. Yu, J.Q. Zhang and W.S. Wang ........................................................................495

A Study on the Manufacturing System of the Axes Linked Ultra-Precision Grinding of
Aspheric Surface
L.J. Li, Y. Jiang and F.H. Zhang ................................................................................500

Finite Element Analysis on Dynamic Characteristics of Hybrid Bearing Spindle System
P. Guan, M. Li, B.C. Li, T.B. Yu and W.S. Wang ..........................................................505

The Structure Analysis of High Efficiency Grinding Automation Equipment for Nuclear
High-Pressure Vessel
D.W. Zhu, Y. Huang and Z. Huang ..............................................................................510

Research on Application of NC Polish-Grinding of Valve Stem and Instantaneous
Compensation of Grinding Wheel
Y.L. Yu, W.M. Li, Z.Y. Miao and D.Q. Yang .................................................................515

The Assembly Precision Debugging of Pillar of the Alien Stone Turning-Milling Compound
Machining Center (HTM50200)

China’s Diamond in the World Market
Z.H. Li, B. Zhao, L. Li and J. Wong ..............................................................................526

Keyword Index ........................................................................................................533
Author Index ............................................................................................................537
