Uncertainty in Artificial Intelligence

Proceedings of the Twenty-Seventh Conference (2011)

July 14–17, 2011
Barcelona, Spain

Edited by
Fabio G. Cozman
Escola Politecnica
Universidade de Sao Paulo
Sao Paulo, Brazil

Avi Pfeffer
Charles River Analytics
Boston, MA

Conference Chair
Peter Grünwald
Centrum Wiskunde & Informatica
Amsterdam, the Netherlands

Local Arrangements Chair
Lluis Godo
Artificial Intelligence Research Institute (IIIA-CSIC)
Bellaterra, Spain

Sponsored by
Artificial Intelligence Journal
IBM Research
Google
Microsoft Research
Pascal Network of Excellence
Gobierno de Espana – Ministerio de Ciencia e Innovación

AUAI Press
Corvallis, Oregon
Contents

Preface xi
Acknowledgments xii

CONTRIBUTED PAPERS

Graphical Models for Bandit Problems ........................................ 1
Kareem Amin, Michael Kearns, Umar Syed

Extended Lifted Inference with Joint Formulas .............................. 11
Udi Apel, Ronen I. Brafman

Learning is Planning: Near Bayes-optimal Reinforcement Learning via Monte-Carlo Tree Search ..................................................... 19
John Asmuth, Michael Littman

Solving Cooperative Reliability Games .......................................... 27
Yoram Bachrach, Reshef Meir, Michal Feldman, Moshe Tennenholtz

Active Diagnosis via AUC Maximization: An Efficient Approach for Multiple Fault Identification in Large Scale, Noisy Networks .................. 35
Gowtham Bellala, Jason Stanley, Clayton Scott, Suresh K. Bhavnani

Semi-supervised Learning with Density Based Distances ................. 43
Avleen S. Bijral, Nathan Ratliff, Nati Srebro

Deconvolution of Mixing Time Series on a Graph .......................... 51
Alexander W. Blocker, Edoardo M. Airoldi

Factored Filtering of Continuous-Time Systems ............................ 61
E. Busra Celikkaya, Christian R. Shelton, William Lam

Near-Optimal Target Learning With Stochastic Binary Signals ........ 69
Mithun Chakraborty, Sanmay Das, Malik Magdon-Ismail

Filtered Fictitious Play for Perturbed Observation Potential Games and Decentralised POMDPs .................................................... 77
Archie C. Chapman, Simon A. Williamson, Nicholas R. Jennings

A Framework for Optimizing Paper Matching .............................. 86
Laurent Charlin, Richard S. Zemel, Craig Boutilier

A Temporally Abstracted Viterbi Algorithm ................................. 96
Shaunak Chatterjee, Stuart Russell

Smoothing Proximal Gradient Method for General Structured Sparse Learning ................................................................. 105
Xi Chen, Qihang Lin, Seyoung Kim, Jaime G. Carbonell, Eric P. Xing

EDML: A Method for Learning Parameters in Bayesian Networks .......... 115
Arthur Choi, Khaled S. Refaat, Adnan Darwiche

Strictly Proper Mechanisms with Cooperating Players ........................ 125
SangIn Chun, Ross D. Shachter

A Logical Characterization of Constraint-Based Causal Discovery ..... 135
Tom Claassen, Tom Heskes
Ensembles of Kernel Predictors
Corinna Cortes, Mehryar Mohri, Afshin Rostamizadeh

Bayesian Network Learning with Cutting Planes
James Cussens

Active Learning for Developing Personalized Treatment
Kun Deng, Joelle Pineau, Susan Murphy

Efficient Optimal Learning for Contextual Bandits
Miroslav Dudík, Daniel Hsu, Satyen Kale, Nikos Karampatziakis, John Langford,
Lev Reyzin, Tong Zhang

A Unifying Framework for Linearly Solvable Control
Krishnamurthy Dvijotham, Emanuel Todorov

Boosting as a Product of Experts
Narayanan U. Edakunni, Gavin Brown, Tim Kovacs

PAC-Bayesian Policy Evaluation for Reinforcement Learning
Mahdi Milani Fard, Joelle Pineau, Csaba Szepesvári

On the Complexity of Decision Making in Possibilistic Decision Trees
Hélène Fargier, Nahla Ben Amor, Wided Guezguez

Inference in Probabilistic Logic Programs using Weighted CNFs
Daan Fierens, Guy Van den Broeck, Ingo Thon, Bernd Gutmann, Luc De Raedt

Efficient Inference in Markov Control Problems
Thomas Furmston, David Barber

Dynamic Consistency and Decision Making under Vacuous Belief
Phan H. Giang

Hierarchical Affinity Propagation
Inmar E. Givoni, Clement Chung, Brendan J. Frey

Approximation by Quantization
Vibhav Gogate, Pedro Domingos

Probabilistic Theorem Proving
Vibhav Gogate, Pedro Domingos

Generalized Fisher Score for Feature Selection
Quanquan Gu, Zhenhui Li, Jiawei Han

Active Semi-Supervised Learning using Submodular Functions
Andrew Guillory, Jeff Bilmes

Bregman Divergence as General Framework to Estimate Unnormalized Statistical Models
Michael U. Gutmann, Jun-ichiro Hirayama

Reasoning about RoboCup Soccer Narratives
Hannaneh Hajishirzi, Julia Hockenmaier, Erik T. Mueller, Eyal Amir

Suboptimality Bounds for Stochastic Shortest Path Problems
Eric A. Hansen

Sequential Inference for Latent Force Models
Jouni Hartikainen, Simo Särkkä

What Cannot be Learned with Bethe Approximations
Uri Heinemann, Amir Globerson
Portfolio Allocation for Bayesian Optimization
Matthew Hoffman, Eric Brochu, Nando de Freitas

Sum-Product Networks: A New Deep Architecture
Hoifung Poon, Pedro Domingos

Lipschitz Parametrization of Probabilistic Graphical Models
Jean Honorio

Efficient Probabilistic Inference with Partial Ranking Queries
Jonathan Huang, Ashish Kapoor, Carlos Guestrin

Noisy-OR Models with Latent Confounding
Antti Hyttinen, Frederick Eberhardt, Patrik O. Hoyer

Discovering Causal Structures in Binary Exclusive-OR Skew Acyclic Models
Takanori Inazumi, Takashi Washio, Shohei Shimizu, Joe Suzuki, Akihiro Yamamoto,
Yoshinobu Kawahara

Detecting Low-Complexity Unobserved Causes
Dominik Janzing, Eleni Sgouritsa, Oliver Stegle, Jonas Peters, Bernhard Schölkopf

Online Importance Weight Aware Updates
Nikos Karampatziakis, John Langford

Modeling Social Networks with Node Attributes using the Multiplicative Attribute
Graph Model
Myunghwan Kim, Jure Leskovec

Pitman-Yor Diffusion Trees
David A. Knowles, Zoubin Ghahramani

Learning Determinantal Point Processes
Alex Kulesza, Ben Taskar

Message-Passing Algorithms for Quadratic Programming Formulations of
MAP Estimation
Akshat Kumar, Shlomo Zilberstein

An Efficient Protocol for Negotiation over Combinatorial Domains with
Incomplete Information
Minyi Li, Quoc Bao Vo, Ryszard Kowalczyk

Noisy Search with Comparative Feedback
Shiau Hong Lim, Peter Auer

Variational Algorithms for Marginal MAP
Qiang Liu, Alexander T. Ihler

Classification of Sets using Restricted Boltzmann Machines
Jérôme Louradour, Hugo Larochelle

Belief Change with Noisy Sensing in the Situation Calculus
Jianbing Ma, Weiru Liu, Paul Miller

Improving the Scalability of Optimal Bayesian Network Learning with External-Memory
Frontier Breadth-First Branch and Bound Search
Brandon Malone, Changhe Yuan, Eric A. Hansen, Susan Bridges

Order-of-Magnitude Influence Diagrams
Radu Marinescu, Nic Wilson

Asymptotic Efficiency of Deterministic Estimators for Discrete Energy-Based Models:
Ratio Matching and Pseudolikelihood
Benjamin M. Marlin, Nando de Freitas
Reconstructing Pompeian Households. ........................................... 506
David Mimno

Conditional Restricted Boltzmann Machines for Structured Output Prediction ........................................... 514
Volodymyr Mnih, Hugo Larochelle, Geoffrey E. Hinton

Compact Mathematical Programs For DEC-MDPs With Structured Agent Interactions ........................................... 523
Hala Mostafa, Victor Lesser

Fractional Moments on Bandit Problems ........................................... 531
Ananda Narayanan B, Balaraman Ravindran

Dynamic Mechanism Design for Markets with Strategic Resources ........................................... 539
Swaprava Nath, Onno Zoeter, Yadati Narahari, Chris R. Dance

Multidimensional Counting Grids: Inferring Word Order from Disordered Bags of Words ........................................... 547
Nebojsa Jojic, Alessandro Perina

Partial Order MCMC for Structure Discovery in Bayesian Networks ........................................... 557
Teppo Niinimäki, Pekka Parviainen, Mikko Koivisto

A Geometric Traversal Algorithm for Reward-Uncertain MDPs ........................................... 565
Eunsoo Oh, Kee-Eung Kim

Iterated Risk Measures for Risk-Sensitive Markov Decision Processes with Discounted Cost ........................................... 573
Takayuki Osogami

Price Updating in Combinatorial Prediction Markets with Bayesian Networks ........................................... 581
David M. Pennock, Lirong Xia

Identifiability of Causal Graphs using Functional Models ........................................... 589
Jonas Peters, Joris M. Mooij, Dominik Janzing, Bernhard Schölkopf

Nonparametric Divergence Estimation with Applications to Machine Learning on Distributions ........................................... 599
Barnabas Poczos, Liang Xiong, Jeff Schneider

Compressed Inference for Probabilistic Sequential Models ........................................... 609
Gungor Polatkan, Oncel Tuzel

Fast MCMC Sampling for Markov Jump Processes and Continuous Time Bayesian Networks ........................................... 619
Vinayak Rao, Yee Whye Teh

New Probabilistic Bounds on Eigenvalues and Eigenvectors of Random Kernel Matrices ........................................... 627
Nima Reyhani, Hideitsu Hino, Ricardo Vigário

Learning with Missing Features ........................................... 635
Afshin Rostamizadeh, Alekh Agarwal, Peter Bartlett

Symbolic Dynamic Programming for Discrete and Continuous State MDPs ........................................... 643
Scott Sanner, Karina Valdivia Delgado, Leliane Nunes de Barros

Generalized Fast Approximate Energy Minimization via Graph Cuts: α-Expansion β-Shrink Moves ........................................... 653
Mark Schmidt, Bartek Alahari

An Efficient Algorithm for Computing Interventional Distributions in Latent Variable Causal Models ........................................... 661
Ilya Shpitser, Thomas S. Richardson, James M. Robins

Graph Cuts is a Max-Product Algorithm ........................................... 671
Daniel Tarlow, Irmar E. Givoni, Richard S. Zemel, Brendan J. Frey

Adjustment Criteria in Causal Diagrams: An Algorithmic Perspective ........................................... 681
Johannes Textor, Maciej Liśkiewicz
Learning Mixed Graphical Models from Data with $p$ Larger than $n$ .......................... 689
Inma Tur, Robert Castelo

Robust Learning Bayesian Networks for Prior Belief ............................................. 698
Maomi Ueno

Distributed Anytime MAP Inference ................................................................. 708
Joop van de Ven, Fabio Ramos

A Sequence of Relaxations Constraining Hidden Variable Models ....................... 717
Greg Ver Steeg, Aram Galstyan

The Structure of Signals: Causal Interdependence Models for Games of Incomplete Information ................................. 727
Michael P. Wellman, Lu Hong, Scott E. Page

Generalised Wishart Processes ............................................................................ 736
Andrew Gordon Wilson, Zoubin Ghahramani

Sparse Matrix-Variate Gaussian Process Blockmodels for Network Modeling ........ 745
Feng Yan, Zenglin Xu, Yuan (Alan) Qi

Hierarchical Maximum Margin Learning for Multi-Class Classification ............... 753
Jian-Bo Yang, Ivor W. Tsang

Planar Cycle Covering Graphs ............................................................................. 761
Julian Yarkony, Alexander T. Ihler, Charless C. Fowlkes

Tightening MRF Relaxations with Planar Subproblems ....................................... 770
Julian Yarkony, Ragib Morshed, Alexander T. Ihler, Charless C. Fowlkes

Rank/Norm Regularization with Closed-Form Solution: Application to Subspace Clustering ................................................................. 778
Yao-Liang Yu, Dale Schuurmans

Measuring the Hardness of Stochastic Sampling on Bayesian Networks with Deterministic Causalities: the $k$-Test ...................................................... 786
Haohai Yu, Robert van Engelen

Risk Bounds for Infinitely Divisible Distribution ................................................. 796
Chao Zhang, Dacheng Tao

Kernel-based Conditional Independence Test and Application in Causal Discovery .................................................. 804
Kun Zhang, Jonas Peters, Dominik Janzing, Bernhard Schölkopf

Smoothing Multivariate Performance Measures ............................................... 814
Xinhua Zhang, Ankan Saha, S. V. N. Vishwanathan

Belief Propagation by Message Passing in Junction Trees: Computing Each Message Faster Using GPU Parallelization .................................................... 822
Lu Zheng, Ole Mengshoel, Jike Chong

Sparse Topical Coding ....................................................................................... 831
Jun Zhu, Eric P. Xing

Testing Whether Linear Equations are Causal: A Free Probability Theory Approach .................................................... 839
Jakob Zscheischler, Dominik Janzing, Kun Zhang

ABSTRACTS
Incentives in Group Decision-Making With Uncertainty and Subjective Beliefs .......... 849
Ruggiero Cavallo

Learning High-Dimensional DAGs with Latent and Selection Variables ................ 850
Diego Colombo, Marloes H. Maathuis, Markus Kalisch, Thomas S. Richardson
Characterization and Greedy Learning of Interventional Markov Equivalence Classes of DAGs . . . 851
Alain Hauser, Peter Bühlmann

Correction for Hidden Confounders in the Genetic Analysis of Gene Expression . . . . . . . . 852
Jennifer Listgarten, Carl Kadie, Eric E. Schadt, David Heckerman

Statistical Mechanics of Semi-Supervised Clustering in Sparse Graphs . . . . . . . . . . . . . . 853
Greg Ver Steeg, Aram Galstyan, Armen Allahverdyan
